Acknowledgements

The Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and the GESIS - Leibniz Institute for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Individual level micro data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the data catalogue (https://search.gesis.org/research_data). Access to the Eurobarometer primary data is also provided by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, as well as supported by the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send bibliographic citations for each completed manuscript or thesis abstract to the providing data archive, GESIS or ICPSR. Please indicate in a cover letter which data (surveys and variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.1.4 Bibliographic citation and DOI reference

Publications based on data collections which are made available through ICPSR or GESIS should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Commission, Brussels: Eurobarometer 88.4, December 2017.

TNS opinion, Brussels [Producer];

GESIS, Cologne [Publisher]: ZA6939, dataset version 3.0.0, DOI: [10.4232/1.14003](https://doi.org/10.4232/1.14003) (2022).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and potential errata and update documentation in the GESIS data catalogue.

1.2 Content

1.2.1 Abstract

Eurobarometer 88.4 covered the following special topics: (1) Fairness, inequality and inter-generational mobility, (2) Sport and physical Activity, and (3) EU citizens, Agriculture and the CAP. Respondents' opinions were collected regarding their perception of life, including health, happiness, personal experiences of discrimination, and their income-related perceptions, including income differences in their country and the household income situation. The respondents were also asked about their occupation, level of education and social status, also in comparison with parents and grandparents. Additional questions were asked about equal opportunities, fairness, justice, immigration, and globalisation. In regard to sport and physical activities respondents were queried about their level of physical activity, including how often and how vigorously they participated in activities, their opinions of exercise, how much time they spend sitting on an average day, any issues that prevent them from being physically active, and whether they volunteer in sporting activities. Lastly, for the third major area of focus, agriculture, the survey queried participants on the importance of and their knowledge about agriculture, including the effectiveness and priorities of the Common Agricultural Policy (CAP), main objectives of the European Union and responsibilities of farmers, and the approval of EU financial support of the CAP. The respondents were also presented questions about agriculture in relation to climate and environmental protection, about purchasing decisions, quality labels and organic products, and about their attitudes towards trade agreements and research and innovation.

Demographic and other background information collected includes left or right self-placement on political scale, age, gender, nationality, marital status, occupation, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone and other goods, difficulties in paying bills, self-assessed social class, Internet use, life satisfaction, life conditions in five years, political discussion frequency, opinions on whether their voice counts in their country/EU, and image of the EU. In addition, country-specific data includes type and size of locality, region of residence, and language of interview (select countries).

1.3 Universe

In all, Eurobarometer 88.4 interviewed 28.031 citizens in the 28 countries of the European Union after the 2013 enlargement (accession of Croatia in July 2013). All respondents were residents in the respective country, nationals and non-national EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Great Britain and Northern Ireland as well as for East and West Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), as well as Luxembourg, Republic of Cyprus, and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From December 2 to December 11, 2017, TNS opinion carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate-General for Communication. TNS opinion is based in Brussels, Belgium, and co-ordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS opinion. Interviews were conducted face-to-face in people's home in the respective national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These

questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence. Multi-language questionnaires are applied if appropriate (Belgium, Luxembourg, Spain, Finland, Estonia, Latvia, and Malta).

In each country only the national language version(s) of the questionnaire is (are) used; in countries with more than one official language, the language version is selected at the beginning of the interview.

1.7 Weighting

In general, the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis, a national weighting procedure, using marginal and intercellular weighting, is applied. As such, in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This post-stratification weighting is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The population size weighting factors correct for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTs adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general, all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do

exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2, a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately, as documented in the respective study and weight variable description. In some surveys, special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 88.4 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT UNITED KINGDOM ONLY) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT GERMANY ONLY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation but include the post-stratification factors for the United Kingdom and Germany respectively.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole), and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY), all countries are included in calculations.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights on European level

European Weights in Eurobarometer 88.4	Function
W5 to W9, W11, W14, W22, W23, W87	grouping EU member countries
W10, W13, W24, W94	grouping new member countries
-	grouping candidate/accession countries
-	grouping member + candidate/accession countries
W29, W30, W81, W82, W83, W84, W85, W86, W89, W90, W98, W99	grouping (non-)Eurozone countries
wextra	extrapolating population size (15+) for each country

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by the GESIS Eurobarometer Data Service from TNS opinion were checked for completeness, missing data and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76.1, the traditional variable naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals. The dot used in the original TNS variable names for multiple response dummy variables is replaced by underscore in view of potential software incompatibilities.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('unqid') for the complete dataset has been constructed from the TNS country id (digits 1-2) and the TNS case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tnscntry'), applying the established archive standard codes for the Eurobarometer series ('country'), and an alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. region variable P7).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. GESIS has recoded these residual responses in the case of uncommon minor

inconsistencies in accordance with the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from the English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS opinion. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, GESIS, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Region NUTS 2 categories for Portugal have been edited and adapted to changes as of 2002 (NUTS version 2003) which are reflected in Eurobarometer starting with wave 62 (confirmed by TNS). Region NUTS 1 categories for Greece have been edited correcting for the non-coverage of Ionian and Aegean Islands starting with Eurobarometer 62 (confirmed by TNS).

P7 (REGION – NUTS CODES) – variables 'nuts' and 'nutslvl': The integrated NUTS variable has been derived by GESIS from the original TNS country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant time period (<https://ec.europa.eu/eurostat/web/nuts/history>).

W3A/W4A (NATION WEIGHTS) – variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation': Starting with Eurobarometer 62 the original SPECIAL WEIGHTS for the UNITED GERMANY (East + West) and the UNITED KINGDOM (Great Britain + Northern Ireland) automatically exclude all other samples/countries from the calculation. In accordance with former practice up to Eurobarometer 61, GESIS now started to derive three additional weights (W3A, W4A, W3A_W4A) in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (nations). They combine the weights W3 (population size + redressment factor for Germany) or/and W4 (population size + redressment factor for the United Kingdom) with W1 (redressment factor for all other countries).

All INDEX and TOTAL variables have been checked and documented accordingly.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

1.9 Further remarks

Question module QA 'Fairness, inequality and inter-generational mobility' was newly introduced. This module is available starting with dataset version v2-0-0.

Question module QB 'Sport and physical activity' is based on questions asked in the context of the corresponding module surveyed in the framework of Eurobarometer 80.2 (ZA5877).

Question module QC 'EU citizens, agriculture and the CAP' is partly based on questions asked in the context of the corresponding module surveyed in the framework of Eurobarometer 84.2 (ZA6642).

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas).

Starting with Eurobarometer 81.3 the category scheme for country specific protocol variables P7 (REGION) has changed for some countries, in particular introducing NUTS categories for Ireland, Estonia, and Croatia.

Please note that gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents.

Variable uniqid was corrected in dataset version v3-0-0 for the erroneous coding of Belgium.

Variable qa11 refers to country-specific income distributions that can be identified via the corresponding country questionnaires.

Data for protocol variables p1 (date of interview), p2 (time of interview), p3 (duration of interview), p4 (number of persons present during interview), p5 (respondent cooperation), p8 (postal code), p9 (sample point number) and p10 (interviewer number) have not been made available.

2 Eurobarometer series description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general, they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; 'Attitudes towards Europe' (GESIS study ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He had the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid-nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999, the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present, the Eurobarometer surveys are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.3 'Media Monitoring & Eurobarometer', with Maria Letizia Albergati as head of the unit and Roberto Santaniello as head of the Eurobarometer sector.

The special topic modules are requested by the respectively responsible EC Directorate General, as regards the content. Since 2007, the European Parliament is commissioning its own survey ('Parlemeter') through the Public Opinion Monitoring Unit of the European Parliament, in close cooperation with the DG COMM unit and within the same survey framework.

The main survey results are regularly published on the European Commission's Public Opinion website (<https://europa.eu/eurobarometer>) in official standard and special topic reports; detailed tabular reports are published through the European Union Open Data Portal (<https://data.europa.eu/data>).

2.4 Development of geographical and population coverage

In all European Union (formerly European Communities) member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics, starting in 1999 (EB51.1). Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the Standard Eurobarometer series, even before starting the accession process (e.g. Turkey or Macedonia). Further countries are continuously added in accordance with the EU membership application and accession process.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriot Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24, 16-30	17, 28.1, 34.2, 47.2OVR, 55.1OVR, 85.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)
Sampling experiment	Non-Nationals	41.0

2.5 Standard question program and special topics

The Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently, Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990), additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues (table 5). Selected subsets of standard trend questions appear in the context of related special topics (e.g. 'The Future of Europe' or 'European Parliament Eurobarometer').

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <https://www.gesis.org/eurobarometer-data-service/home/>

3 Dataset structure and standards

The processing and documentation of the Standard and Special Eurobarometer are based on standards agreed upon between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Eurobarometer Data Service, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable, it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structures

In general, the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1, the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise, from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except for multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country

specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49, the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1, an additional standardized REGION variable 'nuts' (REGION - NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general, missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ('don't know') responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. 'not ascertained' resp. 'no answer') and the value 9 (99, 999, ...) for INAP (i.e. 'inappropriate' resp. 'not applicable'). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or 'level', e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

As noted in chapter 1.8, missing answers (NA) represented in the original dataset by blanks (system missing) have been recoded to standard values by GESIS. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

3.3 International documentation standard (DDI)

The study and variable level documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The variable level documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AL	Albania	IE	Ireland

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded 'real' values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the

sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

doi - DIGITAL OBJECT IDENTIFIER

Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.14003>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

doi

version - GESIS ARCHIVE VERSION & DATE

GESIS archive version & date

3.0.0 '2022-09-22'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

version

Value	Label	Missing	Count	Percent	Valid Percent

survey - SURVEY IDENTIFICATION

Survey identification

The number identifying the Eurobarometer survey.

884 Eurobarometer 88.4 (December 2017)

survey

Value	Label	Missing	Count	Percent	Valid Percent
884	Eurobarometer 88.4 (December 2017)		28031	100.0	100.0
	Sum		28031	100.0	100.0
	Valid Cases		28031		

caseid - TNS CASE ID (SEE NOTE)

TNS case ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (TNS). The unique respondent identification variable unqid adds the original country identification codes (tnscntry) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

For Eurobarometer 88.4 no country specific TNS case id for DE-W, DE-E and GB-GBN is provided (variable 'caseid' is coded '9999999', variable unqid is coded '999999999'). The dataset does include an original unique serial id across all countries (variable 'serialid').

uniqid - UNIQUE RESPONDENT ID (CASEID BY TNS COUNTRY CODE) (SEE NOTE)

Unique respondent ID (caseid by tnsctry)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 46: Croatia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

For Eurobarometer 88.4 no country specific TNS case id for DE-W, DE-E and GB-GBN is provided (variable 'caseid' is coded '9999999', variable uniqid is coded '999999999'). The dataset does include an original unique serial id across all countries (variable 'serialid').

Variable uniqid was corrected in dataset version v3-0-0 for the erroneous coding of Belgium.

serialid - SERIAL CASE ID (PROVIDED BY TNS)

Serial case ID (provided by TNS)

This unique respondent identification number has been provided by TNS. It shows the position of the cases in the dataset, starting with 1 and ending with 28031 (total number of cases).

Note:

Actual number is coded.

tnscntry - ORIGINAL TNS COUNTRY/SAMPLE ID

Original TNS country/sample ID

The original country identification codes as applied by the fieldwork institute (TNS).

isocntry - COUNTRY CODE - ISO 3166

Country code - in accordance with ISO 3166-1-alpha-2 country code

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the 'historical' East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized 'Turkish Republic of Northern Cyprus'.

Note:

Use of weighting factor w1 is optional.

w1 - WEIGHT RESULT FROM TARGET

w1 Weight result from target

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31 (March-April 1989)).

w3 - WEIGHT UNITED GERMANY ONLY**w3 Weight United Germany (only)**

This POPULATION SIZE WEIGHT adjusts the East and the West German (sub-national) samples to their share in the total population aged 15 and over, of the united Germany. Weight w3 must be applied whenever Germany is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis.

w4 - WEIGHT UNITED KINGDOM ONLY

w4 Weight United Kingdom (only)

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. Weight w4 must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31 (March-April 1989)).

w4

w9 - WEIGHT EU12+DE-E

w9 Weight EU12 + DE-E

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34 (October-November 1990)). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w9 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

w24 - WEIGHT EU NMS 12

w24 Weight EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w24 must be applied whenever these 12 countries are to be analyzed altogether as a group.

w29 - WEIGHT EURO ZONE 15 (EU27)

w29 Weight EURO ZONE 15 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w89 - WEIGHT EURO ZONE 17 (EU27)

w89 Weight EURO ZONE 17 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2011. These are 17 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), and Estonia (introduction as of January 1, 2011). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w89 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w90 - WEIGHT NON-EURO ZONE 17 (EU27)

w90 Weight NON-EURO ZONE 17 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w90 must be applied whenever these countries are to be analyzed altogether as a group.

w84 - WEIGHT NON-EURO ZONE 18 - EU NMS 12 (EU27)

w84 Weight NON-EURO ZONE 18 - EU NMS 12 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w84 must be applied whenever these 6 countries are to be analyzed altogether as a group.

w85 - WEIGHT EURO ZONE 19 (EU28)

w85 Weight EURO ZONE 19 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2015. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), Latvia (introduction as of January 1, 2014), and Lithuania (introduction as of January 1, 2015). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w85 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w94 - WEIGHT EU NMS 13

w94 Weight EU NMS 13

This POPULATION SIZE WEIGHT refers to the group of the 13 new member countries as of the enlargement in January 2007 and the accession of Croatia in July 2013: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, and Croatia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w94 must be applied whenever these 13 countries are to be analyzed altogether as a group.

wextra - WEIGHT EXTRAPOLATED POPULATION 15+

wextra Weight extrapolated population 15+

Weight wextra extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the dataset.

Note:

Variable wextra was named wex in former versions of this dataset.

qa7a - SOCIAL STATUS - RESPONDENT

Think of the following ladder as representing where people stand in (NATIONALITY) society. The higher up you are on this ladder, the closer you are to the people at the very top in terms of social status; the lower you are, the closer you are to the people at the very bottom in terms of social status.

QA7A

Where would you place yourself on this ladder relative to other people in (OUR COUNTRY)?

(SHOW SCREEN – ONE ANSWER PER COLUMN – SHOW LADDER IMAGE)

(INTERVIEWER: RESPONDENT TO FILL IN THE QUESTION HIMSELF OR HERSELF)

- 1 10 (Top)
- 2 9
- 3 8
- 4 7
- 5 6
- 6 5
- 7 4
- 8 3
- 9 2
- 10 1 (Bottom)
- 97 Refusal
- 98 DK

Note:

Please note the reversed scale: a lower code implies a higher status.

Original code '11' recoded to '97'. Original code '12' recoded to '98'.

Source of ladder image: TNS Opinion & Social: Special Eurobarometer 471 / Wave EB88.4: Fairness, inequality and intergenerational mobility.

Survey requested by the European Commission Joint Research Centre and coordinated by Directorate-General for Communication. Brussels, April 2018. p. 77.

qa7a_r - SOCIAL STATUS - RESPONDENT (REC)

Respondents' social status - recoded to three categories

- 1 Top (coded 1 to 4 in qa7a)
- 2 Middle (coded 5 to 7 in qa7a)
- 3 Bottom (coded 8 to 10 in qa7a)
- 7 Refusal
- 8 DK

Derivation:

This variable collapses answers to qa7a into three categories.

[qa7a Where would you place yourself on this ladder relative to other people in (OUR COUNTRY)?]

Note:

See qa7a for complete question text.

Please note the reversed scale: a lower code implies a higher status.

Starting with dataset version v3-0-0 former code '4' (Refusal) is recoded to '7' and former code '5' (DK) is recoded to '8'.

qa7b - SOCIAL STATUS - PARENTS

Think of the following ladder as representing where people stand in (NATIONALITY) society. The higher up you are on this ladder, the closer you are to the people at the very top in terms of social status; the lower you are, the closer you are to the people at the very bottom in terms of social status.

QA7B

Where would you place your parents on this ladder relative to other people in (OUR COUNTRY)?

(SHOW SCREEN – ONE ANSWER PER COLUMN – SHOW LADDER IMAGE)

(INTERVIEWER: RESPONDENT TO FILL IN THE QUESTION HIMSELF OR HERSELF)

- 1 10 (Top)
- 2 9
- 3 8
- 4 7
- 5 6
- 6 5
- 7 4
- 8 3
- 9 2
- 10 1 (Bottom)
- 97 Refusal
- 98 DK

Note:

Please note the reversed scale: a lower code implies a higher status.

Original code '11' recoded to '97'. Original code '12' recoded to '98'.

Source of ladder image: TNS Opinion & Social: Special Eurobarometer 471 / Wave EB88.4: Fairness, inequality and intergenerational mobility.

Survey requested by the European Commission Joint Research Centre and coordinated by Directorate-General for Communication. Brussels, April 2018. p. 77.

qa7c - SOCIAL STATUS - PATERNAL GRANDPARENTS

Think of the following ladder as representing where people stand in (NATIONALITY) society. The higher up you are on this ladder, the closer you are to the people at the very top in terms of social status; the lower you are, the closer you are to the people at the very bottom in terms of social status.

QA7C

Where would you place your paternal grandparents on this ladder relative to other people in (OUR COUNTRY)?

(SHOW SCREEN – ONE ANSWER PER COLUMN – SHOW LADDER IMAGE)

qa7c_r - SOCIAL STATUS - PATERNAL GRANDPARENTS (REC)

Paternal grandparents' social status - recoded to three categories

- 1 Top (coded 1 to 4 in qa7c)
- 2 Middle (coded 5 to 7 in qa7c)
- 3 Bottom (coded 8 to 10 in qa7c)
- 7 Refusal
- 8 DK

Derivation:

This variable collapses answers to qa7c into three categories.

[qa7c Where would you place your paternal grandparents on this ladder relative to other people in (OUR COUNTRY)?]

Note:

See qa7c for complete question text.

Please note the reversed scale: a lower code implies a higher status.

Starting with dataset version v3-0-0 former code '4' (Refusal) is recoded to '7' and former code '5' (DK) is recoded to '8'.

qa7d_r - SOCIAL STATUS - MATERNAL GRANDPARENTS (REC)

Maternal grandparents' social status - recoded to three categories

- 1 Top (coded 1 to 4 in qa7d)
- 2 Middle (coded 5 to 7 in qa7d)
- 3 Bottom (coded 8 to 10 qa7d)
- 7 Refusal
- 8 DK

Derivation:

This variable collapses answers to qa7d into three categories.

[qa7d Where would you place your maternal grandparents on this ladder relative to other people in (OUR COUNTRY)?]

Note:

See qa7d for complete question text.

Please note the reversed scale: a lower code implies a higher status.

Starting with dataset version v3-0-0 former code '4' (Refusal) is recoded to '7' and former code '5' (DK) is recoded to '8'.

qa7t_1 - STATUS HIGHER THAN PARENTS

Respondents' social status - status higher than parents

0 Not mentioned

1 'Yourself' higher than 'Parents'

Derivation:

This variable subsumes respondents who place their social status higher than their parents' social status.

[qa7a Where would you place yourself on this ladder relative to other people in (OUR COUNTRY)?

qa7b Where would you place your parents on this ladder relative to other people in (OUR COUNTRY)?]

Note:

See qa7a and qa7b for complete question text.

qa7t_4 - STATUS HIGHER THAN PATERNAL GRANDPARENTS

Respondents' social status - status higher than paternal grandparents

0 Not mentioned

1 'Yourself' higher than 'Paternal grandparents'

Derivation:

This variable subsumes respondents who place their social status higher than their paternal grandparents' social status.

[qa7a Where would you place yourself on this ladder relative to other people in (OUR COUNTRY)?

qa7c Where would you place your paternal grandparents on this ladder relative to other people in (OUR COUNTRY)?]

Note:

See qa7a and qa7c for complete question text.

qa7t_17 - STATUS LOWER THAN PARENTS AND GRANDPARENTS (BOTH SIDES)

Respondents' social status - status lower than parents and grandparents (both sides)

0 Not mentioned

1 'Yourself' lower than 'Parents' and 'Grandparents (both sides)'

Derivation:

This variable subsumes respondents who place their social status lower than their parents' and grandparents' social status (both sides).

[qa7a Where would you place yourself on this ladder relative to other people in (OUR COUNTRY)?

qa7b Where would you place your parents on this ladder relative to other people in (OUR COUNTRY)?

qa7c Where would you place your paternal grandparents on this ladder relative to other people in (OUR COUNTRY)?

qa7d Where would you place your maternal grandparents on this ladder relative to other people in (OUR COUNTRY)?]

Note:

See qa7a, qa7b, qa7c and qa7d for complete question text.

qa8a_r2 - MAIN OCCUPATION HH HEAD AT AGE 15 (REC 2)

Main occupation of household head at age 15 - recoded to eight categories

- 1 Self-employed (coded 1 to 5 in qa8a)
- 2 Managers (coded 9 to 11 in qa8a)
- 3 Other white collars (coded 12 to 13 in qa8a)
- 4 Manual workers (coded 14 to 17 in qa8a)
- 5 House persons (coded 18 in qa8a)
- 6 Unemployed (coded 20 in qa8a)
- 7 Retired (coded 21 in qa8a)
- 8 Students (coded 19 in qa8a)
- 9 Refusal/DK

Derivation:

This variable collapses answers to qa8a into eight categories.

[qa8a As far as you know, what was the main occupation of the person in your family who was the principal contributor to your household's income when you were around 15 years old?]

Note:

See qa8a for complete question text.

qa8b_r1 - MAIN OCCUPATION PATERNAL GRANDFATHER AT AGE 15 (REC 1)

Main occupation of paternal grandfather - recoded to three categories

- 1 Self-employed (coded 1 to 5 in qa8b)
- 2 Employed (coded 9 to 17 in qa8b)
- 3 Not working (coded 18 to 21 in qa8b)
- 9 Refusal/DK

Derivation:

This variable collapses answers to qa8b into three categories.

[qa8b As far as you know, what was the main occupation of your paternal grandfather?]

Note:

See qa8b for complete question text.

qa8c_r1 - MAIN OCCUPATION MATERNAL GRANDFATHER AT AGE 15 (REC 1)

Main occupation of maternal grandfather - recoded to three categories

- 1 Self-employed (coded 1 to 5 in qa8c)
- 2 Employed (coded 9 to 17 in qa8c)
- 3 Not working (coded 18 to 21 in qa8c)
- 9 Refusal/DK

Derivation:

This variable collapses answers to qa8c into three categories.

[qa8c As far as you know, what was the main occupation of your maternal grandfather?]

Note:

See qa8c for complete question text.

qa9t_1 - EDUCATION HIGHER THAN FATHER

Respondents' level of education - education higher than father

0 Not mentioned

1 'Yourself' higher than 'Father'

Derivation:

This variable subsumes respondents who place their level of education higher than their father's level of education.

[qa9a What is the highest level of education that has been achieved by you?

qa9b What is the highest level of education that has been achieved by your father?]

Note:

See qa9a and qa9b for complete question text.

qa9t_6 - EDUCATION LOWER THAN MOTHER

Respondents' level of education - education lower than mother

0 Not mentioned

1 'Yourself' lower than 'Mother'

Derivation:

This variable subsumes respondents who place their level of education lower than their mother's level of education.

[qa9a What is the highest level of education that has been achieved by you?

qa9c What is the highest level of education that has been achieved by your mother?]

Note:

See qa9a and qa9c for complete question text.

qa11 - ANNUAL HH INCOME CATEGORY

QA11

Taking all these income sources by individuals in your household together, after tax, which category corresponds to your annual household income?

(SHOW SCREEN – ONE ANSWER ONLY)

- 1 Lower quintile
- 2 2nd quintile
- 3 3rd quintile
- 4 4th quintile
- 5 Upper quintile
- 7 Refusal
- 8 DK

Note:

Original code '6' recoded to '7'.

Original code '7' recoded to '8'.

Variable qa11 refers to country-specific income distributions that can be identified via the corresponding country questionnaires.

qa12a_1 - ASSESSMENT CURRENT NATIONAL NET INCOME SHARE – TOP INCOME QUINTILE

QA12A

We would like to ask you a few questions about how you think net income is distributed in (OUR COUNTRY). Think of the total income, after tax, earned by all individuals in (OUR COUNTRY) as a pie.

(SHOW PIE)

Roughly how many slices of this pie do you think is CURRENTLY EARNED by:

(SHOW SCREEN AND PIE – ONE ANSWER PER LINE – SHOW IMAGE OF THE PIE – DISPLAY '99' ON SCREEN INSTEAD OF 'DK')

QA12A_1 The 20% of people who earn the most?

0 None of the pie

1 1

2 2 A proportional share of the pie

3 3

4 4

5 5

6 6

7 7

8 8

9 9

10 10 All of the pie

11 DK

Note:

Please note, that the coding of answer categories has been shifted compared to the questionnaire. Answer category 'None of the pie' is coded '0', answer category '1' is coded '1' and so on.

The image of the pie has not been published. It is therefore not included as showcard in the variable documentation.

qa12a_2 - ASSESSMENT CURRENT NATIONAL NET INCOME SHARE – BOTTOM INCOME QUINTILE

QA12A

We would like to ask you a few questions about how you think net income is distributed in (OUR COUNTRY). Think of the total income, after tax, earned by all individuals in (OUR COUNTRY) as a pie.

(SHOW PIE)

Roughly how many slices of this pie do you think is CURRENTLY EARNED by:

(SHOW SCREEN AND PIE – ONE ANSWER PER LINE – SHOW IMAGE OF THE PIE – DISPLAY '99' ON SCREEN INSTEAD OF 'DK')

QA12A_2 The 20% of people who earn the least?

0 None of the pie

1 1

2 2 A proportional share of the pie

3 3

4 4

5 5

6 6

7 7

8 8

9 9

10 10 All of the pie

11 DK

Note:

Please note, that the coding of answer categories has been shifted compared to the questionnaire. Answer category 'None of the pie' is coded '0', answer category '1' is coded '1' and so on.

The image of the pie has not been published. It is therefore not included as showcard in the variable documentation.

qa12b_1 - FAVOURED NATIONAL NET INCOME SHARE – TOP INCOME QUINTILE

[QA12A

We would like to ask you a few questions about how you think net income is distributed in (OUR COUNTRY). Think of the total income, after tax, earned by all individuals in (OUR COUNTRY) as a pie. Roughly how many slices of this pie do you think is CURRENTLY EARNED by:]

QA12B

Now, tell me how many slices of this pie you think SHOULD ideally go to:

(SHOW SCREEN AND PIE – ONE ANSWER PER LINE – SHOW IMAGE OF THE PIE – DISPLAY '99' ON SCREEN INSTEAD OF 'DK')

QA12B_1 The 20% of people who earn the most?

0 None of the pie

1 1

2 2 A proportional share of the pie

3 3

4 4

5 5

6 6

7 7

8 8

9 9

10 10 All of the pie

11 DK

Note:

Please note, that the coding of answer categories has been shifted compared to the questionnaire. Answer category 'None of the pie' is coded '0', answer category '1' is coded '1' and so on.

The image of the pie has not been published. It is therefore not included as showcard in the variable documentation.

qb1 - SPORT ACTIVITY - FREQUENCY

B. SPORT AND PHYSICAL ACTIVITY

Now, let's talk about another topic.

(READ OUT)

By 'exercise' we mean any form of physical activity which you do in a sport context or sport-related setting, such as swimming, training in a fitness centre or a sport club, running in the park.

(READ OUT)

QB1

ASK ALL

How often do you exercise or play sport?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 5 times a week or more
- 2 3 to 4 times a week
- 3 1 to 2 times a week
- 4 1 to 3 times a month
- 5 Less often
- 6 Never
- 7 DK

qb1r - SPORT ACTIVITY - FREQUENCY (RECODED)

Frequency of sport activities - recoded to four categories

- 1 Regularly (coded 1 in qb1)
- 2 With some regularity (coded 2 and 3 in qb1)
- 3 Seldom (coded 4 and 5 in qb1)
- 4 Never (coded 6 in qb1)
- 8 DK

Derivation:

This variable collapses answers to qb1 into four categories.

[qb1 How often do you exercise or play sport?]

Note:

See qb1 for complete question text.

Starting with dataset version v3-0-0 former code '5' (DK) is recoded to '8'.

qb2r - PHYSICAL ACTIVITY - FREQUENCY (RECODED)

Frequency of physical activities outside sport - recoded to four categories

- 1 Regularly (coded 1 in qb2)
- 2 With some regularity (coded 2 and 3 in qb2)
- 3 Seldom (coded 4 and 5 in qb2)
- 4 Never (coded 6 in qb2)
- 8 DK

Derivation:

This variable collapses answers to qb2 into four categories.

[qb2 And how often do you engage in other physical activity such as cycling from one place to another, dancing, gardening, etc.? By 'other physical activity' we mean physical activity for recreational or non-sport-related reasons.]

Note:

See qb2 for complete question text.

Starting with dataset version v3-0-0 former code '5' (DK) is recoded to '8'.

qb1b2t - SPORT/PHYSICAL ACTIVITY - FREQUENCY (TOTAL)

Frequency of sport/physical activity - recoded to three categories

- 1 Almost daily
- 2 A few times a week
- 3 Occasionally
- 4 Never/DK

Derivation:

This variable summarizes responses to variables qb1 and qb2.

[QB1 How often do you exercise or play sport?

QB2 And how often do you engage in other physical activity such as cycling from one place to another, dancing, gardening, etc.? By 'other physical activity' we mean physical activity for recreational or non-sport-related reasons.]

Respondents coded 1 ('5 times a week or more') in qb1 or qb2 are coded 1 ('Almost daily') in qb1b2t. Respondents coded 2 ('3 to 4 times a week') or 3 ('1 to 2 times a week') in qb1 or qb2 are coded 2 ('A few times a week') in qb1b2t. Respondents coded 4 ('1 to 3 times a month') or 5 ('Less often') in qb1 or qb2 are coded 3 ('Occasionally') in qb1b2t. Respondents coded 6 ('Never') or 7 ('DK') in qb1 and qb2 are coded 4 ('Never/DK') in qb1b2t.

Note:

See qb1 and qb2 for complete question text.

qb3a - VIGOROUS PHYSICAL ACTIVITY - DAYS LAST WEEK

QB3A

ASK QB3A TO QB4B IF 'PRACTICES A SPORT OR A PHYSICAL ACTIVITY'; CODE 1 TO 5 IN QB1 OR CODE 1 TO 5 IN QB2 – OTHERS GO TO QB5A

In the last 7 days, on how many days did you do vigorous physical activity like lifting heavy things, digging, aerobics or fast cycling?

(DO NOT SHOW SCREEN – DO NOT READ OUT – ONE ANSWER ONLY)

- 1 1 day
- 2 2 days
- 3 3 days
- 4 4 days
- 5 5 days
- 6 6 days
- 7 7 days
- 8 None
- 9 DK
- 99 Inap. Does not practice sport/physical activity or DK (not coded 1 to 5 in qb1 and qb2)

Comparability:

Last trend: EB80.2, QD3A

qb3a_r - VIGOROUS PHYSICAL ACTIVITY - DAYS LAST WEEK (RECODED)

Number of days last week practiced vigorous physical activity - recoded to three categories

- 1 Never (coded 8 in qb3a)
- 2 1-3 days (coded 1 to 3 in qb3a)
- 3 4-7 days (coded 4 to 7 in qb3a)
- 8 DK
- 9 Inap. Does not practice sport/physical activity or DK (not coded 1 to 5 in qb1 and qb2)

Derivation:

This variable collapses answers to qb3a into three categories.

[qb3a In the last 7 days, on how many days did you do vigorous physical activity like lifting heavy things, digging, aerobics or fast cycling?]

Note:

See qb3a for complete question text.

Starting with dataset version v3-0-0 former code '4' (DK) is recoded to '8'.

qb3b - VIGOROUS PHYSICAL ACTIVITY - HOW MUCH TIME

ASK QB3A TO QB4B IF 'PRACTICES A SPORT OR A PHYSICAL ACTIVITY'; CODE 1 TO 5 IN QB1 OR CODE 1 TO 5 IN QB2 – OTHERS GO TO QB5A

QB3B

In general, on days when you do vigorous physical activity, how much time in total do you usually spend at it?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 30 minutes or less
- 2 31 to 60 minutes
- 3 61 to 90 minutes
- 4 91 to 120 minutes
- 5 More than 120 minutes
- 6 Never do any vigorous physical activity
- 7 DK
- 9 Inap. Does not practice sport/physical activity or DK (not coded 1 to 5 in qb1 and qb2)

qb4a_r - MODERATE PHYSICAL ACTIVITY - DAYS LAST WEEK (RECODED)

Number of days last week practiced moderate physical activity - recoded to three categories

- 1 Never (coded 8 in qb4a)
- 2 1-3 days (coded 1 to 3 in qb4a)
- 3 4-7 days (coded 3 to 7 in qb4a)
- 8 DK
- 9 Inap. Does not practice sport/physical activity or DK (not coded 1 to 5 in qb1 and qb2)

Derivation:

This variable collapses answers to qb4a into three categories.

[qb4a In the last 7 days, on how many days did you do moderate physical activity like carrying light loads, cycling at normal pace or doubles tennis?
Please do not include walking.]

Note:

See qb4a for complete question text.

Starting with dataset version v3-0-0 former code '4' (DK) is recoded to '8'.

qb4b - MODERATE PHYSICAL ACTIVITY - HOW MUCH TIME

ASK QB3A TO QB4B IF 'PRACTICES A SPORT OR A PHYSICAL ACTIVITY'; CODE 1 TO 5 IN QB1 OR CODE 1 TO 5 IN QB2 – OTHERS GO TO QB5A

QB4B

In general, on days when you do a moderate physical activity, how much time do you spend at it?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 30 minutes or less
- 2 31 to 60 minutes
- 3 61 to 90 minutes
- 4 91 to 120 minutes
- 5 More than 120 minutes
- 6 Never do any moderate physical activity
- 7 DK
- 9 Inap. Does not practice sport/physical activity or DK (not coded 1 to 5 in qb1 and qb2)

qb5a_r - WALKED AT LEAST 10 MINUTES - DAYS LAST WEEK (RECODED)

Number of days last week walked at least 10 minutes - recoded to three categories

- 1 Never (coded 8 in qb5a)
- 2 1-3 days (coded 1 to 3 in qb5a)
- 3 4-7 days (coded 4 to 7 in qb5a)
- 8 DK

Derivation:

This variable collapses answers to qb5a into three categories.

[qb5a In the last 7 days, on how many days did you walk for at least 10 minutes at a time?]

Note:

See qb5a for complete question text.

Starting with dataset version v3-0-0 former code '4' (DK) is recoded to '8'.

qb6r - TIME SPENT SITTING - USUAL DAY (RECODED)

Time spend sitting on a usual day: recoded to four categories

- 1 2h30min or less (coded 1 to 3 in qb6)
- 2 2h31min to 5h30min (coded 4 to 6 in qb6)
- 3 5h31min to 8h30min (coded 7 to 9 in qb6)
- 4 8h31min or more (coded 10 in qb6)
- 8 DK

Derivation:

This variable collapses answers to qb6 into four categories.

[qb6 How much time do you spend sitting on a usual day? This may include time spent at a desk, visiting friends, studying or watching television.]

Note:

See qb6 for complete question text.

Starting with dataset version v3-0-0 former code '5' (DK) is recoded to '8'.

qb12 - VOLUNTARY WORK IN SPORT - ENGAGED

The next questions are about volunteering in sport. By volunteering we mean doing any voluntary work or activity for which you do not receive any payment except to cover expenses. This includes organising or helping to run events, campaigning or raising money, providing transport or driving, coaching, tuition, mentoring, etc.

QB12

Do you engage in voluntary work that supports sporting activities?

(ONE ANSWER ONLY)

- 1 Yes
- 2 No
- 3 DK

qb13 - VOLUNTARY WORK IN SPORT - TIME SPENT

QB13

ASK QB13 AND QB14 IF 'ENGAGE IN VOLUNTARY WORK'; CODE 1 IN QB12 - OTHERS GO TO NEXT TOPIC

How much time do you spend on voluntary work in sport?

(SHOW SCREEN – READ OUT – ONE ANSWER)

- 1 Only occasionally, at individual events
- 2 1 to 5 hours per month
- 3 6 to 20 hours per month
- 4 21 to 40 hours per month
- 5 More than 40 hours per month
- 6 DK
- 9 Inap. Not engaged in voluntary work or DK (not coded 1 in qb12)

qc9 - CAP FARMERS INCOME SUPPORT - ASSESSMENT

QC9

The EU gives financial support to farmers to help stabilise their incomes. This aid represents around 1% of the combined public expenditure of the 28 Member States of the EU and almost 40% of the total EU budget. Do you think that this support is too low, about right or too high?

(ONE ANSWER ONLY)

- 1 Too low
- 2 About right
- 3 Too high
- 4 DK

qc10_1 - CAP BUDGET REASONS: ALMOST ENTIRELY FINANCED

QC10

What do you think are the main reasons why the EU spends a significant proportion of its budget (almost 40% of the total EU budget) on the Common Agricultural Policy (CAP)?

(SHOW SCREEN – READ OUT – MAX. 2 ANSWERS – ROTATE ANSWERS 1 TO 6 – DISPLAY ‘96’ ON SCREEN INSTEAD OF ‘OTHER’ – CODES 8 AND 9 ARE EXCLUSIVE)

QC10_1 Agriculture is a sector financed almost entirely by the EU budget, rather than at national or local level

qc14t - AWARENESS OF LOGOS - AT LEAST ONE (SUM)

Awareness of food logos - at least one logo

0 Not mentioned (NONE/DK)

1 Aware of at least one logo

Derivation:

This variable summarizes answers to qc14_1 to qc14_5. It subsumes respondents who are coded at least one logo.

[qc14 Which of the logos on this card are you aware of?

qc14_1 LOGO 1 [Organic Farming]

qc14_2 LOGO 2 [Fairtrade]

qc14_3 LOGO 3 [Protected Designation of Origin]

qc14_4 LOGO 4 [Protected Geographical Indication]

qc14_5 LOGO 5 [Traditional Speciality Guaranteed]]

Note:

See qc14 for complete question text.

Variable qc14t is newly introduced starting with dataset version v3-0-0.

qc15_4 - BUYING DECISION LOGO: TRADITIONAL SPECIALITY

QC15

ASK QC15_4 IF QC14=5

To what extent would the presence of the following logo(s) on the package of food products be an important reason to buy them?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE – ROTATE STATEMENTS 1 TO 4 – DISPLAY ‘90’ ON SCREEN INSTEAD OF ‘YOU DO NOT BUY FOOD PRODUCTS’)

QC15_4 LOGO 5 [TRADITIONAL SPECIALTY GUARANTEED]

- 1 Very important
- 2 Fairly important
- 3 Not very important
- 4 Not important at all
- 5 You do not buy food products (SPONTANEOUS)
- 6 DK
- 9 Inap. Logo not mentioned (not coded 1 in qc14_5)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc16_4 - ORGANIC FOOD STATEMENTS - TASTE BETTER

QC16

ASK ALL

Do you agree or not with the following statements about food products coming from 'organic' agriculture?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE – ROTATE STATEMENTS 1 TO 8 – DISPLAY '99' ON SCREEN INSTEAD OF 'DK')

QC16_4 They taste better than other food products

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

qc17_1 - FARMER PAYMENT PROVISIO: FOOD SAFETY STANDARDS

QC17

Under the rules of the Common Agricultural Policy (CAP), subsidy payments to farmers are linked to the requirement to comply with rules for the environment, food safety and animal welfare. To what extent do you think that it is justified or unjustified to reduce subsidy payments to farmers who do not respect...?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE – ROTATE STATEMENTS 1 TO 3 – DISPLAY ‘99’ ON SCREEN INSTEAD OF ‘DK’)

d1r1 - LEFT-RIGHT PLACEMENT: 3 CAT (RECODED)

Left-right placement - recoded to three categories

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 - 10) Right
- 9 DK/Refusal (Spontaneous)

Derivation:

This variable collapses answers to d1 into three categories.

[d1 In political matters people talk of 'the left' and 'the right'. How would you place your views on this scale?]

Note:

See d1 for complete question text.

d7 - MARITAL STATUS

D7

Which of the following best corresponds to your own current situation?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY – CODE ‘NO ANSWER’ IN CODE 16)

MARRIED OR REMARRIED

- 1 Living without children
- 2 Living with the children of this marriage
- 3 Living with the children of a previous marriage
- 4 Living with the children of this marriage and of a previous marriage

SINGLE LIVING WITH A PARTNER

- 5 Living without children
- 6 Living with the children of this union
- 7 Living with the children of a previous union
- 8 Living with the children of this union and of a previous union

SINGLE

- 9 Living without children
- 10 Living with children

DIVORCED OR SEPARATED

- 11 Living without children
- 12 Living with children

WIDOW/ER

- 13 Living without children
- 14 Living with children

15 Other (SPONTANEOUS)

97 Refusal (SPONTANEOUS)

Note:

Original code ‘16’ recoded to ‘97’.

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

Marital status recoded to five categories with focus on partnership

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for complete question text.

d11r1 - AGE: 4 GROUPS (RECODED)

Age of respondent - recoded to four categories

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older (see code 99 in d11)

Derivation:

This variable collapses answers to d11 into four categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

d11r3 - AGE: 7 GROUPS (RECODED)

Age of respondent - recoded to seven categories

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 - 74 years
- 7 75 years and older (see code 99 in d11)

Derivation:

This variable collapses answers to d11 into seven categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

gen1 - GENERATION BEFORE 1928 (AGE 90 AND OLDER)

Generation born before 1928 (age 90 and older)

0 Not mentioned

1 Mentioned [incl. '99' in d11]

Derivation:

This variable summarizes all respondents born before 1928 and is based on questions d11 ('How old are you?'). Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents.

Note:

See d11 for complete question text.

d8 - AGE EDUCATION

D8

How old were you when you stopped full-time education?

(IF 'STILL STUDYING', CODE '00' – IF 'NO EDUCATION' CODE '01' – IF 'REFUSAL' CODE '98' – IF 'DK' CODE '99' – CODE 'NO ANSWER' IN CODE 98 – CANNOT BE LARGER THAN D11)

(MAKE SURE THE RESPONDENT UNDERSTANDS THAT D8 IS ABOUT FULL-TIME EDUCATION)

0 Refusal

2 2 years

69 69 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code '00' recoded to '98'.

Original code '01' recoded to '97'.

Original code '98' recoded to '0'.

Please note that users might be advised to consider pre-school ages (outliers) as with 'no full-time education' or to treat them as missing values.

Actual number is coded.

Comparability:

Last trend: EB88.3, D8

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

Age when finished full-time education - recoded to 11 categories

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 for indicated ages lowest (2) to 14 and 22 to highest (69).

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d8r2 - AGE EDUCATION: 5 CAT (RECODED)

Age when finished full-time education - recoded to five categories

- 1 Up to 15 years
- 2 16-19 years
- 3 20 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 into three age groups.

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d15a - OCCUPATION OF RESPONDENT

D15A

What is your current occupation?

(DO NOT SHOW SCREEN – ‘NO ANSWER’ NOT ALLOWED – IF D15A=2 THEN D8=00 – IF D15<>2 AND D8=00 THEN CORRECT D8 OR CHANGE THE ANSWER IN D15A)

NON-ACTIVE

- 1 Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
- 2 Student
- 3 Unemployed or temporarily not working
- 4 Retired or unable to work through illness

SELF EMPLOYED

- 5 Farmer
- 6 Fisherman
- 7 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 8 Owner of a shop, craftsmen, other self-employed person
- 9 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 10 Employed professional (employed doctor, lawyer, accountant, architect)
- 11 General management, director or top management (managing directors, director general, other director)
- 12 Middle management, other management (department head, junior manager, teacher, technician)
- 13 Employed position, working mainly at a desk
- 14 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 15 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 16 Supervisor
- 17 Skilled manual worker
- 18 Other (unskilled) manual worker, servant

d15a_r1 - OCCUPATION OF RESPONDENT (RECODED)

Occupation of respondent - recoded to employment status

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15a_r2 - RESPONDENT OCCUPATION SCALE (C14)

Occupation of respondent - scale (C14)

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Managers (coded 10 to 12 in d15a)
- 3 Other white collars (coded 13 or 14 in d15a)
- 4 Manual workers (coded 15 to 18 in d15a)
- 5 House persons (coded 1 in d15a)
- 6 Unemployed (coded 3 in d15a)
- 7 Retired (coded 4 in d15a)
- 8 Students (coded 2 in d15a)

Derivation:

This scale is based on a combination/selection of answers to variable d15a.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

[D15A

What is your current occupation?]

D15B

ASK D15B IF 'NOT DOING ANY PAID WORK CURRENTLY', CODES 1 TO 4 IN D15A

Did you do any paid work in the past? What was your last occupation?

(DO NOT SHOW SCREEN – 'NO ANSWER' NOT ALLOWED)

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

d15b_r - OCCUPATION OF RESPONDENT - LAST JOB (RECODED)

Occupation of respondent: last job - recoded to employment status

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (coded 15 in d15b)
- 9 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

[d15b Did you do any paid work in the past? What was your last occupation?]

Note:

See d15b for complete question text.

d40t - HOUSEHOLD COMPOSITION: SIZE (SUMMARIZED)

n of people in household - summarized

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 17 Seventeen
- 18 Eighteen
- 19 Nineteen
- 20 Twenty
- 22 Twenty-two
- 24 Twenty-four
- 26 Twenty-six

Derivation:

This variable summarizes d40a, d40b, and d40c.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

Variable d40t was named d40abc in former versions of this dataset.

Generated by GESIS in accordance with former surveys.

d40t by isocntry, Absolute Values (Row Percent), weighted by w1

d40t_r - HOUSEHOLD COMPOSITION: SIZE A+B+C (RECODED)

n of people in household - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four and more

Derivation:

This variable groups the summarized variable d40t.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

Variable d40t_r was named d40abc_r in former versions of this dataset.

d40_d11 - ONE-PERSON HOUSEHOLD COMPOSITION BY AGE

One-person households - recoded to three age categories

- 1 15 - 29 years
- 2 30 - 59 years
- 3 60 years and older [see code 99 in d11]
- 9 Inap. No one-person-household (not coded 1 in d40t)

Derivation:

This variable collapses answers to d11 into three age categories, but only for one-person households.

[d11 How old are you?

d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d11 and d40a, d40b, and d40c for complete question text.

d43t - PHONE AVAILABLE (SUMMARIZED)

Availability of mobile and/or landline phones - summarized

- 1 Mobile only
- 2 Landline only
- 3 Landline & mobile
- 4 No telephone

Derivation:

This variable summarizes answers to question d43a and d43b.

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?]

Respondents coded 2 in d43a and 1 in d43b are coded 1 ('Mobile only') in d43t. Respondents coded 1 in d43a and 2 in d43b are coded 2 ('Landline only') in d43t. Respondents coded 1 in d43a and d43b are coded 3 ('Landline and mobile') in d43t. Respondents coded 2 in d43a and d43b are coded 4 ('No telephone') in d43t.

Note:

See d43a and d43b for complete question text

d62_4 - INTERNET USE FREQ: SOMEWHERE ELSE

D62

Could you tell me if ...?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE – ‘NO ANSWER’ NOT ALLOWED – DISPLAY ‘95’ INSTEAD OF ‘NO INTERNET ACCESS’)

D62_4 You use the Internet somewhere else (school, university, cyber-café, etc.)

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

Comparability:

Last trend: EB88.3, D62

d62t1 - INTERNET USE - INDEX 1 (4 CAT)

Frequency of internet use - index with four categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_4)
- 2 Often/sometimes (at least once coded 2 to 5 in d62_1 to d62_4)
- 3 Never/no access (coded 6 or 6/7 in d62_1 to d62_4)
- 4 No Internet access at all (only 7 in d62_1 to d62_4)

Derivation:

This variable summarizes responses to d62 in four categories.

[d62 Could you tell me if you use the internet ...?

d62_1 You use the Internet at home, in your home

d62_2 You use the Internet on your place of work

d62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62_4 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_4 are coded 1 in d62t1 ('Everyday/Almost everyday'). Respondents coded 2, 3, 4 or 5 in each variable d62_1 to d62_4 are coded 2 ('Often/sometimes') in d62t1. Respondents coded 6 ('Never') in each variable d62_1 to d62_4 are coded 3 ('Never to all') in d62t1. Respondents coded 6 ('Never') in each variable d62_1 to d62_4, or at least once coded 6 in d62_1 to d62_4 and coded 7 ('No internet access') in the other variable(s), are coded 3 ('Never/No access') in d62t1. Respondents coded 7 ('No internet access') in each variable d62_1 to d62_4 are coded 4 ('No internet access at all') in d62t1.

Note:

See d62 for complete question text.

Please note that categories 3 and 4 of index variable d62t1 in EB 88.4 might differ from former surveys.

Variable d62t1 was named d62t in former versions of this dataset.

d62t2 - INTERNET USE - INDEX 2 (7 CAT)

Frequency of internet use - index with seven categories

- 1 Everyday/Almost everyday (at least once 1 in d62_1 to d62_4)
- 2 Two or three times a week (not 1 and at least once 2 in d62_1 to d62_4)
- 3 About once a week (not 1-2 and at least once 3 in d62_1 to d62_4)
- 4 Two or three times a month (not 1-3 and at least once 4 in d62_1 to d62_4)
- 5 Less often (not 1-4 and at least once 5 in d62_1 to d62_4)
- 6 Never/no access (6 or 6/7 in d62_1 to d62_4)
- 7 No Internet access at all (only 7 in d62_1 to d62_4)

Derivation:

This variable summarizes responses to d62.

[d62 Could you tell me if you use the internet ...?

d62_1 You use the Internet at home, in your home

d62_2 You use the Internet on your place of work

d62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62_4 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_4 are coded 1 in d62t2 ('Everyday/Almost everyday'). Respondents coded 2 at least once in d62_1 to d62_4 and not coded 1, are coded 2 in d62t2 ('Two or three times a week'). Respondents coded 3 at least once in d62_1 to d62_4 and not coded 1 or 2, are coded 5 in d62t2 ('About once a week'). Respondents coded 4 at least once in d62_1 to d62_4 and not coded 1 to 3, are coded 4 in d62t2 ('Two or three times a month'). Respondents coded 5 at least once in d62_1 to d62_4 and not coded 1 to 4, are coded 5 in d62t2 ('Less often'). Respondents coded 6 ('Never') in each variable d62_1 to d62_4, or at least once coded 6 in d62_1 to d62_4 and coded 7 ('No internet access') in the other variable(s), are coded 6 ('Never/No access') in d62t2. Respondents coded 7 ('No internet access') in each variable d62_1 to d62_4 are coded 7 ('No internet access at all') in d62t2.

Note:

See d62 for complete question text.

Generated by GESIS in accordance with former surveys.

Variable d62t2 was named netuse in former versions of this dataset.

polintr - POLITICAL INTEREST INDEX (D71_1/2/3)

Index of interest in politics

0 DK (coded 4 in d71_1, d71_2 and d71_3)

1 Not at all interested in politics

2 Slightly interested in politics

3 Moderately interested in politics

4 Strongly interested in politics

Derivation:

The POLITICAL INTEREST INDEX is based on the answers to the following question: 'When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?' (d71_1, d71_2, and d71_3). According to former studies the index was constructed by first attributing a score to each item in d71 ('Never' = 0; 'Occasionally' = 1; 'Frequently' = 2) and then adding together the three political dimensions (national/European/local). This procedure results in four different index levels ('Not at all interested in politics' if added up score = 0; 'Slightly' if added up score = 1 or 2; 'Moderately' if added up score = 3 or 4; 'Strongly' if added up score = 5 or 6) which have been coded accordingly into the categories 1 to 4. Furthermore combinations with DK responses in maximum two variables (d71_1, d71_2, and d71_3) have been coded as follows: 'DK' and 'Never' = 'Not at all'; 'DK' and 'Never' and 'Occasionally' or 'Frequently' = 'Slightly'; 'DK' and 'Occasionally' and at least one 'Frequently' = 'Moderately'.

Note:

This new POLITICAL INTEREST INDEX is introduced as C2 starting with EB 73.4. Please notice that in former waves up to EB 69.2 the VALUE ORIENTATION - POST-MATERIALISM index was named C2.

Compared to the original variable the scale has been inversed by GESIS in accordance with former practice. Furthermore responses coded 'DK' to all source variables (d71_1, d71_2, and d71_3) have been recoded to '0' (DK).

Modified by GESIS.

See d71 for the complete question text.

opls - OPINION LEADERSHIP INDEX (D71&D77 SUMMARIZED)

Index of Opinion Leadership

0 DK (coded 5 in d77 and 0 in polintr)

1 - - low (coded 4 in d77 and coded 0, 1, 2 or 3 in polintr; or coded 5 in d77 and coded 1, 2, 3 or 4 in polintr)

2 - (coded 3 in d77 and coded 0, 1, 2 or 3 in polintr; coded 4 in d77 and coded 4 in polintr)

3 + (coded 3 in d77 and coded 4 in polintr; coded 2 in d77 and coded 0, 1, 2 or 3 in polintr; coded 1 in d77 and coded 0, 1 or 2 in polintr)

4 ++ high (coded 1 in d77 and coded 3 or 4 in polintr; or coded 2 in d77 and coded 4 in polintr)

Derivation:

The OPINION LEADERSHIP INDEX is based on the answers to the following two questions: 'When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? Does this happen often ...?' (d77) and 'When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?' (d71), the latter first being summarized in the POLITICAL INTEREST INDEX (polintr). Interviewees giving affirmative answers to both questions are labelled ++.

Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

Note:

Starting with EB 73.4 the OPINION LEADERSHIP INDEX (C1) is constructed via the new POLITICAL INTEREST INDEX. For the background and derivation of this index variable see polintr.

Compared to the original variable the scale has been inversed by GESIS in accordance with former practice. Furthermore responses coded 'DK' to both source variables (d77 and polintr) have been recoded to '0' (DK), if applicable.

See d77 and d71 for complete question text.

p6fr - SIZE OF COMMUNITY - FRANCE

p6fr Objective size of community: France

- 1 Rural area
- 2 Towns and suburbs/small urban area
- 3 Cities/large urban area
- 99 Inap. (not FR in isocntry)

Note:

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

Comparability:

Last trend: EB88.3, P6

p7pt - REGION - PORTUGAL NUTS 2

p7pt Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North) [PT]
- 2 Centro (Center) [PT]
- 3 Área Metropolitana de Lisboa (Lisbon metropolitan area)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region 'Lisboa e vale do tejo' is split up and the subregion 'Lezíria do Tejo' reinstated to the 'Alentejo' Region and the 'Médio Tejo' and 'Oeste' reinstated to the 'Centro' Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category '3' ('Lisboa e vale do Tejo') has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes 'Grande Lisboa' and 'Península de Setúbal'.

Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 category '3' is labelled 'Área Metropolitana de Lisboa'.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

NUTS 3 according to NUTS versions 2010, 2013

HR031 Primorsko-goranska županija (Primorje-Gorski Kotar County)

HR032 Licko-senjska županija (Lika-Senj County) (NOT CODED)

HR033 Zadarska županija (Zadar County)

HR034 Šibensko-kninska županija (Šibenik-Knin County)

HR035 Splitsko-dalmatinska županija (Split-Dalmatia)

HR036 Istarska županija (Istria County)

HR037 Dubrovacko-neretvanska županija (Dubrovnik-Neretva County) (NOT CODED)

HR041 Grad Zagreb (Capital)

HR042 Zagrebacka županija (Zagreb County)

HR043 Krapinsko-zagorska županija (Krapina-Zagorje County)

HR044 Varaždinska županija (Varaždin County)

HR045 Koprivničko-križevačka županija (Koprivnica-Križevci County)

HR046 Medimurska županija (Medimurje County)

HR047 Bjelovarsko-bilogorska županija (Bjelovar-Bilogora County)

HR048 Viroviticko-podravska županija (Virovitica-Podravina County) (NOT CODED)

HR049 Požeško-slavonska županija (Požega-Slavonia County)

HR04A Brodsko-posavska županija (Brod-Posavina County)

HR04B Osječko-baranjska županija (Osijek-Baranja County)

HR04C Vukovarsko-srijemska županija (Vukovar-Srijem County)

HR04D Karlovačka županija (Karlovac County)

HR04E Sisacko-moslavacka županija (Sisak-Moslavina County)

Derivation:

This additional alphanumeric NUTS CODES variable is produced by GESIS. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are

documented in the official EUROSTAT classification history (History of NUTS). A second variable (nutslvl) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Ireland:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Ireland introducing NUTS 3 categories.

Greece:

The Aegean Islands (EL41 - Βόρειο Αιγαίο/Voreio Aigaio and EL42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (EL22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) the standard country prefix 'GR' is replaced by 'EL'. The remaining numerical part of the codes remains unaffected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered. Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 category '3' is labelled 'Área Metropolitana de Lisboa'.

Finland:

Starting with EB 81.3 for Finland only one country specific protocol variable P7 (REGION) is available. The variable p7fi corresponds to the NUTS 2 breakdown in accordance to NUTS 2010 with regular amendment as of January 1, 2012. The NUTS 3 breakdown is no longer available for Finland.

Estonia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Estonia introducing the official NUTS 3 categories.

Bulgaria:

Starting with EB 81.3 for Bulgaria only one country specific protocol variable P7 (REGION) is available. The NUTS 3 breakdown is no longer available for Bulgaria.

Croatia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Croatia introducing the NUTS 2 and NUTS 3 categories.

Comparability:

nuts (REGION - NUTS CODES) in EB88.3

nutslvl - REGION - NUTS LEVEL

nutslvl REGION - NUTS LEVEL

0 No NUTS units

1 NUTS level 1

2 NUTS level 2

3 NUTS level 3

Derivation:

This variable identifies the lowest available NUTS LEVEL as coded for each country in variable NUTS CODES variable 'nuts'.

Starting with EB 81.3 the category scheme for country specific protocol variables P7 (REGION) have changed for some countries, in particular introducing NUTS categories for Ireland, Estonia and Croatia, and modifying NUTS categories for Finland and Bulgaria.

w3a - WEIGHT RESULT FROM TARGET - UNITED GERMANY

w3a Weight result from target - United Germany

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). This weight has been derived by GESIS from original TNS weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, GESIS is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

nation - NATION (UNITED KINGDOM AND UNITED GERMANY) ISO3166

nation (United Kingdom and United Germany) ISO3166

NATION (UNITED KINGDOM AND UNITED GERMANY) ISO3166 equals country/sample identification variable isocntry (COUNTRY CODE - ISO 3166) but coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany. Unlike variables "gb" (NATION – UNITED KINGDOM (ONLY)) and "de" (NATION – UNITED GERMANY (ONLY)) all other countries are included for calculation.

Note:

Use of weighting factor w3a4a is mandatory for descriptive analysis.

w3a4a - WEIGHT RESULT FROM TARGET - NATION

w3a4a Weight result from target – Nation

This weight combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors), the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West), and the redressment factors for all other countries. This weight has been derived by GESIS from original TNS weights w1, w3 and w4. Unlike weighting variables w4 (WEIGHT UNITED KINGDOM (ONLY)) and w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, GESIS is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

w3a4a
