## Acknowledgements

---

Standard & Special Eurobarometer surveys are conducted on behalf of the Commission of the European Communities, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS ([https://search.gesis.org/research\\_data](https://search.gesis.org/research_data)), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

## 1.2 Content

### 1.2.1 Abstract

This round of Euro-Barometer surveys queried 15- to 24- year-old respondents on standard Euro-Barometer measures, such as how satisfied they were with their present life, whether they attempted to persuade others close to them to share their views on subjects they held strong opinions about, whether they discussed political matters, what their country's goals should be for the next ten years, and how they viewed the need for societal change. Additional questions focused on the respondents' knowledge and opinions of the European Community. One major focus of the study was the general interests of the respondents. Questions included what groups and associations they belonged to, whether they took part in clubs, organizations, or community centers intended for young people, which causes they felt were worth taking risks and making sacrifices for, how they rated certain aspects of their lives and relationships, which qualities they thought parents should encourage in their children, and what the three major problems facing young people were. Another major focus of the study was on exposure to foreign cultures. Queries included which foreign languages respondents knew, which languages they would like to know, whether they felt enough attention had been paid to foreign languages in school, how much time they had spent traveling abroad, what foreign countries they had visited, whether they had participated in a youth exchange or had worked abroad, which countries they would like to visit for work or study, and what problems were involved in working, studying, or training abroad. Respondents were also asked whether they had ever experienced discrimination, what their financial situation was, whom they talked to when making life course decisions, and whether they used counseling and guidance services. Questions also examined employed respondents' current occupations and employment histories. Unemployed respondents were asked how many months they had been looking for a job, what they had been doing to find a job, and what the main reason was for their being unemployed. Respondents who were still in school or pursuing higher education were asked why they chose to continue studying, at what age they intended to finish their full-time education, why they chose the current subject of their studies, and what their current level of study was. Those respondents who were in a job placement or apprenticeship program were asked questions pertaining to their placement. Respondents no longer in school were asked how many years they studied beyond the minimum for schooling, what their reasons were for finishing formal education when they did, whether they had started a training course, how many training courses they had completed, how many months they had been involved in the training course, what they felt the standard of training was, how much they had gained from the training course, and whether the training had helped them get a job. Additional information was gathered on family income, number of people residing in the home, size of locality, home ownership, region of residence, occupation of the head of household, and the respondent's age, sex, occupation, education, religion, religiosity, subjective social class standing, political party and union membership, and left-right political selfplacement.

Note: In the context of Eurobarometer 34.0, certain questions from this study (34.2) were also asked of a sample within each country of the population aged 15 years and over. Meaningful results are obtained for the total population on the 34.0 data. A large number of questions have already been asked in the same or a modified way in the context of Eurobarometer 28.1 (Oct-Nov 1987); trends are indicated for each question.

### 1.2.2 Topic classification

- International Institutions, Relations

- Commission of the European Communities: Young Europeans in 1990 - Eurobarometer 34.2. Brussels, May 1991.

## 1.3 Universe

In all, Eurobarometer 34.2 interviewed 7.706 young people of the 12 countries in the European Community (population of the respective nationality). The samples of Eurobarometer 34.2 are designed to be representative for the national population aged 15 to 24 years of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland) and in Germany (West and East Germany).

## 1.4 Sampling procedure

A sample design, applied in all member states, is a selection by quota. In this way a representative sample of the total target population (young people between 15 and 24 years of age) was drawn. In all member states a number of sampling points was drawn with probability proportional to population size, for a total coverage of each member state, and to population density. The number of sampling points in each of the countries (except Luxembourg and Northern Ireland) is at least 60. For doing so, the points were drawn systematically from all "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the member states according to the EUROSTAT NUTS II (Nomenclature of territorial unit for statistics) and according to the distribution of the national, resident population in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. That starting address formed the first of a cluster of addresses. The remainder of the cluster was selected as every Nth address by standard random route procedures from the initial address. In each household the young respondent was selected according to the quota imposed. These quotas were crossed in all countries, i.e. by sex, age and activity rate. The quotas are defined in a uniform way, i.e. from census data 1981-1982, in all countries of the European Community, as published by EUROSTAT in 1988. For East Germany the most recent results of a national census were used. The maximum number of interviews per household is one. All interviews are taken face to face in the respondent's private residences and as far as possible in the absence of parents. The effective number of realized interviews in this round is indicated in table 1.

## 1.5 Fieldwork

From December 3 to December 23, 1990, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the 'Survey, Research, Analysis' Unit of the Directorate General X, 'Information, Communication and Culture', of the Commission of the European Communities. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels. In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

Table 1: Participating countries (regions) and fieldwork information for Eurobarometer 34.2

## 1.6 Mode of data collection

INRA (Europe) developed equivalent French and English basic questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

## 1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This post-stratification weighting is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The population size weighting factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 34.2 provides three (post-stratification) NATION WEIGHTS: WEIGHT ADJUSTED TO STANDARD SIZE (NATION WEIGHT IIb ) for separate analysis or comparison of individual samples (countries or regions on sub-national level), WEIGHT SPECIAL UNITED KINGDOM (NATION WEIGHT I adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, WEIGHT SPECIAL GERMANY (NATION WEIGHT III adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset (Q.29, Q.57, P.6 and P.7). Two variables containing condensed information were created by ZA for this Eurobarometer: NATION I and NATION III.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent. More extensive recodings with respect to irregular answers to questions intended to be skipped were necessary for Q.92 to Q.101 in order to achieve meaningful results and comparability between countries (see Note No. 1).

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or coding is provided by INRA in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

### 1.9 Main changes from previous archive edition release

The current dataset has been corrected for the values in variable v469, which have not been masked in previous dataset versions. The current variable report replaces the initial variable report published in 2012/07/01. Information unrelated to this update has not been updated.

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <https://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general, the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general, missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

### 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.	Eurobarometer 67.1 - February-March 2007 GESIS Study No. 4529 (v3.0.1, <a href="http://dx.doi.org/doi:10.4232/1.10983">http://dx.doi.org/doi:10.4232/1.10983</a> )

QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).																																																																																																																																																																																																																																																																																																												
CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).																																																																																																																																																																																																																																																																																																												
DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																																																												
CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table.	<div>Absolute Values (Row Percent), weighted by v8</div> FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																												

## 5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER - DISTRIBUTOR

Archive Study Number: distributor

Note:  
Actual number is coded

v1

Value	Label	Missing	Count	Percent	Valid Percent
1962			7706	100.0	100.0
	Sum		7706	100.0	100.0
	Valid Cases		7706		

v2 - STUDY NUMBER - PRODUCER

Archive Study Number: producer

1962 The ZA has attached this as a unique data collection identification number.

v2

Value	Label	Missing	Count	Percent	Valid Percent
1962	ZA STUDY NUMBER		7706	100.0	100.0
	Sum		7706	100.0	100.0
	Valid Cases		7706		

#### v3 - EDITION NUMBER

##### Archive Edition Number

The number identifying the release edition of this dataset.

2 Second ZA Edition - February 2001

##### Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
2	2ND ZA EDITION		7706	100.0	100.0
	Sum		7706	100.0	100.0
	Valid Cases		7706		

**doi - DIGITAL OBJECT IDENTIFIER**

## Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.14037>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

## doi

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.14037			7706	100.0	100.0
	Sum		7706	100.0	100.0
	Valid Cases		7706		

version - GESIS ARCHIVE VERSION & DATE

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Version 2.0.0 recodes all values in v469 to NA.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
2.0.0 (2022-11-11)			7706	100.0	100.0
	Sum		7706	100.0	100.0
	Valid Cases		7706		

v4 - EUROBAROMETER PART NUMBER

Archive Part Number

The number identifying the Eurobarometer sample.

In the context of Eurobarometer 34.0, certain questions from this study (34.2) were also asked of a sample within each country of the population aged 15 years and over. Meaningful results are obtained for the total population on the 34.0 data.

2 Eurobarometer 34.2 (ZA 1962 / ICPSR 9578)

v4

Value	Label	Missing	Count	Percent	Valid Percent
2	EB 34.2		7706	100.0	100.0
	Sum		7706	100.0	100.0
	Valid Cases		7706		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique identification number is assigned to each respondent.

Note:

Actual number is coded

## isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

## NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

## isocntry

Value	Label	Missing	Count	Percent	Valid Percent
BE			593	7.7	7.7
DE-E			659	8.6	8.6
DE-W			613	8.0	8.0

PT			600	7.8	7.8
	Sum		7706	100.0	100.0
	Valid Cases		7706		

## v6 - NATION I (UNITED KINGDOM)

## Nation of interview I

This variable identifies the E.C. nation in which the respondent was interviewed. A unique numeric code is assigned to each of the 12 E.C. countries including separate samples for East and West Germany.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 West Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 East Germany

## v6

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		603	7.8	7.8
2	BELGIUM		593	7.7	7.7
3	NETHERLANDS		581	7.5	7.5
4	WEST GERMANY		613	8.0	8.0
5	ITALY		608	7.9	7.9
6	LUXEMBOURG		199	2.6	2.6
7	DENMARK		617	8.0	8.0
8	IRELAND		600	7.8	7.8
9	UNITED KINGDOM		821	10.7	10.7
10	GREECE		612	7.9	7.9
11	SPAIN		600	7.8	7.8
12	PORTUGAL		600	7.8	7.8
13	EAST GERMANY		659	8.6	8.6
	Sum		7706	100.0	100.0
	Valid Cases		7706		

v7 - WEIGHT SPECIAL UNITED KINGDOM

Weight Special United Kingdom:

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All nation weights are included.

Note:

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31, this weight adjusts all samples to the standard size.

## v8 - NATION II (GB AND NORTHERN IRELAND)

## Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 West Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 East Germany

## v8

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		603	7.8	7.8
2	BELGIUM		593	7.7	7.7
3	NETHERLANDS		581	7.5	7.5
4	WEST GERMANY		613	8.0	8.0
5	ITALY		608	7.9	7.9
6	LUXEMBOURG		199	2.6	2.6
7	DENMARK		617	8.0	8.0
8	IRELAND		600	7.8	7.8
9	GREAT BRITAIN		621	8.1	8.1
10	NORTHERN IRELAND		200	2.6	2.6
11	GREECE		612	7.9	7.9
12	SPAIN		600	7.8	7.8
13	PORTUGAL		600	7.8	7.8
14	EAST GERMANY		659	8.6	8.6
	Sum		7706	100.0	100.0
	Valid Cases		7706		

#### v9 - WEIGHT ADJUSTED TO STANDARD SIZE

Weight Adjusted to Standard Size:

This variable contains weights that adjust the weighted samples to make them representative for the population aged 15 to 24 years in the countries from which they were drawn. All samples are adjusted to the standard size of 600 cases respectively 200 cases (Northern Ireland and Luxembourg). Great Britain and Northern Ireland are weighted as independent samples.

"Weight Result from Target" which usually reproduces the real number of cases for each EC country is not available for Eurobarometer 34.2.

## v10 - NATION III (EAST AND WEST GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany (West and East)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal

v10

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		603	7.8	7.8
2	BELGIUM		593	7.7	7.7
3	NETHERLANDS		581	7.5	7.5
4	GERMANY (WEST+EAST)		1272	16.5	16.5
5	ITALY		608	7.9	7.9
6	LUXEMBOURG		199	2.6	2.6
7	DENMARK		617	8.0	8.0
8	IRELAND		600	7.8	7.8
9	GREAT BRITAIN		621	8.1	8.1
10	NORTHERN IRELAND		200	2.6	2.6
11	GREECE		612	7.9	7.9
12	SPAIN		600	7.8	7.8
13	PORTUGAL		600	7.8	7.8
	Sum		7706	100.0	100.0
	Valid Cases		7706		

v11 - WEIGHT SPECIAL GERMANY

Weight Special Germany:

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size.

v12 - WEIGHT EURO 6

European Weight 6:

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition. This weight includes the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy, and Luxembourg) and includes national weighting for each sample adjusted to the standard size.

v13 - WEIGHT EURO 10

European Weight 10:

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition. This weight excludes East Germany, Spain and Portugal. This weight includes national weighting for each sample adjusted to the standard size.

v14 - WEIGHT EURO 12

European Weight 12:

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries as categorized by Nation I (V6). This weight excludes East Germany.

v15 - WEIGHT EURO 12 +

Weight Euro 12+:

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included.

Note:

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31, this weight contains the adjustment to the standard size.

## v16 - Q1 ELECTORAL REGISTER

Q.1

Are You ... (NATIONALITY)?

(IF YES) Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under your present address, at another address or does not appear at all?

- 1 at present address
- 2 at another address
- 3 don't know if registered
- 4 does not appear at all
- 5 is not ... (NATIONALITY) CLOSE INTERVIEW

Note:

Last trend: EB34.0 Q.1

## v28 - Q7 SOCIAL CHANGE - BASIC ATTITUDES

## Q.7

On this card are three basic kinds of attitudes towards the society we live in. Please choose the one which best describes your own opinion?

(SHOW CARD - ONE ANSWER ONLY)

0 NA

1 The entire way our society is organised must be radically changed by revolutionary action

2 Our society must be gradually improved by reforms

3 Our present society must be strongly defended against all subversive forces

4 DK

v160 - Q29 MOTHERTONGUE OF RESP - SEE DOCUMENT

Q.29

What is your mothertongue?

0 NA (France: not documented)

in France (FR):

- 1 French
- 2 Polish
- 3 German
- 4 Auvergnat (French dialect)
- 5 Danish
- 6 Spanish
- 7 Alsacien (French dialect)
- 8 Arabic
- 9 English
- 10 Breton (French dialect)
- 11 Portuguese
- 12 Flamish
- 13 Provençal (French dialect)
- 14 Russian
- 15 Yiddish
- 16 Italian
- 17 Malagasy
- 18 Armenian
- 19 Kabyle
- 20 Yugoslavian
- 21 Basque
- 22 Vietnamese
- 23 Hungarian
- 24 Other

in Belgium (BE):

- 1 French
- 2 Dutch
- 3 German
- 4 Greek
- 5 Luxemburgish
- 6 Russian
- 7 Arabic
- 8 Italian

in Netherlands (NL):

- 1 Dutch

- 2 Fries
- 3 English
- 4 French
- 5 German
- 6 Turkish
- 7 Moroccan
- 8 Surinamese
- 9 Papiamentu
- 10 Indonesian
- 11 Other

in Germany (DE):

- 1 Danish
- 2 German
- 3 French
- 4 Italian
- 5 Dutch
- 6 English
- 7 Spanish
- 8 Portuguese
- 9 Greek
- 10 Polish
- 11 Russian
- 12 Roumanian
- 13 Yugoslavian
- 14 Turkish
- 15 Other

in Italy (IT):

- 1 Danish
- 2 German
- 3 French
- 4 Italian
- 5 Dutch
- 6 English
- 7 Spanish
- 8 Portuguese
- 9 Greek
- 10 Other

in Luxembourg (LU):

- 1 Luxemburgish
- 2 German
- 3 Drench
- 4 Italian
- 5 Portuguese

- 6 Dutch
- 7 Yugoslavian
- 8 Spanish
- 9 Polish
- 10 English
- 11 Other

in Denmark (DK):

- 1 Danish
- 2 German
- 3 French
- 4 Italian
- 5 Dutch
- 6 English
- 7 Spanish
- 8 Portuguese
- 9 Greek
- 10 Other

in Great Britain (GB\_GBN):

- 1 Arabic
- 2 Bengali
- 3 Cantonese
- 4 Danish
- 5 Dutch
- 6 English
- 7 French
- 8 German
- 9 Greek
- 10 Gujarati
- 11 Hindi
- 12 Hungarian
- 13 Italian
- 14 Mandarin
- 15 Polish
- 16 Punjabi
- 17 Spanish
- 18 Swedish
- 19 Sylheti
- 20 Turkish
- 21 Ukrainian
- 22 Urdu
- 23 Other

in Greece (GR):

- 1 Greek

- 2 Turkish
- 3 Bulgarian
- 4 Yugoslavian
- 5 Russian
- 6 Roumanian
- 7 English
- 8 German
- 9 French
- 10 Other

in Spain (ES):

- 1 Castellano (Spanish)
- 2 Catalan
- 3 Vascuence/Euskera (basque)
- 4 Gallego
- 5 Portuguese
- 6 French
- 7 English
- 8 German
- 9 Italian
- 10 Valenciano
- 11 Asturiano
- 12 Arabic
- 13 Mallorqui

in Portugal (PT):

- 1 Portuguese
- 2 Other

in IE GB\_NIR:

- 1 English
- 2 Irish
- 3 Danish
- 4 Dutch
- 5 French
- 6 German
- 7 Greek
- 8 Italian
- 9 Portuguese
- 10 Spanish
- 11 Other

## v356 - Q57R INCOME - HARMONISED

## Q.57R Available income - harmonised

INRA found income distribution for BELGIUM, ITALY and SPAIN not satisfactory. It was decided to construct a harmonised variable for Q.57, taking into account some other variables from the questionnaire (social status, living alone etc.) in order to differentiate the population. The outcome variable is included as received from the principal investigator.

- 1 -- (lowest quartile; except BELGIUM, ITALY and SPAIN)
- 2 -
- 3 +
- 4 ++ (highest quartile; except BELGIUM, ITALY and SPAIN)
- 5 NA/DK/Refusal

## v404 - Q73 EMPLOYMENT HOW MUCH SKILL NEEDED

Q.73

QUESTIONS Q.68 TO Q.80 TO THOSE IN FULL TIME OR PART TIME EMPLOYMENT - CODE 1 OR 2 IN Q.67

How much skill or training does your job really need? Please use this scale (SHOW CARD) going from 1 = no skill at all to 5 = a lot of skill and training.

0 NA

1 No skill at all

2 2

3 3

4 4

5 A lot of skill

## v412 - Q80 UNION MEMBERSHIP - REASON WHY NOT

Q.80

QUESTIONS Q.68 TO Q.80 TO THOSE IN FULL TIME OR PART TIME EMPLOYMENT - CODE 1 OR 2 IN Q.67

(IF NOT) Which is the reason, from this list, why you are not member of a trade union?

(SHOW CARD \_ ONLY ONE ANSWER)

(GO TO Q.92)

0 NA

1 There is no union where I work

2 Where I work the unions don't look after the interests of people like me

3 My employer does not like unions

4 I don't believe in unions

5 I'm going to join, but I haven't done so yet

6 Others

7 DK

9 INAP., not working, not answered 'no' to union membership (not coded 1, 2 in V395; not coded 2 in V411)

## v448 - Q91 UNEMPLOYED - MAIN REASON

Q.91

What is the main reason why you are unemployed?

(SHOW CARD - ONE ANSWER ONLY)

(GO TO Q.92)

0 NA

1 The jobs that I have been offered did not really appeal to me

2 I can get at least as much money on the dole as I could in a job

3 There are no jobs available that suit my training and qualifications

4 There are absolutely no jobs at all in this area

5 Personal or family reasons (e.g. looking after children)

6 Other reason

7 DK

v449 - Q92 FORMAL EDUCATION FIN AFTER SCHOOL

Q.92

QUESTIONS Q.92 TO Q.101 TO ALL YOUNG PEOPLE EXCEPT THOSE STILL AT SCHOOL OR IN HIGHER EDUCATION - CODE 3 IN Q.67

How long after the end of minimum schoolleaving age, did you finish your formal education?

- 0 NA
- 1 Immediately after
- 2 1 year later
- 3 2 years later
- 4 3 years later
- 5 4 years later
- 6 Later still
- 7 DK
- 9 INAP., still at school or in higher education (coded 3 in V395)

Note:

Last trend: EB28.1 Q.326

Questions Q.92 to Q.101 (V449 - V467)

Questions Q.92 to Q.101 are supposed to be asked to all young people except those still at school or in higher education. The respondents to be excluded are coded '3' in Q.67 (V395).

For Belgium, the Netherlands, Germany (East and West), and Portugal the group of "young people still at school or in higher education" was not completely excluded from the uni- verse for questions Q.92 to Q.101. Especially in the cases of the Netherlands and Germany the interviewer instructions in the field questionnaires were not clear at all. Also in the case of other countries the responses for the excluded group of respondents was collapsed into one of the respective substantive categories instead of being left as missing.

In order to make data comparable for all countries ZA has recoded all cases to be excluded to inaplicated (INAP). Responses to questions Q.92 to Q.101 should be analysed with caution.

In addition questions Q.95 to Q.99 (V461 - V465) are supposed to be asked only to those WHO DID ANY TRAINING COURSE AFTER FORMAL EDUCATION, i.e. respondents coded '1' in Q.94 (V460). In order to make data comparable for all countries ZA has recoded all these cases to inaplicated (INAP), although this was not the case in the original INRA data set for Belgium, the Netherlands, Germany (East and West), Denmark, Great Britain, Northern Ireland, Spain, and Portugal.

Note:

Last trend: EB28.1 Q.327

Questions Q.92 to Q.101 (V449 - V467)

Questions Q.92 to Q.101 are supposed to be asked to all young people except those still at school or in higher education. The respondents to be excluded are coded '3' in Q.67 (V395).

For Belgium, the Netherlands, Germany (East and West), and Portugal the group of "young people still at school or in higher education" was not completely excluded from the uni-verse for questions Q.92 to Q.101. Especially in the cases of the Netherlands and Germany the interviewer instructions in the field questionnaires were not clear at all. Also in the case of other countries the responses for the excluded group of respondents was collapsed into one of the respective substantive categories instead of being left as missing.

In order to make data comparable for all countries ZA has recoded all cases to be excluded to inaplicated (INAP). Responses to questions Q.92 to Q.101 should be analysed with caution.

In addition questions Q.95 to Q.99 (V461 - V465) are supposed to be asked only to those WHO DID ANY TRAINING COURSE AFTER FORMAL EDUCATION, i.e. respondents coded '1' in Q.94 (V460). In order to make data comparable for all countries ZA has recoded all these cases to inaplicated (INAP), although this was not the case in the original INRA data set for Belgium, the Netherlands, Germany (East and West), Denmark, Great Britain, Northern Ireland, Spain, and Portugal.

v458 - Q93 EDUCATION FINISHED OTHER REASON

Q.93

Why did you finish your formal education when you did?

(SHOW CARD - SEVERAL ANSWERS POSSIBLE)

Q.93\_9 Other

0 Not mentioned

1 Mentioned

9 INAP., still at school or in higher education (coded 3 in V395)

Note:

Last trend: EB28.1 Q.327

Questions Q.92 to Q.101 (V449 - V467)

Questions Q.92 to Q.101 are supposed to be asked to all young people except those still at school or in higher education. The respondents to be excluded are coded '3' in Q.67 (V395).

For Belgium, the Netherlands, Germany (East and West), and Portugal the group of "young people still at school or in higher education" was not completely excluded from the universe for questions Q.92 to Q.101. Especially in the cases of the Netherlands and Germany the interviewer instructions in the field questionnaires were not clear at all. Also in the case of other countries the responses for the excluded group of respondents was collapsed into one of the respective substantive categories instead of being left as missing.

In order to make data comparable for all countries ZA has recoded all cases to be excluded to inaplicated (INAP). Responses to questions Q.92 to Q.101 should be analysed with caution.

In addition questions Q.95 to Q.99 (V461 - V465) are supposed to be asked only to those WHO DID ANY TRAINING COURSE AFTER FORMAL EDUCATION, i.e. respondents coded '1' in Q.94 (V460). In order to make data comparable for all countries ZA has recoded all these cases to inaplicated (INAP), although this was not the case in the original INRA data set for Belgium, the Netherlands, Germany (East and West), Denmark, Great Britain, Northern Ireland, Spain, and Portugal.

Questions Q.92 to Q.101 are supposed to be asked to all young people except those still at school or in higher education. The respondents to be excluded are coded '3' in Q.67 (V395).

For Belgium, the Netherlands, Germany (East and West), and Portugal the group of "young people still at school or in higher education" was not completely excluded from the universe for questions Q.92 to Q.101. Especially in the cases of the Netherlands and Germany the interviewer instructions in the field questionnaires were not clear at all. Also in the case of other countries the responses for the excluded group of respondents was collapsed into one of the respective substantive categories instead of being left as missing.

In order to make data comparable for all countries ZA has recoded all cases to be excluded to inaplicated (INAP). Responses to questions Q.92 to Q.101 should be analysed with caution.

In addition questions Q.95 to Q.99 (V461 - V465) are supposed to be asked only to those WHO DID ANY TRAINING COURSE AFTER FORMAL EDUCATION, i.e. respondents coded '1' in Q.94 (V460). In order to make data comparable for all countries ZA has recoded all these cases to inaplicated (INAP), although this was not the case in the original INRA data set for Belgium, the Netherlands, Germany (East and West), Denmark, Great Britain, Northern Ireland, Spain, and Portugal.

v497 - P6 SIZE OF COMMUNITY - SEE DOCUMENT

P.6 (Objective population) size of locality

in France (FR):

- 1 < 2000 inhabitants
- 2 2000 - < 20000 inhabitants
- 3 20001 - < 100000 inhabitants
- 4 >100000 inhabitants
- 5 Paris

in Belgium (BE):

- 1 Grand centre
- 2 Localite urbaine
- 3 Localite secondaire
- 4 Autre localite

in Netherlands (NL):

- 1 < 5000 inhabitants
- 2 5000 < 10000 inhabitants
- 3 10000 < 20000 inhabitants
- 4 20000 < 50000 Inhabitants
- 5 50000 < 100000 inhabitants
- 6 100000 < 400000 inhabitants
- 7 >400000 inhabitants

in Germany - West (DE\_W):

- 1 < 2000 inhabitants
- 2 2000 < 5000 inhabitants
- 3 5000 < 20000 inhabitants
- 4 20000 < 50000 inhabitants
- 5 50000 < 100000 inhabitants
- 6 100000 < 500000 inhabitants
- 7 >500000 inhabitants

in Italy (IT):

- 1 < 10000 inhabitants
- 2 10001 - 100000 inhabitants
- 3 100001 - 250000 inhabitants
- 4 >250000 inhabitants

in Luxembourg (LU):

- 1 < 2500 inhabitants

- 2 2501 < 5000 inhabitants
- 3 5001 < 10000 inhabitants
- 4 10001 < 20000 inhabitants
- 5 20001 < 50000 inhabitants
- 6 >50000 (Luxembourg ville)

in Denmark (DK):

- 1 < 2000 inhabitants
- 2 2000 < 4999 inhabitants
- 3 5000 < 9999 inhabitants
- 4 10000 < 19999 inhabitants
- 5 20000 < 49999 inhabitants
- 6 50000 < 99999 inhabitants
- 7 >100000 inhabitants

in Ireland (IE):

- 1 < 2000 inhabitants
- 2 2001 < 20000 inhabitants
- 3 20001 < 100000 inhabitants
- 4 >100000 inhabitants

in Great Britain (GB\_GBN):

- 1 Metropolitan country
- 2 Other 100% urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB\_NIR):

- 1 < 2000 inhabitants
- 2 2001 < 20000 inhabitants
- 3 20001 < 100000 inhabitants
- 4 >100000 inhabitants

in Greece (GR):

- 1 1 < 1000 inhabitants
- 2 1001 < 2000 inhabitants
- 3 2001 < 3000 inhabitants
- 4 3001 < 5000 inhabitants
- 5 5001 < 10000 inhabitant,
- 6 10001 < 20000 inhabitants
- 7 20001 < 30000 inhabitants
- 8 30001 < 50000 inhabitants
- 9 50001 < 100000 inhabitants
- 10 100001 < 500000 inhabitants
- 11 500001 < 1000000 inhabitants
- 12 1000001 < 5000000 inhabitants

in Spain (ES):

- 1 < 2000 inhabitants
- 2 2001 < 10000 inhabitants
- 3 10001 < 50000 inhabitants
- 4 50001 < 100000 inhabitants
- 5 100001 < 300000 inhabitants
- 6 300001 < 500000 inhabitants
- 7 500001 < 1000000 inhabitants
- 8 >1000000 inhabitants

in Portugal (PT):

- 1 < 100 inhabitants
- 2 101 < 200 inhabitants
- 3 201 < 500 inhabitants
- 4 501 < 1000 inhabitants
- 5 1001 < 2000 inhabitants
- 6 2001 < 5000 inhabitants
- 7 5001 < 10000 inhabitants
- 8 10001 < 30000 inhabitants
- 9 30001 < 100000 inhabitants
- 10 100001 < 500000 inhabitants
- 11 >500000 inhabitants

in Germany - East (DE\_E):

- 1 < 2000 inhabitants
- 2 2000 < 5000 inhabitants
- 3 5000 < 20000 inhabitants
- 4 20000 < 50000 inhabitants
- 5 50000 < 100000 inhabitants
- 6 100000 < 500000 inhabitants
- 7 >500000 inhabitants

Note:

SIZE OF COMMUNITY data for GREECE are dubious. Five categories are documented in the original codebook and in the SPSS dataset, while the GREEK field questionnaire predefines 12 categories. In addition category 4 (50.001 - 1.000.000 inhabitants) has no mentions at all. Comparisons with corresponding frequency distributions in other Eurobarometer waves indicate to all appearances that category 4 was collapsed into category 5 during the original data processing.

v499 - P7R REGION II - SEE DOCUMENT

P.7\_2 Region II (NUTS I LEVEL)

Only in the case of West Germany "Region II" corresponds to the variable "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT Nomenclature for regional statistics (NUTS).

99 Inap. (no region II)

in France (FR):

France (EUROSTAT NUTS I LEVEL)

- 1 Ile De France
- 2 Bassin Parisien
- 3 Nord-pas De Calais
- 4 East
- 5 West
- 6 South West
- 7 Centre East
- 8 Mediterranee

in Belgium (BE):

Belgium (EUROSTAT NUTS I LEVEL) (Regions)

- 1 Wallonie
- 2 Bruxelles
- 3 Vlaanderen

in Netherlands (NL):

Netherlands (EUROSTAT NUTS I LEVEL) (Landsdelen)

- 1 North
- 2 East
- 3 West
- 4 South

in Germany - West (DE\_W):

West Germany (EUROSTAT NUTS I LEVEL) (Bundeslaender)

- 1 Schleswig Holstein
- 2 Hamburg
- 3 Niedersachsen
- 4 Bremen
- 5 Nordrhein - Westfalen
- 6 Hessen
- 7 Rheinland Pfalz
- 8 Baden Wuerttemberg
- 9 Bayern

10 Saarland

11 Berlin (West)

in Italy (IT):

Italy (EUROSTAT NUTS I LEVEL) (Gruppi di regioni)

1 North West

2 Lombardia

3 North East

4 Emilia Romagna

5 Centre

6 Lazio

7 Molise E Abruzzi

8 Campania

9 South

10 Sicilia

11 Sardegna

in United Kingdom (GB):

United Kingdom (EUROSTAT NUTS I LEVEL - modified) (Standard Regions)

1 Scotland

2 North, Yorkshire, Humberside, and North West

3 East/West Midlands, East Anglia

4 Wales

5 South East

6 South West

7 Northern Ireland

in Spain (ES):

1 Galicia

2 North

3 North-East

4 Aragon, Rioja

5 Madrid

6 Centre

7 Cataluna

8 East

9 South

10 Canarias

in Germany - East (DE\_E):

99 Inap. (no region II)

Note:

East Germany (EUROSTAT NUTS I LEVEL) - The East Germany regions should not yet be collapsed into the new East Germany federal units "Laender" as in later Eurobarometers. The East German sample was drawn immediately after the unification and the new "Laender" were not yet considered. The regions are based on the former GDR administrative units called "Bezirke."

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

v500 - C1 OPINION LEADERSHIP INDEX

C.1 OPINION LEADERSHIP INDEX

0 DK / NA

1 - - low

2 -

3 +

4 + + high

Derivation:

Cognitive mobilization index is based on the answers to the following two questions (Q.5 and Q.4):

(a) "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" and

(b) "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?"

Labels are: ++, +, -, --.

- Interviewees giving affirmative answers to both questions are labeled ++.

- Interviewees giving negative answers to both questions are labeled --.

- Middle categories (+ and -) are constituted correspondingly.

CODE 1: coded 3, 4, 5 or 0 for V24 and 3 for V25; or coded 3 or 4 for V24 and 3, 4 or 0 for V25

CODE 2: coded 3, 4, 5 or 0 for V24 and 2 for V25; or coded 1 or 2 for V24 and 3, 4 or 0 for V25

CODE 3: coded 3, 4, 5 or 0 for V24 and 1 for V25; or coded 1 or 2 for V24 and 2 for V25

CODE 4: coded 1 or 2 for V24 and 1 for V25

CODE 0: coded 0 or 5 for V24 and 0 or 4 for V25

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates, see Ronald Inglehart, *the Silent Revolution: Changing Values and Political Styles Among Western Publics* (Princeton University Press, 1977), Chapter 11.

v501 - C2 VALUE ORIENTATION POST-MATERIALISM

C.2 VALUE ORIENTATION

Materialist/Post-materialist values index

- 0 DK/NA
- 1 Materialist
- 2 Mixed
- 3 Post materialist

Derivation:

This index was constructed from responses to Q6\_1 and Q6\_2: "There is a lot of talk these days about what this country's goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority (show card). Would you please say which of them you yourself consider most important in the long run?" (one answer only) "And what would be your second choice?"

Card: (1) maintaining order in the nation (2) giving the people more say in important government decisions (3) fighting rising prices (4) protecting freedom of speech.

- Respondents combining item (1) and (3) are labeled "materialist",
- Those combining items (2) and (4) are labeled "post-materialist", and
- Others are labeled "mixed".

CODE 1: coded 3 for V26 and 1 for V27

CODE 2: coded 1 or 3 for V26 and 2 or 4 for V27; or coded 2 or 4 for V26 and 1 or 3 for V27; or coded 0 or 5 for either V26 OR V27

CODE 3: coded 2 for V26 and 4 for V27; or coded 4 for V26 and 2 for V27

CODE 0: coded 0 or 5 for V26 and 0 or 5 for V27; including 3 cases coded identical in V26 and V27

For a complete discussion of this variable, see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles Among Western Publics* (Princeton University Press, 1977).

v502 - C3 EC SUPPORT TYPOLOGY - EUROP ATTITUDES

C.3 TYPOLOGY OF EUROPEAN ATTITUDES

0 DK/NA

1 Positive attitudes

2 Ambivalent attitudes

3 Negative attitudes

Derivation:

This variable was constructed from responses to questions Q.20 and Q.17:

"Generally speaking, do you think that (your country's) membership of (in) the european community is: a good thing; a bad thing; neither good nor bad?" (= membership) and "in general, are you for or against efforts being made to unify Western Europe? Are you... for very much; for, to some extent; against, to some extent; against, very much?" (= unification).

Positive = membership: "good" and unification: "for, very much"

Ambivalent = membership: "neither good nor bad" and unification: "for, very much" or membership: "good" and unification: "against, to some extent"

Negative = membership: "bad" and unification: "against"

The index construction can be modified to suit specific needs. Especially the responses coded as 'missing' (code 0) might also be considered as 'ambivalent attitudes (code 2).

CODE 1: coded 1 for V123 and either 1 or 2 for V120

CODE 2: coded 0 or 4 for V123; or coded 1 for V123 and either 3, 4, 5, or 0 for V120; or coded 2 for V123; or coded 3 for V123 and either 1, 2, 5, 0 for V120

CODE 3: coded 3 for V123 and either 3 or 4 for V120

CODE 0: coded 0 or 4 for V123 and 0 or 5 for V120

v503 - C4 OCCUPATION RECODE - SOC PROF STATUS

C.4 SOCIO PROFESSIONAL STATUS

0 Other answers (never any paid work,NA)

1 Farmer & fisher

2 Professionals

3 Shops/company owners

4 Employed professionals

5 General management

6 Middle management

7 Other office employees

8 Non office employees

9 Supervisors

10 Skilled manuals

11 Other manuals

Derivation:

Roughly half of the representative sample of the European community public was without paid work. Basing cross-analyses on "occupation" (D.17) would exclude half of the respondents from analysis. An alternative, also used in past Eurobarometers, is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner.

The following standard was used if the respondent is the main income earner (i.e. head of household):

- for those in paid work it is based on their own present occupation (D.17).

- for those not in paid work, "former occupation" (D.18) was used, if applicable (retired, housewives having been in paid work in the past, temporarily not working, unemployed).

If the respondent is NOT the main income earner, the occupation of the "head of household" was used, if applicable (D.23). If the "head of household" was not performing a paid work at the time of the interview, his or her "former occupation" (D.24) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses.

v504 - C6 EC SUPPORT - COMMITMENT COMMON MARKET

C.6 COMMITMENT TO THE COMMON MARKET

Support for the European Community Index

- 1 Strong opposition
- 2 Moderate opposition
- 3 Neutral position
- 4 Moderate support
- 5 Strong support

Derivation:

This index of support for the E.C. was constructed from responses to two questions (Q.20 and Q.22):

a) Generally speaking, do you think that (your country's) membership of the European community (common market) is ... a good thing / a bad thing / neither good nor bad?

b) If you were told tomorrow that the European Community (Common Market) had been scrapped, would you be very sorry about it, indifferent or very relieved?

v505 - C7 POLITICAL ORIENTATION 7-POINT-TYPOL

C.7 POLITICAL ORIENTATION - TYPOLOGY 7

- 1 TYPE I
- 2 TYPE II
- 3 TYPE III
- 4 TYPE IV
- 5 TYPE V
- 6 TYPE VI
- 7 TYPE VII

Derivation:

This typology was constructed from respondents' scores on the cognitive mobilization index (C.1), the materialist/post-materialist value index (C.2) and responses to the question:

On this card are three basic kinds of attitudes towards the society we live in. Please choose the one which best describes your own opinion (Q.7).

- (1) The entire way our society is organised must be radically changed by revolutionary action.
- (2) Our society must be gradually improved by reforms.
- (3) Our present society must be strongly defended against all subversive forces.

For details on the construction of this typology and its correlates, see Ronald Inglehart and Jacques-Rene Rabier "Economic Uncertainty And European Solidarity," *Annals Of The American Academy Of Political And Social Science* (vol. 440, 1978).

Note:

This index is included as received from the principal investigator.
