## Acknowledgements

---

The Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and the GESIS - Leibniz Institute for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Individual level micro data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the data catalogue ([https://search.gesis.org/research\\_data](https://search.gesis.org/research_data)). Access to the Eurobarometer primary data is also provided by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, as well as supported by the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send bibliographic citations for each completed manuscript or thesis abstract to the providing data archive, GESIS or ICPSR. Please indicate in a cover letter which data (surveys and variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

## 1 Study description – Eurobarometer 89.2

### 1.1 Bibliographic information

#### 1.1.1 Archive study numbers

GESIS: ZA7482

ICPSR: [not yet assigned]

Under a co-operative arrangement for the archival processing and distribution of Standard & Special Eurobarometer, ICPSR and GESIS employ its own archive study identification number and persistent URL. Apart from that the datasets are completely congruent as far as identified by the same release version.

#### 1.1.2 Title and archive subtitle

Eurobarometer 89.2

One year to go to the European elections 2019

April 2018

#### 1.1.3 Principal investigator(s)

European Parliament, Brussels;

Directorate-General for Communication, Public Opinion Monitoring Unit

European Commission, Brussels;

Directorate-General for Communication (COMM.A.1 'Media monitoring, Media Analysis and Eurobarometer')

#### 1.1.4 Bibliographic citation and DOI reference

Publications based on data collections which are made available through ICPSR or GESIS should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Parliament and European Commission, Brussels: Eurobarometer 89.2, April 2018.

Kantar Public, Brussels [Producer];

GESIS, Cologne [Publisher]: ZA7482, dataset version 2.0.0, DOI: [10.4232/1.14102](https://doi.org/10.4232/1.14102) (2023).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and potential errata and update documentation in the GESIS data catalogue.

## 1.2 Content

### 1.2.1 Abstract

Eurobarometer 89.2 covered the following special topic: (1) One year to go to the European elections 2019. The Respondents' opinions were collected regarding their level of interest in European affairs, and their attitudes towards the European Parliament. Questions regarding European and national elections addressed the interest and the importance to vote, and the reasons for the voting behavior. Respondents were asked about priority themes for the upcoming election and their opinion about the election process for the European Parliament. Additionally, respondents were also questioned regarding their perception and expectation of European Union policies and advantages of European Union membership. Finally, respondents were asked about their opinion on new political parties and movements, and their satisfaction with democracy.

Demographic and other background information collected includes left or right self-placement on political scale, age, gender, nationality, marital status, occupation, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone, difficulties in paying bills, self-assessed social class, Internet use, life satisfaction, life conditions in five years, political discussion frequency, opinions on whether their voice counts in their country/EU, and image of the EU. In addition, country-specific data includes type and size of locality, region of residence, and language of interview (select countries).

### 1.2.2 Topic classification

- International Institutions, Relations, Conditions
- Political issues
- Political Attitudes and Behavior

#### CESSDA Topic Classification

- 11 Politics
- 11.2 International politics and organization
- 11.5 Mass political behavior, attitudes / opinion

### 1.2.3 Related publications

- European Parliament: European Parliament Special Eurobarometer (EB 89.2): Democracy on the move - One year to go to the European Elections. Conducted by Kantar Public at the request of the European Parliament and co-ordinated by the European Commission, Directorate-General for Communication. Brussels, May 2018.

## 1.3 Universe

In all, Eurobarometer 89.2 interviewed 27.601 citizens in the 28 countries of the European Union after the 2013 enlargement (accession of Croatia in July 2013). All respondents were residents in the respective country, nationals and non-national EU-citizens, and aged 15 and over. They were supposed to have

sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for East and West Germany.

## 1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except Germany with separate samples for the Eastern (500) and the Western part (1000), as well as Luxembourg, Republic of Cyprus, and Malta with 500 interviews each. Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. The effective number of realized interviews in this round is indicated in table 1.

## 1.5 Fieldwork

From April 11 to April 22, 2018, Kantar Public carried out the fieldwork for this Eurobarometer, at the request of the European Parliament, Directorate-General for Communication, and at the request of the European Commission, Directorate-General for Communication. Kantar Public is based in Brussels, Belgium, and coordinates the fieldwork carried out through its network of national institutes:

## 1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by Kantar Public. Interviews were conducted face-to-face in people's home in the respective national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence. Multi-language questionnaires are applied if appropriate (Belgium, Luxembourg, Spain, Finland, Estonia, Latvia, and Malta).

In each country only the national language version(s) of the questionnaire is (are) used; in countries with more than one official language, the language version is selected at the beginning of the interview.

## 1.7 Weighting

In general, the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis, a national weighting procedure, using marginal and intercellular weighting, is applied. As such, in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This post-stratification weighting is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made

available.

For the descriptive analysis of individual samples or their comparison up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The population size weighting factors correct for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general, all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2, a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately, as documented in the respective study and weight variable description. In some surveys, special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 89.2 provides two (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), and W3 (WEIGHT GERMANY ONLY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 excludes all other countries from calculation but include the post-stratification factors for Germany. Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight

variable w4 (WEIGHT UNITED KINGDOM) is obsolete and no longer included in the dataset.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A\_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A\_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole), and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY), all countries are included in calculations. Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 (WEIGHT UNITED KINGDOM) is obsolete and no longer included in the dataset. Additionally, starting with 89.2 formerly derived weight variables w4a 'WEIGHT RESULT FROM TARGET - UNITED KINGDOM' (Germany East and West separated) and w3a4a 'WEIGHT RESULT FROM TARGET - NATION' (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset. As a consequence country/sample identification variables 'cntry\_gb' and 'cntry\_de' (now identical to variable 'nation') are also obsolete starting with Eurobarometer 89.2.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members). All post-stratification factors are included.

Table 2: Overview of population size weights on European level

European Weights in Eurobarometer 89.2	Function
W5 to W9, W11, W14, W22, W23, W87	grouping EU member countries
W10, W13, W24, W94	grouping new member countries
-	grouping candidate/accession countries
-	grouping member + candidate/accession countries
W29, W30, W81, W82, W83, W84, W85, W86, W89, W90, W98, W99	grouping (non-)Eurozone countries
wextra	extrapolating population size (15+) for each country
W88, W91	grouping countries as surveyed for certain questions or question modules

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by the GESIS Eurobarometer Data Service from Kantar Public were checked for completeness, missing data and duplicate records, for illegal (wild) codes and for (formal) consistency of

response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76.1, the traditional variable naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals. The dot used in the original Kantar Public variable names for multiple response dummy variables is replaced by underscore in view of potential software incompatibilities.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('uniqid') for the complete dataset has been constructed from the Kantar country id (digits 1-2) and the Kantar case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tncntry'), applying the established archive standard codes for the Eurobarometer series ('country'), and an alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community). Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom (GB: ISO 3166-1-alpha-2 country code).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. region variable P7).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. GESIS has recoded these residual responses in the case of uncommon minor inconsistencies in accordance with the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from the English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by Kantar Public. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, GESIS, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Region NUTS 2 categories for Portugal have been edited and adapted to changes as of 2002 (NUTS version 2003) which are reflected in Eurobarometer starting with wave 62 (confirmed by TNS). Region NUTS 1 categories for Greece have been edited correcting for the non-coverage of Ionian and Aegean Islands starting with Eurobarometer 62 (confirmed by TNS).

P7 (REGION – NUTS CODES) – variables ‘nuts’ and ‘nutslvl’: The integrated NUTS variable has been derived by GESIS from the original Kantar country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant time period (<https://ec.europa.eu/eurostat/web/nuts/history>).

Starting with 89.2 formerly derived weight variables w4a ‘WEIGHT RESULT FROM TARGET - UNITED KINGDOM’ (Germany East and West separated) and w3a4a ‘WEIGHT RESULT FROM TARGET - NATION’ (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset.

All INDEX and TOTAL variables have been checked and documented accordingly.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

## 1.9 Further remarks

Question module QA ‘One year to go to the European elections 2019’ was implemented on behalf of and financed by the European Parliament. It partly replicates questions formerly asked in the Special Eurobarometers 88.1 [ZA6925] and 87.1 [ZA6861] and introduces many new questions.

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

Starting with Eurobarometer 81.3 the category scheme for country specific protocol variables P7 (REGION) has changed for some countries, in particular introducing NUTS categories for Ireland, Estonia, and Croatia.

Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 ‘WEIGHT UNITED KINGDOM’ is obsolete and no longer included in the dataset. Additionally, starting with Eurobarometer 89.2 formerly derived weight variables w4a ‘WEIGHT RESULT FROM TARGET - UNITED KINGDOM’ (Germany East and West separated) and w3a4a ‘WEIGHT RESULT FROM TARGET - NATION’ (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset.

Questions qa5 to qa7 are not part of the basic and national questionnaires and have not been part of the

dataset delivery. These questions are also not presented in the report and table volumes.

Please note that contrary to the basic questionnaire and the field questionnaire questions qa8, qa9, qa11a, qa11b, qa12 and qa13 have not been surveyed in the United Kingdom, and for these variables, there are also no results presented for the United Kingdom in the official tabular reports.

Please note the differences in the question and answer texts for question qa15a, qa15b and qa15c. While in the basic questionnaire the wording 'to vote/voting' is applied, in the official tabular volumes and the dataset 'to go to vote/going to vote' is used in question and answer texts.

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

Please note that contrary to the basic questionnaire and the field questionnaires questions qa21 and qa22 have not been surveyed in Belgium and Luxembourg. In the original dataset delivery variables qa21 and qa22 have been coded system missing for Belgian and Luxembourgish cases and accordingly no results are presented for these two samples for both questions in the official tabular reports.

Please note that gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents.

The variable labels for qa3 and paeu were corrected in version v2.0.0. Variables qa22r\_1 and qa22r\_2 were corrected in version v2.0.0.

The end-of-fieldwork dates implied by the values in protocol variable p1 (date of interview) differ slightly from those indicated in the technical specifications provided by Kantar for several countries.

Two additional weights were made available for special country sub-groups. These weights are supplied for use with the questions as indicated in the variable label. W88 (WEIGHT SPECIAL COUNTRY GROUP QA10) excludes Belgium, Luxembourg and the United Kingdom. W91 (WEIGHT SPECIAL COUNTRY GROUP QA21 & QA22) excludes Belgium and Luxembourg.

For Eurobarometer 89.2 no country specific Kantar case id for DE-W, DE-E and GB is provided (variable 'caseid' is coded '9999999', variable uniqid is coded '999999999'). The dataset does include an original unique serial id across all countries (variable 'serialid').

Data for protocol variables p8 (postal code), p9 (sample point number) and p10 (interviewer number) have not been made available.

## 2 Eurobarometer series description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general, they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; 'Attitudes towards Europe' (GESIS study ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He had the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid-nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999, the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present, the Eurobarometer surveys are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.3 'Media Monitoring & Eurobarometer', with Oana Hriscu as acting head of the unit and Roberto Santaniello as head of the Eurobarometer sector.

The special topic modules are requested by the respectively responsible EC Directorate General, as regards the content. Since 2007, the European Parliament is commissioning its own survey ('Parlemeter') through the Public Opinion Monitoring Unit of the European Parliament, in close cooperation with the DG COMM unit and within the same survey framework.

The main survey results are regularly published on the European Commission's Public Opinion website (<https://europa.eu/eurobarometer>) in official standard and special topic reports; detailed tabular reports are published through the European Union Open Data Portal (<https://data.europa.eu/data>).

## 2.4 Development of geographical and population coverage

In all European Union (formerly European Communities) member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics, starting in 1999 (EB51.1). Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the Standard Eurobarometer series, even before starting the accession process (e.g. Turkey or Macedonia). Further countries are continuously added in accordance with the EU membership application and accession process.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriot Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

EU History	Survey (start)	Country (Sample)	ISO Code Alpha-2	Standard Sample Size	Remarks

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24, 16-30	17, 28.1, 34.2, 47.2OVR, 55.1OVR, 85.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR

Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)
Sampling experiment	Non-Nationals	41.0

## 2.5 Standard question program and special topics

The Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently, Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990), additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues (table 5). Selected subsets of standard trend questions appear in the context of related special topics (e.g. 'The Future of Europe' or 'European Parliament Eurobarometer').

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <https://www.gesis.org/eurobarometer-data-service/home/>

## 3 Dataset structure and standards

---

The processing and documentation of the Standard and Special Eurobarometer are based on standards agreed upon between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Eurobarometer Data Service, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable, it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structures

In general, the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1, the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise, from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry\_de', 'w4a'/'cntry\_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except for multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country

specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49, the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1, an additional standardized REGION variable 'nuts' (REGION - NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

### 3.2.2 Missing values

In general, missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ('don't know') responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. 'not ascertained' resp. 'no answer') and the value 9 (99, 999, ...) for INAP (i.e. 'inappropriate' resp. 'not applicable'). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or 'level', e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

As noted in chapter 1.8, missing answers (NA) represented in the original dataset by blanks (system missing) have been recoded to standard values by GESIS. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

### 3.3 International documentation standard (DDI)

The study and variable level documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The variable level documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL\* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AL	Albania	IE	Ireland
AT	Austria	IT	Italy
BE	Belgium	IS	Iceland
BG	Bulgaria	LT	Lithuania
CY	Cyprus	LU	Luxembourg

HR	Croatia	TR	Turkey
HU	Hungary	BA	Bosnia and Herzegovina
		RS-KM	Kosovo

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded 'real' values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the

sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																															
CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																															
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																															

## 5 Variable documentation

Variable, Label

Question Text (English Language)

studyno1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

Archive study number – distributor

Study number of the distributing data archive.

7482 GESIS STUDY ID ZA7482

studyno1

Value	Label	Missing	Count	Percent	Valid Percent
7482	GESIS STUDY ID ZA7482		27601	100.0	100.0
	Sum		27601	100.0	100.0
	Valid Cases		27601		

studyno2 - ARCHIVE STUDY NUMBER - PUBLISHER

Archive study number – publisher

Study number of the data archive which is publishing this dataset version.

7482 GESIS STUDY ID ZA7482

studyno2

Value	Label	Missing	Count	Percent	Valid Percent

#### doi - DIGITAL OBJECT IDENTIFIER

##### Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232.14102>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

##### doi

version - GESIS ARCHIVE VERSION & DATE

GESIS archive version & date

2.0.0 '2023-06-13'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

version

Value	Label	Missing	Count	Percent	Valid Percent
2.0.0 (2023-06-13)			27601	100.0	100.0

caseid - KANTAR CASE ID (SEE NOTE)

Kantar case ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (Kantar). The unique respondent identification variable uniqid adds the original country identification codes (tnscntry) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

For Eurobarometer 89.2 no country specific Kantar case ID for DE-W, DE-E and GB is provided (variable 'caseid' is coded '9999999', variable uniqid is coded '999999999'). The dataset does include an original unique serial ID across all countries (variable 'serialid').

uniqid - UNIQUE RESPONDENT ID (CASEID BY KANTAR COUNTRY CODE) (SEE NOTE)

Unique respondent ID (caseid by tnsctry)

This unique respondent identification is composed of the original Kantar country code and the original Kantar interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: United Kingdom; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 43: Turkey; 46: Croatia; 57: Cyprus (CY-TCC); 63: Macedonia (FYROM); 64: Montenegro; 70: Serbia; 71: Albania). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

For Eurobarometer 89.2 no country specific Kantar case ID for DE-W, DE-E and GB is provided (variable 'caseid' is coded '9999999', variable uniqid is coded '999999999'). The dataset does include an original unique serial ID across all countries (variable 'serialid').

Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom.

serialid - SERIAL CASE ID (PROVIDED BY KANTAR)

Serial case ID (provided by Kantar)

This unique respondent identification number has been provided by Kantar. It shows the position of the cases in the dataset, starting with 1 and ending with 27601 (total number of cases).

Note:

Actual number is coded.

tnscntry - ORIGINAL KANTAR COUNTRY/SAMPLE ID

Original Kantar country/sample ID

The original country identification codes as applied by the fieldwork institute (Kantar).

isocntry - COUNTRY CODE - ISO 3166

Country code - in accordance with ISO 3166-1-alpha-2 country code

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions in former waves. ISO standard codes are not available for the 'historical' East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized 'Turkish Republic of Northern Cyprus'.

Note:

Use of weighting factor w1 is optional.

Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom (GB: ISO 3166-1-alpha-2 country code).

#### w1 - WEIGHT RESULT FROM TARGET

w1 Weight result from target

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31 (March-April 1989)).

Note:

Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom.

## w5 - WEIGHT EU6

## w5 Weight EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w5 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

## w6 - WEIGHT EU9

## w6 Weight EU9

This POPULATION SIZE WEIGHT adds Denmark, Ireland and the United Kingdom to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w6 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

## Note:

Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom.

## w13 - WEIGHT EU NMS 10

## w13 Weight EU NMS 10

This POPULATION SIZE WEIGHT only refers to the group of the ten new members as of the enlargement in 2004: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w13 must be applied whenever these ten countries are to be analyzed altogether as a group.

## w14 - WEIGHT EU25

## w14 Weight EU25

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w14 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

## w87 - WEIGHT EU28 (NO UK)

## w87 WEIGHT EU28 (NO UK)

WEIGHT EU28 (NO UK) refers to the EU28 countries but excludes the United Kingdom. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU27B (EU28 NO UK). The post-stratification weighting factors are included. Weight w87 must be applied whenever these countries are to be analyzed altogether as a group.

## w24 - WEIGHT EU NMS 12

## w24 Weight EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w24 must be applied whenever these 12 countries are to be analyzed altogether as a group.

## w29 - WEIGHT EURO ZONE 15 (EU27)

## w29 Weight EURO ZONE 15 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

## w81 - WEIGHT EURO ZONE 16 (EU27)

## w81 Weight EURO ZONE 16 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2009. These are 16 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), and Slovakia (introduction as of January 1, 2009). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w81 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

## w99 - WEIGHT NON-EURO ZONE 18 (EU28)

## w99 Weight NON-EURO ZONE 18 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Lithuania, Poland, Bulgaria, Romania, Croatia) which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w99 must be applied whenever these countries are to be analyzed altogether as a group.

## w84 - WEIGHT NON-EURO ZONE 18 - EU NMS 12 (EU27)

## w84 Weight NON-EURO ZONE 18 - EU NMS 12 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w84 must be applied whenever these 6 countries are to be analyzed altogether as a group.

## w85 - WEIGHT EURO ZONE 19 (EU28)

## w85 Weight EURO ZONE 19 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2015. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), Latvia (introduction as of January 1, 2014), and Lithuania (introduction as of January 1, 2015). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w85 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

## w94 - WEIGHT EU NMS 13

## w94 Weight EU NMS 13

This POPULATION SIZE WEIGHT refers to the group of the 13 new member countries as of the enlargement in January 2007 and the accession of Croatia in July 2013: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, and Croatia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w94 must be applied whenever these 13 countries are to be analyzed altogether as a group.

## wextra - WEIGHT EXTRAPOLATED POPULATION 15+

wextra Weight extrapolated population 15+

Weight wextra extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the dataset.

Note:

Variable wextra was named wex in former versions of this dataset.

d11r1 - AGE: 4 GROUPS (RECODED)

Age of respondent - recoded to four categories

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older (see code 99 in d11)

Derivation:

This variable collapses answers to d11 into four categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

d11r2 - AGE: 6 GROUPS (RECODED)

Age of respondent - recoded to six categories

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older (see code 99 in d11)

Derivation:

This variable collapses answers to d11 into six categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

gen1 - GENERATION BEFORE 1928 (AGE 91 AND OLDER)

Generation born before 1928 (age 91 and older)

0 Not mentioned

1 Mentioned [incl. '99' in d11]

Derivation:

This variable summarizes all respondents born before 1928 and is based on questions d11 ('How old are you?'). Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents.

Note:

See d11 for complete question text.

gen4 - GENERATION 1946-1964

Generation born between 1946 and 1964 (age 54-72) - 'Babyboomer generation'

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes all respondents born between 1946 and 1964 and is based on questions d11 ('How old are you?'). Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents.

Note:

See d11 for complete question text.

qa10r - NEXT EP ELECTION - HOW LIKELY TO VOTE (RECODED)

Likelihood to vote in European Parliament elections - recoded to four categories

- 1 Total 'Not likely' (coded 1 to 5 in qa10)
- 2 Total 'Moderately likely' (coded 6 to 7 in qa10)
- 3 Total 'Likely' (coded 8 to 9 in qa10)
- 4 Total 'Very likely' (coded 10 in qa10)
- 8 DK
- 9 Inap. (BE LU GB in isocntry)

Derivation:

This variable collapses qa10 into four categories.

[qa10 The next European Parliament elections will be held in May 2019. How likely are you to vote in these elections? Please use a scale from 1 to 10, where '1' means 'not at all likely' and '10' means 'very likely'.]

Note:

See qa10 for complete question text.

Question QA10 has only been asked in Denmark, Germany, Greece, Spain, France, Ireland, Italy, The Netherlands, Portugal, Austria, Sweden, Finland, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, Croatia. The weight variable WEIGHT SPECIAL COUNTRY GROUP QA10 separates this group of countries and adapts the samples regarding population size and universe description. For more information see w88 and country group variable cntrgr88.

qa11b\_1 - EUROP ELEC CAMPAIGN THEMES 2ND: IMMIGRATION

[QA11A

Which of the following themes should be discussed as a matter of priority during the electoral campaign for the next European Parliament elections? Firstly?]

QA11B

IF 'NONE' OR 'DK' IN QA11A THEN SKIP QA11B

And then?

(SHOW SCREEN – READ OUT – MAX. 5 ANSWERS – DO NOT PROPOSE ANSWER GIVEN IN QA11A (EXCEPT FOR CODE 13) – ROTATE ANSWERS 1 TO 12 – DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER' – CODE 14 AND 15 ARE EXCLUSIVE)

QA11B\_1 Immigration

0 Not mentioned

1 Mentioned

9 Inap. None/Not interested or DK (coded 14 or 15 in qa11a)

99 Inap. (GB in isocntry)

Note:

Please note that contrary to the basic questionnaire and the field questionnaire questions qa8, qa9, qa11a, qa11b, qa12 and qa13 have not been surveyed in the United Kingdom, and for these variables, there are also no results presented for the United Kingdom in the official tabular reports.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa11b\_13 - EUROP ELEC CAMPAIGN THEMES 2ND: OTHER (SPONT)

[QA11A

Which of the following themes should be discussed as a matter of priority during the electoral campaign for the next European Parliament elections? Firstly?]

QA11B

IF 'NONE' OR 'DK' IN QA11A THEN SKIP QA11B

And then?

(SHOW SCREEN – READ OUT – MAX. 5 ANSWERS – DO NOT PROPOSE ANSWER GIVEN IN QA11A (EXCEPT FOR CODE 13) – ROTATE ANSWERS 1 TO 12 – DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER' – CODE 14 AND 15 ARE EXCLUSIVE)

QA11B\_13 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. None/Not interested or DK (coded 14 or 15 in qa11a)

99 Inap. (GB in isocntry)

Note:

Please note that contrary to the basic questionnaire and the field questionnaire questions qa8, qa9, qa11a, qa11b, qa12 and qa13 have not been surveyed in the United Kingdom, and for these variables, there are also no results presented for the United Kingdom in the official tabular reports.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa12 - EC PRESIDENT ELECTION ENCOURAGING TO VOTE

In the last European Parliament elections in 2014, the leading candidate in the European political family which had won the most votes was elected President of the European Commission. Europeans could therefore not only vote for who should represent them in the European Parliament, but also take part in the process of electing the President of the European Commission.

QA12

In the next European Parliament elections voters would have this opportunity for the second time. Would this make you more likely to vote than at present?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, definitely
- 2 Yes, probably
- 3 No, probably not
- 4 No, definitely not
- 5 DK
- 9 Inap. (GB in isocntry)

Note:

Please note that contrary to the basic questionnaire and the field questionnaire questions qa8, qa9, qa11a, qa11b, qa12 and qa13 have not been surveyed in the United Kingdom, and for these variables, there are also no results presented for the United Kingdom in the official tabular reports.

qa14a - HOW IMPORTANT TO VOTE IN EUROPEAN ELECTIONS

QA14A

DO NOT ASK QA14A AND QA14B IN THE UK

Please tell me how important or not it is for you personally to vote in the European Parliament elections? Please use a scale from 1 to 10, when 1 means that voting has no importance at all for you, and 10 means that you consider voting essential, or that is a key duty for you as a citizen. The remaining numbers indicates something in between these two positions.

(SHOW SCREEN – READ OUT – ONE ANSWER PER COLUMN)

qa14a\_r - HOW IMPORTANT TO VOTE IN EUROPEAN ELECTIONS (REC)

Importance to vote in European Parliament elections - recoded to three categories

- 1 Total 'Low importance' (coded 1 to 3 in qa14a)
- 2 Total 'Medium importance' (coded 4 to 7 in qa14a)
- 3 Total 'High importance' (coded 8 to 10 in qa14a)
- 8 DK
- 9 Inap. (GB in isocntry)

Derivation:

This variable collapses qa14a into three categories.

[qa14a Please tell me how important or not it is for you personally to vote in the European Parliament elections? Please use a scale from 1 to 10, when 1 means that voting has no importance at all for you, and 10 means that you consider voting essential, or that is a key duty for you as a citizen. The remaining numbers indicates something in between these two positions.]

Note:

See qa14a for complete question text.

qa15a - HOW EASY/DIFFICULT TO VOTE IN EUROPEAN PARL ELECTIONS

QA15A

DO NOT ASK QA15A AND QA15B IN THE UK

And now, please tell me how easy or difficult it is for you personally to vote in the European Parliament elections? Please use a scale from 1 to 10, when 1 means voting is very easy for you, and 10 means that voting is something you consider very difficult. The remaining numbers indicates something in between these two positions.

(SHOW SCREEN – READ OUT – ONE ANSWER PER COLUMN)

- 1 Box 1 - Going to vote is very easy for you
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - Going to vote is very difficult for you
- 11 DK
- 99 Inap. (GB in isocntry)

Note:

Please note the differences in the question and answer texts for question qa15a, qa15b and qa15c. While in the basic questionnaire the wording 'to vote/voting' is applied, in the official tabular volumes and the dataset 'to go to vote/going to vote' is used in question and answer texts.

qa15a\_r - HOW EASY/DIFFICULT TO VOTE IN EUROPEAN PARL ELECTIONS (REC)

Easiness to vote in European Parliament elections - recoded to three categories

- 1 Total 'Easy' (coded 1 to 3 in qa15a)
- 2 Total 'Moderate' (coded 4 to 7 in qa15a)
- 3 Total 'Difficult' (coded 8 to 10 in qa15a)
- 8 DK
- 9 Inap. (GB in isocntry)

Derivation:

This variable collapses qa15a into three categories.

[qa15a And now, please tell me how easy or difficult it is for you personally to vote in the European Parliament elections? Please use a scale from 1 to 10, when 1 means voting is very easy for you, and 10 means that voting is something you consider very difficult. The remaining numbers indicates something in between these two positions.]

Note:

See qa15a for complete question text.

Please note the differences in the question and answer texts for question qa15a, qa15b and qa15c. While in the basic questionnaire the wording 'to vote/voting' is applied, in the official tabular volumes and the dataset 'to go to vote/going to vote' is used in question and answer texts.

## qa15c - HOW EASY/DIFFICULT TO VOTE IN NATIONAL ELECTIONS IN UK

QA15C

ASK QA15C ONLY IN THE UK

How easy or difficult is it for you personally to vote in the national elections in the UK? Please use a scale from 1 to 10, when 1 means voting is very easy for you, and 10 means that voting is something you consider very difficult. The remaining numbers indicates something in between these two positions.

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 Box 1 - Going to vote is very easy for you
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - Going to vote is very difficult for you
- 11 DK
- 99 Inap. (not GB in isocntry)

Note:

Please note the differences in the question and answer texts for question qa15a, qa15b and qa15c. While in the basic questionnaire the wording 'to vote/voting' is applied, in the official tabular volumes and the dataset 'to go to vote/going to vote' is used in question and answer texts.

qa15c, weighted by w1

Value	Label	Missing	Count	Percent	Valid Percent
1	Box 1 - Going to vote is very easy for you		662	2.4	67.5

## qa15c\_r - HOW EASY/DIFFICULT TO VOTE IN NATIONAL ELECTIONS IN UK (REC)

Easiness to vote in national elections in UK - recoded to three categories

- 1 Total 'Easy' (coded 1 to 3 in qa15c)
- 2 Total 'Moderate' (coded 4 to 7 in qa15c)
- 3 Total 'Difficult' (coded 8 to 10 in qa15c)
- 8 DK
- 9 Inap. (not GB in isocntry)

Derivation:

This variable collapses qa15c into three categories.

[qa15c How easy or difficult is it for you personally to vote in the national elections in the UK? Please use a scale from 1 to 10, when 1 means voting is very easy for you, and 10 means that voting is something you consider very difficult. The remaining numbers indicates something in between these two positions.]

Note:

See qa15c for complete question text.

Please note the differences in the question and answer texts for question qa15a, qa15b and qa15c. While in the basic questionnaire the wording 'to vote/voting' is applied, in the official tabular volumes and the dataset 'to go to vote/going to vote' is used in question and answer texts.

qa15c\_r, weighted by w1

Value	Label	Missing	Count	Percent	Valid Percent
1	Total 'Easy' (1-3 in qa15c)		764	2.8	77.9
2	Total 'Moderate' (4-7 in qa15c)		89	0.3	9.1
3	Total 'Difficult' (8-10 in qa15c)		128	0.5	13.0
8	DK	M	60	0.2	
9	Inap. (not GB in isocntry)	M	26561	96.2

Regardless of how important you personally think it is to vote, what, in your opinion, are the main reasons why people vote in the European Parliament elections? Firstly?]

QA16B

IF 'NONE' OR 'DK' IN QA16A THEN SKIP QA16B

And then?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS – DO NOT PROPOSE ANSWER GIVEN IN QA16A (EXCEPT FOR CODE 11) – ROTATE ANSWERS 1 TO 10 – DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER' – CODE 12 AND 13 ARE EXCLUSIVE)

QA16B\_1 It is their duty as citizens

0 Not mentioned

1 Mentioned

9 Inap. None or DK (coded 12 or 13 in qa16a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa16b\_8 - REASON PEOPLE VOTE IN EU ELECTIONS 2ND: SYSTEMATICALLY VOTE

[QA16A

Regardless of how important you personally think it is to vote, what, in your opinion, are the main reasons why people vote in the European Parliament elections? Firstly?]

QA16B

IF 'NONE' OR 'DK' IN QA16A THEN SKIP QA16B

And then?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS – DO NOT PROPOSE ANSWER GIVEN IN QA16A (EXCEPT FOR CODE 11) – ROTATE ANSWERS 1 TO 10 – DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER' – CODE 12 AND 13 ARE EXCLUSIVE)

QA16B\_8 They systematically vote in elections

0 Not mentioned

1 Mentioned

9 Inap. None or DK (coded 12 or 13 in qa16a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa16r\_1 - REASON PEOPLE VOTE IN EU ELECTIONS: CIVIC REASONS (SUM)

Reasons people vote in European Parliament elections - civic reasons summarized

0 no Civic reasons

1 Total 'Civic reasons'

Derivation:

This variable summarizes respondents coded 1, 2, 4 or 8 in qa16a and/or coded 1 'Mentioned' in qa16b\_1, qa16b\_2, qa16b\_4 and/or qa16b\_8.

[qa16a Regardless of how important you personally think it is to vote, what, in your opinion, are the main reasons why people vote in the European Parliament elections? Firstly?

qa16b And then?

qa16b\_1 It is their duty as citizens

qa16b\_2 They can change things by voting in the European Parliament elections

qa16b\_4 They want to express their discontent

qa16b\_8 They systematically vote in elections]

Note:

See qa16a and qa16b for complete question text.

Variable qa16r\_1 was named qa16r.1 in former versions of this dataset.

qa17a - REASON PEOPLE NOT VOTE IN EU ELECT - FIRSTLY

QA17A

Still regardless of how important you personally think it is to vote, what are the reasons why people do not vote in the European Parliament elections? Firstly?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY – ROTATE ANSWERS 1 TO 9)

- 1 They are not interested in politics, or in elections in general
- 2 They believe their vote will not change anything
- 3 They are against Europe, the European Union, the building of Europe
- 4 They do not know enough about the role of the European Parliament
- 5 They believe that the European Parliament does not deal sufficiently with problems that concern people like them
- 6 They believe that they are not sufficiently informed on the positioning of the different political parties on European issues
- 7 They have no time or something more important to do
- 8 They do not know where or how to vote
- 9 They distrust the political system
- 10 Other (SPONTANEOUS)
- 11 None (SPONTANEOUS)
- 12 DK

qa17b\_1 - REASON PEOPLE NOT VOTE IN EU ELECT 2ND: NOT INTERESTED

[QA17A

Still regardless of how important you personally think it is to vote, what are the reasons why people do not vote in the European Parliament elections? Firstly?]

QA17B

IF 'NONE' OR 'DK' IN QA17A THEN SKIP QA17B

And then?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS – DO NOT PROPOSE ANSWER GIVEN IN QA17A (EXCEPT FOR CODE 10) – ROTATE ANSWERS 1 TO 9 – DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER' – CODE 11 AND 12 ARE EXCLUSIVE)

QA17B\_1 They are not interested in politics, or in elections in general

0 Not mentioned

1 Mentioned

9 Inap. None or DK (coded 11 or 12 in qa17a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa17b\_7 - REASON PEOPLE NOT VOTE IN EU ELECT 2ND: LACK OF TIME/LOW PRIORITY

[QA17A

Still regardless of how important you personally think it is to vote, what are the reasons why people do not vote in the European Parliament elections? Firstly?]

QA17B

IF 'NONE' OR 'DK' IN QA17A THEN SKIP QA17B

And then?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS – DO NOT PROPOSE ANSWER GIVEN IN QA17A (EXCEPT FOR CODE 10) – ROTATE ANSWERS 1 TO 9 – DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER' – CODE 11 AND 12 ARE EXCLUSIVE)

QA17B\_7 They have no time or something more important to do

0 Not mentioned

1 Mentioned

9 Inap. None or DK (coded 11 or 12 in qa17a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

IF 'NONE' OR 'DK' IN QA17A THEN SKIP QA17B

And then?

(SHOW SCREEN – READ OUT – MAX. 3 ANSWERS – DO NOT PROPOSE ANSWER GIVEN IN QA17A (EXCEPT FOR CODE 10) – ROTATE ANSWERS 1 TO 9 – DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER' – CODE 11 AND 12 ARE EXCLUSIVE)

QA17B\_12 DK

0 Not mentioned

1 Mentioned

9 Inap. None or DK (coded 11 or 12 in qa17a)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa17r\_2 - REASON PEOPLE NOT VOTE IN EU ELECTIONS: LACK OF INFORMATION REASONS (SUM)

Reasons people do not vote in European Parliament elections - lack of information reasons summarized

0 no Lack of information reasons

1 Total 'Lack of information reasons'

Derivation:

This variable summarizes respondents coded 4 or 6 in qa17a and/or coded 1 'Mentioned' in qa17b\_4 and/or qa17b\_6.

[qa17a Still regardless of how important you personally think it is to vote, what are the reasons why people do not vote in the European elections?  
Firstly?

qa17b And then?

qa17b\_4 They do not know enough about the role of the European Parliament

qa17b\_6 They believe that they are not sufficiently informed on the positioning of the different political parties on European issues]

Note:

See qa17a and qa17b for complete question text.

Variable qa17r\_2 was named qa17r.2 in former versions of this dataset.

qa17r\_2 by isocntry, Absolute Values (Row Percent), weighted by w1

qa18 - PERSONAL VOTING BEHAVIOUR

QA18

ASK QA18 ONLY TO RESPONDENTS AGED 18 OR MORE (16 OR MORE IN AUSTRIA)

Let's now talk about your personal voting behaviour. Which of the following best describes your voting behaviour in recent years, whether at the local or regional, national or European level?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 You systematically vote
- 2 You vote most of the time
- 3 You vote from time to time
- 4 You rarely vote
- 5 You never vote
- 6 It depends / You only vote in certain elections (SPONTANEOUS)
- 7 You were too young to vote before (SPONTANEOUS)
- 8 DK
- 9 Inap. (not aged 18 or more; AT: not aged 16 or more)

Note:

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

qa18r\_1 - PERSONAL VOTING BEHAVIOUR - AT LEAST MOST OF THE TIME (REC)

Personal voting behavior - recoded to six categories

- 1 At least 'Most of the time' (coded 1 to 2 in qa18)
- 2 You vote from time to time
- 3 You rarely vote
- 4 You never vote
- 5 It depends/ You only vote in certain elections (SPONTANEOUS)
- 6 You were too young to vote before (SPONTANEOUS)
- 8 DK
- 9 Inap. (not aged 18 or more; AT: not aged 16 or more)

Derivation:

This variable collapses qa18 into six categories.

[qa18 Let's now talk about your personal voting behaviour. Which of the following best describes your voting behaviour in recent years, whether at the local or regional, national or European level?]

Note:

See qa18 for complete question text.

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

qa18r\_2 - PERSONAL VOTING BEHAVIOUR - AT LEAST FROM TIME TO TIME (REC)

Personal voting behavior - recoded to five categories

- 1 At least 'From time to time' (coded 1 to 3 in qa18)
- 2 You rarely vote
- 3 You never vote
- 4 It depends/ You only vote in certain elections (SPONTANEOUS)
- 5 You were too young to vote before (SPONTANEOUS)
- 8 DK
- 9 Inap. (not aged 18 or more; AT: not aged 16 or more)

Derivation:

This variable collapses qa18 into five categories.

[qa18 Let's now talk about your personal voting behaviour. Which of the following best describes your voting behaviour in recent years, whether at the local or regional, national or European level?]

Note:

See qa18 for complete question text.

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

qa19 - MAIN REASON FOR ABSTENTION IN PAST FIVE YEARS

QA19

ASK QA18 ONLY TO RESPONDENTS AGED 18 OR MORE (16 OR MORE IN AUSTRIA) / ASK QA19 AND QA20 TO THOSE WHO DO NOT VOTE SYSTEMATICALLY  
(CODES 2 TO 6 AND 8 IN QA18)

If you did not participate in an election or a referendum in the past five years, what was the main reason?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 You didn't vote for ideological or political reasons
- 2 You didn't vote for technical or personal reasons
- 3 For both reasons (SPONTANEOUS)
- 4 Neither/You have always voted in the past five years (SPONTANEOUS)
- 5 DK
- 9 Inap. Systematically votes or too young to vote before (coded 1 or 7 in qa18)
- 99 Inap. (not aged 18 or more; AT: not aged 16 or more)

qa21 - LAST ELECTION NOT VOTED - TIME OF DECISION NOT TO VOTE

QA21

ASK ALL

Thinking about the last time that you did not vote in an election in (OUR COUNTRY) when did you decide not to vote?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 You never vote
- 2 You decided a few months before election day
- 3 You decided a few weeks before election day
- 4 You decided a few days before the elections
- 5 You decided on the day of the elections
- 6 None/ you have always voted (SPONTANEOUS)
- 7 DK
- 9 Inap. (BE LU in isocntry)

Note:

Please note that contrary to the basic questionnaire and the field questionnaires questions qa21 and qa22 have not been surveyed in Belgium and Luxembourg. In the original dataset delivery variables qa21 and qa22 have been coded system missing for Belgian and Luxembourgish cases and accordingly no results are presented for these two samples for both questions in the official tabular reports.

Questions qa21 and qa22 have only been asked in Denmark, Germany, Greece, Spain, France, Ireland, Italy, The Netherlands, Portugal, United Kingdom, Austria, Sweden, Finland, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, Croatia. The weight variable WEIGHT SPECIAL COUNTRY GROUP QA21 & QA22 separates this group of countries and adapts the samples regarding population size and universe description. For more information see w91 and country group variable cntrgr91.

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

qa21r\_1 - LAST ELECTION NOT VOTED - DECISION AT LEAST FEW WEEKS BEFORE (REC)

Last election not voted - time of decision recoded to five categories

- 1 You never vote
- 2 At least 'A few weeks before the elections' (coded 2 to 3 in qa21)
- 3 You decided a few days before the elections
- 4 You decided on the day of the elections
- 5 None/ you have always voted (SPONTANEOUS)
- 8 DK
- 9 Inap. (BE LU in isocntry)

Derivation:

This variable collapses answers to qa21 into five categories.

[qa21 Thinking about the last time that you did not vote in an election in (OUR COUNTRY) when did you decide not to vote?]

Note:

See qa21 for complete question text.

Please note that contrary to the basic questionnaire and the field questionnaires questions qa21 and qa22 have not been surveyed in Belgium and Luxembourg. In the original dataset delivery variables qa21 and qa22 have been coded system missing for Belgian and Luxembourgish cases and accordingly no results are presented for these two samples for both questions in the official tabular reports.

Questions qa21 and qa22 have only been asked in Denmark, Germany, Greece, Spain, France, Ireland, Italy, The Netherlands, Portugal, United Kingdom, Austria, Sweden, Finland, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, Croatia. The weight variable WEIGHT SPECIAL COUNTRY GROUP QA21 & QA22 separates this group of countries and adapts the samples regarding population size and universe description. For more information see w91 and country group variable cntrgr91.

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

qa21r\_2 - LAST ELECTION NOT VOTED - DECISION AT LEAST FEW DAYS BEFORE (REC)

Last election not voted - time of decision recoded to four categories

- 1 You never vote
- 2 At least 'A few days before the elections' (coded 2 to 4 in qa21)
- 3 You decided on the day of the elections
- 4 None/ you have always voted (SPONTANEOUS)
- 8 DK
- 9 Inap. (BE LU in isocntry)

Derivation:

This variable collapses answers to qa21 into four categories.

[qa21 Thinking about the last time that you did not vote in an election in (OUR COUNTRY) when did you decide not to vote?]

Note:

See qa21 for complete question text.

Please note that contrary to the basic questionnaire and the field questionnaires questions qa21 and qa22 have not been surveyed in Belgium and Luxembourg. In the original dataset delivery variables qa21 and qa22 have been coded system missing for Belgian and Luxembourgish cases and accordingly no results are presented for these two samples for both questions in the official tabular reports.

Questions qa21 and qa22 have only been asked in Denmark, Germany, Greece, Spain, France, Ireland, Italy, The Netherlands, Portugal, United Kingdom, Austria, Sweden, Finland, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, Croatia. The weight variable WEIGHT SPECIAL COUNTRY GROUP QA21 & QA22 separates this group of countries and adapts the samples regarding population size and universe description. For more information see w91 and country group variable cntrgr91.

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

qa22 - LAST ELECTION VOTED - TIME OF DECISION TO VOTE

QA22

ASK QA22 IF HAS VOTED RECENTLY, EVEN RARELY (CODE 1, 2, 3, 4, 6, 8 IN QA18)

And now thinking about the last time you voted in an election in (OUR COUNTRY) when did you decide to vote?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

- 1 You never vote
- 2 You decided a few months ahead
- 3 You decided a few weeks ahead
- 4 You decided a few days before the elections
- 5 You decided on the day of the elections
- 6 DK
- 9 Inap. Never voted or too young to vote before (coded 5 or 7 in qa18)
- 99 Inap. (not aged 18 or more; AT: not aged 16 or more)
- 999 Inap. (BE LU in isocntry)

Note:

Please note that contrary to the basic questionnaire and the field questionnaires questions qa21 and qa22 have not been surveyed in Belgium and Luxembourg. In the original dataset delivery variables qa21 and qa22 have been coded system missing for Belgian and Luxembourgish cases and accordingly no results are presented for these two samples for both questions in the official tabular reports.

Questions qa21 and qa22 have only been asked in Denmark, Germany, Greece, Spain, France, Ireland, Italy, The Netherlands, Portugal, United Kingdom, Austria, Sweden, Finland, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, Croatia. The weight variable WEIGHT SPECIAL COUNTRY GROUP QA21 & QA22 separates this group of countries and adapts the samples regarding population size and universe description. For more information see w91 and country group variable cntrgr91.

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

qa22r\_1 - LAST ELECTION VOTED - DECISION AT LEAST FEW WEEKS BEFORE (REC)

Last election voted - time of decision recoded to four categories

- 1 You never vote
- 2 At least 'A few weeks before the elections'
- 3 You decided a few days before the elections
- 4 You decided on the day of the elections
- 8 DK
- 9 Inap. Never voted or too young to vote before (coded 5 or 7 in qa18)
- 99 Inap. (not aged 18 or more; AT: not aged 16 or more)
- 999 Inap. (BE LU in isocntry)

Derivation:

This variable collapses answers to qa22 into four categories.

[qa22 And now thinking about the last time you voted in an election in (OUR COUNTRY) when did you decide to vote?]

Note:

See qa22 for complete question text.

Please note that contrary to the basic questionnaire and the field questionnaires questions qa21 and qa22 have not been surveyed in Belgium and Luxembourg. In the original dataset delivery variables qa21 and qa22 have been coded system missing for Belgian and Luxembourgish cases and accordingly no results are presented for these two samples for both questions in the official tabular reports.

Questions qa21 and qa22 have only been asked in Denmark, Germany, Greece, Spain, France, Ireland, Italy, The Netherlands, Portugal, United Kingdom, Austria, Sweden, Finland, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, Croatia. The weight variable WEIGHT SPECIAL COUNTRY GROUP QA21 & QA22 separates this group of countries and adapts the samples regarding population size and universe description. For more information see w91 and country group variable cntrgr91.

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

Variables qa22r\_1 and qa22r\_2 were corrected in version v2.0.0 for the erroneous coding of Luxembourg under an INAP-category for intentionally skipped respondents.

qa22r\_2 - LAST ELECTION VOTED - DECISION AT LEAST FEW DAYS BEFORE (REC)

Last election voted - time of decision recoded to three categories

- 1 You never vote
- 2 At least 'A few days before the elections'
- 3 You decided on the day of the elections
- 8 DK
- 9 Inap. Never voted or too young to vote before (coded 5 or 7 in qa18)
- 99 Inap. (not aged 18 or more; AT: not aged 16 or more)
- 999 Inap. (BE LU in isocntry)

Derivation:

This variable collapses answers to qa22 into three categories.

[qa22 And now thinking about the last time you voted in an election in (OUR COUNTRY) when did you decide to vote?]

Note:

See qa22 for complete question text.

Please note that contrary to the basic questionnaire and the field questionnaires questions qa21 and qa22 have not been surveyed in Belgium and Luxembourg. In the original dataset delivery variables qa21 and qa22 have been coded system missing for Belgian and Luxembourgish cases and accordingly no results are presented for these two samples for both questions in the official tabular reports.

Questions qa21 and qa22 have only been asked in Denmark, Germany, Greece, Spain, France, Ireland, Italy, The Netherlands, Portugal, United Kingdom, Austria, Sweden, Finland, Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, Croatia. The weight variable WEIGHT SPECIAL COUNTRY GROUP QA21 & QA22 separates this group of countries and adapts the samples regarding population size and universe description. For more information see w91 and country group variable cntrgr91.

For questions qa18, qa21 and qa22 additional recoded variables have been constructed by GESIS (qa18r\_2, qa21r\_2 and qa22r\_2) as supplement to the existing recoded variables in the original dataset delivery (qa18r\_1, qa21r\_1 and qa22r\_1) and in accordance with the official tables and report.

Variables qa22r\_1 and qa22r\_2 were corrected in version v2.0.0 for the erroneous coding of Luxembourg under an INAP-category for intentionally skipped respondents.

d1r1 - LEFT-RIGHT PLACEMENT: 3 CAT (RECODED)

Left-right placement - recoded to three categories

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 - 10) Right
- 9 DK/Refusal (Spontaneous)

Derivation:

This variable collapses answers to d1 into three categories.

[d1 In political matters people talk of 'the left' and 'the right'. How would you place your views on this scale?]

Note:

See d1 for complete question text.

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

Marital status recoded to five categories with focus on partnership

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for complete question text.

d8 - AGE EDUCATION

D8

How old were you when you stopped full-time education?

(IF 'STILL STUDYING' CODE '00' – IF 'NO EDUCATION' CODE '01' – IF 'REFUSAL' CODE '98' – IF 'DK' CODE '99' – CODE 'NO ANSWER' IN CODE 98 - CANNOT BE LARGER THAN D11)

(MAKE SURE THE RESPONDENT UNDERSTANDS THAT D8 IS ABOUT FULL-TIME EDUCATION)

0 Refusal

2 2 years

89 89 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code '00' recoded to '98'.

Original code '01' recoded to '97'.

Original code '98' recoded to '0'.

Please note that users might be advised to consider pre-school ages (outliers) as with 'no full-time education' or to treat them as missing values.

Actual number is coded.

Comparability:

Last trend: EB89.1, D8

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

Age when finished full-time education - recoded to 11 categories

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 for indicated ages lowest (2) to 14 and 22 to highest (89).

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d15a - OCCUPATION OF RESPONDENT

D15A

What is your current occupation?

('NO ANSWER' NOT ALLOWED – DO NOT SHOW SCREEN – IF D15A=2 THEN D8=00 – IF D15<>2 AND D8=00 THEN CORRECT D8 OR CHANGE THE ANSWER IN D15A)

NON-ACTIVE

- 1 Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
- 2 Student
- 3 Unemployed or temporarily not working
- 4 Retired or unable to work through illness

SELF EMPLOYED

- 5 Farmer
- 6 Fisherman
- 7 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 8 Owner of a shop, craftsmen, other self-employed person
- 9 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 10 Employed professional (employed doctor, lawyer, accountant, architect)
- 11 General management, director or top management (managing directors, director general, other director)
- 12 Middle management, other management (department head, junior manager, teacher, technician)
- 13 Employed position, working mainly at a desk
- 14 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 15 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 16 Supervisor
- 17 Skilled manual worker
- 18 Other (unskilled) manual worker, servant

d15a\_r1 - OCCUPATION OF RESPONDENT (RECODED)

Occupation of respondent - recoded to employment status

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15a\_r2 - RESPONDENT OCCUPATION SCALE (C14)

Occupation of respondent - scale (C14)

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Managers (coded 10 to 12 in d15a)
- 3 Other white collars (coded 13 or 14 in d15a)
- 4 Manual workers (coded 15 to 18 in d15a)
- 5 House persons (coded 1 in d15a)
- 6 Unemployed (coded 3 in d15a)
- 7 Retired (coded 4 in d15a)
- 8 Students (coded 2 in d15a)

Derivation:

This scale is based on a combination/selection of answers to variable d15a.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

[D15A

What is your current occupation?]

D15B

ASK D15B IF 'NOT DOING ANY PAID WORK CURRENTLY', CODES 1 TO 4 IN D15A

Did you do any paid work in the past? What was your last occupation?

('NO ANSWER' NOT ALLOWED – DO NOT SHOW SCREEN)

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

d15b\_r - OCCUPATION OF RESPONDENT - LAST JOB (RECODED)

Occupation of respondent: last job - recoded to employment status

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (coded 15 in d15b)
- 9 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

[d15b Did you do any paid work in the past? What was your last occupation?]

Note:

See d15b for complete question text.

d40c\_r - HOUSEHOLD COMPOSITION: AGED 10-14 (RECODED)

n of people in household aged 10 to 14 years - recoded to five categories

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question d40c.

[d40c Could you tell me how many children aged 10 to 14 years old live in your household?]

Note:

See d40c for complete question text.

- 16 Sixteen
- 17 Seventeen
- 18 Eighteen
- 19 Nineteen
- 20 Twenty
- 21 Twenty-one
- 22 Twenty-two
- 24 Twenty-four

Derivation:

This variable summarizes d40a, d40b, and d40c.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

Variable d40t was named d40abc in former versions of this dataset.

Generated by GESIS in accordance with former surveys.

d40t by isocntry, Absolute Values (Row Percent), weighted by w1

d40t\_r - HOUSEHOLD COMPOSITION: SIZE A+B+C (RECODED)

n of people in household - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four and more

Derivation:

This variable groups the summarized variable d40t.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

Variable d40t\_r was named d40abc\_r in former versions of this dataset.

d40t\_r by isocntry, Absolute Values (Row Percent), weighted by w1

d40\_d11 - ONE-PERSON HOUSEHOLD COMPOSITION BY AGE

One-person households – recoded to three age categories

- 1 15 - 29 years
- 2 30 - 59 years
- 3 60 years and older
- 9 Inap. No one-person-household (not coded 1 in d40t)

Derivation:

This variable collapses answers to d11 into three age categories, but only for one-person households.

[d11 How old are you?

d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d11 and d40a, d40b, and d40c for complete question text.

d43t - PHONE AVAILABLE (SUMMARIZED)

Availability of mobile and/or landline phones - summarized

- 1 Mobile only
- 2 Landline only
- 3 Landline & mobile
- 4 No telephone

Derivation:

This variable summarizes answers to question d43a and d43b.

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?]

Respondents coded 2 in d43a and 1 in d43b are coded 1 ('Mobile only') in d43t. Respondents coded 1 in d43a and 2 in d43b are coded 2 ('Landline only') in d43t. Respondents coded 1 in d43a and d43b are coded 3 ('Landline and mobile') in d43t. Respondents coded 2 in d43a and d43b are coded 4 ('No telephone') in d43t.

Note:

See d43a and d43b for complete question text.

d62\_4 - INTERNET USE FREQ: SOMEWHERE ELSE

D62

Could you tell me if ...?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE – ‘NO ANSWER’ NOT ALLOWED – DISPLAY ‘95’ INSTEAD OF ‘NO INTERNET ACCESS’)

D62\_4 You use the Internet somewhere else (school, university, cyber-café, etc.)

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

#### d62t1 - INTERNET USE - INDEX 1 (4 CAT)

Frequency of internet use - index with four categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62\_1 to d62\_4)
- 2 Often/sometimes (at least once coded 2 to 5 in d62\_1 to d62\_4)
- 3 Never/no access (coded 6 or 6/7 in d62\_1 to d62\_4)
- 4 No Internet access at all (only coded 7 in d62\_1 to d62\_4)

Derivation:

This variable summarizes responses to d62 in four categories.

[d62 Could you tell me if you use the internet ...?

d62\_1 You use the Internet at home, in your home

d62\_2 You use the Internet on your place of work

d62\_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62\_4 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62\_1 to d62\_4 are coded 1 in d62t1 ('Everyday/Almost everyday'). Respondents coded 2, 3, 4 or 5 in each variable d62\_1 to d62\_4 are coded 2 ('Often/sometimes') in d62t1. Respondents coded 6 ('Never') in each variable d62\_1 to d62\_4 are coded 3 ('Never to all') in d62t1. Respondents coded 6 ('Never') in each variable d62\_1 to d62\_4, or at least once coded 6 in d62\_1 to d62\_4 and coded 7 ('No internet access') in the other variable(s), are coded 3 ('Never/No access') in d62t1. Respondents coded 7 ('No internet access') in each variable d62\_1 to d62\_4 are coded 4 ('No internet access at all') in d62t1.

Note:

See d62 for complete question text.

Please note that categories 3 and 4 of index variable d62t1 in EB 89.2 might differ from former surveys.

Variable d62t1 was named d62t in former versions of this dataset.

#### d62t2 - INTERNET USE - INDEX 2 (7 CAT)

Frequency of internet use - index with seven categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62\_1 to d62\_4)
- 2 Two or three times a week (not coded 1 and at least once coded 2 in d62\_1 to d62\_4)
- 3 About once a week (not coded 1 to 2 and at least once coded 3 in d62\_1 to d62\_4)
- 4 Two or three times a month (not coded 1 to 3 and at least once coded 4 in d62\_1 to d62\_4)
- 5 Less often (not coded 1 to 4 and at least once coded 5 in d62\_1 to d62\_4)
- 6 Never/no access (coded 6 or 6/7 in d62\_1 to d62\_4)
- 7 No Internet access at all (coded 7 in d62\_1 to d62\_4)

Derivation:

This variable summarizes responses to d62.

[d62 Could you tell me if you use the internet ...?

d62\_1 You use the Internet at home, in your home

d62\_2 You use the Internet on your place of work

d62\_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62\_4 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62\_1 to d62\_4 are coded 1 in d62t2 ('Everyday/Almost everyday'). Respondents coded 2 at least once in d62\_1 to d62\_4 and not coded 1, are coded 2 in d62t2 ('Two or three times a week'). Respondents coded 3 at least once in d62\_1 to d62\_4 and not coded 1 or 2, are coded 5 in d62t2 ('About once a week'). Respondents coded 4 at least once in d62\_1 to d62\_4 and not coded 1 to 3, are coded 4 in d62t2 ('Two or three times a month'). Respondents coded 5 at least once in d62\_1 to d62\_4 and not coded 1 to 4, are coded 5 in d62t2 ('Less often'). Respondents coded 6 ('Never') in each variable d62\_1 to d62\_4, or at least once coded 6 in d62\_1 to d62\_4 and coded 7 ('No internet access') in the other variable(s), are coded 6 ('Never/No access') in d62t2. Respondents coded 7 ('No internet access') in each variable d62\_1 to d62\_4 are coded 7 ('No internet access at all') in d62t2.

Note:

See d62 for complete question text.

Generated by GESIS in accordance with former surveys.

Variable d62t2 was named netuse in former versions of this dataset.

d63 - SOCIAL CLASS - SELF-ASSESSMENT (5 CAT)

D63

Do you see yourself and your household belonging to...?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY – CODE ‘NO ANSWER’ IN CODE 8)

- 1 The working class of society
- 2 The lower middle class of society
- 3 The middle class of society
- 4 The upper middle class of society
- 5 The higher class of society
- 6 Other (SPONTANEOUS)
- 7 None (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)
- 98 DK

Note:

Original code ‘8’ recoded to ‘97’.

Original code ‘9’ recoded to ‘98’.

Starting with Eurobarometer 82.3 demographic variable d63 ‘SOCIAL CLASS - SELF-ASSESSMENT (5 CAT)’ consists of five categories instead of three categories.

polintr - POLITICAL INTEREST INDEX (D71\_1/2/3)

Index of interest in politics

0 DK (coded 4 in d71\_1, d71\_2 and d71\_3)

1 Not at all interested in politics

2 Slightly interested in politics

3 Moderately interested in politics

4 Strongly interested in politics

Derivation:

The POLITICAL INTEREST INDEX is based on the answers to the following question: 'When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?' (d71\_1, d71\_2, and d71\_3). According to former studies the index was constructed by first attributing a score to each item in d71 ('Never' = 0; 'Occasionally' = 1; 'Frequently' = 2) and then adding together the three political dimensions (national/European/local). This procedure results in four different index levels ('Not at all interested in politics' if added up score = 0; 'Slightly' if added up score = 1 or 2; 'Moderately' if added up score = 3 or 4; 'Strongly' if added up score = 5 or 6) which have been coded accordingly into the categories 1 to 4. Furthermore combinations with DK responses in maximum two variables (d71\_1, d71\_2, and d71\_3) have been coded as follows: 'DK' and 'Never' = 'Not at all'; 'DK' and 'Never' and 'Occasionally' or 'Frequently' = 'Slightly'; 'DK' and 'Occasionally' and at least one 'Frequently' = 'Moderately'.

Note:

This new POLITICAL INTEREST INDEX is introduced as C2 starting with EB 73.4. Please notice that in former waves up to EB 69.2 the VALUE ORIENTATION - POST-MATERIALISM index was named C2.

Compared to the original variable the scale has been inversed by GESIS in accordance with former practice. Furthermore responses coded 'DK' to all source variables (d71\_1, d71\_2, and d71\_3) have been recoded to '0' (DK).

Modified by GESIS.

See d71 for complete question text.

opls - OPINION LEADERSHIP INDEX (D77 & POLINTR)

Index of Opinion Leadership

0 DK (coded 5 in d77 and coded 0 in polintr)

1 -- low (coded 4 in d77 and coded 0, 1, 2 or 3 in polintr; or coded 5 in d77 and coded 1, 2, 3 or 4 in polintr)

2 - (coded 3 in d77 and coded 0, 1, 2 or 3 in polintr; coded 4 in d77 and coded 4 in polintr)

3 + (coded 3 in d77 and coded 4 in polintr; coded 2 in d77 and coded 0, 1, 2 or 3 in polintr; coded 1 in d77 and coded 0, 1 or 2 in polintr)

4 ++ high (coded 1 in d77 and coded 3 or 4 in polintr; or coded 2 in d77 and coded 4 in polintr)

Derivation:

The OPINION LEADERSHIP INDEX is based on the answers to the following two questions: 'When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? Does this happen often ...?' (d77) and 'When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?' (d71), the latter first being summarized in the POLITICAL INTEREST INDEX (polintr). Interviewees giving affirmative answers to both questions are labelled ++.

Interviewees giving negative answers to both questions are labelled --. Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

Note:

Starting with EB 73.4 the OPINION LEADERSHIP INDEX (C1) is constructed via the new POLITICAL INTEREST INDEX. For the background and derivation of this index variable see polintr.

Compared to the original variable the scale has been inversed by GESIS in accordance with former practice. Furthermore responses coded 'DK' to both source variables (d77 and polintr) have been recoded to '0' (DK), if applicable.

See d77 and d71 for complete question text.

d78 - EU IMAGE - POSITIVE/NEGATIVE

D78

In general, does the EU conjure up for you a very positive, fairly positive, neutral, fairly negative or very negative image?

(ONE ANSWER ONLY – CODE 'NO ANSWER' IN CODE 6)

- 1 Very positive
- 2 Fairly positive
- 3 Neutral
- 4 Fairly negative
- 5 Very negative
- 6 DK

paeu - POSITIVE ATTITUDE TOWARDS EUROPEAN UNION INDEX (QA23 & D73\_2 & D78 SUM)

Index of Positive Attitude Towards the European Union - qa23, d73\_2 & d78 summarized

- 1 High (coded 1 in qa23 and d73\_2 and coded 1 or 2 in d78)
- 2 Medium (coded 1 in qa23 and d73\_2 and coded 3 to 6 in d78 OR coded 1 in qa23 and coded 2 to 4 in d73\_2 and coded 1 or 2 in d78 OR coded 2 to 4 in qa23 and coded 1 in d73\_2 and coded 1 or 2 in d78)
- 3 Poor (coded 1 in qa23 and coded 2 to 4 in d73\_2 and coded 3 to 6 in d78 OR coded 2 to 4 in qa23 and coded 1 in d73\_2 and coded 3 to 6 in d78 OR coded 2 to 4 in qa23 and d73\_2 and coded 1 or 2 in d78)
- 4 None (coded 2 to 4 in qa23 and d73\_2 and coded 3 to 6 in d78)

Derivation:

The POSITIVE ATTITUDE TOWARDS EUROPEAN UNION INDEX is based on the answers to the following questions: (QA23) Generally speaking, do you think that (OUR COUNTRY)'s membership of the EU is a good thing, a bad thing, neither a good thing nor a bad thing?; (D73\_2) At the present time, would you say that, in general, things are going in the right direction, in the wrong direction, neither the one nor the other in the European Union?; (D78) In general, does the EU conjure up for you a very positive, fairly positive, neutral, fairly negative, or very negative image?

The index was constructed by assigning four different index levels to eight possible answer combinations which has been coded accordingly into the categories 1 to 4: ('High' if coded 1 in qa23 and d73\_2 and coded 1 or 2 in d78; 'Medium' if coded 1 in qa23 and d73\_2 and coded 3, 4, 5 or 6 in d78; 'Medium' if coded 1 in qa23 and coded 2, 3 or 4 in d73\_2 and coded 1 or 2 in d78; 'Medium' if coded 2, 3 or 4 in qa23 and coded 1 in d73\_2 and coded 1 or 2 in d78; 'Poor' if coded 1 in qa23 and coded 2, 3 or 4 in d73\_2 and coded 3, 4, 5 or 6 in d78; 'Poor' if coded 2, 3 or 4 in qa23 and coded 1 in d73\_2 and coded 3, 4, 5 or 6 in d78; 'Poor' if coded 2, 3 or 4 in qa23 and d73\_2 and coded 1 or 2 in d78; 'None' if coded 2, 3 or 4 in qa23 and d73\_2 and coded 3, 4, 5 or 6 in d78).

Note:

This new POSITIVE ATTITUDE TOWARDS EUROPEAN UNION INDEX is introduced as paeu with EB89.2.

See qa23, d73\_2, and d78 for the complete question texts.

Variable label for paeu was corrected in version v2.0.0.

## p6fr - SIZE OF COMMUNITY - FRANCE

p6fr Objective size of community: France

- 1 Rural area
- 2 Towns and suburbs/small urban area
- 3 Cities/large urban area
- 99 Inap. (not FR in isocntry)

## Note:

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

## Comparability:

Last trend: EB89.1, P6

p6fr, weighted by w1

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural area		340	1.2	32.7
2	Towns and suburbs/ small urban area		224	0.8	21.5
3	Cities/ large urban area		477	1.7	45.8
99	Inap. (not FR in isocntry)	M	26559	96.2	
	Sum		27601	100.0	100.0
	Valid Cases		1042		

## p6be - SIZE OF COMMUNITY - BELGIUM

p6be Objective size of community: Belgium

- 1 Rural area
- 2 Towns and suburbs/small urban area
- 3 Cities/large urban area
- 99 Inap. (not BE in isocntry)

## Note:

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

## Comparability:

## p6de - SIZE OF COMMUNITY - GERMANY

p6de Objective size of community: Germany

- 1 Rural area
- 2 Towns and suburbs/ small urban area
- 3 Cities/ large urban area
- 99 Inap. (not DE in isocntry)

## Note:

For meaningful (descriptive) results this variable needs to be used for West and East Germany separately (select if '4' OR '14' in country) or be weighted by special weighting variables for GERMANY w3 or w3a.

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

Starting with Eurobarometer 85.1 the variable 'SIZE OF COMMUNITY - GERMANY (BIK 10-LEVEL)' is no longer available.

## Comparability:

Last trend: EB89.1, P6

p6de, weighted by w3

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural area		324	21.1	21.1
2	Towns and suburbs/ small urban area		667	43.3	43.3

## p6gb - SIZE OF COMMUNITY - UNITED KINGDOM

p6gb Objective size of community: United Kingdom

- 1 Rural area
- 2 Towns and suburbs/ small urban area
- 3 Cities/ large urban area
- 99 Inap. (not GB in isocntry)

## Note:

Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 'WEIGHT UNITED KINGDOM' is obsolete and no longer included in the dataset.

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

## Comparability:

Last trend: EB89.1, P6

## p6hu - SIZE OF COMMUNITY - HUNGARY

p6hu Objective size of community: Hungary

- 1 Rural area
- 2 Towns and suburbs/small urban area
- 3 Cities/large urban area
- 99 Inap. (not HU in isocntry)

## Note:

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

## Comparability:

Last trend: EB89.1, P6

p6hu, weighted by w1

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural area		328	1.2	30.4

Note:

The combination of regions (Piemonte & Valle d'Aosta / Vallee d'Aoste; Abruzzo & Molise; Puglia & Basilicata) does not comply with the official EUROSTAT specifications for NUTS 2.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (IT13: Marche and ITH5: Emilia Romagna).

Comparability:

## p7pt - REGION - PORTUGAL NUTS 2

p7pt Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North) [PT]
- 2 Centro (Center) [PT]
- 3 Área Metropolitana de Lisboa (Lisbon metropolitan area)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

## Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region 'Lisboa e vale do tejo' is split up and the subregion 'Lezíria do Tejo' reinstated to the 'Alentejo' Region and the 'Médio Tejo' and 'Oeste' reinstated to the 'Centro' Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category '3' ('Lisboa e vale do Tejo') has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes 'Grande Lisboa' and 'Península de Setúbal'.

Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 category '3' is labelled 'Área Metropolitana de Lisboa'.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

- 1 Länsi-Suomi (West Finland)
- 2 Helsinki-Uusimaa
- 3 Etelä-Suomi (South Finland)
- 4 Pohjois- ja Itä-Suomi (North & East Finland)
- 99 Inap. (not FI in isocntry)

## Note:

Starting with EB 81.3 for Finland only one country specific protocol variable P7 (REGION) is available. The variable p7fi corresponds to the NUTS 2 breakdown in accordance to NUTS 2010 with regular amendment as of January 1, 2012, and was named p7fi\_r2 in former waves, but with a different sequence of the values 1 to 3. Please note the implications for the integrated NUTS CODES variable 'nuts'. The NUTS 3 breakdown is no longer available for Finland.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

## Comparability:

Last trend: EB89.1, P7

- 99 Inap. (not BG in isocntry)

## Note:

Starting with EB 81.3 for Bulgaria only one country specific protocol variable P7 (REGION) is available. The variable p7bg corresponds to the NUTS 2 breakdown and was named p7bg\_r in former waves. Please note the implications for the integrated NUTS CODES variable 'nuts'. The NUTS 3 breakdown is no longer available for Bulgaria.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

## Comparability:

Derivation:

This additional alphanumeric NUTS CODES variable is produced by GESIS. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Eurostat: RAMON Eurostat Metadata Server. Statistical Regions for Candidate countries and EFTA countries, by country. Webdownload: 2023-05-05 ([https://ec.europa.eu/eurostat/ramon/documents/nuts/Statistical\\_Regions.zip](https://ec.europa.eu/eurostat/ramon/documents/nuts/Statistical_Regions.zip))

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are documented in the official EUROSTAT classification history (History of NUTS). A second variable (nutslvl) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Ireland:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Ireland introducing NUTS 3 categories.

United Kingdom:

Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 'WEIGHT UNITED KINGDOM' is obsolete and no longer included in the dataset.

Greece:

The Aegean Islands (EL41 - Βόρειο Αιγαίο/Voreio Aigaio and EL42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (EL22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) the standard country prefix 'GR' is replaced by 'EL'. The remaining numerical part of the codes remains unaffected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered. Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 category '3' is labelled 'Área Metropolitana de Lisboa'.

Finland:

Starting with EB 81.3 for Finland only one country specific protocol variable P7 (REGION) is available. The variable p7fi corresponds to the NUTS 2 breakdown in accordance to NUTS 2010 with regular amendment as of January 1, 2012. The NUTS 3 breakdown is no longer available for Finland.

Estonia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Estonia introducing the official NUTS 3 categories.

Bulgaria:

Starting with EB 81.3 for Bulgaria only one country specific protocol variable P7 (REGION) is available. The NUTS 3 breakdown is no longer available for Bulgaria.

Croatia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Croatia introducing the NUTS 2 and NUTS 3 categories.

Comparability:

nuts (REGION - NUTS CODES) in EB89.1

nutslvl - REGION - NUTS LEVEL

nutslvl REGION - NUTS LEVEL

0 No NUTS units

1 NUTS level 1

2 NUTS level 2

3 NUTS level 3

Derivation:

This variable identifies the lowest available NUTS LEVEL as coded for each country in variable NUTS CODES variable 'nuts'.

Starting with EB 81.3 the category scheme for country specific protocol variables P7 (REGION) have changed for some countries, in particular introducing NUTS categories for Ireland, Estonia and Croatia, and modifying NUTS categories for Finland and Bulgaria.

Comparability:

nation - NATION (UNITED GERMANY) ISO3166

nation (United Germany) ISO3166

NATION (UNITED GERMANY) ISO3166 equals country/sample identification variable isocntry (COUNTRY CODE - ISO 3166) but coding East and West Germany together. Unlike variable 'de' (NATION – UNITED GERMANY (ONLY)) all other countries (samples) are included for calculation.

Note:

Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 'WEIGHT UNITED KINGDOM' is obsolete and no longer included in the dataset. Additionally, starting with Eurobarometer 89.2 formerly derived weight variables w4a 'WEIGHT RESULT FROM TARGET - UNITED KINGDOM' (Germany East and West separated) and w3a4a 'WEIGHT RESULT FROM TARGET - NATION' (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset. As a consequence country/sample identification variables 'cntry\_gb' and 'cntry\_de' (now identical to variable 'nation') are also obsolete starting with Eurobarometer 89.2.

Use of weighting factor w3a is mandatory for descriptive analysis.

w3a - WEIGHT RESULT FROM TARGET - UNITED GERMANY

w3a Weight result from target - United Germany

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries. This weight has been derived by GESIS from original Kantar weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 'WEIGHT UNITED KINGDOM' is obsolete and no longer included in the dataset. Additionally, starting with Eurobarometer 89.2 formerly derived weight variables w4a 'WEIGHT RESULT FROM TARGET - UNITED KINGDOM' (Germany East and West separated) and w3a4a 'WEIGHT RESULT FROM TARGET - NATION' (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset.
