ISSP Background Variable Documentation

Please name the **ISSP module** which the documentation refers to (e.g., "Health and Health Care / ISSP2011"):

Environment IV/ISSP2020

Please name your **country**:

South Korea

SEX - Sex of respondent

	National Language	English Translation
<i>Question no. and text</i>	# 52.1.2 이 분은 남자입니까? 아니면 여자입니까?	#52.1.2 Is [Person] male or female?
<i>Codes/ Categories</i>	1. 남자 2. 여자	1. Male 2. Female
<i>Interviewer Instruction</i>	-	-
<i>Translation Note</i>	-	-
<i>Note</i>	-	-

Construction/Recoding:

Country Variable Codes (in translation)	→ SEX
If (#52.1.2=1)	1. Male
If (#52.1.2=2)	2. Female
-	-9. No answer

BIRTH – Year of birth

This question can be asked as an alternative to asking about AGE. If BIRTH is not asked directly, it must be computed by DATEYR ‘year of interview’ minus AGE ‘age of respondent’.

	National Language	English Translation
<i>Question no. and text</i>	#52.1.3 이 분의 나이는 만으로 몇 세입니까?	#52.1.3 How old is [Person]?
<i>Codes/ Categories</i>	18. 18세	18. 18 years old
	92. 92세	92. 92 years old
<i>Interviewer Instruction</i>	-	-
<i>Translation Note</i>	-	-
<i>Note</i>	-	-

Construction/Recoding: (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→ BIRTH
<i>Construction</i>		
<i>Codes</i>	If (#52.1.3=92)	[1929]
	If (#52.1.3=18)	[2003]
	-	-9. No answer

Optional: Recoding Syntax

compute birth=DATEYR-age.

AGE - Age of respondent

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed by DATEYR ‘year of interview’ minus BIRTH ‘year of birth’.

	National Language	English Translation
<i>Question no. and text</i>	#52.1.3 이 분의 나이는 만으로 몇 세입니까?	#52.1.3 How old is [Person]?
<i>Codes/ Categories</i>	18. 18세	18. 18 years old
	92. 92세	92. 92 years old
<i>Interviewer Instruction</i>	-	-
<i>Translation Note</i>	-	-
<i>Note</i>	-	-

Construction/Recoding: (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→ AGE
<i>Construction</i>		
<i>Codes</i>	If (#52.1.3=18)	[18]
	If (#52.1.3=92)	[92]
	-	-9. No answer

Optional: Recoding Syntax

ISCO08 - Occupation ISCO 2008

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do **not** enter **standard** ISCO08 codes here, but report any deviations. **However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!**

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [-8] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

SPISCO08 – Spouse, partner: occupation ISCO 2008

Please give the text of the source question(s) on the respondent's spouse occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do **not** enter **standard** ISCO08 codes here, but report any deviations. **However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!**

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [-8] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

SUBSCASE – Case substitution flag**Filter Variable(s) and Conditions:**

--

Construction/Recoding:

Country Variable Codes/Construction Rules	→ SUBSCASE
1	1. Case from original sample
-	2. Case substituted
-	-4. NAP, no substitution in this survey

Optional: Recoding Syntax

compute subscase=1.

INTERLANG – Language of the interview

	National Language	English Translation
<i>Codes/ Categories deviating from ISO 639-3</i>		
<i>Note</i>		
<i>Use of ISO 639-3</i>	ISO 639-3 <input checked="" type="checkbox"/>	
	Please specify any other code _____	

Filter Variable(s) and Conditions:

--

Construction/Recoding:

Country Variable Codes/Construction Rules	→ INTERLANG
29 한국어	29 "Korean (kor)"

Optional: Recoding Syntax

compute INTLANG=29.

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No	[]
	Yes	[√]
<i>Weight to adjust for non-response bias</i>	No	[]
	Yes	[√] → please specify variables used for calculation of weight We were using the following 4 variables with specific categories: gender(male, female), age(18-29, 30-39, 40-49, 50-59 and over), Region(seoul, kyunggi, kangwon/jeju, chungcheng, kyungsnag, cholla), urban/city(urban/rural).
<i>Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?</i>	No	[] → please specify target population represented by sum of all case weights
	Yes	[√]
<i>Note</i>		

Construction/Recoding:

Country Variable Codes/Construction Rules	→ WEIGHT
	1. No weighting

MODE – Administrative mode of data-collection

<i>Note</i>	
-------------	--
