Acknowledgements

The Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and the GESIS - Leibniz Institute for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Individual level micro data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the data catalogue (https://search.gesis.org/research_data). Access to the Eurobarometer primary data is also provided by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, as well as supported by the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send bibliographic citations for each completed manuscript or thesis abstract to the providing data archive, GESIS or ICPSR. Please indicate in a cover letter which data (surveys and variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.1.4 Bibliographic citation and DOI reference

Publications based on data collections which are made available through ICPSR or GESIS should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Commission, Brussels: Eurobarometer 90.2, October-November 2018.

Kantar Public , Brussels [Producer];

GESIS, Cologne [Publisher]: ZA7488, dataset version 2.0.0, DOI: [10.4232/14339](https://doi.org/10.4232/14339) (2024).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and potential errata and update documentation in the GESIS data catalogue.

1.2 Content

1.2.1 Abstract

Eurobarometer 90.2 covered the following special topics: (1) & (3) Future of Europe I and II, (2) Future of Europe – Climate change, and (4) Europeans' attitudes towards internet security. In regard to the future of Europe, opinions were collected on future priorities and perspectives, on immigration, environmental and safety issues, and economic security. Additional questions were asked about main EU assets, future EU challenges, EU political influence, and how the EU should address European and global changes in the future. Respondent's opinions were collected on the perception of reasons for climate change, the current and future impact of climate change, the need for new measures and public support. Additional questions were asked regarding risks of internet security and cybercrime, respondents' devices used to access the internet online activities, prevention of online harassment of household children, and adjustments to internet use based upon concerns. Respondents were also questioned about their perceptions of specific cybercrimes, their experience with being victimized and their awareness of other people who experienced cybercrime. Furthermore, respondents were asked about actual or possible actions taken, and their knowledge of official websites for reporting.

Demographic and other background information collected includes left or right self-placement on political scale, age, gender, nationality, marital status, occupation, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone, difficulties in paying bills, self-assessed social class, internet use, life satisfaction, life conditions in five years, political discussion frequency, opinions on whether their voice counts in their country/EU, and image of the EU. In addition, country-specific data includes type and size of locality, region of residence, and language of interview (select countries).

Survey co-ordinated by the Directorate-General for Communication (DG COMM 'Media monitoring and Eurobarometer' Unit). Brussels, March 2019.

1.3 Universe

In all, Eurobarometer 90.2 interviewed 27.339 citizens in the 28 countries of the European Union after the 2013 enlargement (accession of Croatia in July 2013). All respondents were residents in the respective country, nationals and non-national EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for East and West Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except Germany with separate samples for the Eastern (500) and the Western part (1000), as well as Luxembourg, Republic of Cyprus, and Malta with 500 interviews each. Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From October 24 to November 7, 2018, Kantar Public carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate-General for Communication. Kantar Public is based in Brussels, Belgium, and co-ordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by Kantar Public. Interviews were conducted face-to-face in people's home in the respective national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence. Multi-language questionnaires are applied if appropriate (Belgium, Luxembourg, Spain, Finland, Estonia, Latvia, and Malta).

In each country only the national language version(s) of the questionnaire is (are) used; in countries with more than one official language, the language version is selected at the beginning of the interview.

1.7 Weighting

In general, the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis, a national weighting procedure, using marginal and intercellular weighting, is applied. As such, in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This post-stratification weighting is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The population size weighting factors correct for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general, all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2, a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective

actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately, as documented in the respective study and weight variable description. In some surveys, special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 90.2 provides two (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), and W3 (WEIGHT GERMANY ONLY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 excludes all other countries from calculation but include the post-stratification factors for Germany. Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 (WEIGHT UNITED KINGDOM) is obsolete and no longer included in the dataset.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole), and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY), all countries are included in calculations. Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 (WEIGHT UNITED KINGDOM) is obsolete and no longer included in the dataset. Additionally, starting with 89.2 formerly derived weight variables w4a 'WEIGHT RESULT FROM TARGET - UNITED KINGDOM' (Germany East and West separated) and w3a4a 'WEIGHT RESULT FROM TARGET - NATION' (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset. As a consequence country/sample identification variables 'cntry_gb' and 'cntry_de' (now identical to variable 'nation') are also obsolete starting with Eurobarometer 89.2.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members). All post-stratification factors are included.

Table 2: Overview of population size weights on European level

European Weights in Eurobarometer 90.2	Function
W5 to W9, W11, W14, W22, W23, W87	grouping EU member countries
W10, W13, W24, W94	grouping new member countries
-	grouping candidate/accession countries
-	grouping member + candidate/accession countries
W29, W30, W81, W82, W83, W84, W85, W86, W89, W90, W98, W99	grouping (non-)Eurozone countries
wextra	extrapolating population size (15+) for each country
-	grouping countries as surveyed for certain questions or question modules

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by the GESIS Eurobarometer Data Service from Kantar Public were checked for completeness, missing data and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76.1, the traditional variable naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technical. The dot used in the original Kantar Public variable names for multiple response dummy variables is replaced by underscore in view of potential software incompatibilities.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('unqid') for the complete dataset has been constructed from the Kantar country id (digits 1-2) and the Kantar case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tnscntry'), applying the established archive standard codes for the Eurobarometer series ('country'), and an alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community). Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom (GB: ISO 3166-1-alpha-2 country code).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. region variable P7).

Users should note that answers to multiple-response questions are (originally) represented by a series of

binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. GESIS has recoded these residual responses in the case of uncommon minor inconsistencies in accordance with the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from the English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by Kantar Public. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, GESIS, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Region NUTS 2 categories for Portugal have been edited and adapted to changes as of 2002 (NUTS version 2003) which are reflected in Eurobarometer starting with wave 62 (confirmed by TNS). Region NUTS 1 categories for Greece have been edited correcting for the non-coverage of Ionian and Aegean Islands starting with Eurobarometer 62 (confirmed by TNS).

P7 (REGION – NUTS CODES) – variables 'nuts' and 'nutslvl': The integrated NUTS variable has been derived by GESIS from the original Kantar country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant time period (<https://ec.europa.eu/eurostat/web/nuts/history>).

Starting with 89.2 formerly derived weight variables w4a 'WEIGHT RESULT FROM TARGET - UNITED KINGDOM' (Germany East and West separated) and w3a4a 'WEIGHT RESULT FROM TARGET - NATION' (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset.

All INDEX and TOTAL variables have been checked and documented accordingly.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

1.9 Further remarks

Question module QA 'Future of Europe I' was newly introduced. Question module QB on 'Future of Europe - Climate Change' carries on the topic of climate change in the context of Special Eurobarometers 87.1 (ZA6861) and 83.4 (ZA6595) but introduces many new questions. Question module QC 'Future of Europe II' partly replicates questions formerly asked in the framework of Eurobarometer 88.1 (ZA6925) and Eurobarometer 86.1 (ZA6697). Question module QD on 'Internet Security' partly replicates questions formerly asked in the framework of Eurobarometer 87.4 (ZA6924).

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

Starting with Eurobarometer 81.3 the category scheme for country specific protocol variables P7 (REGION) has changed for some countries, in particular introducing NUTS categories for Ireland, Estonia, and Croatia.

Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 'WEIGHT UNITED KINGDOM' is obsolete and no longer included in the dataset. Additionally, starting with Eurobarometer 89.2 formerly derived weight variables w4a 'WEIGHT RESULT FROM TARGET - UNITED KINGDOM' (Germany East and West separated) and w3a4a 'WEIGHT RESULT FROM TARGET - NATION' (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset.

From Eurobarometer 89.3 to Eurobarometer 90.3 respondents were asked for consent to being asked sensitive questions in order to achieve compliance with European GDPR regulations. Respondents that refused to give consent in the beginning of the interview are assigned the value '9' or '99' and labelled 'Inap. (No consent given)' on questions requiring prior consent. The variables recording this consent have not been part of the original data delivery.

Please note that gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents.

The fieldwork dates implied by the values in protocol variable p1 (date of interview) differ slightly from those indicated in the technical specifications provided by Kantar for several countries.

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Variables qd4t and qd6t are available starting with dataset version v2.0.0.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of

these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

For Eurobarometer 90.2 no country specific Kantar case id for DE-W, DE-E and GB is provided (variable 'caseid' is coded '9999999', variable uniqid is coded '999999999'). The dataset does include an original unique serial id across all countries (variable 'serialid').

Data for protocol variables p8 (postal code), p9 (sample point number) and p10 (interviewer number) have not been made available.

2 Eurobarometer series description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general, they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; 'Attitudes towards Europe' (GESIS study ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He had the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid-nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999, the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present, the Eurobarometer surveys are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.3 'Media Monitoring & Eurobarometer', with Oana Hriscu as acting head of the unit and Roberto Santaniello as head of the Eurobarometer sector.

The special topic modules are requested by the respectively responsible EC Directorate General, as regards the content. Since 2007, the European Parliament is commissioning its own survey ('Parlemeter') through the Public Opinion Monitoring Unit of the European Parliament, in close cooperation with the DG COMM unit and within the same survey framework.

The main survey results are regularly published on the European Commission's Public Opinion website (<https://europa.eu/eurobarometer>) in official standard and special topic reports; detailed tabular reports are published through the European Union Open Data Portal (<https://data.europa.eu/data>).

2.4 Development of geographical and population coverage

In all European Union (formerly European Communities) member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics, starting in 1999 (EB51.1). Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the Standard Eurobarometer series, even before starting the accession process (e.g. Turkey or Macedonia). Further countries are continuously added in accordance with the EU membership application and accession process.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriot Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24, 16-30	17, 28.1, 34.2, 47.2OVR, 55.1OVR, 85.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)
Sampling experiment	Non-Nationals	41.0

2.5 Standard question program and special topics

The Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently, Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990), additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues (table 5). Selected subsets of standard trend questions appear in the context of related special topics (e.g. 'The Future of Europe' or 'European Parliament Eurobarometer').

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and EU trend surveys	Fieldwork	GESIS Study ID	Standard Report	Subset	Special Topic

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <https://www.gesis.org/en/eurobarometer-data-service>.

3 Dataset structure and standards

The processing and documentation of the Standard and Special Eurobarometer are based on standards agreed upon between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Eurobarometer Data Service, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable, it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structures

In general, the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1, the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise, from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except for multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country

specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49, the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1, an additional standardized REGION variable 'nuts' (REGION - NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general, missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ('don't know') responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. 'not ascertained' resp. 'no answer') and the value 9 (99, 999, ...) for INAP (i.e. 'inappropriate' resp. 'not applicable'). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or 'level', e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

As noted in chapter 1.8, missing answers (NA) represented in the original dataset by blanks (system missing) have been recoded to standard values by GESIS. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

3.3 International documentation standard (DDI)

The study and variable level documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The variable level documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded 'real' values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the

sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																																																																																																					
CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable documentation

Variable, Label

Question Text (English Language)

studyno1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

Archive study number – distributor

Study number of the distributing data archive.

7488 GESIS STUDY ID ZA7488

studyno1

Value	Label	Missing	Count	Percent	Valid Percent
7488	GESIS STUDY ID ZA7488		27339	100.0	100.0
	Sum		27339	100.0	100.0
	Valid Cases		27339		

studyno2 - ARCHIVE STUDY NUMBER - PUBLISHER

Archive study number – publisher

Study number of the data archive which is publishing this dataset version.

7488 GESIS STUDY ID ZA7488

studyno2

Value	Label	Missing	Count	Percent	Valid Percent
7488	GESIS STUDY ID ZA7488		27339	100.0	100.0

	Valid Cases		27339		

doi - DIGITAL OBJECT IDENTIFIER

Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <https://dx.doi.org/10.4232/1.14339>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

doi

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.14339			27339	100.0	100.0
	Sum		27339	100.0	100.0
	Valid Cases		27339		

version - GESIS ARCHIVE VERSION & DATE

GESIS archive version & date

2.0.0 '2024-07-09'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

version

Value	Label	Missing	Count	Percent	Valid Percent
2.0.0 (2024-07-09)			27339	100.0	100.0
	Sum		27339	100.0	100.0
	Valid Cases		27339		

edition - DATASET EDITION

Dataset edition

This variable identifies the type of archive release for the dataset at hand.

1 Archive pre-release

2 Archive edition

edition

Value	Label	Missing	Count	Percent	Valid Percent
2	ARCHIVE EDITION		27339	100.0	100.0
	Sum		27339	100.0	100.0
	Valid Cases		27339		

survey - SURVEY IDENTIFICATION

Survey identification

The number identifying the Eurobarometer survey.

902 Eurobarometer 90.2 (October-November 2018)

survey

Value	Label	Missing	Count	Percent	Valid Percent
902	Eurobarometer 90.2 (October-November 2018)		27339	100.0	100.0
	Sum		27339	100.0	100.0
	Valid Cases		27339		

caseid - KANTAR CASE ID (SEE NOTE)

Kantar case ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (Kantar). The unique respondent identification variable `unqid` adds the original country identification codes (`tnscntry`) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

For Eurobarometer 90.2 no country specific Kantar case ID for DE-W and DE-E is provided (variable `'caseid'` is coded `'9999999'`, variable `unqid` is coded `'999999999'`). The dataset does include an original unique serial ID across all countries (variable `'serialid'`).

uniqid - UNIQUE RESPONDENT ID (CASEID BY KANTAR COUNTRY CODE) (SEE NOTE)

Unique respondent ID (caseid by tnsntry)

This unique respondent identification is composed of the original Kantar country code and the original Kantar interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: United Kingdom; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 43: Turkey; 46: Croatia; 57: Cyprus (CY-TCC); 63: Macedonia (FYROM); 64: Montenegro; 70: Serbia; 71: Albania). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

For Eurobarometer 90.2 no country specific Kantar case ID for DE-W and DE-E is provided (variable 'caseid' is coded '9999999', variable uniqid is coded '999999999'). The dataset does include an original unique serial ID across all countries (variable 'serialid').

Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom.

serialid - SERIAL CASE ID (PROVIDED BY KANTAR)

Serial case ID (provided by Kantar)

This unique respondent identification number has been provided by Kantar. It shows the position of the cases in the dataset, starting with 1 and ending with 27339 (total number of cases).

Note:

Actual number is coded.

tnscntry - ORIGINAL KANTAR COUNTRY/SAMPLE ID

Original Kantar country/sample ID

The original country identification codes as applied by the fieldwork institute (Kantar).

isocntry - COUNTRY CODE - ISO 3166

Country code - in accordance with ISO 3166-1-alpha-2 country code

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions in former waves. ISO standard codes are not available for the 'historical' East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized 'Turkish Republic of Northern Cyprus'.

Note:

Use of weighting factor w1 is optional.

Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom (GB: ISO 3166-1-alpha-2 country code).

w1 - WEIGHT RESULT FROM TARGET

w1 Weight result from target

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31 (March-April 1989)).

Note:

Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom.

w3 - WEIGHT UNITED GERMANY ONLY

w3 Weight United Germany (only)

This POPULATION SIZE WEIGHT adjusts the East and the West German (sub-national) samples to their share in the total population aged 15 and over, of the united Germany. Weight w3 must be applied whenever Germany is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis.

w3

isocntry	Count	Minimum	Maximum	ArithmeticMean	StandardDeviation
DE-E	509	0.22145	1.67772	0.59131	0.39
DE-W	1001	0.41863	3.80608	1.20781	0.79

eu6 - NATION GROUP EU6 (FOUNDER MEMBERS)

Nation group EU6 (founder members)

NATION GROUP EU6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy, and Luxembourg).

0 Not country group

1 EU6

Note:

Use of weighting factor w5 is mandatory for descriptive analysis.

w5 - WEIGHT EU6

w5 Weight EU6

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w5 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

w11 - WEIGHT EU15

w11 Weight EU15

This POPULATION SIZE WEIGHT adds Austria, Finland, and Sweden to the EU12+DE-E countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w11 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

w23 - WEIGHT EU28 (EU27 + HR)

w23 Weight EU28 (EU27 + HR)

WEIGHT EU28 (EU27 + HR) includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, and Croatia as the new member as of July 2013. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU28 (EU27 + HR). The post-stratification weighting factors are included. Weight w23 must be applied whenever these countries are to be analyzed altogether as a group.

w24 - WEIGHT EU NMS 12

w24 Weight EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w24 must be applied whenever these 12 countries are to be analyzed altogether as a group.

w29 - WEIGHT EURO ZONE 15 (EU27)

w29 Weight EURO ZONE 15 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w30 - WEIGHT NON-EURO ZONE 15 (EU27)

w30 Weight NON-EURO ZONE 15 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovakia, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2008. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w30 must be applied whenever these countries are to be analyzed altogether as a group.

w98 - WEIGHT EURO ZONE 18 (EU28)

w98 Weight EURO ZONE 18 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2014. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), and Latvia (introduction as of January 1, 2014). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w98 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w85 - WEIGHT EURO ZONE 19 (EU28)

w85 Weight EURO ZONE 19 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2015. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), Latvia (introduction as of January 1, 2014), and Lithuania (introduction as of January 1, 2015). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w85 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w86 - WEIGHT NON-EURO ZONE 19 (EU28)

w86 Weight NON-EURO ZONE 19 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Poland, Bulgaria, Romania, Croatia) which did not introduce the EURO up to January 1, 2015. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w86 must be applied whenever these countries are to be analyzed altogether as a group.

w94 - WEIGHT EU NMS 13

w94 Weight EU NMS 13

This POPULATION SIZE WEIGHT refers to the group of the 13 new member countries as of the enlargement in January 2007 and the accession of Croatia in July 2013: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, and Croatia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w94 must be applied whenever these 13 countries are to be analyzed altogether as a group.

wextra - WEIGHT EXTRAPOLATED POPULATION 15+

wextra Weight extrapolated population 15+

Weight wextra extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the dataset.

Note:

Variable wextra was named wex in former versions of this dataset.

d11r3 - AGE: 7 GROUPS (RECODED)

Age of respondent - recoded to seven categories

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 - 74 years
- 7 75 years and older

Derivation:

This variable collapses answers to d11 into seven categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

gen1 - GENERATION BEFORE 1928 (AGE 91 AND OLDER)

Generation born before 1928 (age 91 and older)

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes all respondents born before 1928 and is based on questions d11 ('How old are you?'). Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents.

Note:

See d11 for complete question text.

gen5 - GENERATION 1965-1980 (AGE 38-53)

Generation born between 1965 and 1980 (age 38-53) - 'Generation X'

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes all respondents born between 1965 and 1980 and is based on questions d11 ('How old are you?').

Please note that variables gen1 to gen6 are based on age instead of year of birth, which may entail a slightly inaccurate categorization for some respondents.

Note:

See d11 for complete question text.

qa1_1 - IDEAL EU FUTURE: EQUAL WAGES SAME JOBS ACROSS EU

A. CITIZENS' CONSULTATION

Let's now discuss the future orientations for the European Union

QA1

Which of the following would best describe the ideal future for the European Union?

(SHOW SCREEN - READ OUT - MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 10 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA1_1 Equal wages for the same job across the European Union

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa1_7 - IDEAL EU FUTURE: EQUAL ACCESS TO EDUCATION ACROSS EU

A. CITIZENS' CONSULTATION

Let's now discuss the future orientations for the European Union

QA1

Which of the following would best describe the ideal future for the European Union?

(SHOW SCREEN - READ OUT - MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 10 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA1_7 Fair and equal access to education for all across the European Union

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa2_12 - PREFERRED HARMONISATION BETWEEN EU CNTRS - CONSUMER PROTECTION

QA2

To improve each of the following areas, would you prefer to have more harmonisation between European Union countries, less harmonisation between European Union countries, or would prefer to keep the current situation?

(SHOW SCREEN - READ OUT - ONE ANSWER PER LINE - ROTATE STATEMENTS 1 TO 12 - DISPLAY '99' ON SCREEN INSTEAD OF 'DK')

QA2_12 Consumer Protection

- 1 More harmonisation
- 2 Keep the current situation/ the same/ no change
- 3 Less harmonisation
- 4 DK (SPONTANEOUS)

qa3_1 - IMMIGRATION PRIORITIES FOR BENEFIT IN 20 YRS: IMPROVE SITUATION SOURCE COUNTRY

QA3

On immigration in Europe, what should now be given priority for the benefit of Europeans in twenty years' time?

(SHOW SCREEN - READ OUT - MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 9 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA3_1 Improve the situation in the countries where migrants come from

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa3_6 - IMMIGRATION PRIORITIES FOR BENEFIT IN 20 YRS: CREATE EU BORDER GUARD CORPS

QA3

On immigration in Europe, what should now be given priority for the benefit of Europeans in twenty years' time?

(SHOW SCREEN - READ OUT - MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 9 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA3_6 Create a real Border Guard Corps at European Union level

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa4_1 - ENVIRONMENT PROTECTION PRIORITIES EUROPE: PRESERVE NATURAL RESOURCES

Let's now turn to environment, agriculture and fisheries issues

QA4

From the following list, what should be given priority in Europe to protect the environment?

(SHOW SCREEN - READ OUT - MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 9 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA4_1 Preserve natural resources

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa4_8 - ENVIRONMENT PROTECTION PRIORITIES EUROPE: INCREASE RECYCLING/WASTE SORTING

Let's now turn to environment, agriculture and fisheries issues

QA4

From the following list, what should be given priority in Europe to protect the environment?

(SHOW SCREEN - READ OUT - MAX. 3 ANSWERS - ROTATE ANSWERS 1 TO 9 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA4_8 Increase recycling and waste sorting

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa5_3 - SAFETY PRIORITIES EU: BETTER CONTROL EXTERNAL BORDERS

Let's now discuss about security and threats

QA5

What should be the priorities for the European Union to make life safer for its citizens?

(SHOW SCREEN - READ OUT - MAX. 2 ANSWERS - ROTATE ANSWERS 1 TO 4 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA5_3 Better control of external borders

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa6_4 - MAIN RISKS/THREATS TO EU IN COMING YEARS: CONFLICTS WITH COUNTRIES OUTSIDE EU

QA6

What are the main risks/threats for the European Union in the coming years?

(SHOW SCREEN - READ OUT - MAX. 5 ANSWERS - ROTATE ANSWERS 1 TO 14 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA6_4 Conflicts with countries outside the EU

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa6_10 - MAIN RISKS/THREATS TO EU IN COMING YEARS: BRAIN DRAIN

QA6

What are the main risks/threats for the European Union in the coming years?

(SHOW SCREEN - READ OUT - MAX. 5 ANSWERS - ROTATE ANSWERS 1 TO 14 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA6_10 Brain drain

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qa7_7 - ECON SECURITY MEASURES F EUROPEAN CITIZENS: MORE WELF BENEFITS WHEN FIN DIFFICULTIES

Let's now turn to economic and social issues

QA7

What do you think should be done to provide European citizens with economic security?

(SHOW SCREEN - READ OUT - MAX. 2 ANSWERS - ROTATE ANSWERS 1 TO 7 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA7_7 Increase welfare benefits for those with financial difficulties

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb3a - IMPACT OF CLIMATE CHANGE BY 2050 - FIRSTLY

QB3A

By 2050, which of the following is the most likely to intensify because of climate change? Firstly?

(SHOW SCREEN - READ OUT - ONE ANSWER ONLY - ROTATE ANSWERS 1 TO 6)

- 1 Increasing food and water shortages
- 2 Biodiversity loss
- 3 An increase in infectious diseases or epidemics
- 4 Soil degradation and desertification
- 5 A rise in mass migration to Europe
- 6 Damages to buildings and infrastructures
- 7 Other (SPONTANEOUS)
- 8 DK

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc1b - MAIN EU ASSETS - SECOND

[QC1A

In your opinion, what are the main assets of the EU? Firstly?]

QC1B

IF 'NONE' OR 'DK' IN QC1A THEN SKIP QC1B

And secondly?

(SHOW SCREEN - READ OUT - ONE ANSWER PER COLUMN - ROTATE CODES 1 TO 9 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER' - DO NOT PROPOSE ANSWER GIVEN IN QC1A (EXCEPT FOR CODE 10))

- 1 The standard of living of EU citizens
- 2 The economic, industrial and trading power of the EU
- 3 The EU's respect for democracy, human rights and the rule of law
- 4 The skills and talents of EU citizens
- 5 The quality of infrastructure in the EU
- 6 The EU's capacity for research and innovation
- 7 The good relationship between the EU's Member States
- 8 The EU's ability to promote peace and democracy outside its borders
- 9 The EU's commitment to environmental responsibility
- 10 Other (SPONTANEOUS)
- 11 None (SPONTANEOUS)
- 12 DK
- 99 Inap. None or DK (coded 11 or 12 in qc1a)

Comparability:

Last trend: EB88.1, QC1B

qc1t_11 - MAIN EU ASSETS: NONE (SPONT) (SUM)

[QC1A

In your opinion, what are the main assets of the EU? Firstly?

QC1B

And secondly?]

QC1T_11 None (SPONTANEOUS)

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to this item in qc1a and qc1b.

Note:

See qc1a and qc1b for complete question text.

qc1t_12 - MAIN EU ASSETS: DK (QC1A ONLY)

[QC1A

In your opinion, what are the main assets of the EU? Firstly?

QC1B

And secondly?]

QC1T_12 DK (QC1A ONLY)

0 Not mentioned

1 Mentioned

Derivation:

This variable repeats answers to category '12' (DK) in qc1a, while all other answers to qc1a are summarized with qc1b in variables qc1t_1 to qc1t_11.

Note:

See qc1a and qc1b for complete question text.

qc2_1 - EU CHALLENGES: AGING POPULATION

QC2

Which of the following do you think are the main challenges for the EU?

(SHOW SCREEN - READ OUT - MAX. 3 ANSWERS – DISPLAY ‘96’ ON SCREEN INSTEAD OF ‘OTHER’ – CODES 12 AND 13 ARE EXCLUSIVE)

QC2_1 The ageing of the EU's population

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc2_5 - EU CHALLENGES: PUBLIC DEBT

QC2

Which of the following do you think are the main challenges for the EU?

(SHOW SCREEN - READ OUT - MAX. 3 ANSWERS – DISPLAY ‘96’ ON SCREEN INSTEAD OF ‘OTHER’ – CODES 12 AND 13 ARE EXCLUSIVE)

QC2_5 The public debt of EU Member States

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc2_12 - EU CHALLENGES: NONE (SPONT)

QC2

Which of the following do you think are the main challenges for the EU?

(SHOW SCREEN - READ OUT - MAX. 3 ANSWERS – DISPLAY ‘96’ ON SCREEN INSTEAD OF ‘OTHER’ – CODES 12 AND 13 ARE EXCLUSIVE)

QC2_12 None (SPONTANEOUS)

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc3_5 - VALUE FOR SOCIETY: PROGRESS AND INNOVATION

QC3

From the following items, which two should our society emphasise in order to face major global challenges?

(SHOW SCREEN – READ OUT – MAX. 2 ANSWERS – ROTATE CODES 1 TO 6 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER' – CODE 8 AND 9 ARE EXCLUSIVE)

QC3_5 Progress and innovation

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qc12_12 - EU VS NATIONAL LEVEL - EDUCATION

QC12

In your opinion, at what level can we deal with each of the following areas most efficiently?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '99' INSTEAD OF 'DK')

QC12_12 Education

- 1 At the EU level only
- 2 Mainly at the EU level
- 3 Equally at the EU and the national level
- 4 Mainly at the national level
- 5 At the national level only
- 6 DK (SPONTANEOUS)

d62_3 - INTERNET USE FREQ: ON MOBILE DEVICE

D. INTERNET SECURITY

Let's now talk about another topic.

D62

Could you tell me if ...?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE – DISPLAY '95' INSTEAD OF 'NO INTERNET ACCESS')

D62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

- 1 Everyday or almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

d62t1 - INTERNET USE - INDEX 1 (4 CAT)

Frequency of internet use - index with four categories

- 1 (Almost) everyday (at least once coded 1 in d62_1 to d62_4)
- 2 Often / sometimes (at least once coded 2 to 5 in d62_1 to d62_4)
- 3 Never/no access (coded 6 or 6/7 in d62_1 to d62_4)
- 4 No Internet access at all (coded 7 in d62_1 to d62_4)

Derivation:

This variable summarizes responses to d62 in four categories.

[d62 Could you tell me if ...?

d62_1 You use the Internet at home, in your home

d62_2 You use the Internet on your place of work

d62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62_4 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_4 are coded 1 in d62t1 ('Everyday/Almost everyday'). Respondents coded 2, 3, 4 or 5 in each variable d62_1 to d62_4 are coded 2 ('Often/sometimes') in d62t1. Respondents coded 6 ('Never') in each variable d62_1 to d62_4 are coded 3 ('Never to all') in d62t1. Respondents coded 6 ('Never') in each variable d62_1 to d62_4, or at least once coded 6 in d62_1 to d62_4 and coded 7 ('No internet access') in the other variable(s), are coded 3 ('Never/No access') in d62t1. Respondents coded 7 ('No internet access') in each variable d62_1 to d62_4 are coded 4 ('No internet access at all') in d62t1.

Note:

See d62 for complete question text.

Variable d62t1 was named d62t in former versions of this dataset.

d62t2 - INTERNET USE - INDEX 2 (7 CAT)

Frequency of internet use - index with seven categories

- 1 (Almost) everyday (at least once coded 1 in d62_1 to d62_4)
- 2 Two or three times a week (not coded 1 and at least once coded 2 in d62_1 to d62_4)
- 3 About once a week (not coded 1 to 2 and at least once coded 3 in d62_1 to d62_4)
- 4 Two or three times a month (not coded 1 to 3 and at least once coded 4 in d62_1 to d62_4)
- 5 Less often (not coded 1 to 4 and at least once coded 5 in d62_1 to d62_4)
- 6 Never/no access (coded 6 or 6/7 in d62_1 to d62_4)
- 7 No Internet access at all (coded 7 in d62_1 to d62_4)

Derivation:

This variable summarizes responses to d62.

[d62 Could you tell me if ...?

d62_1 You use the Internet at home, in your home

d62_2 You use the Internet on your place of work

d62_3 You use the Internet on your mobile device (laptop, smartphone, tablet, etc.)

d62_4 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_4 are coded 1 in d62t2 ('Everyday/Almost everyday'). Respondents coded 2 at least once in d62_1 to d62_4 and not coded 1, are coded 2 in d62t2 ('Two or three times a week'). Respondents coded 3 at least once in d62_1 to d62_4 and not coded 1 or 2, are coded 5 in d62t2 ('About once a week'). Respondents coded 4 at least once in d62_1 to d62_4 and not coded 1 to 3, are coded 4 in d62t2 ('Two or three times a month'). Respondents coded 5 at least once in d62_1 to d62_4 and not coded 1 to 4, are coded 5 in d62t2 ('Less often'). Respondents coded 6 ('Never') in each variable d62_1 to d62_4, or at least once coded 6 in d62_1 to d62_4 and coded 7 ('No internet access') in the other variable(s), are coded 6 ('Never/No access') in d62t2. Respondents coded 7 ('No internet access') in each variable d62_1 to d62_4 are coded 7 ('No internet access at all') in d62t2.

Note:

See d62 for complete question text.

Generated by GESIS in accordance with former surveys.

Variable d62t2 was named netuse in former versions of this dataset.

qd1_5 - INTERNET ACCESS DEVICES: GAMES CONSOLE

QD1

ASK QD1 TO QD5 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3 - OTHERS GO TO QD6

What devices do you use to access the Internet?

(SHOW SCREEN - READ OUT - MULTIPLE ANSWERS POSSIBLE - ROTATE ANSWERS 1 TO 5 - DISPLAY '96' ON SCREEN INSTEAD OF 'OTHER')

QA1_5 Games console

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access (not coded 1 to 5 in d62_1 to d62_4)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Comparability:

qd6t - ONLINE HARASSMENT CHILD PROTECTION (SUM)

Respondents who did something to protect children under the age of 16 from online harassment - summarized

0 Nothing (Spontaneous)/Not applicable (Spontaneous)/DK (Spontaneous)

1 Total 'Something is done'

Derivation:

This variable summarizes answers qd6_1 to qd6_4.

[qd6 Thinking about the online harassment of children under the age of 16 (e.g. bullying or grooming), what, if anything, is done in your household to protect them while they are online?

qd6_1 The child's Internet use is monitored (SPONTANEOUS)

qd6_2 The security settings on browser for use by child are adjusted (SPONTANEOUS)

qd6_3 The time spent by child online is limited (SPONTANEOUS)

qd6_4 Online risks are discussed with the child (SPONTANEOUS)]

Comparability:

See qd6 for complete question text.

Variable qd6t is available starting with dataset version v2.0.0.

qd8_1 - CYBERCRIME CONCERN - FRAUDULENT E-MAIL/PHONE CALL

QD8

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3 - OTHERS GO TO QD13

Cybercrimes include many different types of criminal activity. How concerned are you personally about experiencing or being a victim of the following situations?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '99' ON SCREEN INSTEAD OF 'DK')

QD8_1 Fraudulent emails or phone calls asking for your personal details (including access to your computer, logins, banking or payment information)

- 1 Very concerned
- 2 Fairly concerned
- 3 Not very concerned
- 4 Not at all concerned
- 5 DK (SPONTANEOUS)
- 9 Inap. Do not use the Internet/no access (not coded 1 to 5 in d62_1 to d62_4)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

qd8_4 - CYBERCRIME CONCERN - MALICIOUS SOFTWARE

QD8

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3 - OTHERS GO TO QD13

Cybercrimes include many different types of criminal activity. How concerned are you personally about experiencing or being a victim of the following situations?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '99' ON SCREEN INSTEAD OF 'DK')

QD8_4 The infection of devices with malicious software (viruses, etc.)

- 1 Very concerned
- 2 Fairly concerned
- 3 Not very concerned
- 4 Not at all concerned
- 5 DK (SPONTANEOUS)
- 9 Inap. Do not use the Internet/no access (not coded 1 to 5 in d62_1 to d62_4)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Comparability:

qd9_1 - CYBERCRIME GRAVITY - FRAUDULENT E-MAIL/PHONE CALL

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3 - OTHERS GO TO QD13

QD9

Please tell me, for each of the following situations, if you think it is a very serious crime, a fairly serious crime, a minor crime or not a crime at all?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '99' INSTEAD OF 'DK')

QD9_1 Fraudulent emails or phone calls asking for one's personal details (including access to one's computer, logins, banking or payment information)

- 1 A very serious crime
- 2 A fairly serious crime
- 3 A minor crime
- 4 Not a crime at all
- 5 DK (SPONTANEOUS)
- 9 Inap. Do not use the Internet/no access (not coded 1 to 5 in d62_1 to d62_4)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

qd9_5 - CYBERCRIME GRAVITY - IDENTITY THEFT

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3 - OTHERS GO TO QD13

QD9

Please tell me, for each of the following situations, if you think it is a very serious crime, a fairly serious crime, a minor crime or not a crime at all?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '99' INSTEAD OF 'DK')

QD9_5 Identity theft (somebody stealing your personal data and impersonating you)

- 1 A very serious crime
- 2 A fairly serious crime
- 3 A minor crime
- 4 Not a crime at all
- 5 DK (SPONTANEOUS)
- 9 Inap. Do not use the Internet/no access (not coded 1 to 5 in d62_1 to d62_4)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

qd9_9 - CYBERCRIME GRAVITY - BANKING FRAUD ONLINE

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3 - OTHERS GO TO QD13

QD9

Please tell me, for each of the following situations, if you think it is a very serious crime, a fairly serious crime, a minor crime or not a crime at all?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '99' INSTEAD OF 'DK')

QD9_9 Bank card or online banking fraud

- 1 A very serious crime
- 2 A fairly serious crime
- 3 A minor crime
- 4 Not a crime at all
- 5 DK (SPONTANEOUS)
- 9 Inap. Do not use the Internet/no access (not coded 1 to 5 in d62_1 to d62_4)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

qd10_3 - CYBERCRIME EXPERIENCE - CYBER ATTACKS

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3 - OTHERS GO TO QD13

QD10

In the last three years, how often have you personally experienced or been a victim of each the following situations?

(SHOW SCREEN – READ OUT – ONE ANSWER PER LINE - DISPLAY '99' INSTEAD OF 'DK')

QD10_3 Cyber-attacks which prevent you from accessing online services like banking or public services

- 1 Once
- 2 Two or three times
- 3 More than three times
- 4 Never
- 5 DK (SPONTANEOUS)
- 9 Inap. Do not use the Internet/no access (not coded 1 to 5 in d62_1 to d62_4)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_1)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_1_5 - CYBERCRIME EXPERIENCE ACTION FRAUDULENT E-MAIL: CONTACTED CONSUMER PROT ORGANISATION

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD12_1

Receiving fraudulent emails or phone calls asking for your personal details (including access to your computer, logins, banking or payment information)

QD12_1_5 You contacted a consumer protection organisation

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_1)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_2_1 - CYBERCRIME EXPERIENCE ACTION PURCHASE FRAUD: DID NOTHING

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD12_2

Online fraud where goods purchased are not delivered, are counterfeit or are not as advertised

QD12_2_1 Nothing

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_2)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_2_6 - CYBERCRIME EXPERIENCE ACTION PURCHASE FRAUD: REPORTED THROUGH OFFICIAL WEBSITE/EMAIL

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD12_2

Online fraud where goods purchased are not delivered, are counterfeit or are not as advertised

QD12_2_6 You reported the situation through an official website or e-mail address (other than one belonging to the police)

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_2)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_3)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_3)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_3t - CYBERCRIME EXPERIENCE ACTION CYBER ATTACKS (SUM)

Cybercrime cyber attacks - contact summarized

0 Not mentioned (Nothing/DK)

1 Total 'At least one action'

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_3)

Derivation:

This variable summarizes responses to qd12_3_2 to qd12_3_7.

[qd12 What have you done in each of the situations you have personally experienced or been a victim of?

qd12_3 Cyber-attacks which prevent you from accessing online services like banking or public services

qd12_3_2 Contact the police

qd12_3_3 Contact the website/vendor

qd12_3_4 Contact your Internet service provider

qd12_3_5 Contact a consumer protection organisation

qd12_3_6 Report the situation through an official website or e-mail address (other than one belonging to the police)

qd12_3_7 Other (SPONTANEOUS)]

Note:

See qd12 for complete question text.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_4)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_4_8 - CYBERCRIME EXPERIENCE ACTION MALICIOUS SOFTWARE: DK

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD12_4

Discovering malicious software (viruses, etc.) on your device

QD12_4_8 DK

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_4)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_4t - CYBERCRIME EXPERIENCE ACTION MALICIOUS SOFTWARE (SUM)

Cybercrime malicious software - contact summarized

0 Not mentioned (Nothing/DK)

1 Total 'At least one action'

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_4)

Derivation:

This variable summarizes responses to qd12_4_2 to qd12_4_7.

[qd12 What have you done in each of the situations you have personally experienced or been a victim of?

qd12_4 Discovering malicious software (viruses, etc.) on your device

qd12_4_2 Contact the police

qd12_4_3 Contact the website/vendor

qd12_4_4 Contact your Internet service provider

qd12_4_5 Contact a consumer protection organisation

qd12_4_6 Report the situation through an official website or e-mail address (other than one belonging to the police)

qd12_4_7 Other (SPONTANEOUS)]

Note:

See qd12 for complete question text.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_5_4 - CYBERCRIME EXPERIENCE ACTION IDENTITY THEFT: CONTACTED INTERNET SERVICE PROVIDER

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD12_5

Identity theft (somebody stealing your personal data and impersonating you)

QD12_5_4 You contacted your Internet service provider

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_5)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_5t - CYBERCRIME EXPERIENCE ACTION IDENTITY THEFT (SUM)

Cybercrime identity theft - contact summarized

0 Not mentioned (Nothing/DK)

1 Total 'At least one action'

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_5)

Derivation:

This variable summarizes responses to qd12_5_2 to qd12_5_7.

[qd12 What have you done in each of the situations you have personally experienced or been a victim of?

qd12_5 Identity theft (somebody stealing your personal data and impersonating you)

qd12_5_2 Contact the police

qd12_5_3 Contact the website/vendor

qd12_5_4 Contact your Internet service provider

qd12_5_5 Contact a consumer protection organisation

qd12_5_6 Report the situation through an official website or e-mail address (other than one belonging to the police)

qd12_5_7 Other (SPONTANEOUS)]

Note:

See qd12 for complete question text.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_6_5 - CYBERCRIME EXPERIENCE ACTION ACCIDENTALLY CHILD PORNOGRAPHY: CONTACTED CONSUMER PROT
ORGANISATION

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTOM FOR 'DK')

QD12_6

Accidentally encountering child pornography online

QD12_6_5 You contacted a consumer protection organisation

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_6)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_7_1 - CYBERCRIME EXPERIENCE ACTION ACCIDENTALLY EXTREMIST MATERIALS: DID NOTHING

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD12_7

Accidentally encountering material which promotes racial hatred or religious extremism

QD12_7_1 Nothing

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_7)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_7_6 - CYBERCRIME EXPERIENCE ACTION ACCIDENTALLY EXTREMIST MATERIALS: REPORTED THROUGH OFFICIAL WEBSITE/EMAIL

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTOM FOR 'DK')

QD12_7

Accidentally encountering material which promotes racial hatred or religious extremism

QD12_7_6 You reported the situation through an official website or e-mail address (other than one belonging to the police)

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_7)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_8)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_8)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_9_3 - CYBERCRIME EXPERIENCE ACTION BANKING FRAUD ONLINE: CONTACTED WEBSITE/VENDOR

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD12_9

Being a victim of bank card or online banking fraud

QD12_9_3 You contacted the website/vendor

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_9)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_9_8 - CYBERCRIME EXPERIENCE ACTION BANKING FRAUD ONLINE: DK

ASK QD8 TO QD12 IF 'USE THE INTERNET', CODE 1 TO 5 IN D62_1 OR D62_2 OR D62_3

QD12

ASK QD12 FOR EACH SITUATION WHERE RESPONDENTS HAVE BEEN A VICTIM (CODES 1 TO 3 IN QD10)

What have you done in each of the situations you have personally experienced or been a victim of?

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD12_9

Being a victim of bank card or online banking fraud

QD12_9_8 DK

0 Not mentioned

1 Mentioned

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_9)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd12_9t - CYBERCRIME EXPERIENCE ACTION BANKING FRAUD ONLINE (SUM)

Cybercrime credit card or banking fraud - contact summarized

0 Not mentioned (Nothing/DK)

1 Total 'At least one action'

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_9)

Derivation:

This variable summarizes responses to qd12_9_2 to qd12_9_7.

[qd12 What have you done in each of the situations you have personally experienced or been a victim of?

qd12_9 Being a victim of bank card or online banking fraud

qd12_9_2 Contact the police

qd12_9_3 Contact the website/vendor

qd12_9_4 Contact your Internet service provider

qd12_9_5 Contact a consumer protection organisation

qd12_9_6 Report the situation through an official website or e-mail address (other than one belonging to the police)

qd12_9_7 Other (SPONTANEOUS)]

Note:

See qd12 for complete question text.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

9 Inap. Do not use the Internet/no access and have not been victim in that situation (not coded 1 to 5 in d62_1 to d62_4 and not coded 1 to 3 in qd10_10)

Note:

In contrast to the instruction in the questionnaire the filtering of variables qd1 to qd5 and qd8 to qd12 is also based on codes 1 to 5 on d62_4 ('INTERNET USE FREQ: SOMEWHERE ELSE') and therefore also includes respondents who only report this type of internet use.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

See qd12 for complete question text.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_1_6 - CYBERCRIME POTENTIAL ACTION FRAUDULENT E-MAIL: REPORT THROUGH OFFICIAL WEBSITE/EMAIL

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_1

Receiving fraudulent emails or phone calls asking for your personal details (including access to your computer, logins, banking or payment information)

QD13_1_6 Report the situation through an official website or e-mail address

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_2_8 - CYBERCRIME POTENTIAL ACTION PURCHASE FRAUD: DK

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_2

Online fraud where goods purchased are not delivered, are counterfeit or are not as advertised

QD13_2_8 DK

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_3_5 - CYBERCRIME POTENTIAL ACTION CYBER ATTACKS: CONTACT CONSUMER PROT ORGANISATION

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_3

Cyber-attacks which prevent you from accessing online services like banking or public services

QD13_3_5 Contact a consumer protection organisation

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_4_1 - CYBERCRIME POTENTIAL ACTION MALICIOUS SOFTWARE: DO NOTHING

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_4

Discovering malicious software (viruses, etc.) on your device

QD13_4_1 Do nothing

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_4_7 - CYBERCRIME POTENTIAL ACTION MALICIOUS SOFTWARE: OTHER (SPONT)

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_4

Discovering malicious software (viruses, etc.) on your device

QD13_4_7 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_5t - CYBERCRIME POTENTIAL ACTION IDENTITY THEFT (SUM)

Cybercrime potential identity theft - contact summarized

0 Not mentioned (Do nothing/DK)

1 Total 'At least one action'

Derivation:

This variable summarizes responses to qd13_5_2 to qd13_5_7.

[qd13 Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

qd13_5 Identity theft (somebody stealing your personal data and impersonating you)

qd13_5_2 Contact the police

qd13_5_3 Contact the website/vendor

qd13_5_4 Contact your Internet service provider

qd13_5_5 Contact a consumer protection organisation

qd13_5_6 Report the situation through an official website or e-mail address

qd13_5_7 Other (SPONTANEOUS)]

Note:

See qd13 for complete question text.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_6_6 - CYBERCRIME POTENTIAL ACTION ACCIDENTALLY CHILD PORNOGRAPHY: REPORT THROUGH OFFICIAL WEBSITE/EMAIL

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_6

Accidentally encountering child pornography online

QD13_6_6 Report the situation through an official website or e-mail address

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_7

Accidentally encountering material which promotes racial hatred or religious extremism

QD13_7_2 Contact the police

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_7_8 - CYBERCRIME POTENTIAL ACTION ACCIDENTALLY EXTREMIST MATERIALS: DK

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_7

Accidentally encountering material which promotes racial hatred or religious extremism

QD13_7_8 DK

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_8t - CYBERCRIME POTENTIAL ACTION ACCOUNT BEING HACKED (SUM)

Cybercrime potential account hacked - contact summarized

- 0 Not mentioned (Do nothing/DK)
- 1 Total 'At least one action'

Derivation:

This variable summarizes responses to qd13_8_2 to qd13_8_7.

[qd13_8_2 Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

qd13_8_3 Your social network account or email being hacked

qd13_8_4 Contact the police

qd13_8_5 Contact the website/vendor

qd13_8_6 Contact your Internet service provider

qd13_8_7 Contact a consumer protection organisation

qd13_8_8 Report the situation through an official website or e-mail address

qd13_8_9 Other (SPONTANEOUS)]

Note:

See qd13 for complete question text.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_9_1 - CYBERCRIME POTENTIAL ACTION BANKING FRAUD ONLINE: DO NOTHING

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_9

Being a victim of bank card or online banking fraud

QD13_9_1 Do nothing

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_9_7 - CYBERCRIME POTENTIAL ACTION BANKING FRAUD ONLINE: OTHER (SPONT)

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_9

Being a victim of bank card or online banking fraud

QD13_9_7 Other (SPONTANEOUS)

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_10_3 - CYBERCRIME POTENTIAL ACTION RANSOMWARE: CONTACT WEBSITE/VENDOR

QD13

ASK ALL

Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

(SHOW SCREEN – READ OUT - MULTIPLE ANSWERS PER LINE - DISPLAY '96' INSTEAD OF 'OTHER' - USE BOTTON FOR 'DK')

QD13_10

Being asked for a payment in return for getting back control of their device

QD13_10_3 Contact the website/vendor

0 Not mentioned

1 Mentioned

Note:

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd13_10t - CYBERCRIME POTENTIAL ACTION RANSOMWARE (SUM)

Cybercrime potential ransomware - contact summarized

0 Not mentioned (Do nothing/DK)

1 Total 'At least one action'

Derivation:

This variable summarizes responses to qd13_10_2 to qd13_10_7.

[qd13 Regardless of whether or not, you have previously been a cybercrime victim, what would you do if you experienced or were a victim of the following situations? You would:

qd13_10 Being asked for a payment in return for getting back control of their device

qd13_10_2 Contact the police

qd13_10_3 Contact the website/vendor

qd13_10_4 Contact your Internet service provider

qd13_10_5 Contact a consumer protection organisation

qd13_10_6 Report the situation through an official website or e-mail address

qd13_10_7 Other (SPONTANEOUS)]

Note:

See qd13 for complete question text.

Please note that there are five respondents in the Swedish sample that are coded 1 ('Mentioned') in one or more of the 'DID NOTHING'-variables in qd12 and qd13 while at the same time also reporting to have performed one or more actions. The respective serialids are: 11751, 11949, 11952, 11975, and 12312. One of these cases (11952) had been erroneously corrected to 0 ('Not mentioned (Nothing/DK)') in qd12_1t and qd12_4t in dataset version v1.0.0, which then led to a slight deviation from the results in the official tabular reports. This respondent has been recoded to 1 ('Total 'At least one action') in qd12_1t and qd12_4t in dataset version v2.0.0.

qd14 - AWARE OF WEBSITE TO REPORT CYBERCRIME/ILLEGAL ONLINE ACTIVITY

QD14

Are you aware of the existence of an official website or e-mail address in (OUR COUNTRY) where you can report a cybercrime or any other illegal online behaviour (e.g. cyberattack, online harassment or bullying)? This excludes consumer protection websites.

(READ OUT - ONE ANSWER ONLY)

- 1 Yes, and you have already reported a cybercrime or some other illegal online behaviour through this website or e-mail address
- 2 Yes, but you have never reported a cybercrime or any other illegal online behaviour through this website or e-mail address
- 3 No, you are not aware
- 4 DK

qd15_4 - CYBERCRIME - RISK IS INCREASING

QD15

Could you please tell me to what extent you agree or disagree with each of the following statements?

(ROTATE ITEMS 1 TO 5 - DISPLAY '99' INSTEAD OF 'DK' - SHOW SCREEN - READ OUT - ONE ANSWER PER LINE)

QD15_4 You believe the risk of becoming a victim of cybercrime is increasing

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

d1 - LEFT-RIGHT PLACEMENT

DEMOGRAPHICS

D1

ASK ALL

In political matters people talk of 'the left' and 'the right'. How would you place your views on this scale?

(SHOW SCREEN – DO NOT PROMPT – IF CONTACT HESITATES, TRY AGAIN)

- 1 Box 1 - left
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - right
- 97 Refusal (SPONTANEOUS)
- 98 DK
- 99 Inap. (no consent given)

Note:

Original code '11' recoded to '97'.

Original code '12' recoded to '98'.

From Eurobarometer 89.3 to Eurobarometer 90.3 respondents were asked for consent to being asked sensitive questions in order to achieve compliance with European GDPR regulations. Respondents that refused to give consent in the beginning of the interview are assigned the value '9' or '99' and labelled 'Inap. (No consent given)' on questions requiring prior consent. The variables recording this consent have not been part of the original data delivery.

d1r1 - LEFT-RIGHT PLACEMENT: 3 CAT (RECODED)

Left-right placement - recoded to three categories

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 - 10) Right
- 9 DK/Refusal (Spontaneous)/No consent given

Derivation:

This variable collapses answers to d1 into three categories.

[d1 In political matters people talk of 'the left' and 'the right'. How would you place your views on this scale?]

Note:

See d1 for complete question text.

d7 - MARITAL STATUS

D7

Which of the following best corresponds to your own current situation?

(SHOW SCREEN – READ OUT – ONE ANSWER ONLY)

MARRIED OR REMARRIED

- 1 (Re-)Married: without children
- 2 (Re-)Married: children this marriage
- 3 (Re-)Married: children prev marriage
- 4 (Re-)Married: children this/prev marriage

SINGLE LIVING WITH A PARTNER

- 5 Single liv w partner: without children
- 6 Single liv w partner: childr this union
- 7 Single liv w partner: childr prev union
- 8 Single liv w partner: childr this/prev union

SINGLE

- 9 Single: without children
- 10 Single: with children

DIVORCED OR SEPARATED

- 11 Divorced/Separated: without children
- 12 Divorced/Separated: with children

WIDOW/ER

- 13 Widow: without children
- 14 Widow: with children

15 Other (SPONT.)

97 Refusal (SPONT.)

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

Marital status recoded to five categories with focus on partnership

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for complete question text.

d7r2 - MARITAL STATUS: 4 CAT (RECODED)

Marital status recoded to four categories with focus on marriage

- 1 Unmarried (coded 9 to 10 in d7)
- 2 (Re-)Married/Single with partner (coded 1 to 8 in d7)
- 3 Divorced or separated (coded 11 to 12 in d7)
- 4 Widow (coded 13 to 14 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Which of the following best corresponds to your own current situation?]

Note:

See d7 for complete question text.

d8 - AGE EDUCATION

D8

How old were you when you stopped full-time education?

(IF 'STILL STUDYING' CODE '00' – IF 'NO EDUCATION' CODE '01' – IF 'REFUSAL' CODE '98' – IF 'DK' CODE '99' – CANNOT BE LARGER THAN D11)

(MAKE SURE THE RESPONDENT UNDERSTANDS THAT D8 IS ABOUT FULL-TIME EDUCATION)

0 Refusal

2 2 years

88 88 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code '00' recoded to '98'.

Original code '01' recoded to '97'.

Original code '98' recoded to '0'.

Please note that users might be advised to consider pre-school ages (outliers) as with 'no full-time education' or to treat them as missing values.

Actual number is coded.

Comparability:

Last trend: EB90.1, D8

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

Age when finished full-time education - recoded to 11 categories

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 for indicated ages lowest (2) to 14 and 22 to highest (88).

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d8r2 - AGE EDUCATION: 5 CAT (RECODED)

Age when finished full-time education - recoded to five categories

- 1 Up to 15 years
- 2 16-19 years
- 3 20 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 into three age groups.

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d15a - OCCUPATION OF RESPONDENT

D15A

What is your current occupation?

(DO NOT SHOW SCREEN – IF D15A=2 THEN D8=00 – IF D15<>2 AND D8=00 THEN CORRECT D8 OR CHANGE THE ANSWER IN D15A)

NON-ACTIVE

- 1 Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
- 2 Student
- 3 Unemployed or temporarily not working
- 4 Retired or unable to work through illness

SELF EMPLOYED

- 5 Farmer
- 6 Fisherman
- 7 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 8 Owner of a shop, craftsmen, other self-employed person
- 9 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 10 Employed professional (employed doctor, lawyer, accountant, architect)
- 11 General management, director or top management (managing directors, director general, other director)
- 12 Middle management, other management (department head, junior manager, teacher, technician)
- 13 Employed position, working mainly at a desk
- 14 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 15 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 16 Supervisor
- 17 Skilled manual worker
- 18 Other (unskilled) manual worker, servant

Note:

Please note for d15a that answer category 19 'Never did any paid work' is listed in the questionnaires, but has not been included as a possible item. The answer category 'Never did any paid work' only becomes relevant in the follow-up question d15b.

d15a_r1 - OCCUPATION OF RESPONDENT (RECODED)

Occupation of respondent - recoded to employment status

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15a_r2 - RESPONDENT OCCUPATION SCALE (C14)

Occupation of respondent - scale (C14)

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Managers (coded 10 to 12 in d15a)
- 3 Other white collars (coded 13 or 14 in d15a)
- 4 Manual workers (coded 15 to 18 in d15a)
- 5 House persons (coded 1 in d15a)
- 6 Unemployed (coded 3 in d15a)
- 7 Retired (coded 4 in d15a)
- 8 Students (coded 2 in d15a)

Derivation:

This scale is based on a combination/selection of answers to variable d15a.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

[D15A

What is your current occupation?]

D15B

ASK D15B IF 'NOT DOING ANY PAID WORK CURRENTLY', CODES 1 TO 4 IN D15A

Did you do any paid work in the past? What was your last occupation?

(DO NOT SHOW SCREEN)

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

Please note for d15a that answer category 19 'Never did any paid work' is listed in the questionnaires, but has not been included as a possible item. The answer category 'Never did any paid work' only becomes relevant in the follow-up question d15b.

Comparability:

Last trend: EB90.1, D15B

d15b_r - OCCUPATION OF RESPONDENT - LAST JOB (RECODED)

Occupation of respondent: last job - recoded to employment status

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (coded 15 in d15b)
- 9 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

[d15b Did you do any paid work in the past? What was your last occupation?]

Note:

See d15b for complete question text.

d40a_r - HOUSEHOLD COMPOSITION: AGED 15+ (RECODED)

n of people in household aged 15 years or more - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 9 DK/NA [NOT DOCUMENTED]

Derivation:

This variable groups answers to question d40a.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?]

Note:

See d40a for complete question text.

d40c_r - HOUSEHOLD COMPOSITION: AGED 10-14 (RECODED)

n of people in household aged 10 to 14 years - recoded to five categories

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question d40c.

[d40c Could you tell me how many children aged 10 to 14 years old live in your household?]

Note:

See d40c for complete question text.

d40t - HOUSEHOLD COMPOSITION: SIZE (SUMMARIZED)

n of people in household - summarized

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 16 Sixteen
- 17 Seventeen
- 18 Eighteen
- 19 Nineteen
- 20 Twenty
- 23 Twenty-three
- 24 Twenty-four
- 30 Thirty
- 99 DK/NA (coded 99 in d40a)

Derivation:

This variable summarizes d40a, d40b, and d40c.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children less than 10 years old live in your household?

d40c Could you tell me how many children aged 10 to 14 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

Variable d40t was named d40abc in former versions of this dataset.

Generated by GESIS in accordance with former surveys.

d40t by isocntry, Absolute Values (Row Percent), weighted by w1

d40_d11 - ONE-PERSON HOUSEHOLD COMPOSITION BY AGE

One-person households – recoded to three age categories

- 1 15 - 29 years
- 2 30 - 59 years
- 3 60 years and older
- 9 Inap. No one-person-household (not coded 1 in d40t)

Derivation:

This variable collapses answers to d11 into three age categories, but only for one-person households.

[d11 How old are you?

d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d11 and d40a, d40b, and d40c for complete question text.

d43t - PHONE AVAILABLE (SUMMARIZED)

Availability of mobile and/or landline phones - summarized

- 1 Mobile only
- 2 Landline only
- 3 Landline & mobile
- 4 No telephone

Derivation:

This variable summarizes answers to question d43a and d43b.

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?]

Respondents coded 2 in d43a and 1 in d43b are coded 1 ('Mobile only') in d43t. Respondents coded 1 in d43a and 2 in d43b are coded 2 ('Landline only') in d43t. Respondents coded 1 in d43a and d43b are coded 3 ('Landline and mobile') in d43t.

Respondents coded 2 in d43a and d43b are coded 4 ('No telephone') in d43t.

Note:

See d43a and d43b for complete question text.

d71_1 - POLITICAL DISCUSSION - NATIONAL MATTERS

D71

When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about...?

(READ OUT – ONE ANSWER PER LINE)

D71_1 National political matters

- 1 Frequently
- 2 Occasionally
- 3 Never
- 7 Refusal (SPONTANEOUS)
- 8 DK
- 9 Inap. (no consent given)

Note:

From Eurobarometer 89.3 to Eurobarometer 90.3 respondents were asked for consent to being asked sensitive questions in order to achieve compliance with European GDPR regulations. Respondents that refused to give consent in the beginning of the interview are assigned the value '9' or '99' and labelled 'Inap. (No consent given)' on questions requiring prior consent. The variables recording this consent have not been part of the original data delivery.

Original code '4' recoded to '7'.

Original code '5' recoded to '8'.

d71_3 - POLITICAL DISCUSSION - LOCAL MATTERS

D71

When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about...?

(READ OUT – ONE ANSWER PER LINE)

D71_3 Local political matters

- 1 Frequently
- 2 Occasionally
- 3 Never
- 7 Refusal (SPONTANEOUS)
- 8 DK
- 9 Inap. (no consent given)

Note:

From Eurobarometer 89.3 to Eurobarometer 90.3 respondents were asked for consent to being asked sensitive questions in order to achieve compliance with European GDPR regulations. Respondents that refused to give consent in the beginning of the interview are assigned the value '9' or '99' and labelled 'Inap. (No consent given)' on questions requiring prior consent. The variables recording this consent have not been part of the original data delivery.

Original code '4' recoded to '7'.

Original code '5' recoded to '8'.

polintr - POLITICAL INTEREST INDEX (D71_1/2/3)

Index of interest in politics

- 0 DK (coded 8 in d71_1, d71_2 and d71_3)
- 1 Not at all interested in politics
- 2 Slightly interested in politics
- 3 Moderately interested in politics
- 4 Strongly interested in politics
- 9 Inap. (no consent given)

Derivation:

The POLITICAL INTEREST INDEX is based on the answers to the following question: 'When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?' (d71_1, d71_2, and d71_3). According to former studies the index was constructed by first attributing a score to each item in d71 ('Never' = 0; 'Occasionally' = 1; 'Frequently' = 2) and then adding together the three political dimensions (national/European/local). This procedure results in four different index levels ('Not at all interested in politics' if added up score = 0; 'Slightly' if added up score = 1 or 2; 'Moderately' if added up score = 3 or 4; 'Strongly' if added up score = 5 or 6) which have been coded accordingly into the categories 1 to 4. Furthermore combinations with DK responses in maximum two variables (d71_1, d71_2, and d71_3) have been coded as follows: 'DK' and 'Never' = 'Not at all'; 'DK' and 'Never' and 'Occasionally' or 'Frequently' = 'Slightly'; 'DK' and 'Occasionally' and at least one 'Frequently' = 'Moderately'.

Note:

This new POLITICAL INTEREST INDEX is introduced as C2 starting with EB 73.4. Please notice that in former waves up to EB 69.2 the VALUE ORIENTATION - POST-MATERIALISM index was named C2.

Compared to the original variable the scale has been inversed by GESIS in accordance with former practice. Furthermore responses coded 'DK' to all source variables (d71_1, d71_2, and d71_3) have been recoded to '0' (DK).

Modified by GESIS.

See d71 for complete question text.

d73_1 - PRESENT DIRECTION - COUNTRY

D73

At the present time, would you say that, in general, things are going in the right direction or in the wrong direction, in...?

(READ OUT – ONE ANSWER PER LINE – DISPLAY ‘94’ ON SCREEN INSTEAD OF ‘NEITHER THE ONE NOR THE OTHER’ – DISPLAY ‘98’ INSTEAD OF ‘REFUSAL’)

D73_1 (OUR COUNTRY)

- 1 Things are going in the right direction
- 2 Things are going in the wrong direction
- 3 Neither the one nor the other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)
- 8 DK
- 9 Inap. (no consent given)

Note:

From Eurobarometer 89.3 to Eurobarometer 90.3 respondents were asked for consent to being asked sensitive questions in order to achieve compliance with European GDPR regulations. Respondents that refused to give consent in the beginning of the interview are assigned the value ‘9’ or ‘99’ and labelled ‘Inap. (No consent given)’ on questions requiring prior consent. The variables recording this consent have not been part of the original data delivery.

Original code ‘4’ recoded to ‘7’.

Original code ‘5’ recoded to ‘8’.

opls - OPINION LEADERSHIP INDEX (D77 & POLINTR)

Index of Opinion Leadership

0 DK (coded 5 in d77 and 0 in polintr)

1 - - low (4 in d77 and 0, 1, 2 or 3 in polintr; or 5 in d77 and 1, 2, 3 or 4 in polintr)

2 - (3 in d77 and 0, 1, 2 or 3 in polintr; 4 in d77 and 4 in polintr)

3 + (3 in d77 and 4 in polintr; 2 in d77 and 0, 1, 2 or 3 in polintr; 1 in d77 and 0, 1 or 2 in polintr)

4 ++ high (1 in d77 and 3 or 4 in polintr; or 2 in d77 and 4 in polintr)

9 Inap. (no consent given)

Derivation:

The OPINION LEADERSHIP INDEX is based on the answers to the following two questions: 'When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? Does this happen often?' (d77) and 'When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?' (d71), the latter first being summarized in the POLITICAL INTEREST INDEX (polintr). Interviewees giving affirmative answers to both questions are labelled ++. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

Note:

Starting with EB 73.4 the OPINION LEADERSHIP INDEX (C1) is constructed via the new POLITICAL INTEREST INDEX. For the background and derivation of this index variable see polintr.

Compared to the original variable the scale has been inversed by GESIS in accordance with former practice. Furthermore responses coded 'DK' to both source variables (d77 and polintr) have been recoded to '0' (DK), if applicable.

See d77 and d71 for complete question text.

d78 - EU IMAGE - POSITIVE/NEGATIVE

D78

In general, does the EU conjure up for you a very positive, fairly positive, neutral, fairly negative or very negative image?

(ONE ANSWER ONLY)

- 1 Very positive
- 2 Fairly positive
- 3 Neutral
- 4 Fairly negative
- 5 Very negative
- 7 Refusal (SPONTANEOUS)
- 8 DK
- 9 Inap. (no consent given)

Note:

From Eurobarometer 89.3 to Eurobarometer 90.3 respondents were asked for consent to being asked sensitive questions in order to achieve compliance with European GDPR regulations. Respondents that refused to give consent in the beginning of the interview are assigned the value '9' or '99' and labelled 'Inap. (No consent given)' on questions requiring prior consent. The variables recording this consent have not been part of the original data delivery.

Original code '6' recoded to '7'.

Original code '7' recoded to '8'.

p1 - DATE OF INTERVIEW

INTERVIEW PROTOCOLE

p1 Date of the interview

- 1 Wednesday, 24th October 2018
- 2 Thursday, 25th October 2018
- 3 Friday, 26th October 2018
- 4 Saturday, 27th October 2018
- 5 Sunday, 28th October 2018
- 6 Monday, 29th October 2018
- 7 Tuesday, 30th October 2018
- 8 Wednesday, 31st October 2018
- 9 Thursday, 1st November 2018
- 10 Friday, 2nd November 2018
- 11 Saturday, 3rd November 2018
- 12 Sunday, 4th November 2018
- 13 Monday, 5th November 2018
- 14 Tuesday, 6th November 2018
- 15 Wednesday, 7th November 2018 (not coded)

Note:

The fieldwork dates implied by the values in protocol variable p1 (date of interview) differ slightly from those indicated in the technical specifications provided by Kantar for several countries.

p6fr - SIZE OF COMMUNITY - FRANCE

p6fr Objective size of community: France

- 1 Rural area
- 2 Towns and suburbs/small urban area
- 3 Cities/large urban area
- 99 Inap. (not FR in isocntry)

Note:

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

p6pl - SIZE OF COMMUNITY - POLAND

p6pl Objective size of community: Poland

- 1 Rural area
- 2 Towns and suburbs/small urban area
- 3 Cities/large urban area
- 99 Inap. (not PL in isocntry)

Note:

Starting with Eurobarometer 81.3 (with 84.1 for Germany), the category scheme for country specific protocol variables P6 (SIZE OF COMMUNITY) has changed considerably. Categories for all countries have been harmonized among each other to three values (Rural area - Towns and suburbs/small urban area - Cities/large urban areas) except for Turkey (5-point category scheme). Starting with Eurobarometer 85.2 the category scheme for Montenegro, Serbia and Albania changed from three to two categories (Rural area – Urban area).

Comparability:

Last trend: EB90.1, P6

p6pl, weighted by w1

Value	Label	Missing	Count	Percent	Valid Percent

p7gb - REGION - UNITED KINGDOM NUTS 1

p7gb United Kingdom (EUROSTAT NUTS 1 LEVEL)

- 1 UKC - North East
- 2 UKD - North West
- 3 UKE - Yorkshire and the Humber
- 4 UKF - East Midlands
- 5 UKG - West Midlands
- 6 UKH - East of England
- 7 UKI - London
- 8 UKJ - South East
- 9 UKK - South West
- 10 UKL - Wales
- 11 UKM - Scotland
- 12 UKN - Northern Ireland
- 99 Inap. (not GB in isocntry)

Note:

Starting with EB 81.3 category scheme for country specific protocol variable P7 (REGION) has changed for the United Kingdom:
The variable p7gb does no longer consist of five NUTS 3 regions for Northern Ireland but one NUTS 1 region.

Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 'WEIGHT UNITED KINGDOM' is obsolete and no longer included in the dataset.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

Comparability:

Last trend: EB90.1, P7

p7gb, weighted by w1

Value	Label	Missing	Count	Percent	Valid Percent
1	UKC - North East		41	0.1	4.1

p7pt - REGION - PORTUGAL NUTS 2

p7pt Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North) [PT]
- 2 Centro (Center) [PT]
- 3 Área Metropolitana de Lisboa (Lisbon metropolitan area)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region 'Lisboa e vale do tejo' is split up and the subregion 'Lezíria do Tejo' reinstated to the 'Alentejo' Region and the 'Médio Tejo' and 'Oeste' reinstated to the 'Centro' Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category '3' ('Lisboa e vale do Tejo') has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes 'Grande Lisboa' and 'Península de Setúbal'.

Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 category '3' is labelled 'Área Metropolitana de Lisboa'.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

Derivation:

This additional alphanumeric NUTS CODES variable is produced by GESIS. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

(<https://ec.europa.eu/eurostat/documents/345175/629341/NUTS2013-NUTS2016.xlsx>)

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are documented in the official EUROSTAT classification history (History of NUTS). A second variable

(nutslvl) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Ireland:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Ireland introducing NUTS 3 categories.

United Kingdom:

Starting with Eurobarometer 89.2 (ZA7482) no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 'WEIGHT UNITED KINGDOM' is obsolete and no longer included in the dataset.

Greece:

The Aegean Islands (EL41 - Βόρειο Αιγαίο/Voreio Aigaio and EL42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (EL22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) the standard country prefix 'GR' is replaced by 'EL'. The remaining numerical part of the codes remains unaffected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Please note that according to the NUTS version 2013 with regular amendment as of January 1, 2015, and starting with Eurobarometer 83.1 category '3' is labelled 'Área Metropolitana de Lisboa'.

Finland:

Starting with EB 81.3 for Finland only one country specific protocol variable P7 (REGION) is available. The variable p7fi corresponds to the NUTS 2 breakdown in accordance to NUTS 2010 with regular amendment as of January 1, 2012. The NUTS 3 breakdown is no longer available for Finland.

Estonia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Estonia introducing the official NUTS 3 categories.

Bulgaria:

Starting with EB 81.3 for Bulgaria only one country specific protocol variable P7 (REGION) is available. The NUTS 3 breakdown is

no longer available for Bulgaria.

Croatia:

Starting with EB 81.3 the category scheme for country specific protocol variable P7 (REGION) has changed for Croatia introducing the NUTS 2 and NUTS 3 categories.

Comparability:

nation - NATION (UNITED GERMANY) ISO3166

nation (United Germany) ISO3166

NATION (UNITED GERMANY) ISO3166 equals country/sample identification variable isocntry (COUNTRY CODE - ISO 3166) but coding East and West Germany together. Unlike variable 'de' (NATION – UNITED GERMANY (ONLY)) all other countries (samples) are included for calculation.

Note:

Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 'WEIGHT UNITED KINGDOM' is obsolete and no longer included in the dataset. Additionally, starting with Eurobarometer 89.2 formerly derived weight variables w4a 'WEIGHT RESULT FROM TARGET - UNITED KINGDOM' (Germany East and West separated) and w3a4a 'WEIGHT RESULT FROM TARGET - NATION' (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset. As a consequence country/sample identification variables 'cntry_gb' and 'cntry_de' (now identical to variable 'nation') are also obsolete starting with Eurobarometer 89.2.

Use of weighting factor w3a is mandatory for descriptive analysis.

w3a - WEIGHT RESULT FROM TARGET - UNITED GERMANY

w3a Weight result from target - United Germany

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries. This weight has been derived by GESIS from original Kantar weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 89.2 no separate sample is drawn for Northern Ireland, which is now covered by the sample for the United Kingdom. Accordingly, the formerly available weight variable w4 'WEIGHT UNITED KINGDOM' is obsolete and no longer included in the dataset. Additionally, starting with Eurobarometer 89.2 formerly derived weight variables w4a 'WEIGHT RESULT FROM TARGET - UNITED KINGDOM' (Germany East and West separated) and w3a4a 'WEIGHT RESULT FROM TARGET - NATION' (coding together both separate samples, Great Britain und Northern Ireland as well as East and West Germany and all other countries) are also obsolete and no longer included in the dataset.
