Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures such as public awareness of and attitudes toward the European Union (EU), and also focused on issues surrounding vacations and holiday travel. A set of questions asked respondents about their attitudes toward the European Parliament, how this organization defended their interests, and whether they planned to vote in the next elections to the Parliament scheduled in June of 1999.

The principal topic of the survey was the experiences respondents reported concerning holiday trips. Respondents were asked whether they had taken a trip in 1997 and, if not, the reason they did not travel, whether they had ever been on a holiday and, if so, when they went on their first holiday and for what duration, what subsequent vacations they took, which countries and locales they visited, who accompanied them, and how they traveled to their destinations. Additional questions focused on where respondents stayed during their holiday, what criteria they used to select a holiday destination, how much they would spend in the current year for their holiday, what type of payment (e.g., checks, credit card) they used, what types of local products they purchased, what kinds of places they visited, and what kinds of events they attended. They were also asked who arranged their holiday, how they obtained information and how they rated tourist information in general, if they sought out tourist information before or while on vacation, and how satisfied they were if they had already taken a vacation during the year. They also indicated whether they planned to travel in the following year and, if so, specified their intended destination.

Demographic and other background information provided includes respondent's age, sex, marital status, occupation, left-right political self-placement and vote intention, as well as household income, the number of people residing in the home, and region of residence.

For a comparable survey from this series, see EURO-BAROMETER 25: HOLIDAY TRAVEL AND ENVIRONMENTAL PROBLEMS, APRIL 1986.

1.2.2 Topic classification

- International Institutions, Relations
- Leisure: Holidays, Travel
- Society, Culture

1.3 Universe

In all, Eurobarometer 48 interviewed 16.186 citizens of the 15 countries in the European Union (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes in the appropriate national language. Sweden is using a random sample bought at the government census bureau. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From October 12 to November 16, 1997, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the "Survey, Research, Analysis" Unit of the Directorate General X, "Information, Communication and Culture", of the European Commission. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels.

1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English basic questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as

redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 48 provides five (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) and NATION WEIGHT IIb (WEIGHT ADJUSTED TO TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM adjusted to target) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, NATION WEIGHT III (WEIGHT SPECIAL GERMANY adjusted to target), which adds the adjustment of the East and West

German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. NATION WEIGHT IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM) combines NATION WEIGHT I and NATION WEIGHT III. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Four variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, NATION IV, and REGION II. Users should be aware that ZA's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometer.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or coding is provided by INRA in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

Please see the respective variable documentation (variable notes) for specific remarks on data inconsistencies or processing.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brêthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.	Eurobarometer 67.1 - February-March 2007 GESIS Study No. 4529 (v3.0.1, http://dx.doi.org/doi:10.4232/1.10983)																																																																																																																																																																																																																																																																																																																																																				
VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the dataset.	<div>v77 - QA1 FEELING FULFILLED: PROFESSIONAL LIFE</div> <div>Q.A1 ASK Q.A IN EU27 To what extent would you say that the life you live allows you to feel fulfilled in...? QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).																																																																																																																																																																																																																																																																																																																																																					
CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).																																																																																																																																																																																																																																																																																																																																																					
DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																																																																																																					
CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .

5 Variable Documentation

Variable, Label
Question Text (English Language)

v1 - STUDY NUMBER - DISTRIBUTOR

Distributor Archive Study Number

Study number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
2959			16186	100.0	100.0
	Sum		16186	100.0	100.0
	Valid Cases		16186		

v2 - STUDY NUMBER - PRODUCER

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
2959			16186	100.0	100.0
	Sum		16186	100.0	100.0
	Valid Cases		16186		

v3 - EDITION NUMBER

ZA/ICPSR Edition Number

The number identifying the release edition of this dataset.

1 1st codebook edition

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	1ST ZA EDITION (revision April 24, 2006)		16186	100.0	100.0
	Sum		16186	100.0	100.0
	Valid Cases		16186		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			16186	100.0	100.0
	Sum		16186	100.0	100.0
	Valid Cases		16186		

v4 - EUROBAROMETER NUMBER

ZA/ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 48

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	EB48 (10-11 1997)		16186	100.0	100.0
	Sum		16186	100.0	100.0
	Valid Cases		16186		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v6 - NATION I (UNITED KINGDOM)

Nation of interview I

15 EC countries including separate samples for East and West Germany

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany (East)
- 14 Norway (not included)
- 15 Finland
- 16 Sweden
- 17 Austria

v6

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1005	6.2	6.2

	Sum		16186	100.0	100.0
	Valid Cases		16186		

v7 - WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights are included.

Unlike the "Nation Weight I" in earlier Eurobarometer up to 31 this weight adjusts all samples to the standard size.

v8 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany (East)
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria

v8

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1005	6.2	6.2
2	BELGIUM		1041	6.4	6.4
3	NETHERLANDS		1003	6.2	6.2
4	WEST GERMANY		1026	6.3	6.3
5	ITALY		1011	6.2	6.2
6	LUXEMBOURG		620	3.8	3.8
7	DENMARK		1000	6.2	6.2
8	IRELAND		1002	6.2	6.2
9	GREAT BRITAIN		1064	6.6	6.6
10	NORTHERN IRELAND		311	1.9	1.9
11	GREECE		1012	6.3	6.3
12	SPAIN		1000	6.2	6.2
13	PORTUGAL		1000	6.2	6.2
14	EAST GERMANY		1036	6.4	6.4
16	FINLAND		1032	6.4	6.4
17	SWEDEN		1000	6.2	6.2
18	AUSTRIA		1023	6.3	6.3
	Sum		16186	100.0	100.0

Value	Label	Missing	Count	Percent	Valid Percent
	Valid Cases		16186		

v9 - WEIGHT RESULT FROM TARGET

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples.

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometer up to 31.

v10 - WEIGHT ADJUSTED TO STANDARD SIZE

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

This variable corresponds to "Weight Result from Target" but adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 600 (Luxembourg). Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples.

v11 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West+East)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Norway (not included)
- 15 Finland
- 16 Sweden
- 17 Austria

v11

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1005	6.2	6.2
2	BELGIUM		1041	6.4	6.4
3	NETHERLANDS		1003	6.2	6.2
4	GERMANY		2062	12.7	12.7
5	ITALY		1011	6.2	6.2

17	AUSTRIA		1023	6.3	6.3
	Sum		16186	100.0	100.0
	Valid Cases		16186		

v12 - WEIGHT SPECIAL GERMANY

Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size.

v13 - NATION IV (UK + UNITED GERMANY)

Nation of interview IV

United Germany (East+West) and United Kingdom

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West+East)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Norway (not included)
- 14 Finland
- 15 Sweden
- 16 Austria

v13

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1005	6.2	6.2
2	BELGIUM		1041	6.4	6.4
3	NETHERLANDS		1003	6.2	6.2

16	AUSTRIA		1023	6.3	6.3
	Sum		16186	100.0	100.0
	Valid Cases		16186		

v14 - WEIGHT SPECIAL UK + GERMANY

Nation Weight IV (WEIGHT SPECIAL UK + GERMANY)

This variable adjusts the East and West German samples to their respective proportions in the united Germany, and the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights are included and all samples adjusted to the standard size.

v15 - WEIGHT EURO 6

European Weight I (WEIGHT EURO 6)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v16 - WEIGHT EURO 9

European Weight Ila (WEIGHT EURO 9)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 9 excludes Greece, Spain, Portugal, East Germany, Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v17 - WEIGHT EURO 10

European Weight IIb (WEIGHT EURO 10)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 excludes Spain, Portugal, East Germany, Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v18 - WEIGHT EURO 12

European Weight III (WEIGHT EURO 12)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 excludes East Germany, Finland, Sweden, and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v19 - WEIGHT EURO 12 +

European Weight IV (WEIGHT EUROPE 12 +)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12+ equals EURO 12 but includes East Germany.

v20 - WEIGHT EURO 15

European Weight Va (WEIGHT EUROPE 15)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included.

Note:

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometer up to 31 this weight contains the adjustment to the standard size

v21 - WEIGHT EURO + 3

European Weight Vb (WEIGHT EURO +3)

This variable contains weights that adjust each national sample of the three new member countries Finland, Sweden and Austria to its nation's share in the total population of these three countries. The respective national weights and the adjustment to the standard size are included. All other countries are weighted by "zero".

v22 - Q1 NATIONALITY BELGIUM

Q.1

What is your nationality? Please tell me the country (or countries) that apply.

(MULTIPLE ANSWERS POSSIBLE)

(If "other countries" or "DK" CLOSE INTERVIEW)

Q.22a

In the European Union, each Member State, in turn, becomes the President of the Council of Ministers for six months. Just now, it's the turn of Luxembourg. Have you recently read in the newspapers or heard on radio or television anything about the presidency of Luxembourg?

Q.22b

Whether you have heard about it or not, do you think it is important or not that Luxembourg is President of the Council of Ministers of the European Union at this time? Would you say it is ...?

(READ OUT)

- 1 Very important
- 2 Important
- 3 Not very important
- 4 Not at all important
- 5 DK
- 9 INAP., only asked in Luxembourg (not coded 6 in v8)

v198 - Q26 EU COMMON DEFENCE - IRISH PARTICIP

Q.26

ASK ONLY IN IRELAND

European Political Union may include a common defense arrangement involving the member states of the European Union. Successive Irish governments have accepted that moves towards European Political Union could mean scrapping Ireland's policy of military neutrality. Would you be in favour of or opposed to Irish participation in a collective European Union defense arrangement?

- 1 In favour
- 2 Opposed
- 3 DK
- 9 INAP., only asked in Ireland (not coded 8 in V8)

v203 - Q27 EU COMMON POLICY: HEALTH & WELFARE

Q.27

ASK ALL

Some people believe that certain areas of policy should be decided by the (NATIONAL) government, while other areas of policy should be decided jointly within the European Union. Which of the following areas of policy do you think should be decided by the (NATIONAL) government, and which should be decided jointly within the European Union?

(READ OUT - ROTATING THE ORDER)

v209 - Q27 EU COMMON POLICY: SUPPORT REGIONS

Q.27

ASK ALL

Some people believe that certain areas of policy should be decided by the (NATIONAL) government, while other areas of policy should be decided jointly within the European Union. Which of the following areas of policy do you think should be decided by the (NATIONAL) government, and which should be decided jointly within the European Union?

(READ OUT - ROTATING THE ORDER)

Q.27I Supporting regions which are experiencing economic

v290 - Q38 EU FINANCIAL AID: SMALL/M COMPANIES

Q.38

If there is enlargement, European Union financial aid will be shared between more countries. For each of the following, which one of these two choices would you make?

(SHOW CARD WITH A AND B - READ OUT)

A= Increase the budget so that (OUR COUNTRY) receives as much aid as before;

B= Keep the same budget, which implies (OUR COUNTRY) might receive less financial aid than before.

Q.38_3 Aid to small and medium sized companies

0 NA

1 Increase the budget

2 Keep the same budget

v379 - Q61B HOLIDAY TRIP 97 2ND - MONTH

Q.61

IF BEEN ON HOLIDAY OR PLANS TO GO ON HOLIDAY IN 1997 - CODE 1 OR 2 IN Q.58

Let's now talk about the holidays that you have taken or plan to take in 1997.

(REPEAT THIS QUESTIONS UP TO 6th HOLIDAY THEN INDICATE THE 3 LONGEST HOLIDAYS OF 4 NIGHTS OR MORE, THEN WRITE CODE IN Q.62 to Q.67)

Q.61b_1 Which month have you been, or are you going to go, for the second time on holiday?

- 1 January
- 2 February
- 3 March
- 4 April
- 5 May
- 6 June
- 7 July
- 8 August
- 9 September
- 10 October
- 11 November
- 12 December
- 13 DK/NA
- 99 INAP., only asked if holidays in 1997 (not coded 1-2 in V361)

v387 - Q61F HOLIDAY TRIP 97 6TH - MONTH

Q.61

IF BEEN ON HOLIDAY OR PLANS TO GO ON HOLIDAY IN 1997 - CODE 1 OR 2 IN Q.58

Let's now talk about the holidays that you have taken or plan to take in 1997.

(REPEAT THIS QUESTIONS UP TO 6th HOLIDAY THEN INDICATE THE 3 LONGEST HOLIDAYS OF 4 NIGHTS OR MORE, THEN WRITE CODE IN Q.62 to Q.67)

Q.61f_1 Which month have you been, or are you going to go, for the sixth time on holiday?

- 1 January
- 2 February
- 3 March
- 4 April
- 5 May
- 6 June
- 7 July
- 8 August
- 9 September
- 10 October
- 11 November
- 12 December
- 13 DK/NA
- 99 INAP., only asked if holidays in 1997 (not coded 1-2 in V361)

v981 - D29 INCOME HH

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter (non-alphabetical, irregular order) of the income group your household falls into before tax and other deductions.

in France (FR):

French francs per month

- 1 Less than 4.000
- 2 4.000 to 4.999
- 3 5.000 to 5.999
- 4 6.000 to 6.999
- 5 7.000 to 7.999
- 6 8.000 to 8.999
- 7 9.000 to 9.999
- 8 10.000 to 10.999
- 9 11.000 to 12.499
- 10 12.500 to 14.999
- 11 15.000 to 17.499
- 12 17.500 or more
- 97 Refusal
- 98 DK

in Belgium (BE):

Belgian francs per month

- 1 Less than 20.000
- 2 20.000 to 29.999
- 3 30.000 to 39.999
- 4 40.000 to 49.999
- 5 50.000 to 59.999
- 6 60.000 to 69.999
- 7 70.000 to 79.999
- 8 80.000 to 89.999
- 9 90.000 to 99.999
- 10 100.000 to 109.999
- 11 110.000 to 119.999
- 12 120.000 or more
- 97 Refusal
- 98 DK

in Netherlands (NL):

Dutch guilders per month

- 1 Less than 1.500
- 2 1.500 to 1.999

v988 - P6 SIZE OF COMMUNITY

P.6

(Objective)Size of locality

in France (FR):

- 1 less than 2.000 inhabitants
- 2 2.000 - less than 20.000 inhabitants
- 3 20.000 - less than 100.000 inhabitants
- 4 100.000 and more inhabitants
- 5 Paris (Agglomeration parisienne)

in Belgium (BE):

- 1 Grands centres
- 2 Localites urbaine
- 3 Localites secondaire
- 4 Autres localites

in Netherlands (NL):

- 1 less than 5.000 inhabitants
- 2 5.000 - less than 10.000 inhabitants
- 3 10.000 - less than 20.000 inhabitants
- 4 20.000 - less than 50.000 inhabitants
- 5 50.000 - less than 100.000 inhabitants
- 6 100.000 - less than 400.000 inhabitants
- 7 400.000 and more inhabitants

in Germany (DE):

- 1 less than 2.000 inhabitants
- 2 2.000 - less than 5.000 inhabitants
- 3 5.000 - less than 20.000 inhabitants
- 4 20.000 - less than 50.000 inhabitants
- 5 50.000 - less than 100.000 inhabitants
- 6 100.000 - less than 500.000 inhabitants
- 7 500.000 and more inhabitants

in Italy (IT):

- 1 less than 10.000
- 2 10.000 - less than 100.000 inhabitants
- 3 100.000 - less than 250.000 inhabitants
- 4 250.000 and more inhabitants

in Luxembourg (LU):

- 1 less than 2.500
- 2 2.500 - less than 5.000 inhabitants

- 3 5.000 - less than 10.000 inhabitants
- 4 10.000 - less than 20.000 inhabitants
- 5 20.000 - less than 50.000 inhabitants
- 6 50.000 and more inhabitants (Luxembourg ville)

in Denmark (DK):

- 1 less than 2.000
- 2 2.000 - less than 5.000 inhabitants
- 3 5.000 - less than 10.000 inhabitants
- 4 10.000 - less than 20.000 inhabitants
- 5 20.000 - less than 50.000 inhabitants
- 6 50.000 - less than 100.000 inhabitants
- 7 100.000 and more inhabitants

in Ireland (IE):

- 1 less than 2.000 inhabitants
- 2 2.001 less than 20.000 inhabitants
- 3 20.001 less than 100.000 inhabitants
- 4 100.000 and more inhabitants

in Great Britain (GB_GBN):

- 1 Metropolitan country
- 2 Other 100 % urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB_NIR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants

in Greece (GR):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 1.000.000
- 5 1.000.000 and more inhabitants

in Spain (ES):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 100.000
- 5 100.000 - less than 300.000
- 6 300.000 - less than 500.000
- 7 500.000 - less than 1.000.000

8 1.000.000 and more inhabitants

in Portugal (PT):

- 1 less than 100
- 2 100 - less than 200
- 3 200 - less than 500
- 4 500 - less than 1.000
- 5 1.000 - less than 2.000
- 6 2.000 - less than 5.000
- 7 5.000 - less than 10.000
- 8 10.000 - less than 20.000
- 9 20.000 - less than 100.000
- 10 100.000 - less than 500.000
- 11 500.000 and more inhabitants

in Finland (FI):

- 1 Helsinki area
- 2 Turku/Tampere
- 3 Other town
- 4 Rural center

in Sweden (SE):

- 1 less than 5.000
- 2 5.000 - less than 10.000
- 3 10.000 - less than 30.000
- 4 30.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 150.000
- 7 150.000 and more inhabitants

in Austria (AT):

- 1 Rural
- 2 Mixed urban/rural
- 3 Urban
- 4 Metropolitan

- 92 Niederbayern
- 93 Oberpfalz
- 94 Oberfranken
- 95 Mittelfranken
- 96 Unterfranken
- 97 Schwaben
- 100 Saarland
- 110 Berlin (West)

in Italy (IT):

Regioni (EUROSTAT NUTS II LEVEL - modified)

- 1 Valle d'Aosta e Piemonte
- 2 Liguria
- 3 Lombardia
- 4 Milano
- 5 Trentino
- 6 Veneto
- 7 Friuli-Venezia Giulia
- 8 Emilia-Romagna
- 9 Toscana
- 10 Marche
- 11 Umbria
- 12 Lazio
- 13 Molise e Abruzzi
- 14 Campania
- 15 Puglia
- 16 Basilicata
- 17 Calabria
- 18 Sicilia
- 19 Sardegna

in Luxembourg (LU):

- 1 Centrum
- 2 Süden
- 3 Norden
- 4 Osten

in Denmark (DK):

- 1 Hovedstodomradet (Copenhagen area)
- 2 Sjælland, Lolland-Falster, Bornholms (excl. Hovedstodomradet)
- 3 Fyn
- 4 Jylland

in Ireland (IE):

Planning Regions (EUROSTAT NUTS III LEVEL)

- 1 Donegal
- 2 North west (Sligo/Leitrim)
- 3 North east (Cavan/Monaghan/Louth)
- 4 West (Mayo/Galway)
- 5 Midlands (Westmeath/Roscommon/Longford/Laois/Offaly)
- 6 East (Dublin/Meath/Kildare/Wicklow)
- 7 Mid west (Limerick/Clare/Tipperary North Riding)
- 8 South east (Waterford/Wexford/ Carlow/Kilkenny/Tipperary South Riding)
- 9 South west (Kerry/Cork)

in United Kingdom (GB):

Groups of Counties (grouping for Community purposes) (EUROSTAT NUTS II LEVEL)

- 1 Cleveland, Durham
- 2 Cumbria
- 3 Northumberland, Tyne and Wear
- 4 Humberside
- 5 North Yorkshire
- 6 South Yorkshire
- 7 West Yorkshire
- 8 Derbyshire, Nottinghamshire
- 9 Leicestershire, Northamptonshire
- 10 Lincolnshire
- 11 East Anglia
- 12 Bedfordshire, Hertfordshire
- 13 Berkshire, Buckinghamshire, Oxfordshire
- 14 Surrey, East/West Sussex
- 15 Essex
- 16 Greater London
- 17 Hampshire, Isle of Wight
- 18 Kent
- 19 Avon, Gloucestershire, Wiltshire
- 20 Cornwall, Devon
- 21 Dorset, Somerset
- 22 Hereford and Worcester, Warwickshire
- 23 Shropshire, Staffordshire
- 24 West Midlands (County)
- 25 Cheshire
- 26 Greater Manchester
- 27 Lancashire
- 28 Merseyside
- 29 Clwyd, Dyfed, Gwynedd, Powys
- 30 Gwent, Mid-South-West Glamorgan
- 31 Borders, Central, Fife, Lothian, Tayside
- 32 Dumfriesshire and Galloway, Strathclyde
- 33 Highlands, Islands
- 34 Grampian
- 35 Northern Ireland

in Greece (GR):

Development Regions (EUROSTAT NUTS II LEVEL - modified)

- 1 Kentriki Makedonia kai Dytiki Makedonia
- 2 Thessalia
- 3 Anatoliki Makedonia
- 4 Thraki
- 5 Anatoliki Sterea kai Nisia
- 6 Peloponnisos kai Dytiki Sterea
- 7 Ipeiros

8 Kriti

9 Nisia Anatolikou Aigaiou

in Spain (ES):

Comunidades Autonomas (EUROSTAT NUTS II LEVEL)

1 Andalucia

2 Aragon

3 Asturias

4 Baleares

5 Canarias

6 Cantabria

7 Castilla-Leon

8 Castilla-La Mancha

9 Cataluna

10 Extremadura

11 Galicia

12 Madrid

13 Murcia

14 Navarra

15 La Rioja

16 Comunidad Valenciana

17 Pais Vasco

in Portugal (PT):

Comissaoes de Coordinacao Regional, Regioes Autonomas (EUROSTAT NUTS II LEVEL)

1 Norte

2 Centro

3 Lisboa e Vale do Tejo

4 Alentejo

5 Algarve

6 Acores

7 Madeira

in Germany - East (DE_E):

Regierungsbezirke (EUROSTAT NUTS II LEVEL)

110 Berlin (Ost)

120 Brandenburg

130 Mecklenburg Vorpommern

140 Sachsen

141 Chemnitz

142 Dresden

143 Leipzig

151 Dessau

152 Halle

153 Magdeburg

160 Thüringen

in Finland (FI):

Maakunnat (EUROSTAT NUTS III LEVEL)

- 1 Uusimaa
- 2 Varsinais-Suomi
- 3 Satakunta
- 4 Häme
- 5 Pirkanmaa
- 6 Päijät-Häme
- 7 Kymenlaakso
- 8 Etelä-Karjala
- 9 Etelä-Savo
- 10 Pohjois-Savo

- 12 Keski-Suomi
- 13 Etelä-Pohjanmaa
- 14 Vasaan rannikkoseutu
- 15 Keski-Pohjanmaa
- 16 Pohjois-Pohjanmaa
- 17 Kainuu
- 18 Lappi

in Sweden (SE):

Riksomraden (EUROSTAT NUTS II LEVEL)

- 1 Stockholm
- 2 Östra Mellansverige
- 3 Smaland med öarna
- 4 Sydsverige
- 5 Västsverige
- 6 Norra Mellansverige
- 7 Mellersta Norrland
- 8 Övre Norrland

in Austria (AT):

Bundesländer (EUROSTAT NUTS II LEVEL)

- 1 Vorarlberg
- 2 Tirol
- 3 Salzburg
- 4 Ober-Österreich (Upper Austria)
- 5 Steiermark (Styria)
- 6 Kärnten (Carinthia)
- 7 Nieder-Österreich (Lower Austria)
- 8 Burgenland
- 9 Wien (Vienna)

Note:

In the cases of France, West Germany, Italy, Ireland and the United Kingdom "Region I" corresponds to the variable labelled "Province" in earlier Eurobarometers up to number 31. If indicated, "Region I" units are consistent with the EUROSTAT nomenclature

for regional statistics (NUTS).

Starting with Eurobarometer 44.2bis the Eurobarometer are considering the new East German regional units as resulting from the regional reforms 1992-94. The new regional units on NUTS II level (Regierungsbezirke) for Sachsen-Anhalt are Dessau, Halle, and Magdeburg; the new units for Sachsen (Chemnitz, Dresden, Leipzig) are only considered starting with Eurobarometer 48. REGION I categories used in former surveys up to number 44.1 are based on ex-GDR administrative units (Bezirke) and are not comparable to the new categories even if identical names are used. The almost unchanged NUTS I unit (Bundesland) Sachsen-Anhalt in Eurobarometer REGION II for example was formerly only composed of Halle and Magdeburg. The East German federal units (Neue Bundesländer) Brandenburg, Mecklenburg-Vorpommern, and Thüringen are not subdivided on NUTS II level.

v990 - P7 REGION II

P.7R

Region II

99 INAP (no REGION II available)

in France (FR):

Zeal (EUROSTAT NUTS I LEVEL)

- 1 Ile de France
- 2 Bassin Parisien
- 3 Nord-pas-de-Calais
- 4 Est
- 5 Ouest
- 6 Sud-Ouest
- 7 Centre-Est
- 8 Mediterranee

in Belgium (BE):

Regions (EUROSTAT NUTS I LEVEL)

- 1 Region Wallonne
- 2 Bruxelles-Brussel
- 3 Vlaanderen

in Netherlands (NL):

Landsdelen (EUROSTAT NUTS I LEVEL)

- 1 Noord-Nederland
- 2 Oost-Nederland
- 3 West-Nederland
- 4 Zuid-Nederland

in Germany - West (DE_W):

Bundesländer (EUROSTAT NUTS I LEVEL)

- 1 Schleswig Holstein
- 2 Hamburg
- 3 Niedersachsen
- 4 Bremen
- 5 Nordrhein-Westfalen
- 6 Hessen
- 7 Rheinland-Pfalz
- 8 Baden-Württemberg
- 9 Bayern
- 10 Saarland
- 11 Berlin (West)

in Italy (IT):

Gruppi di regioni (grouping for Community purposes) (EUROSTAT NUTS I LEVEL)

- 1 Nord Ovest
- 2 Lombardia
- 3 Nord Est
- 4 Emilia-Romagna
- 5 Centro
- 6 Lazio
- 7 Abruzzi-Molise
- 8 Campania
- 9 Sud
- 10 Sicilia
- 11 Sardegna

in United Kingdom (GB):

Standard Regions (EUROSTAT NUTS I LEVEL - modified)

- 1 Scotland
- 2 North, Yorkshire, Humberside and North West
- 3 East and West Midlands, East Anglia
- 4 Wales
- 5 South East
- 6 South West
- 7 Northern Ireland

in Spain (ES):

Agrupacion de comunidades autonomas

- 1 Galicia
- 2 North
- 3 North-East
- 4 Aragon, Rioja
- 5 Madrid
- 6 Centre
- 7 Cataluna
- 8 East
- 9 South
- 10 Canarias

in Germany - East (DE_E):

Bundesländer (EUROSTAT NUTS I LEVEL)

- 11 Berlin (Ost)
- 12 Brandenburg
- 13 Mecklenburg-Vorpommern
- 14 Sachsen
- 15 Sachsen-Anhalt
- 16 Thüringen

in Finland (FI):

Suuralueet (EUROSTAT NUTS II LEVEL)

- 1 Uusimaa
- 2 Etelä-Suomi
- 3 Itä-Suomi
- 4 Väli-Suomi
- 5 Pohjois-Suomi

Note:

Only in the case of West Germany "Region II" corresponds to the variable labelled "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

Starting with Eurobarometer 44.2bis the East German federal units (Neue Bundesländer) are not any more constructed from the ex-GDR administrative regional units (Bezirke). There may be minor changes in the real territorial outline of each unit in comparison with the categories as constructed in former Eurobarometer up to survey number 44.1.

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

v993 - C1 OPINION LEADERSHIP INDEX

C.1 OPINION LEADERSHIP INDEX

Cognitive Mobilisation Index 1

0 DK / NA (coded 0 or 5 for V38 and 0 or 4 for V37)

1 - - low (coded 3, 4, 5 or 0 for V38 and 3 for V37; or coded 3 or 4 for V38 and 3, 4 or 0 for V37)

2 - (coded 3, 4, 5 or 0 for V38 and 2 for V37; or coded 1 or 2 for V38 and 3, 4 or 0 for V37)

3 + (coded 3, 4, 5 or 0 for V38 and 1 for V37; or coded 1 or 2 for V38 and 2 for V37)

4 + + high (coded 1 or 2 for V38 and 1 for V37)

Derivation:

This index is based on the answers to the following two questions: "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.3) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.2).

Interviewees giving affirmative answers to both questions are labelled + +.

Interviewees giving negative answers to both questions are labelled - -.

Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977). See also standard report EUROBAROMETER 48, March 1998, Brussels, C.6

v994 - C4 SOCIO PROF STATUS

C.4 SOCIO PROFESSIONAL STATUS

- 0 Other answers (never any paid work, NA)
- 1 Farmer and fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position, not at a desk but travelling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non- marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE:

For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. See also standard report EUROBAROMETER 48, March 1998, Brussels, C.5

v995 - C5 EUROPEAN POL PARTY PREFERENCE

C.5 EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX

- 0 Other answers
- 1 (PSE) Socialist Group
- 2 (PPE) Group of the European People's Party (Christian Democratic Group)
- 3 (ELDR) Group of the European Liberal, Democrat and Reform Party
- 4 (GUE/NGL) Confederal Group of the European United Left / Nordic Green Left
- 5 (UFE) Group Union for Europe
- 6 (RDE) Group of the European Renewal and Democratic Alliance
- 7 (V) The Green Group in the European Parliament
- 8 (ARE) Group of the European Radical Alliance
- 9 (IEDN) Group of Independents for a Europe of Nations
- 10 (N.I.) Non-affiliated
- 11 Not represented (other parties)

Derivation:

This index is based upon the vote intention question D.4: "If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labelled N.I., supporters of parties not represented in the European Parliament are labelled "other parties". Labels are presented in the order in which they occur in the "list of members" of the European Parliament of 1994.

v996 - C14 OCCUPATION OF RESPONDENT - SCALE

C.14 Respondent Occupation Scale

- 0 NA (Coded 0 for V975)
- 1 Self employed (Coded 5 to 9 for V975)
- 2 Managers (Coded 10 to 12 for V975)
- 3 Other white collars (Coded 13 or 14 for V975)
- 4 Manual workers (Coded 15 to 18 for V975)
- 5 House persons (Coded 1 for V975)
- 6 Unemployed (Coded 3 for V975)
- 7 Retired (Coded 4 for V975)
- 8 Students (Coded 2 for V975)

Derivation:

This scale is based on a combination / selection of the current respondent occupation variable D.15A.

v997 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number:

This is the original respondent identification number as supplied by INRA. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: Greece; 05: Italy; 06: Spain; 07: France; 08: Ireland; 09: Northern Ireland; 10: Luxembourg; 11: Netherlands; 12: Portugal; 13: Great Britain; 14: East Germany; 16: Finland; 17: Sweden; 18: Austria). The remaining four digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded
