Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures such as public awareness of and attitudes toward the European Union (EU), and also focused on personal health issues, the Common European Currency, energy questions, development aid, and the rights of EU citizens. Respondents were asked if they thought exposure to the sun was good or bad for their health, how best to protect themselves from the sun, what type of skin, eye, and hair colour they had, and what information they had received about the 'Europe Against Cancer' campaign. In regard to the Common European Currency, they provided information about their attitudes toward having one currency for all member states, how well-informed they were about this issue, if they knew about the conditions that member countries must meet in order to join the European Economic and Monetary Union, if their own country would be able to meet the requirements and what the consequences would be if it did not, when euro coins and notes might be introduced, how the introduction of the single currency should proceed, and how it would affect economic policies and transactions. Questions about energy use and consumption covered problems that could affect the environment, if respondents had made attempts to conserve energy use in recent years and how they might do so in the future, how effective public bodies were in saving energy, and whether energy investment decisions should be left to market forces or to public bodies. Views regarding the availability and cost of energy resources over the next ten years, the importance of nuclear energy, the role of taxes in energy consumption, and whether public or private transportation should be favoured in traffic planning decisions were also elicited. A battery of questions about developing countries focused on whether respondents thought there was a need to help poorer countries to develop, whether their own governments provided development aid, whether the European Commission provided such aid and if so, how much, and whether such aid should be increased or decreased. Other questions probed for opinions on whether developing countries used aid money to purchase goods from the EU, whether the Community's aid should be made better known, and how profitable it was to invest in developing countries. Respondents were also asked if they thought Europe, the United States, or Japan was best placed to help poor people, where Europe's exports were sent, if development aid helped to solve certain social and economic problems, and if they felt they received accurate accounts about developing countries from newspapers and television news programs. A few questions also focused on perceptions of the rights of citizens of the EU and where information could be located about such rights. Citizens from Germany, Spain, France, Italy, and the United Kingdom were asked about their attitudes toward other EU countries, which countries should join the Monetary Union, how important the introduction of the single currency by January 1, 1999, was, and how likely they thought that date would be met. Demographic items included age, gender, marital status, household size, monthly income, education, size of community, region, and occupation.

Please notice that identical questions on European Currency have also been asked in the framework of Eurobarometer 46.1. It is recommended to analyze both surveys in combination.

1.3 Universe

In all, Eurobarometer 46.0 interviewed 16.248 citizens of the 15 countries in the European Union (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes in the appropriate national language. Sweden is using a random sample bought at the government census bureau. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From October 12 to November 11, 1996, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the "Survey, Research, Analysis" Unit of the Directorate General X, "Information, Communication and Culture", of the European Commission. INRA (Europe) is a European

network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels.

1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English basic questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 46.0 provides four (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) and NATION WEIGHT IIb (WEIGHT ADJUSTED TO STANDARD SIZE) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole and NATION WEIGHT III (WEIGHT SPECIAL GERMANY adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset (D.4, D.29, P.6, P.7, and P.13). Three variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, and D.8R. ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has

recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or coding is provided by INRA in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																						
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																						

5 Variable Documentation

Variable, Label
Question Text (English Language)

v1 - STUDY NUMBER - DISTRIBUTOR

Distributor Archive Study Number

Study number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
2898			16248	100.0	100.0
	Sum		16248	100.0	100.0
	Valid Cases		16248		

v2 - STUDY NUMBER - PRODUCER

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
2898			16248	100.0	100.0
	Sum		16248	100.0	100.0
	Valid Cases		16248		

v3 - EDITION NUMBER

ZA/ICPSR Edition Number

The number identifying the release edition of this dataset.

1 1st codebook edition

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	1ST CODEBOOK EDITION (release 28-08-06)		16248	100.0	100.0
	Sum		16248	100.0	100.0
	Valid Cases		16248		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			16248	100.0	100.0
	Sum		16248	100.0	100.0
	Valid Cases		16248		

v4 - EUROBAROMETER NUMBER

ZA/ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 46.0

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	EUROBARO 46.0		16248	100.0	100.0
	Sum		16248	100.0	100.0
	Valid Cases		16248		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

isocntry

v6 - NATION I (UNITED KINGDOM)

Nation of interview I

15 EC countries including separate samples for East and West Germany

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany (East)
- 14 Norway (not included)
- 15 Finland
- 16 Sweden
- 17 Austria

v6

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1013	6.2	6.2

	Sum		16248	100.0	100.0
	Valid Cases		16248		

v7 - WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights are included.

Note:

Unlike the "Nation Weight I" in earlier Eurobarometer up to 31 this weight adjusts all samples to the standard size.

v8 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany (East)
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria

v8

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1013	6.2	6.2

13	PORTUGAL		1004	6.2	6.2
14	EAST GERMANY		1035	6.4	6.4
16	FINLAND		1000	6.2	6.2
17	SWEDEN		1000	6.2	6.2
18	AUSTRIA		1062	6.5	6.5
	Sum		16248	100.0	100.0

Value	Label	Missing	Count	Percent	Valid Percent
	Valid Cases		16248		

v9 - WEIGHT RESULT FROM TARGET

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples.

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometer up to 31.

v10 - WEIGHT ADJUSTED TO STANDARD SIZE

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

This variable corresponds to "Weight Result from Target" but adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 600 (Luxembourg). Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples.

v11 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West+East)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Norway (not included)
- 15 Finland
- 16 Sweden
- 17 Austria

v11

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1013	6.2	6.2
2	BELGIUM		1027	6.3	6.3
3	NETHERLANDS		1054	6.5	6.5
4	GERMANY		2066	12.7	12.7
5	ITALY		1058	6.5	6.5
6	LUXEMBOURG		611	3.8	3.8
7	DENMARK		1002	6.2	6.2
8	IRELAND		1001	6.2	6.2
9	GREAT BRITAIN		1042	6.4	6.4
10	NORTHERN IRELAND		305	1.9	1.9
11	GREECE		1003	6.2	6.2
12	SPAIN		1000	6.2	6.2
13	PORTUGAL		1004	6.2	6.2
15	FINLAND		1000	6.2	6.2
16	SWEDEN		1000	6.2	6.2
17	AUSTRIA		1062	6.5	6.5
	Sum		16248	100.0	100.0
	Valid Cases		16248		

v12 - WEIGHT SPECIAL GERMANY

Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size.

v13 - WEIGHT EURO 6

European Weight I (WEIGHT EURO 6)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg).

This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v14 - WEIGHT EURO 9

European Weight Ila (WEIGHT EURO 9)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 9 excludes Greece, Spain, Portugal, East Germany, Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v15 - WEIGHT EURO 10

European Weight IIb (WEIGHT EURO 10)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 excludes Spain, Portugal, East Germany, Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v16 - WEIGHT EURO 12

European Weight III (WEIGHT EURO 12)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 excludes East Germany, Finland, Sweden, and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v17 - WEIGHT EURO 12 +

European Weight IV (WEIGHT EUROPE 12 +)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12+ equals EURO 12 but includes East Germany.

v18 - WEIGHT EURO 15

European Weight Va (WEIGHT EUROPE 15)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included.

Note:

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometer up to 31 this weight contains the adjustment to the standard size.

v19 - WEIGHT EURO + 3

European Weight Vb (WEIGHT EURO +3)

This variable contains weights that adjust each national sample of the three new member countries Finland, Sweden and Austria to its nation's share in the total population of these three countries. The respective national weights and the adjustment to the standard size are included. All other countries are weighted by "zero".

v20 - Q1 NATIONALITY BELGIUM

Q.1

What is your nationality? Please tell me the country (or countries) that apply.

(MULTIPLE ANSWERS POSSIBLE - If "other countries" or "DK" CLOSE INTERVIEW)

v180 - Q27 EU MONETARY UNION CONDITIONS KNOWN

Q.27

The "European Union Treaty" which was signed and ratified by all member states, says that European Economic and Monetary Union will start fully by January 1999 at the latest. From then on exchange rates will be locked between the countries which meet the relevant conditions of the Treaty. After that, one European currency, the Euro, will replace national currencies. Do you know any of the conditions member countries must meet in order to join the European Economic and Monetary Union? (IF YES) Please tell me which ones.

v188 - Q28 COMMON CURRENCY INTRODUCTION - YEAR

Q.28

Notes and coins in the European currency, that is in euro, may be introduced some time after exchange rates are locked. In

December this year, designs for the European currency's banknotes will be chosen. When do you think these notes and coins will be introduced?

v189 - Q29 COMMON CURRENCY - PART COUNTRY 1999

Q.29

1999 will be the year when member states participating in the European Single Currency will be selected and 2002, the year when the euro will actually be introduced. Selection of the participating member states will be made on the basis of a number of criteria such as a low inflation rate, limited interest rates, limited public budget deficit, etc.

Do you think that (OUR COUNTRY) will certainly, probably, probably not or certainly not be ready to take part in the Single European Currency in 1999?

0 NA

1 Certainly

2 Probably

3 Probably not

4 Certainly not

v316 - Q49 ENERGY SAVING MORE: HOME INSULATION

Q.49

On these same points (SHOW CARD - READ OUT - SEVERAL ANSWERS POSSIBLE), how do you feel you could personally save more energy than you do now?

Q.49_1 By reducing heating costs (gas, oil, electricity) by improving the insulation in your home, for instance, putting in double glazing improving roof insulation, adjusting the controls of your heating equipment

v325 - Q50 PUBLIC ENERGY SAVING: WORLDWIDE

Q.50

Public bodies at different levels can act to save energy

In your opinion, do public bodies act efficiently or not efficiently ...?

Q.50_5 At Worldwide level

0 NA

1 Efficiently

2 Not efficiently

3 DK

v332 - Q54 NUCLEAR ENERGY - OPINION ABOUT

Q.54_A

SPLIT BALLOT A

Here are three opinions about the development of ...

... nuclear power stations, that is installations which use nuclear energy to produce electricity. Which one of these three statements comes closest to your own opinion on the subject?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

Q.54_B

SPLIT BALLOT B

Here are three opinions about the development of ...

... nuclear energy. Which one comes closest to your own opinion?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

0 NA

1 SPLIT A: It is worthwhile to develop nuclear energy

SPLIT B: Nuclear energy should be developed

2 SPLIT A: The development of nuclear energy involves an unacceptable risk and should be abandoned

SPLIT B: Nuclear energy should be abandoned

3 One should neither develop, nor abandon nuclear energy

v338 - Q57 DEVELOPMENT AID: DOMESTIC PRBL FIRST

Q.57a

In your opinion, is it very important, important, not very important or not at all important to help the people in poor countries in Africa, South America, Asia, etc. to develop?

Q.57b

IF NOT VERY IMPORTANT OR NOT AT ALL IMPORTANT, CODES 3 OR 4 in Q.57a

Why not?

(PROBE)

Anything else?

Q.57b_1 First we should solve domestic problems (poverty, economy, unemployment) in our own country

v347 - Q57 DEVELOPMENT AID: NO OWN INITIATIVE

Q.57a

In your opinion, is it very important, important, not very important or not at all important to help the people in poor countries in Africa, South America, Asia, etc. to develop?

Q.57b

IF NOT VERY IMPORTANT OR NOT AT ALL IMPORTANT, CODES 3 OR 4 in Q.57a

Why not?

(PROBE)

Anything else?

Q.57b_10 Helping people makes them passive/lazy, they don't show enough initiative of their own

v356 - Q57 DEVELOPMENT AID: DONT KNOW ENOUGH

Q.57a

In your opinion, is it very important, important, not very important or not at all important to help the people in poor countries in Africa, South America, Asia, etc. to develop?

Q.57b

IF NOT VERY IMPORTANT OR NOT AT ALL IMPORTANT, CODES 3 OR 4 in Q.57a

Why not?

(PROBE)

Anything else?

Q.57b_19 I don't know enough about these countries to decide whether it makes sense or not to help them

v361 - Q58 DEVELOPMENT AID BY GOVERNMENT

Q.58

ASK ALL

We are not talking about humanitarian aid, that is assistance provided in emergency situations like war, famine, etc., but about development aid. Do you think the (NATIONALITY) government helps the people in poor countries in Africa, Asia, etc. to develop, or not?

(IF YES)

Roughly how much of its budget do you think the (NATIONALITY) government spends on this aid?

(SHOW CARD - READ OUT)

v612 - Q84 ITALIAN ECONOMICS - GOOD/BAD

Q.84b

And please would you rate the present ECONOMIC situation in Italy?

(SHOW CARD)

Please choose between the two ends of the scale. If it is very bad, you give a score of 1. If it is very good you give a score of 10. The scores between 1 and 10 allow you to say how close to either side you are.

0 NA

1 Very bad

2 ..

3 ..

4 ..

5 ..

6 ..

7 ..

8 ..

9 ..

10 Very good

v613 - Q85_E EUROP PARLIAMENT CAND - ELECTION

Q.85_E

Cada 5 años, los Españoles eligen a sus miembros Españoles para el parlamento Europeo sobre las listas nacionales, es decir, los nombres de los candidatos son los mismos en toda España.

Algunas personas opinan que esta forma de elegir es la más adecuada para representar a España en el Parlamento Europeo. Otras personas piensan que se deberían tener listas autonómicas para acercar los diputados Europeos a los ciudadanos.

VD. personalmente, como cree que se deberían elegir los diputados Europeos?

(LEER RESPUESTAS)

(Every 5 years the Spaniards elect their Spanish members for the European Parliament through national lists, i.e. the names of the candidates are the same all over Spain.

Some people think, that this way of election is the most adequate for representing Spain in the European Parliament. Other people think that there should be lists for the autonomous regions in order to bring the European representatives closer to the citizens.

In your personal opinion, how should the European representatives be elected?)

(READ OUT)

- 1 Sobre listas nacionales, como se hace actualmente (Through national lists, as nowadays)
- 2 Sobre listas autonómicas (Through lists in the autonomous regions)
- 3 Ambas formas de elegir me parecen bien (SOLO ESPONTANEO) (Both methods are convenient for me (ONLY SPONTANEOUS))
- 4 Otras respuestas (SOLO ESPONTANEO) (Other answers (ONLY SPONTANEOUS))
- 5 No sabe (DK)
- 9 Inap., only asked in Spain (not coded 12 in V8)

v646 - D29 INCOME HH

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter (non-alphabetical, irregular order) of the income group your household falls into before tax and other deductions.

in France (FR):

France (French francs per month)

- 1 Less than 4.000
- 2 4.000 to 4.999
- 3 5.000 to 5.999
- 4 6.000 to 6.999
- 5 7.000 to 7.999
- 6 8.000 to 8.999
- 7 9.000 to 9.999
- 8 10.000 to 10.999
- 9 11.000 to 12.499
- 10 12.500 to 14.999
- 11 15.000 to 17.499
- 12 17.500 or more
- 97 Refusal
- 98 DK

in Belgium (BE):

Belgium (Belgian francs per month)

- 1 Less than 20.000
- 2 20.000 to 29.999
- 3 30.000 to 39.999
- 4 40.000 to 49.999
- 5 50.000 to 59.999
- 6 60.000 to 69.999
- 7 70.000 to 79.999
- 8 80.000 to 89.999
- 9 90.000 to 99.999
- 10 100.000 to 109.999
- 11 110.000 to 119.999
- 12 120.000 or more
- 97 Refusal
- 98 DK

in Netherlands (NL):

The Netherlands (Dutch guilders per month)

- 1 Less than 1.500
- 2 1.500 to 1.999
- 3 2.000 to 2.499
- 4 2.500 to 2.749
- 5 2.750 to 3.249
- 6 3.250 to 3.749
- 7 3.750 to 4.249
- 8 4.250 to 4.749
- 9 4.750 to 5.249
- 10 5.250 to 6.249
- 11 6.250 to 7.249
- 12 7250 or more
- 97 Refusal
- 98 DK

in Germany (DE):

Germany - west and east (German marks per month)

- 1 Less than 1.500
- 2 1.501 to 1.750
- 3 1.751 to 2.000
- 4 2.001 to 2.250
- 5 2.251 to 2.500
- 6 2.501 to 2.750
- 7 2.751 to 3.000
- 8 3.001 to 3.500
- 9 3.501 to 4.000
- 10 4.001 to 4.500
- 11 4.501 to 5.000
- 12 5.001 or more
- 97 Refusal
- 98 DK

in Italy (IT):

Italy (Italian lire per month)

- 1 Less than 750.000
- 2 750.000 to 1.000.000
- 3 1.000.001 to 1.500.000
- 4 1.500.001 to 1.750.000
- 5 1.750.001 to 2.000.000
- 6 2.000.001 to 2.500.000
- 7 2.500.001 to 3.000.000
- 8 3.000.001 to 3.500.000
- 9 3.500.001 to 4.000.000
- 10 4.000.001 to 4.500.000
- 11 4.500.001 to 5.000.000

12 5.000.000 or more

97 Refusal

98 DK

in Luxembourg (LU):

Luxembourg (Luxembourg francs per month)

1 Less than 50.000

2 50.000 to 69.999

3 70.000 to 89.999

4 90.000 to 99.999

5 100.000 to 109.999

6 110.000 to 119.999

7 120.000 to 129.999

8 130.000 to 139.999

9 140.000 to 149.999

v647 - D29 INCOME HH QUARTILES

D.29R Household income (HARMONISED)

(This variable collapses answers to D.29 into four groups representing approximate quartiles.)

- 1 - - (Lowest income quartile)
- 2 - (Next to lowest income quartile)
- 3 + (Next to highest income quartile)
- 4 + + (Highest income quartile)
- 5 DK / refusal

Note:

See D.29 for complete question text

v654 - P7 REGION I

P.7

Region I

in France (FR):

Regions (EUROSTAT NUTS II LEVEL)

- 1 Ile de France
- 2 Champagne-Ardenne
- 3 Picardie
- 4 Haute-Normandie
- 5 Centre
- 6 Basse-Normandie
- 7 Bourgogne
- 8 Nord Pas de Calais
- 9 Lorraine
- 10 Alsace
- 11 Franche-Comte
- 12 Pays de la Loire
- 13 Bretagne
- 14 Poitou-Charentes
- 15 Aquitaine
- 16 Midi-Pyrenees
- 17 Limousin
- 18 Rhone-Alpes
- 19 Auvergne
- 20 Languedoc-Roussillon
- 21 Provence-Alpes-Cote d'Azur
- 22 Corse

in Belgium (BE):

Provinces (EUROSTAT NUTS II LEVEL - modified)

- 1 Hainaut
- 2 Limburg
- 3 Namur
- 4 Oost-Vlaanderen
- 5 West-Vlaanderen
- 6 Liege
- 7 Luxembourg
- 8 Brabant flamand
- 9 Antwerpen
- 10 Bruxelles
- 11 Brabant wallon

in Netherlands (NL):

Provinces (EUROSTAT NUTS II LEVEL)

- 1 Groningen
- 2 Friesland
- 3 Drenthe
- 4 Overijssel
- 5 Gelderland
- 6 Flevoland
- 7 Utrecht
- 8 Noord-Holland
- 9 Zuid-Holland
- 10 Zeeland
- 11 Noord Brabant
- 12 Limburg

in Germany - West (DE_W):

Regierungsbezirke (EUROSTAT NUTS II LEVEL)

- 10 Schleswig-Holstein
- 20 Hamburg
- 31 Braunschweig
- 32 Hannover
- 33 Lüneburg
- 34 Weser-Ems
- 40 Bremen
- 51 Düsseldorf
- 53 Köln
- 55 Münster
- 57 Detmold
- 59 Arnsberg
- 64 Darmstadt
- 65 Gießen
- 66 Kassel
- 71 Koblenz
- 72 Trier
- 73 Rheinhessen-Pfalz
- 81 Nord Württemberg=Stuttgart
- 82 Nordbaden=Karlsruhe
- 83 Südbaden=Freiburg
- 84 Süd Württemberg=Tübingen
- 91 Oberbayern
- 92 Niederbayern
- 93 Oberpfalz
- 94 Oberfranken
- 95 Mittelfranken
- 96 Unterfranken
- 97 Schwaben
- 100 Saarland
- 110 Berlin (West)

in Italy (IT):

Regioni (EUROSTAT NUTS II LEVEL - modified)

- 1 Valle d'Aosta e Piemonte
- 2 Liguria
- 3 Lombardia
- 4 Milano
- 5 Trentino
- 6 Veneto
- 7 Friuli-Venezia Giulia
- 8 Emilia-Romagna
- 9 Toscana
- 10 Marche
- 11 Umbria
- 12 Lazio
- 13 Molise e Abruzzi
- 14 Campania
- 15 Puglia
- 16 Basilicata
- 17 Calabria
- 18 Sicilia
- 19 Sardegna

in Luxembourg (LU):

- 1 Centre
- 2 South
- 3 North
- 4 East

Regioni (EUROSTAT NUTS II LEVEL - modified)

- 1 Centre
- 2 South
- 3 North
- 4 East

in Denmark (DK):

- 1 Hovedstodomradet (Kobenhavens area)
- 2 Sjaellands, Lolland-Falster, Bornholms (excl. hovedstodomradet)
- 3 Fyns
- 4 Jyllands
- 0 NA

in Ireland (IE):

Planning Regions (EUROSTAT NUTS III LEVEL)

- 1 Donegal
- 2 North west (Sligo/Leitrim)
- 3 North east (Cavan/Monaghan/Louth)

- 4 West (Mayo/Galway)
- 5 Midlands (Westmeath/Roscommon/Longford/Laois/Offaly)
- 6 East (Dublin/Meath/Kildare/Wicklow)
- 7 Mid west (Limerick/Clare/Tipperary North Riding)
- 8 South east (Waterford/Wexford/Carlow/Kilkenny/Tipperary South Riding)
- 9 South west (Kerry/Cork)

in United Kingdom (GB):

Groups of Counties (grouping for Community purposes) (EUROSTAT NUTS II LEVEL)

- 1 Cleveland, Durham
- 2 Cumbria
- 3 Northumberland, Tyne and Wear
- 4 Humberside
- 5 North Yorkshire
- 6 South Yorkshire
- 7 West Yorkshire
- 8 Derbyshire, Nottinghamshire
- 9 Leicestershire, Northamptonshire
- 10 Lincolnshire
- 11 East Anglia
- 12 Bedfordshire, Hertfordshire
- 13 Berkshire, Buckinghamshire, Oxfordshire
- 14 Surrey, East-West Sussex
- 15 Essex
- 16 Greater London
- 17 Hampshire, Isle of Wight
- 18 Kent
- 19 Avon, Gloucestershire, Wiltshire
- 20 Cornwall, Devon
- 21 Dorset, Somerset
- 22 Hereford and Worcester, Warwickshire
- 23 Shropshire, Staffordshire
- 24 West Midlands (County)
- 25 Cheshire
- 26 Greater Manchester
- 27 Lancashire
- 28 Merseyside
- 29 Clwyd, Dyfed, Gwynedd, Powys
- 30 Gwent, Mid-South-West Glamorgan
- 31 Borders, Central, Fife, Lothian, Tayside
- 32 Dumfries and Galloway, Strathclyde
- 33 Highlands, Islands
- 34 Grampian
- 35 Northern Ireland

in Greece (GR):

Development Regions (EUROSTAT NUTS II LEVEL)

- 1 Kentriki Makedonia kai Dytiki Makedonia
- 2 Thessalia
- 3 Anatoliki Makedonia
- 4 Thraki
- 5 Anatoliki Sterea kai Nisia
- 6 Peloponnisos kai Dytiki Sterea
- 7 Ipeiros
- 8 Kriti
- 9 Nisia Anatolikou Aigaiou

in Spain (ES):

Comunidades Autonomas (EUROSTAT NUTS II LEVEL)

- 1 Andalucia
- 2 Aragon
- 3 Asturias
- 4 Baleares
- 5 Canarias
- 6 Cantabria
- 7 Castilla-Leon
- 8 Castilla-La Mancha
- 9 Cataluna
- 10 Extremadura
- 11 Galicia
- 12 Madrid
- 13 Murcia
- 14 Navarra
- 15 La Rioja
- 16 Comunidad Valenciana
- 17 Pais Vasco

in Portugal (PT):

Comissaoes de Coordinacao Regional, Regioes Autonomas (EUROSTAT NUTS II LEVEL)

- 1 Norte
- 2 Centro
- 3 Lisboa e Vale do Tejo
- 4 Alentejo
- 5 Algarve
- 6 Acores
- 7 Madeira

in Germany - East (DE_E):

Regierungsbezirke (EUROSTAT NUTS II LEVEL)

- 110 Berlin (Ost)
- 120 Brandenburg
- 130 Mecklenburg Vorpommern
- 140 Sachsen
- 151 Dessau

- 152 Halle
- 153 Magdeburg
- 160 Thüringen

in Finland (FI):

Maakunnat (EUROSTAT NUTS III LEVEL)

- 1 Uusimaa
- 2 Varsinais-Suomi
- 3 Satakunta
- 4 Häme
- 5 Pirkanmaa
- 6 Päijät-Häme
- 7 Kymenlaakso
- 8 Etelä-Karjala
- 9 Etelä-Savo
- 10 Pohjois-Savo
- 11 Pohjois-Karjala
- 12 Keski-Suomi
- 13 Etelä-Pohjanmaa
- 14 Vasaan rannikkoseutu
- 15 Keski-Pohjanmaa
- 16 Pohjois-Pohjanmaa
- 17 Kainuu
- 18 Lappi

in Sweden (SE):

Riksomraden (EUROSTAT NUTS II LEVEL)

- 1 Stockholm
- 2 Östra Mellansverige
- 3 Smaland med öarna
- 4 Sydsverige
- 5 Västsverige
- 6 Norra Mellansverige
- 7 Mellersta Norrland
- 8 Övre Norrland

in Austria (AT):

Bundesländer (EUROSTAT NUTS II LEVEL)

- 1 Vorarlberg
- 2 Tirol
- 3 Salzburg
- 4 Ober-Österreich (Upper Austria)
- 5 Steiermark (Styria)
- 6 Kärnten (Carynthia)
- 7 Nieder-Österreich (Lower Austria)
- 8 Burgenland
- 9 Wien (Vienna)

Note:

In the cases of France, West Germany, Italy, Ireland and the United Kingdom "Region I" corresponds to the variable labelled "Province" in earlier Eurobarometer up to number 31. If indicated, "Region I" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS.)

Starting with Eurobarometer 44.2bis the Eurobarometer are considering the new East German regional units as resulting from the regional reforms 1992-94. The new regional units on NUTS II level (Regierungsbezirke) for Sachsen-Anhalt are Dessau, Halle, and Magdeburg; the new units for Sachsen (Chemnitz, Dresden, Leipzig) are only considered starting with Eurobarometer 48. REGION I categories used in former surveys up to number 44.1 are based on ex-GDR administrative units (Bezirke) and are not comparable to the new categories even if identical names are used. The almost unchanged NUTS I unit (Bundesland) Sachsen-Anhalt in Eurobarometer REGION II for example was formerly only composed of Halle and Magdeburg. The East German federal units (Neue Bundesländer) Brandenburg, Mecklenburg-Vorpommern, and Thüringen are not subdivided on NUTS II level.

v655 - P7 REGION II

P.7R

Region II

99 INAP (no REGION II available)

in France (FR):

Zeal (EUROSTAT NUTS I LEVEL)

- 1 Ile de France
- 2 Bassin Parisien
- 3 Nord-pas-de-Calais
- 4 Est
- 5 Ouest
- 6 Sud-Ouest
- 7 Centre-Est
- 8 Mediterranee

in Belgium (BE):

Regions (EUROSTAT NUTS I LEVEL)

- 1 Region Wallonne
- 2 Bruxelles-Brussel
- 3 Vlaanderen

in Netherlands (NL):

Landsdelen (EUROSTAT NUTS I LEVEL)

- 1 Noord-Nederland
- 2 Oost-Nederland
- 3 West-Nederland
- 4 Zuid-Nederland

in Germany - West (DE_W):

Bundesländer (EUROSTAT NUTS I LEVEL)

- 1 Schleswig Holstein
- 2 Hamburg
- 3 Niedersachsen
- 4 Bremen
- 5 Nordrhein-Westfalen
- 6 Hessen
- 7 Rheinland-Pfalz
- 8 Baden-Wuerttemberg
- 9 Bayern
- 10 Saarland
- 11 Berlin (West)

in Italy (IT):

Gruppi di regioni (grouping for Community purposes) (EUROSTAT NUTS I LEVEL)

- 1 Nord Ovest
- 2 Lombardia
- 3 Nord Est
- 4 Emilia-Romagna
- 5 Centro
- 6 Lazio
- 7 Abruzzi-Molise
- 8 Campania
- 9 Sud
- 10 Sicilia
- 11 Sardegna

in Ireland (IE):

- 1 Dublin
- 2 Rest of Leinster
- 3 Munster
- 4 Connaught / Ulster

in United Kingdom (GB):

Standard Regions (EUROSTAT NUTS II LEVEL - modified)

- 1 Scotland
- 2 North, Yorkshire, Humberside and North West
- 3 East and West Midlands, East Anglia
- 4 Wales
- 5 South East
- 6 South West
- 7 Northern Ireland

in Spain (ES):

Agrupacion de comunidades autonomas

- 1 Galicia
- 2 North
- 3 North-East
- 4 Aragon, Rioja
- 5 Madrid
- 6 Centre
- 7 Cataluna
- 8 East
- 9 South
- 10 Canarias

in Germany - East (DE_E):

Bundesländer (EUROSTAT NUTS I LEVEL)

- 11 Berlin (Ost)
- 12 Brandenburg
- 13 Mecklenburg-Vorpommern

- 14 Sachsen
- 15 Sachsen-Anhalt
- 16 Thüringen

in Finland (FI):

Suuralueet (EUROSTAT NUTS II LEVEL)

- 1 Uusimaa
- 2 Etelä-Suomi
- 3 Itä-Suomi
- 4 Väli-Suomi
- 5 Pohjois-Suomi

Note:

Only in the case of West Germany "Region II" corresponds to the variable labelled "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).)

Starting with Eurobarometer 44.2bis the East German federal units (Neue Bundesländer) are not any more constructed from the ex-GDR administrative regional units (Bezirke). There may be minor changes in the real territorial outline of each unit in comparison with the categories as constructed in former Eurobarometer up to survey number 44.1.

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

v658 - C1 OPINION LEADERSHIP INDEX

C.1 OPINION LEADERSHIP INDEX

Cognitive Mobilisation Index 1

0 DK / NA (coded 0 or 5 for V36 and 0 or 4 for V35)

1 - - low (coded 3, 4, 5 or 0 for V36 and 3 for V35; or coded 3 or 4 for V36 and 3, 4 or 0 for V35)

2 - (coded 3, 4, 5 or 0 for V36 and 2 for V35; or coded 1 or 2 for V36 and 3, 4 or 0 for V35)

3 + (coded 3, 4, 5 or 0 for V36 and 1 for V35; or coded 1 or 2 for V36 and 2 for V35)

4 + + high (coded 1 or 2 for V36 and 1 for V35)

Derivation:

This index is based on the answers to the following two questions: "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.3) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.2). Interviewees giving affirmative answers to both questions are labelled + +. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

v659 - C4 SOCIO PROF STATUS

C.4 SOCIO PROFESSIONAL STATUS

- 0 Other answers (never any paid work, NA)
- 1 Farmer and fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position , not at a desk but travelling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non- marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. See also standard report EURO- BAROMETER 47, October 1997, Brussels, C.9

v660 - C5 EUROPEAN POL PARTY PREFERENCE

C.5 EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX

- 0 Other answers
- 1 (PSE) Socialist Group
- 2 (PPE) Group of the European People's Party (Christian Democratic Group)
- 3 (ELDR) Group of the European Liberal, Democrat and Reform Party
- 4 (GUE/NGL) Confederal Group of the European United Left / Nordic Green Left
- 5 (UFE) Group Union for Europe
- 6 (RDE) Group of the European Renewal and Democratic Alliance (not among the 1994 parliamentary groups)
- 7 (V) The Green Group in the European Parliament
- 8 (ARE) Group of the European Radical Alliance
- 9 (IEDN) Group of Independents for a Europe of Nations
- 10 (N.I.) Non-affiliated
- 11 Not represented (other parties)

Derivation:

This index is based upon the vote intention question D.4: "If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labelled N.I., supporters of parties not represented in the European Parliament are labelled "other parties". Labels are presented in the order in which they occur in the "list of members" of the European Parliament of 1994.

v661 - C11 MEDIA USE INDEX

C.11 MEDIA USE

0 DK/NA (Coded 0 or 6 for one or more variables)

1 +++ (Coded 1 or 2 for V42, V43 and V44)

2 ++ (Coded 1 or 2 for two of these variables and coded 3, 4 or 5 for the third variable)

3 -- (Coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables)

4 --- (Coded 3, 4 or 5 for V42, V43 and V44)

Derivation:

This index is based upon answers to question Q.5 (V42-V44):

"About how often do you watch the news in television, read the news in the daily paper, and listen to the news broadcasts on the radio?"

"It combines the answers in the following way: +++ News on TV, radio and papers every day or several times a week; ++ Two media every day or several times a week, the third medium not more than once or twice a week; -- One of the three media every day or several times a week, the two others, not more than once or twice a week; --- The three media no more than once or twice a week.

v664 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number:

This is the original respondent identification number as supplied by INRA. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: Greece; 05: Italy; 06: Spain; 07: France; 08: Ireland; 09: Northern Ireland; 10: Luxembourg; 11: Netherlands; 12: Portugal; 13: Great Britain; 14: East Germany; 16: Finland; 17: Sweden; 18: Austria). The remaining four digits contain the country-specific questionnaire numbers.

Note:
