Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures such as public awareness of and attitudes toward the Common Market and the European Community (EC), and also focused on poverty and social exclusion, examining the extent and immediacy of these problems for respondents.

Items covered whether the respondent's family or friends were experiencing poverty or social exclusion, how often the respondent saw instances of poverty and social exclusion, and whether the respondent believed that people had a chance of rising out of these circumstances. Respondents were also asked about the main reasons for poverty and social exclusion; the best ways to combat these conditions; what the role of volunteer groups, unions, employers, and the European Community (EC) should be; and whether the fight against poverty and social exclusion should be a priority objective for the EC. Also included were questions that asked whether respondents had given or would give any time to help disadvantaged people and what types of activities they had performed or would be prepared to perform.

Respondents were asked to compare the current general economic and employment situations in their countries, the financial situation of their households, and their job situations with those of 12 months ago and 12 months ahead. Respondents were also asked to rate various aspects of their everyday life, including housing, income, work, social entitlements, and health.

On EC matters, respondents were asked how well-informed they felt about the EC, what sources of information about the EC they used, whether their country had benefited from being an EC member, and the extent of their personal interest in EC matters.

Demographic and other background information was gathered on number of people residing in the home, size of locality, home ownership, trade union membership, region of residence, and occupation of the head of household, as well as the respondent's age, sex, marital status, education, occupation, work sector, religion, religiosity, subjective social class, left-right political self-placement, and opinion leadership.

1.3 Universe

The samples of Eurobarometer 40 are designed to be representative for the national population aged 15 years and over of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland) and in Germany (West and East Germany). A separate national survey was conducted independently in Norway and Finland, designed to be representative for Norwegian and Finnish citizens aged 15 years and over.

1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random.

In some countries, such as Great Britain, Republic of Ireland and Luxembourg, respondents were randomly selected from electoral registers. In each household, a respondent was selected by a random procedure, such as the first birthday method or the KISH grid method. Up to two recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From October 18 to November 9 (Norway: November 28), 1993, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the 'Survey, Research, Analysis' Unit of the Directorate General X, 'Information, Communication and Culture', of the Commission of the European Communities. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R. Vandendriessche 18, B-1150 Brussels.

1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general

all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 40 provides four (post-stratification) NATION WEIGHTS for the EU member countries: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) and NATION WEIGHT IIb (WEIGHT ADJUSTED TO STANDARD SIZE) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole and NATION WEIGHT III (WEIGHT SPECIAL GERMANY adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors, except Norway and Finland. A separate (post-stratification) NATION WEIGHT is provided for Norway: WEIGHT RESULT FROM TARGET NORWAY ONLY and for Finland: WEIGHT RESULT FROM TARGET FINLAND ONLY.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included. Norway and Finland are excluded from calculation.

For more detailed information on the individual weights please see the corresponding variable description.

1.7 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Five variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, REGION II, AGE RECODED, AGE EDUCATION RECODED and REGION II. Users should be aware that ZA's process of condensing information sometimes produces coding schemes that

differ from those in earlier Eurobarometers.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country specific coding is provided by INRA in other languages than English, the original language questionnaire version is supplemented by a literal English translation in brackets.

1.9 Further remarks

Special Release: European Election Study 1994 Special Release: European Election Study 1994

Please notice the special release of codebook and data sets of European Election Study 1994 (ZA study numbers 2866–2869). A number of pertinent variables from Eurobarometer 42 are documented and included here. The complete study essentially consists of a survey conducted immediately after the European Parliament election of June 1994 in the framework of Eurobarometer 41.1. In addition pertinent variables from Eurobarometers 40 and 41.0 are also included. Identical questions have been asked in all member states of the European Community, some of them have been included in two, a few in three or four of the interviews. As a consequence the study offers wide opportunities for comparative and longitudinal analyses of voter behavior and voter orientations. Longitudinal analysis are particularly supported by the fact that 1994 study contents are partially overlapping with those of the European Election Study 1989 (ZA study number 2320).

The special data release EES 1994 was prepared in the framework of the 'European Elections Study Research Group' by Hermann Schmitt (Mannheimer Zentrum fuer Europaeische Sozialforschung, University of Mannheim), Franz Urban Pappi (University of Mannheim), Cees van der Eijk (University of Amsterdam) and Evi Scholz (ZEUS, University of Mannheim) in collaboration with Pilar del Castillo (UNED, Madrid), Roland Cayrol (CEVIPOF, Paris), Mark Franklin (University of Houston), Renato Mannheimer (University of Genova), Michael Marsh (Trinity College, University of Dublin), Karlheinz Reif (European Commission), and Colette Ysmal (CEVIPOF, Paris).

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct–Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER

ZA/ICPSR Study Number

Respective study number of the involved archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
2459			15079	100.0	100.0
	Sum		15079	100.0	100.0
	Valid Cases		15079		

v2 - EDITION NUMBER

ZA/ICPSR Edition Number

The number identifying the release edition of this dataset.

- 1 Early release version
- 2 1st codebook edition

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v2

Value	Label	Missing	Count	Percent	Valid Percent
2	1ST CODEBOOK EDITION (RELEASE AS OF MAY 2, 2007)		15079	100.0	100.0
	Sum		15079	100.0	100.0
	Valid Cases		15079		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.1.0 adds the crosstabulation variable ISOCNTRY and the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.1.0 (2012-07-01)			15079	100.0	100.0
	Sum		15079	100.0	100.0
	Valid Cases		15079		

v3 - PART NUMBER

ZA/ICPSR Part Number

The number identifying this part of a 1-part study.

1 EUROBAROMETER 40

v3

Value	Label	Missing	Count	Percent	Valid Percent
1			15079	100.0	100.0
	Sum		15079	100.0	100.0
	Valid Cases		15079		

v4 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

isocntry

v5 - NATION I (UNITED KINGDOM)

Nation of interview I

Twelve EC countries including separate samples for East and West Germany and with the addition of Norway

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany - west
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany - east
- 14 Norway
- 15 Finland

v5

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1024	6.8	6.8
2	BELGIUM		1003	6.7	6.7
3	NETHERLANDS		1000	6.6	6.6
4	WEST GERMANY		1047	6.9	6.9
5	ITALY		1012	6.7	6.7

14	NORWAY		1011	6.7	6.7
15	FINLAND		995	6.6	6.6
	Sum		15079	100.0	100.0
	Valid Cases		15079		

v6 - WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights are included. Norway and Finland are weighted by "zero".

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31 this weight adjusts all samples to the standard size.

v7 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany - west
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany - east
- 15 Norway
- 16 Finland

v7

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1024	6.8	6.8
2	BELGIUM		1003	6.7	6.7
3	NETHERLANDS		1000	6.6	6.6
4	WEST GERMANY		1047	6.9	6.9
5	ITALY		1012	6.7	6.7
6	LUXEMBOURG		502	3.3	3.3
7	DENMARK		1000	6.6	6.6
8	IRELAND		1000	6.6	6.6
9	GREAT BRITAIN		1061	7.0	7.0
10	NORTHERN IRELAND		300	2.0	2.0
11	GREECE		1002	6.6	6.6

15	NORWAY		1011	6.7	6.7
16	FINLAND		995	6.6	6.6
	Sum		15079	100.0	100.0
	Valid Cases		15079		

v8 - WEIGHT RESULT FROM TARGET

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples. Norway and Finland are weighted by "zero".

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.

v9 - WEIGHT ADJUSTED TO STANDARD SIZE

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg). Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples. Norway and Finland are weighted by "zero".

v10 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Norway
- 15 Finland

v10

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1024	6.8	6.8
2	BELGIUM		1003	6.7	6.7
3	NETHERLANDS		1000	6.6	6.6
4	GERMANY		2169	14.4	14.4
5	ITALY		1012	6.7	6.7
6	LUXEMBOURG		502	3.3	3.3
7	DENMARK		1000	6.6	6.6
8	IRELAND		1000	6.6	6.6
9	GREAT BRITAIN		1061	7.0	7.0
10	NORTHERN IRELAND		300	2.0	2.0
11	GREECE		1002	6.6	6.6
12	SPAIN		1000	6.6	6.6
13	PORTUGAL		1000	6.6	6.6
14	NORWAY		1011	6.7	6.7
15	FINLAND		995	6.6	6.6
	Sum		15079	100.0	100.0
	Valid Cases		15079		

v11 - WEIGHT SPECIAL GERMANY

Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size. Norway and Finland are weighted by "zero".

v12 - WEIGHT EURO 6

European Weight I (WEIGHT EURO 6)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v13 - WEIGHT EURO 10

European Weight II (WEIGHT EURO 10)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 excludes East Germany, Spain and Portugal. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v14 - WEIGHT EURO 12

European Weight III (WEIGHT EURO 12)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 excludes East Germany (weighted by "zero"). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v15 - WEIGHT EUROPE 12 +

European Weight IV (WEIGHT EUROPE 12 +):

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included. Norway and Finland are excluded (weighted by "zero").

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31 this weight contains the adjustment to the standard size.

v16 - WEIGHT RESULT FROM TARGET NORWAY ONLY

Norwegian Weight (WEIGHT RESULT FROM TARGET NORWAY ONLY)

This variable contains weights that adjust the weighted sample to make it representative for Norway. It reproduces the real number of cases. All other countries are weighted by "zero".

v17 - WEIGHT RESULT FROM TARGET FINLAND ONLY

Finland Weight (WEIGHT RESULT FROM TARGET FINLAND ONLY)

This variable contains weights that adjust the weighted sample to make it representative for Finland. It reproduces the real number of cases. All other countries are weighted by "zero".

wght_all - WEIGHT RESULT FROM TARGET - ALL SAMPLES

WEIGHT RESULT FROM TARGET - ALL SAMPLES (EU + NO + FI)

This weight adds WEIGHT RESULT FROM TARGET for EUROPEAN COMMUNITY member countries and parallel surveys conducted in NORWAY and FINLAND. This variable was produced by the archive and contains the original weighting factors for ALL SAMPLES

adjusting the weighted samples to make them representative for the countries/areas from which they were drawn. It reproduces the real number of cases. British and Northern Irish as well as East and West German samples are weighted separately.

v18 - Q1 ELECTORAL REGISTER

Q.1

Are you ... (NATIONALITY)?

(IF YES)

Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under your present address, at another address or does not appear at all?

(IF CODE 5: CLOSE INTERVIEW)

- 1 At present address
- 2 At another address
- 3 Don't know if registered
- 4 Does not appear at all
- 5 Is not ... (NATIONALITY)
- 9 Inap., not interviewed in Finland (coded 16 in V7)

v32 - Q15A VALUE ORIENTATION - POL GOALS 1ST

Q.15

There is a lot of talk these days about what (OUR COUNTRY)'s goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority.

Q.15a Would you please say which one of them you yourself consider to be most important in the long run?

(SHOW CARD - ONE ANSWER ONLY)

- 0 NA
- 1 Maintaining order in the country
- 2 Giving the people more say in important government decisions
- 3 Fighting rising prices
- 4 Protecting freedom of speech
- 5 DK
- 9 Inap., not interviewed in Finland (coded 16 in V7)

v60 - Q25 EC INFO HOT LINE - ASSESSMENT

Q.25

Do you think it would be a good idea or not to have a telephone and telefax "hot line" which would provide information about European Community issues, policies and regulations?

(IF YES)

Would you yourself make use of it or not?

(DO NOT READ OUT)

0 NA

1 No, would not be a good idea

2 Yes, good idea and would probably use it

3 Yes, good idea and would probably not use it

4 Yes, good idea but only if free of charge

v102 - Q42 EC PROBLEMS - MOST IMPORTANT

Q.42

The twelve member countries of the European Community are together trying to solve a certain number of common problems. Here is a list of some of them. Could you please tell me which one of these problems, you think, is the most important at the present time. And which is the next most important problem?

(SHOW CARD)

Q.42_1 Most important problem

- 0 NA
- 1 Replacing the currencies of all member countries, including the (NATIONAL CURRENCY), with a single European currency
- 2 Reducing differences between regions by helping less developed regions
- 3 A common fight against rising prices
- 4 Co-ordinating the social policies of member countries in the fields of employment and job training
- 5 Achieving a common policy on energy supplies
- 6 Modernising European agriculture by encouraging the most productive farms and providing retraining for people who leave agriculture
- 7 Achieving a common policy for assisting scientific research
- 8 Achieving a common policy for protecting nature and fighting pollution
- 9 Achieving a common policy on aid to underdeveloped countries
- 10 Protecting consumers against fraudulent selling and misleading advertising
- 11 Getting Europe to speak with one voice in discussions with the Americans and the Russians
- 12 Achieving a truly equivalent number of years of education and qualifications so that young people can study in any country in the European Community
- 13 None of these problems
- 14 DK

v103 - Q42 EC PROBLEMS - NEXT MOST IMPORTANT

Q.42

The twelve member countries of the European Community are together trying to solve a certain number of common problems. Here is a list of some of them. Could you please tell me which one of these problems, you think, is the most important at the present time. And which is the next most important problem?

(SHOW CARD)

Q.42_2 Next most important problem

- 0 NA
- 1 Replacing the currencies of all member countries, including the (NATIONAL CURRENCY), with a single European currency
- 2 Reducing differences between regions by helping less developed regions
- 3 A common fight against rising prices
- 4 Co-ordinating the social policies of member countries in the fields of employment and job training
- 5 Achieving a common policy on energy supplies
- 6 Modernising European agriculture by encouraging the most productive farms and providing retraining for people who leave agriculture
- 7 Achieving a common policy for assisting scientific research
- 8 Achieving a common policy for protecting nature and fighting pollution
- 9 Achieving a common policy on aid to underdeveloped countries
- 10 Protecting consumers against fraudulent selling and misleading advertising
- 11 Getting Europe to speak with one voice in discussions with the Americans and the Russians
- 12 Achieving a truly equivalent number of years of education and qualifications so that young people can study in any country in the European Community
- 13 None of these problems
- 14 DK

v132 - Q53A EUROP COURT DO AWAY IF DISAGREEMENT

Q.53

The European Court of Justice is in charge of hearing cases about the laws of the European Community. It decides on the proper interpretation of Community law and whether European Community law or national law prevails.

For each of the following statements, could you please indicate whether you agree strongly, you agree somewhat, you disagree somewhat or you disagree strongly with it? If you are undecided, please tell me.

(SHOW CARD AND READ OUT)

Q.53a If the European Court of Justice started making a lot of decisions that most people disagree with, it might be better to do away with the Court altogether.

v161 - Q59 EC BORDER CONTROLS DISAPPEAR

Q.59

QUESTIONS 54 TO 59 ONLY INTERVIEWED IN FRANCE, BELGIUM, THE NETHERLANDS AND GERMANY

Since the completion of the Single European Market at the beginning of 1993, people crossing internal EC borders, that is border between Member States, are not checked AS much as before. In the future, these controls are to disappear completely. Which of the following two opinions comes closest to your own?

(READ OUT)

0 NA

1 Most of all, I am happy that people can travel without restrictions throughout the European Community

2 Most of all, I am worried that crime rates will rise in (OUR COUNTRY) because border controls have been removed

3 DK

v307 - Q66_NL EC MAASTR TREATY - RATIFICATION

Q.66

COUNTRY SPECIFIC QUESTION 66 ONLY ASKED IN THE NETHERLANDS

In februari 1992 werd het Verdrag van Maastricht door vertegenwoordigers van de E.G.-lidstaten ondertekend. Vervolgens diende het Verdrag door elk van de twaalf lidstaten geratificeerd te worden, dat wil zeggen dat het via het eigen parlement of een referendum moest worden bekrachtigd. Is volgens u het Verdrag van Maastricht inmiddels door alle twaalf lidstaten bekrachtigd?

(In February 1992 the Maastricht Treaty was signed by the the representatives of the EC member countries. Following the Treaty had to be ratified by each of the twelve member countries, that is to say it had to be approved by the own parliament or by a referendum. In your opinion, has the Maastricht Treaty meanwhile been approved by all twelve member countries?)

0 NA

1 Ja, door alle 12 lidstaten bekrachtigd (Yes, approved by all 12 member countries)

2 Nee, niet door alle 12 lidstaten bekrachtigd (No, not approved by all 12 member countries)

3 (DK)

v355 - Q76 PEOPLE IN POVERTY BEYOND HELP

Q.70

We are now going to talk again about people living in POVERTY OR EXTREME POVERTY / SOCIAL EXCLUSION OR TOTAL SOCIAL EXCLUSION.

Q.76

Still thinking of these people, are there those who seem to you to be beyond help: no assistance or policy will get them out of it?

0 NA

v451 - Q91 MINIMUM INCOME GUARANTEED FOR

Q.91

Can you tell me whether or not there is a minimum income guaranteed by the public authorities in (OUR COUNTRY)?

(IF YES)

Who, so far as you know, is entitled to this minimum guaranteed income?

(GIVE THE PRECISE NAME IN EACH COUNTRY)

(SHOW CARD)

0 NA

1 Anybody who is below the minimum income level

2 Only those who are below the minimum income level and who fulfil certain specific conditions such as age, nationality, availability for work

3 There is no guaranteed minimum income

4 DK

v452 - Q92 MINIMUM INCOME GUARANTEE - OPINION

Q.92

Some countries recognise the right of all adults to a minimum income. Which of the following opinions is closest to yours?

(SHOW CARD)

- 0 NA
- 1 This right encourages laziness and dependency
- 2 This right should be guaranteed unconditionally
- 3 This right should be guaranteed, only to those, who are committed to do something to improve their situation (looking for housing, a job, additional training)
- 4 This right should be accompanied by measures, which makes it easier to fit into society
- 5 DK

v493 - Q105 SINGLE EURO MARKET SOCIAL DIMENSION

Q.105

The European Community is committed to endowing the Single Market with a social dimension. This consists of a set of rules common to all member countries, for example on the rights and obligations of workers and employers. In your opinion has the social dimension of the Single Market received sufficient importance compared with the economic dimension? Choose from any of the following answers.

(SHOW CARD)

- 0 NA
- 1 The social dimension has taken sufficient importance in the construction of the Single European Market
- 2 The social dimension has taken too great an importance in the construction of Single European Market
- 3 The social dimension has not taken sufficient importance in the construction of the Single European Market
- 4 I don't know anything about it
- 9 Inap., not interviewed in Norway and Finland (coded 15 or 16 in V7)

v588 - D21A OCCUPATION HEAD OF HOUSEHOLD

D.21a

ASK D.20 TO D.22 IF RESPONDENT IS NOT CONTRIBUTING MOST TO THE HOUSEHOLD INCOME: CODE 2 IN D.19b,
OTHERS GO TO D.23

What is the current occupation of the person who contributes most to the household income?

NON-ACTIVE

- 1 Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
- 2 Student
- 3 Unemployed or temporarily not working
- 4 Retired or unable to work through illness

SELF EMPLOYED

- 5 Farmer
- 6 Fisherman
- 7 Professional (lawyer, medical practitioner, accountant, architect, ...)
- 8 Owner of a shop, craftsmen, other self employed person
- 9 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 10 Employed professional (employed doctor, lawyer, accountant, architect)
- 11 General management, director or top management (managing directors, director general, other director)
- 12 Middle management, other management (department head, junior manager, teacher, technician)
- 13 Employed position, working mainly at a desk
- 14 Employed position, not at a desk but travelling (salesmen, driver, ...)
- 15 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
- 16 Supervisor
- 17 Skilled manual worker
- 18 Other unskilled manual worker, servant

0 NA

99 Inap., if "contributing most to the household income" (not coded 2 in V585)

Note:

Last trend: EB39.0 D.21a

Finland does not apply the Eurobarometer standard demographic variables, but tries to recode their regular (Suomen Gallup Omnibus) demographics in the Eurobarometer context. In the case of occupation this recode does not really correspond to the Eurobarometer categories. Moreover the Eurobarometer question is filtered, the Finnish question is not. The Finnish occupation data included in this variable should only be used with caution.

v597 - D29 INCOME HH

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter (non-alphabetical, irregular order) of the income group your household falls into before tax and other deductions.

in France (FR):

French francs per month

- 0 NA

v598 - D29 INCOME HH QUANTILES (HARMONISED)

D.29R Household income - approximate quartiles

- 1 + + (Highest income quartile)
- 2 + (Next to highest income quartile)
- 3 - (Next to lowest income quartile)
- 4 - - (Lowest income quartile)
- 5 DK/refusal
- 9 Inap., not interviewed in Finland (coded 16 in V7)

Derivation:

This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:

See D.29 for complete question text

v623 - P6 SIZE OF COMMUNITY

P.6 (Objective) Size of locality

in France (FR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants
- 5 Paris

in Belgium (BE):

- 1 Grand centre
- 2 Localité urbaine
- 3 Localité secondaire
- 4 Autre localité

in Netherlands (NL):

- 1 less than 5.000
- 2 5.000 - less than 10.000
- 3 10.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 400.000
- 7 400.000 and more inhabitants

in Germany - West (DE_W):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 500.000
- 7 500.000 and more inhabitants

in Italy (IT):

- 1 less than 10.000
- 2 10.000 - less than 100.000
- 3 100.000 - less than 250.000
- 4 250.000 and more inhabitants

in Luxembourg (LU):

- 1 less than 2.500
- 2 2.500 - less than 5.000
- 3 5.000 - less than 10.000

- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 and more inhabitants (Luxembourg ville)

in Denmark (DK):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 10.000
- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 - less than 100.000
- 7 100.000 and more inhabitants

in Ireland (IE):

- 1 less than 2.000
- 2 2.000 less than 20.000
- 3 20.000 less than 100.000
- 4 100.000 and more inhabitants

in Great Britain (GB_GBN):

- 1 Metropolitan
- 2 Other 100 % urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB_NIR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants

in Greece (GR):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 1.000.000
- 5 1.000.000 and more inhabitants

in Spain (ES):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 100.000
- 5 100.000 - less than 300.000
- 6 300.000 - less than 500.000
- 7 500.000 - less than 1.000.000
- 8 1.000.000 and more inhabitants

in Portugal (PT):

- 1 less than 100
- 2 100 - less than 200
- 3 200 - less than 500
- 4 500 - less than 1.000
- 5 1.000 - less than 2.000
- 6 2.000 - less than 5.000
- 7 5.000 - less than 10.000
- 8 10.000 - less than 30.000
- 9 30.000 - less than 100.000
- 10 100.000 - less than 500.000
- 11 500.000 and more inhabitants

in Norway (NO):

- 1 Oslo
- 2 Bergen, Trondheim and other cities
- 3 Densely populated
- 4 Scattered populated

in Finland (FI):

v625 - P7 REGION II

P.7R Region II

99 Inap., not stated in Luxembourg, Denmark, Ireland, Greece, Portugal, and Finland (coded 6 to 8, 11, 13, 16, in V7)

in France (FR):

Zeal (EUROSTAT NUTS I LEVEL)

- 1 Ile de France
- 2 Bassin Parisien
- 3 Nord-pas-de-Calais
- 4 Est
- 5 Ouest
- 6 Sud-Ouest
- 7 Centre-Est
- 8 Mediterranee

in Belgium (BE):

Regions (EUROSTAT NUTS I LEVEL)

- 1 Region Wallonne
- 2 Bruxelles-Brussel
- 3 Vlaams Gewest

in Netherlands (NL):

Landsdelen (EUROSTAT NUTS I LEVEL)

- 1 Noord-Nederland
- 2 Oost-Nederland
- 3 West-Nederland
- 4 Zuid-Nederland

in Germany - West (DE_W):

Bundesländer (EUROSTAT NUTS I LEVEL)

- 1 Schleswig Holstein
- 2 Hamburg
- 3 Niedersachsen
- 4 Bremen
- 5 Nordrhein-Westfalen
- 6 Hessen
- 7 Rheinland-Pfalz
- 8 Baden-Wuerttemberg
- 9 Bayern
- 10 Saarland
- 11 Berlin (West)

in Italy (IT):

Gruppi di regioni (grouping for Community purposes) (EUROSTAT NUTS I LEVEL)

- 1 Nord Ovest
- 2 Lombardia
- 3 Nord Est
- 4 Emilia-Romagna
- 5 Centro
- 6 Lazio
- 7 Abruzzi-Molise
- 8 Campania
- 9 Sud
- 10 Sicilia
- 11 Sardegna

in United Kingdom (GB):

Standard Regions (EUROSTAT NUTS I LEVEL - modified)

- 1 Scotland
- 2 North, Yorkshire, Humberside and North West
- 3 East and West Midlands, East Anglia
- 4 Wales
- 5 South East
- 6 South West
- 7 Northern Ireland

in Spain (ES):

Agrupacion de comunidades autonomas

- 1 Galicia
- 2 North
- 3 North-East
- 4 Aragon, Rioja
- 5 Madrid
- 6 Centre
- 7 Cataluna
- 8 East
- 9 South
- 10 Canarias

in Germany - East (DE_E):

(EUROSTAT NUTS I LEVEL)

- 11 Berlin (Ost)
- 12 Brandenburg
- 13 Mecklenburg-Vorpommern
- 14 Sachsen
- 15 Sachsen-Anhalt
- 16 Thüringen

in Norway (NO):

- 1 Oslo/Akershus
- 2 Rest Eastland

3 South/Western

4 Trondelag/Northern

Note:

Only in the case of West Germany "Region II" corresponds to the variable labelled "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

East-Germany: The East German federal units ("Neue Bundesländer") are constructed from the ex-GDR administrative regional units which only give a rough idea of their real outline.

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

- 9 Inap., not available for Finland

Derivation:

This index is based on the answers to the following two questions: "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.13) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.14). Interviewees giving affirmative answers to both questions are labelled + +. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

v628 - C2 VALUE ORIENTATION (POST-MATERIALISM)

C.2 VALUE ORIENTATION

Materialist/Post-materialist Values Index

- 0 DK/NA
- 1 Materialist
- 2 Mixed
- 3 Post materialist
- 9 Inap., not available for Finland

Derivation:

This index is based on question Q.15 (V32/V33): "There is a lot of talk these days about what this country's goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority: (1) Maintaining order in the nation; (2) Giving the people more say in important government decisions; (3) Fighting rising prices; (4) Protecting Freedom of speech. Would you please say which of them you yourself consider most important in the long run? And what would be your second choice?" Respondents combining item (1) and (3) are labelled "materialist" Respondents combining items (2) and (4) are labelled "post-materialist", and others are labelled "mixed".

v629 - C3 EC SUPPORT TYPOLOGY - EUROP ATTITUDES

C.3 TYPOLOGY OF EUROPEAN ATTITUDES

- 0 DK/NA
- 1 Positive
- 2 Ambivalent
- 3 Negative

Derivation:

The Typology of European attitudes is based upon answers to the following questions: "In general, are you for or against efforts being made to unify Western Europe? Are you for, very much; for, to some extent; against, to some extent; against, very much?" (Q.28 = UNIFICATION) and "Generally speaking, do you think that (your country's) membership of the European Community is: a good thing, a bad thing, or neither good nor bad?" (Q.29 = MEMBERSHIP). Positive attitudes: MEMBERSHIP "good" and UNIFICATION: "for...". Ambivalent attitudes: MEMBERSHIP "neither good nor bad" or MEMBERSHIP "good" and UNIFICATION: "against..." or MEMBERSHIP "bad" and UNIFICATION "for ..." or DK/NA. Negative attitudes: MEMBERSHIP "bad" and UNIFICATION: "against...".

v630 - C4 SOCIO PROF STATUS (OCCUPATION RECODE)

C.4 SOCIO PROFESSIONAL STATUS

- 0 Other answers (never any payed work, NA)
- 1 Farmer and fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position , not at a desk but travelling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker
- 99 Inap., not available for Finland (coded 16 in V7)

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non- marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio- professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. For more details see standard report EUROBAROMETER 40, December 1993, Brussels, A87 f.

v631 - C5 EUROPEAN PARLIAMENT PARTY PREFERENCE

C.5 EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX

- 1 (S) Socialist Group
- 2 (PPE) Group of the European People's Party (Christian Democratic Group)
- 3 (LDR) Liberal and Democratic Reformist Group
- 4 (V) The Green Group in the European Parliament
- 5 (GUE) Group for the European Unitarian Left
- 6 (RDE) Group of the European Renewal and Democratic Alliance
- 7 (DR) Group Technical of the Right
- 8 (CG) Left Unity
- 9 (ARC) Rainbow Group in the European Parliament
- 10 (NI) Non-attached
- 11 Other party
- 12 Other answers (including NA)
- 99 Inap., not available for Norway and Finland (coded 15 or 16 in V7)

Derivation:

This index is based upon the vote intention question D.4: "If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labelled N.I., supporters of parties not represented in the European Parliament are labelled "other". Labels are presented in the order in which they occur in the "list of members" of the European Parliament of October 1989.

v632 - C6 EC SUPPORT - COMMITMENT

C.6 COMMITMENT TO THE COMMON MARKET

Support for the European Community Index

- 1 Strong opposition
- 2 Moderate opposition
- 3 Neutral position
- 4 Moderate support
- 5 Strong support

Derivation:

This index was constructed from responses to the questions: "Generally speaking, do you think that (your country's) membership of the European Community (Common Market) is ... a good thing, a bad thing, or neither good nor bad?" (Q.29) and "If you were told tomorrow that the European Community (Common Market) had been scrapped, would you be very sorry about it, indifferent or very relieved?" (Q.31).

v633 - C11 MEDIA USE INDEX

C.11 MEDIA USE

- 0 DK/NA
- 1 +++
- 2 ++
- 3 --
- 4 ---
- 9 Inap., not available for Finland

Derivation:

This index is based upon answers to question Q.16 (V34-V36): "About how often do you watch the news in television, read the news in the daily paper, and listen to the news broad- casts on the radio?"

It combines the answers in the following way: +++ News on TV, radio and papers every day or several times a week; ++ Two media every day or several times a week, the third medium not more than once or twice a week; -- One of the three media every day or several times a week, the two others, not more than once or twice a week; --- The three media no more than once or twice a week.

CODE 0: Coded 0 or 6 for either V34 or V35 or V36

CODE 1: Coded 1 or 2 for V34, V35 and V36

CODE 2: Coded 1 or 2 for two of these variables and coded 3, 4 or 5 for the third variable

CODE 3: Coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables

CODE 4: Coded 3, 4 or 5 for V34, V35 and V36

CODE 9: Coded 16 in V7

v634 - C12 EUROP SOCIAL GRADE (ESOMAR)

C.12 European Social Grade (ESOMAR 7-point scale)

- 0 NA
- 1 A
- 2 B
- 3 C
- 4 D
- 5 E1
- 6 E2
- 7 E3
- 9 Inap., not available for Finland (coded 16 in V7)

Derivation:

This scale is based on the recommendation of the European Society for Opinion and Marketing Research to harmonise the measurement of social grade across borders. This approach uses three different types of input variables:

I) Occupation of the main income earner (MIE) is based on 16 occupation groups E1 to E16:

- E1 General management, director or top management (6 employees or more)
- E2 Self employed professional
- E3 Employed professional
- E4 General management, director or top management (5 employees or less)
- E5 Middle management, other management (6 employees or more)
- E6 Middle management, other management (5 employees or less)
- E7 Business proprietors, owner (full/partner) of company and owner of a shop, craftsmen, other self employed (6 employees or more)
- E8 employed position, working mainly at a desk
- E9 business proprietors, owner (full/partner) of company (5 employees or less)
- E10 student
- E11 employed position, not at a desk but travelling or in a service job
- E12 farmer and fisherman
- E13 responsible for ordinary shopping and looking after the home, housewife
- E14 supervisor and skilled manual worker
- E15 other (unskilled) manual worker, servant
- E16 retired or unable to work through illness, unemployed or temporarily not working

II) The education level of the main income earner (MIE) is based on a classification into 6 groups of education level (adjusting the finishing age of general education in accordance with extra general education or specific apprenticeship and/or professional training): 1) up to 14 years; 2) 15-16 years; 3) 17-18 years; 4) 19-20 years; 5) 21-24 years; 6) 25 years and over.

III) Household ownership of selected durable is based on ownership in terms of number of products owned (D.14): a colour TV set - a video recorder - a video camera - a radio-clock - a PC/home computer - a still camera - an electric drill - an electric deep fat fryer - two or more cars - a second home or a holiday home/flat.

The combination of these input variables results in a new social grade classification with, as categories (upper to lower): A B C D E1

E2 E3. For more details see standard report EUROBAROMETER 40, December 1993, Brussels, A92 f.

Note:

SCALE on the basis of all active and non-active main income earners as constructed by the original investigator.
