Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into four sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. The last section contains the 'Variable Documentation': the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zocat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

GESIS, Cologne [Publisher]: ZA2348, dataset version 1.0.1, doi:10.4232/1.10907.

1.2 Content

1.2.1 Abstract

This collection presents responses to a set of nonstandard Eurobarometer questions asked in both EURO-BAROMETER 39.0: EUROPEAN COMMUNITY POLICIES AND FAMILY LIFE, MARCH-APRIL 1993 (ICPSR 6195) and EURO-BAROMETER 39.1: ENERGY POLICIES, BIOTECHNOLOGY, AND GENETIC ENGINEERING, MAY-JUNE 1993 (ICPSR 6196).

The major focus of this collection is health and safety in the workplace. A subset of respondents from each survey were queried on their awareness of and involvement in health and safety issues at work, as well as where their knowledge of workplace health and safety was gained, ways to reduce the number of accidents at work, areas in which the European Community (EC) should do more to improve health and safety, and the degree of action the EC should take to guarantee health, safety, and hygiene in the workplace.

Respondents were also asked about their knowledge of the European flag and the European Year logo, the main business activity where they worked, the number of hours they worked weekly, political party attachment, and trade union membership.

Demographic characteristics collected include gender, age, marital status, religious affiliation and practice, subjective membership in social class, education, home ownership, family size, occupation, subjective size of community, and nationality. Selected standard Eurobarometer constructed variables and indices are also included.

1.2.2 Topic classification

- International Institutions, Relations
- Medicine
- Work and Industry

1.2.3 Related publications

- Kommission der Europäischen Gemeinschaften: Die Meinungen der Europäer nach Abschluß des Europäischen Jahres für Sicherheit und Gesundheitsschutz am Arbeitsplatz (Opinions of the Europeans following the European Year of Safety, Hygiene and Health Protection at Work). Luxemburg, 1993 (also available in French).

1.3 Universe

The samples of Eurobarometer 39.A are designed to be representative for the national population aged 15 years and over of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland) and in Germany (West and East Germany). By merging responses from a subset of questions (A.1 to A.10 on "Health and Safety at Work") asked in Eurobarometer 39.0 with responses to identical questions asked in Eurobarometer 39.1, a new data set, Eurobarometer 39.A (n=26,141), was created. For targeting the analysis on ACTIVE (currently

employed) respondents only, special weighting factors are provided.

1.4 Sampling procedure

The basic sample design applied in all Member States is a multi-stage, random (probability) one. In each EC country a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

Sampling points were drawn systematically from all "administrative regional units" after stratification by individual unit and type of area. They thus represent the whole territory of the Member States according to the EUROSTAT-NUTS II and according to the distribution of the national, resident Population in terms of metropolitan, urban, and rural areas. In each of the selected sampling points a starting address was drawn at random. Further addresses were selected as every Nth address by standard random route procedures. In each household the respondent was drawn at random.

The effective number of realized interviews from both surveys, EB 39.0 and 39.1, is indicated in table 1.

1.5 Fieldwork

Between March 13, and June 5, 1993, INRA (EUROPE), a European network of market and public opinion research agencies, carried out waves 39.0 (March 16, through April 16, 1993) and 39.1 (May 10, through June 5, 1993) of the Standard Eurobarometer, on request of the Commission of the European Communities.

1.6 Mode of data collection

All interviews were face-to-face in people's homes and in the appropriate national language.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European

Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 39A provides four (post-stratification) NATION WEIGHTS for the EU member countries: WEIGHT RESULT FROM TARGET (NATION WEIGHT IIa) and WEIGHT ADJUSTED TO STANDARD SIZE (NATION WEIGHT IIb) for separate analysis or comparison of individual samples (countries or regions on sub-national level), WEIGHT SPECIAL UNITED KINGDOM (NATION WEIGHT I adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole and WEIGHT SPECIAL GERMANY (NATION WEIGHT III adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

In addition seven "SPECIAL ACTIVE" weight variables (WEIGHT_A) are provided by INRA (Europe). ICPSR analysis of these variables indicates that they have been calculated to be applied to the "ACTIVE POPULATION" subsample of respondents (codes 5-18 for V86, n=12.804) and should be used in the same manner as would the corresponding Standard Eurobarometer weight variables. For each country a comparison between the sample and the proper universe description was carried out. This Universe description was derived from the Labour Force Survey, 1988.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ICPSR from INRA (Europe) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. When possible, indices and other derived summary variables were also checked and corrected as necessary. The indices supplied with this Eurobarometer include C.1, C.2, C.3, C.4, C.5, C.6, C.11, C.12, C.12_1, C.12_2 and C.14. All indices were checked and verified with the exception of C.5, C.12, C.12_1 and C.12_2 which are provided as supplied by the data producer. Specific information for verification of these four indices was not provided. Complete machine-readable documentation was also created for this dataset by ICPSR.

ICPSR has either added "<NA>" codes to indicate responses that had no code values in the original data (system missing values) or recoded variables to the "<NA>" value if the variable had been inappropriately coded. Illegal (wild) codes which ICPSR has been unable to document have been labeled as "<Undocumented Code>" where they appear in this codebook. Users should also note that on occasion the number of responses to a particular question may exceed the maximum indicated in the interviewer instructions.

Question text and contingency text appearing in this codebook and ICPSR's machine-readable documentation is taken from INRA (Europe)'s English language version of the questionnaire. Whenever a discrepancy occurs between INRA (Europe)'s codebook and its English language questionnaire as to the coding scheme of a variable, the former is followed in the ICPSR documentation.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOENTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category	Party Family
0	(001-099) not affiliated / electoral alliances across "families"
1	(100-199) Communists
2	(200-299) Socialists
3	(300-399) Liberals
4	(400-499) Christian Democrats
5	(500-599) Conservatives
6	(600-699) Extreme Rights / Nationalists
7	(700-799) Regionalists / Ethnic
8	(800-899) Environmental parties
9	(900-949) Agricultural parties
9	(950-989) other special issue parties (e.g. Eurosceptics) and independents
	990 other (spontaneous)
	994 not voting age
	995 empty ballot (blank) or invalid vote
	996 not voted / would not vote
	997 Refused
	998 DK / DK+NA if NA not coded separately
	999 INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																								
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																								

5 Variable Documentation

Variable	Label
	Question Text (English Language)
v1	ARCHIVE STUDY ID - PRODUCER PRODUCER STUDY NUMBER (ICPSR)

6194 As producer, the ICPSR has attached this as a unique data collection identification number.

v1

Value	Label	Missing	Count	Percent	Valid Percent
6194			26141	100.0	100.0
	Sum		26141	100.0	100.0
	Valid Cases		26141		

v2 ARCHIVE STUDY ID - DISTRIBUTOR
DISTRIBUTOR STUDY NUMBER (ZA)

2348 Distributor data collection identification number - attached by ZA

v2

Value	Label	Missing	Count	Percent	Valid Percent
2348			26141	100.0	100.0
	Sum		26141	100.0	100.0
	Valid Cases		26141		

v3 EDITION NUMBER
ICPSR EDITION NUMBER

The number identifying the release edition of this dataset.

2 Second ICPSR Edition -- September 2001
release as of April 12, 2007

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
2	2nd ICPSR Edition - release as of April 12, 2007		26141	100.0	100.0
	Sum		26141	100.0	100.0
	Valid Cases		26141		

version GESIS ARCHIVE VERSION
VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version					
Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			26141	100.0	100.0
	Sum		26141	100.0	100.0
	Valid Cases		26141		

v4 ICPSR PART NUMBER
ICPSR PART NUMBER

The number identifying this part of a 1-part study.

1 Part one of a one-part study

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	Part one		26141	100.0	100.0
	Sum		26141	100.0	100.0
	Valid Cases		26141		

v5 ID SERIAL NUMBER (ICPSR CASE ID)

ICPSR CASE ID

Sequential respondent identification number assigned by ICPSR.

A unique identification number is assigned to each respondent.

Note:

Actual number is coded

isocntry NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)
 NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

isocntry					
Value	Label	Missing	Count	Percent	Valid Percent

v6 NATION I (UNITED KINGDOM)

Nation of interview

This variable identifies the E.C. nation in which the respondent was interviewed. A unique numeric code is assigned to each of the 13 E.C. countries.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 West Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 East Germany

v6

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		2023	7.7	7.7

	Sum		26141	100.0	100.0
	Valid Cases		26141		

v7 WEIGHT SPECIAL UNITED KINGDOM
W2: WEIGHT SPECIAL UNITED KINGDOM

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All nation weights are included.

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31, this weight adjusts all samples to the standard size.

v8 NATION II (GB AND NORTHERN IRELAND)
NATION II (GB AND NORTHERN IRELAND)

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East

v8

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		2023	7.7	7.7
2	BELGIUM		2056	7.9	7.9
3	NETHERLANDS		2009	7.7	7.7
4	WEST GERMANY		2063	7.9	7.9
5	ITALY		2063	7.9	7.9
6	LUXEMBOURG		1013	3.9	3.9
7	DENMARK		2000	7.7	7.7

14	EAST GERMANY		2127	8.1	8.1
	Sum		26141	100.0	100.0
	Valid Cases		26141		

v9 WEIGHT RESULT FROM TARGET
W3: WEIGHT RESULT FROM TARGET

This weight variable adjusts all samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples.

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31A

v10 WEIGHT ADJUSTED TO STANDARD SIZE
W4: WEIGHT ADJUSTED TO STANDARD SIZE

This weight variable corresponds to "WEIGHT RESULT FROM TARGET" adjusting all samples to the standard size of 2000 cases for France, Belgium, the Netherlands, West Germany, Italy, Denmark, Ireland, Great Britain, Greece, Spain, Portugal, and East Germany, 600 cases for Northern Ireland, and 1000 for Luxembourg. Great Britain and Northern Ireland are weighted as independent samples.

v11 NATION III (UNITED GERMANY)
NATION III (UNITED GERMANY)

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal

v11

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		2023	7.7	7.7
2	BELGIUM		2056	7.9	7.9
3	NETHERLANDS		2009	7.7	7.7
4	GERMANY		4190	16.0	16.0
5	ITALY		2063	7.9	7.9
6	LUXEMBOURG		1013	3.9	3.9
7	DENMARK		2000	7.7	7.7
8	IRELAND		2009	7.7	7.7
9	GREAT BRITAIN		2139	8.2	8.2
10	NORTHERN IRELAND		614	2.3	2.3
11	GREECE		2003	7.7	7.7
12	SPAIN		2022	7.7	7.7
13	PORTUGAL		2000	7.7	7.7
	Sum		26141	100.0	100.0
	Valid Cases		26141		

v12	WEIGHT SPECIAL GERMANY
	W1: WEIGHT SPECIAL GERMANY

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size.

v13 WEIGHT EURO 6
W5: WEIGHT EURO 6

This weight variable adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition.

This weight includes the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy, and Luxembourg) and includes national weighting for each sample adjusted to the standard size.

v14 WEIGHT EURO 10
W7: WEIGHT EURO 10

This weight variable adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition.

This weight variable excludes Spain, Portugal and East Germany and includes national weights for each sample with adjustment to the standard size.

v15 WEIGHT EURO 12
W8: WEIGHT EUROPE 12

This weight variable adjusts each national sample in proportion to its nation's share in the total population of all the European Community countries in their historic composition.

This weight variable excludes East Germany and includes national weights for each sample with adjustment to the standard size.

v16 WEIGHT EUROPE 12+
W9: WEIGHT EURO 12 +

This weight variable adjusts each national sample in proportion to its nation's share in the total population of all the European Community countries in their historic composition.

This weight variable is the same as WEIGHT EUROPE 12 but includes East Germany as well as national weights for each sample with adjustment to the standard size.

v17 WEIGHT_A SPECIAL GERMANY
W1A: WEIGHT SPECIAL GERMANY - SPECIAL ACTIVE

No INRA(Europe) documentation included. Caution should be exercised when applying this weight.

ICPSR analysis of this variable indicates that it applies only to the "ACTIVE" (currently working) sub-sample of respondents from this dataset and adjusts the East and West German samples to their respective proportions in the united Germany.

v18 WEIGHT_A ADJUSTED TO STANDARD SIZE

W2A: WEIGHT ADJUSTED TO STANDARD SIZE - SPECIAL ACTIVE

No INRA(Europe) documentation included. Caution should be exercised when applying this weight.

ICPSR analysis of this variable indicates that it applies only to the "ACTIVE" (currently working) sub-sample of respondents from this dataset and adjusts all samples to the standard size of 1000 (28 Northern Ireland and 500 Luxembourg) cases.

v19 WEIGHT_A RESULT FROM TARGET

W3A: WEIGHT RESULT FROM TARGET - SPECIAL ACTIVE

No INRA(Europe) documentation included. Caution should be exercised when applying this weight.

ICPSR analysis of this variable indicates that it applies only to the "ACTIVE" (currently working) sub-sample of respondents from this dataset and adjusts all samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain, Northern Ireland, East Germany and West Germany are treated as independent samples.

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31A.

v20	WEIGHT_A EURO 6
	W5A: WEIGHT EURO 6 - SPECIAL ACTIVE

No INRA(Europe) documentation included. Caution should be exercised when applying this weight.

ICPSR analysis of this variable indicates that it applies only to the "ACTIVE" (currently working) sub-sample of respondents from this dataset and adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition.

This weight includes the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy, and Luxembourg) and includes national weighting for each sample adjusted to the standard size.

v21	WEIGHT_A EURO 10
	W6A: WEIGHT EURO 10 - SPECIAL ACTIVE

No INRA(Europe) documentation included. Caution should be exercised when applying this weight.

ICPSR analysis of this variable indicates that it applies only to the "ACTIVE" (currently working) sub-sample of respondents from this dataset and adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition.

This weight variable excludes Spain, Portugal and East Germany and includes national weights for each sample with adjustment to the standard size.

v22	WEIGHT_A EURO 12
	W7A: WEIGHT EURO 12 - SPECIAL ACTIVE

No INRA(Europe) documentation included. Caution should be exercised when applying this weight.

ICPSR analysis of this variable indicates that it applies only to the "ACTIVE" (currently working) sub-sample of respondents from this dataset and adjusts each national sample in proportion to its nation's share in the total population of all the European Community countries in their historic composition.

This weight variable excludes East Germany and includes national weights for each sample with adjustment to the standard size.

v23	WEIGHT_A EURO 12+
	W8A: WEIGHT EURO 12 PLUS - SPECIAL ACTIVE

No INRA(Europe) documentation included. Caution should be exercised when applying this weight.

ICPSR analysis of this variable indicates that it applies only to the "ACTIVE" (currently working) sub-sample of respondents from this dataset and adjusts each national sample in proportion to its nation's share in the total population of all the European Community countries in their historic composition.

This weight variable is the same as WEIGHT EUROPE 12 but includes East Germany as well as national weights for each sample with adjustment to the standard size.

v60 A10 EC ACTION ON H&S AT WORK - OPINION

A.10

Which of the following come closest to your personal opinion?

(SHOW CARD)

A. The European Commity should take all necessary actions to guarantee health, safety and hygiene at work.

B. No actions at all, concerning their matters, should be taken at the European Community level.

If you fully agree with the opinion on the left hand side, you give a score of 1. If you fully agree with the opinion on the right hand side, you give a score of 10. The scores in between allow you to say how close to either side you are.

v62 D1R LEFT-RIGHT PLACEMENT - HARMONIZED

D.1R Left-right scale - harmonised

- 1 Left
- 2 Center
- 3 Right
- 4 DK/Refusal

Derivation:

This variable collapses responses to D.1 into four categories: left, center, right, and DK/Refusal.

CODE 1: Italy and Spain coded 01 to 03 for D.1; France, Belgium, Netherlands, West Germany, Luxembourg, Denmark, Ireland, Great Britain, Northern Ireland, Greece, Portugal and East Germany coded 01 to 04 for D.1.

CODE 2: Italy and Spain coded 04 to 05 for D.1; Luxembourg, Ireland, Great Britain, Northern Ireland, Greece, Portugal and East Germany coded 05 for D.1; Netherlands, West Germany, and Denmark coded 05 to 06 for D.1; France and Belgium coded 05 for EB 39.0 D.1, coded 05 to 06 for EB 39.1 D.1.

CODE 3: France, Belgium, Italy, Luxembourg, Ireland, Great Britain, Northern Ireland, Greece, Spain, Portugal and East Germany coded 06 to 10 for D.1; Netherlands, West Germany and Denmark coded 07 to 10 for D.1.

CODE 4: France, Belgium, Netherlands, West Germany, Italy, Luxembourg, Denmark, Ireland, Great Britain, Northern Ireland, Greece, Spain, Portugal and East Germany coded 97, 98 for D.1.

Note:

See D.1 for complete question text

v69 D9A GENERAL EDUCATION - MONTHS

D.9

Since stopping full-time education, have you...

(READ OUT)

(IF NO: CODE 00)

D.9a

...resumed general education at all?

(IF YES)

For how many months?

0 NA

998 No

999 INAP 98 IN V67

Note:

Actual number of months is coded.

ICPSR RECODE: Original code "00" recoded to "998"

Last trend: EB37.0 D.9

v70 D9B PROFESSIONAL EDUCATION - MONTHS

D.9

Since stopping full-time education, have you...

(READ OUT)

(IF NO: CODE 00)

D.9b

... taken apprenticeship or professional training for your job?

(IF YES)

For how many months?

0 NA

998 No

999 INAP 98 IN V67

Note:

Actual number of months is coded.

ICPSR RECODE: Original code "00" recoded to "998"

Last trend: EB37.0 D.9

v71 D10 SEX
D.10 SEX

- 1 Male
- 2 Female

v106 D29C INCOME HH QUANTILES

D.29C Household income - approximate quartiles

We also need some information about the income of this household to be able to analyze the survey results for different types of households. Here is a list of income groups. (SHOW INCOME CARD) Please count the total wages and salaries PER MONTH of all members of this household; all pensions and social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

- 1 ++ (Highest income quartile)
- 2 + (Next to highest income quartile)
- 3 - (Next to lowest income quartile)
- 4 -- (Lowest income quartile)
- 5 DK/Refusal

v109 C1 OPINION LEADERSHIP INDEX
C.1 OPINION LEADERSHIP INDEX (Cognitive Mobilization Index)

- 0 NA
- 1 ++ High Cognitive Mobilization
- 2 + Medium-high Cognitive Mobilization
- 3 - Medium-low Cognitive Mobilization
- 4 -- Low Cognitive Mobilization

Derivation:

This index is based on responses to the following two questions.

- 1) "When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? Does this happen often, from time to time, rarely, or never?" (Q4/V22 in EB39.0 and Q2/V18 in EB39.1)
- 2) "When you get together with friends, would you say you discuss political matters frequently, occasionally or never?" (Q5/V23 in EB39.0 and Q3/V19 in EB39.1)

Respondents giving affirmative answers to both questions are labeled + +. Respondents giving negative answers to both questions are labeled - -. Middle categories (+ and -) are constituted correspondingly.

CODE 0: coded 0 or 5 for Q.4/Q.2 and 0 or 4 for Q.5/Q.3

CODE 1: Coded 1 or 2 for Q.4/Q.2 and 1 for Q.5/Q.3

CODE 2: Coded 3, 4, 5 or 0 for Q.4/Q.2 and 1 for Q.5/Q.3; or coded 1 or 2 for Q.4/Q.2 and 2 for Q.5/Q.3

CODE 3: Coded 3, 4, 5 or 0 for Q.4/Q.2 and 2 for Q.5/Q.3; or coded 1 or 2 for Q.4/Q.2 and 3, 4 or 0 for Q.5/Q.3

CODE 4: Coded 3, 4, 5 or 0 for Q.4/Q.2 and 3, 4 or 0 for Q.5

This variable forms an indicator of an individual's potential to take an active role in the political process.

For a complete discussion of this variable and its correlates see Ronald Inglehart, THE SILENT

REVOLUTION:

CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977).

v110 C2 VALUE ORIENTATION POST-MATERIALISM
C.2 VALUE ORIENTATION (Materialist/Post-materialist Values Index)

- 1 Materialist
- 2 Post materialist
- 3 Mixed

Derivation:

This index is based on responses to the following question:

"There is a lot of talk these days about what (OUR COUNTRY)'S goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority. Would you please say which one of them you yourself consider to be most important in the long run? (SHOW CARD ** - ONE ANSWER ONLY) And what would be your second choice?"

- (1) Maintaining order in the nation;
- (2) Giving the people more say in important government decisions;
- (3) Fighting rising prices;
- (4) Protecting Freedom of speech.

(Q.6./V24-V25 in EB39.0 and Q.4./V20-V21 in EB39.1)

Respondents combining items (1) and (3) are labeled "materialist." Respondents combining items (2) and (4) are labeled "post-materialist". Others are labeled "mixed".

CODE 1: Coded 1 for Q.6.1/Q.4.1 and 3 for Q.6.2/Q.4.2; or coded 3 for Q.6.1/Q.4.1 and 1 for Q.6.2/Q.4.2

CODE 2: Coded 2 for Q.6.1/Q.4.1 and 4 for Q.6.2/Q.4.2; or coded 4 for Q.6.1/Q.4.1 and 2 for Q.6.2/Q.4.2

CODE 3: Coded 1 or 3 for Q.6.1/Q.4.1 and 2 or 4 for Q.6.2/Q.4.2; or coded 2 or 4 for Q.6.1/Q.4.1 and 1 or 3 for Q.6.2/Q.4.2; coded 0 or 5 for one of Q.6.1/Q.4.1 or Q.6.2/Q.4.2; or coded the same value in both Q.6.1/Q.4.1 and Q.6.2/Q.4.2

For a complete discussion of this variable, see Ronald Inglehart, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977).

v111 C3 TYPOLOGY OF EUROPEAN ATTITUDES

C.3 TYPOLOGY OF EUROPEAN ATTITUDES (TEA)

- 1 Positive
- 2 Ambivalent
- 3 Negative
- 9 INAP

Derivation:

Typology of European Attitudes is based on responses to the following two questions:

- 1) "In general, are you for or against efforts being made to unify Europe? Are you...? For - very much; For - to some extent; Against - to some extent; Against - very much?" (UNIFICATION) (Q.15./V103 in EB39.0; not asked in EB39.1)
- 2) "Generally speaking, do you think that (our country's) membership of the European Union is...? A good thing; A bad thing; Neither good nor bad?" (MEMBERSHIP) (Q.16./V104 in EB39.0; not asked in EB39.1)

Positive Attitude: MEMEBERSHIP=Good + UNIFICATION=For...

Ambivalent Attitude: MEMEBERSHIP=Neither good nor bad, or MEMBERSHIP=Good + UNIFICATION=Against..., or MEMBERSHIP=Bad + UNIFICATION=For..., or DK/NA

Negative Attitude: MEMEBERSHIP=Bad + UNIFICATION=Against...

CODE 1: Coded 1 for Q.16 and 1 or 2 for Q.15

v112 C4 SOCIO PROF STATUS (OCCUP RECODE)
C.4 SOCIO PROFESSIONAL STATUS

- 0 NA
- 1 Farmer & fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position, not at a desk but traveling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on a (non-Marxist) concept of "objective social class" using the occupation of the "person who contributes most to the household income" as reference.

In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called: "SOCIO PROFESSIONAL STATUS". For those in paid work it is based on their own present occupation. For those not in paid work, "former occupation" was used where applicable (retired, housewives having been in paid work in the past, temporarily not working, unemployed). For those never having been in paid work the occupation of the "person who contributes most to the household income" was used. If the head of household was not in work at the time of the interview his or her "former occupation" was used, where applicable.

SOCIO PROFESSIONAL STATUS is, consequently, a classification "as close to the respondent himself/herself as possible" but draws upon additional background information, to the extent necessary and available, in order to avoid a single measure of respondent socio-professional setting and to include the maximum number of respondents in the respective analyses.

v113 C5 EUROPEAN POLITICAL PARTY PREFERENCE
C.5 EUROPEAN POLITICAL PARTY PREFERENCE

- 0 NA
- 1 (S) Socialists
- 2 (PPE) Christian Democrats
- 3 (LDR) Liberals
- 4 (V) Greens
- 5 (RDE) Gaullist/FF (IRL)
- 6 (DR) Euroright
- 7 (CG) (Comm.) Left Unity
- 8 (ARC) Rainbow Group
- 9 (NI) Non-Attached
- 10 Other Party
- 11 Other
- 99 INAP 1 IN V108

Derivation:

This index is based upon the vote intention question D.4: "If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?" Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group that their party had previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labeled N.I. Supporters of parties not represented in the European Parliament are labeled "other". Labels are presented in the order in which they occur in the "List of Members" of the European Parliament of October 1989.

v114 C6 COMMITMENT TO THE COMMON MARKET
C.6 SUPPORT FOR THE EUROPEAN COMMUNITY INDEX

Commitment To The Common Market

- 1 Strong Opposition
- 2 Moderate Opposition
- 3 Neutral Position
- 4 Moderate Support
- 5 Strong support
- 9 INAP

Derivation:

This index is constructed from responses to the following two questions:

1) "Generally speaking, do you think that (OUR COUNTRY'S) membership of the European Community (Common Market) is... ? A good thing; A bad thing; or Neither good nor bad?" (Q.16./V104 in EB39.0; not asked in EB39.1)

2) "If you were told tomorrow that the European Community (Common Market) had been scrapped, would you be very sorry about it, indifferent or very relieved?" (Q.18./V106 in EB39.0; not asked in EB39.1)

CODE 1: Coded 2 for Q.16 and 3 for Q.18

CODE 2: Coded 2 for Q.16 and 2, 4 or 0 for Q.18; or 3, 4 or 0 for Q.16 and 3 for Q.18

CODE 3: Coded 3, 4 or 0 for Q.16 and 2 for Q.18; or 3 for Q.16 and 2, 4, or 0 for Q.18; or 1 for Q.16 and 3 for Q.18; or 2 for Q.16 and 1 for Q.18; or 0 or 4 for Q.16 and 0 or 4 for Q.18

CODE 4: Coded 1 for Q.16 and 2, 4 or 0 for Q.18; or 3, 4 or 0 for Q.16 and 1 for Q.18

CODE 5: Coded 1 for Q.16 and 1 for Q.18

CODE 9: Coded 1 in V108

v115 C11 MEDIA USE
C.11 MEDIA USE

News on TV, Radio and Papers

0 NA
1 +++
2 ++
3 --
4 ---

Derivation:

This index is based upon responses to the question, "About how often do you watch the news in television, read the news in the daily paper, and listen to the news broadcasts on the radio?" (Q.7/V26-V28 in EB 39.0 and Q.5/V22-V24 in EB 39.1)

It combines the answers in the following way:

+++ News on TV, radio and papers every day or several times a week; ++ Two media every day or several times a week, the third medium not more than once or twice a week; -- One of the three media every or several times a week, the two others not more than once or twice a week; --- The three media less than once or twice a week.

CODE 0: Coded 0 or 6 for V26/V22 or V27/V23 or V28/V24

CODE 1: Coded 1 or 2 for Q.7/Q.5

CODE 2: Coded 1 or 2 for two of these variables and 3, 4 or 5 for the third

CODE 3: Coded 1 or 2 for one of these variables and 3, 4 or 5 for the two other

CODE 4: Coded 3, 4 or 5 for Q.7/Q.5

v116 C12 EUROPEAN SOCIAL GRADE(ESOMAR) -MIE
C.12 European Social Grade (ESOMAR 7-point scale)

- 0 NA/INAP
- 1 A
- 2 B
- 3 C
- 4 D
- 5 E1
- 6 E2
- 7 E3

Derivation:

This scale is based on the recommendation of the European Society for Opinion and Marketing Research (ESOMAR) to harmonize the measurement of social grade across borders.

This approach uses three different types of input variables:

I) Occupation of the main income earner (MIE) is based on a classification into 16 groups (E1 to E16) of the occupation of the Main Income Earner:

- E1 General management, director or top management (6 employees or more)
- E2 Self employed professional
- E3 Employed professional
- E4 General management, director or top management (5 employees or less)
- E5 Middle management, other management (6 employees or more)
- E6 Middle management, other management (5 employees or less)
- E7 Business proprietors, owner (full/partner) of company and owner of a shop, craftsmen, other self employed (6 employees or more)
- E8 Employed position, working mainly at a desk
- E9 Business proprietors, owner (full/partner) of company (5 employees or less)
- E10 Student
- E11 Employed position, not at a desk but traveling or in a service job
- E12 Farmer and fisherman
- E13 Responsible for ordinary shopping and looking after the home, housewife
- E14 Supervisor and skilled manual worker
- E15 Other (unskilled) manual worker, servant
- E16 Retired or unable to work through illness, unemployed or temporarily not working

II) The education level of the main income earner (MIE) is based on a classification into 6 groups of education level (adjusting the finishing age of general education in accordance with extra general education or specific apprenticeship and/or professional training): 1) up to 14 years; 2) 15-16 years; 3) 17-18 years; 4) 19-20 years; 5) 21-24 years; 6) 25 years and over.

III) Household ownership of selected durables is based on ownership in terms of number of products owned (D.14): a colour TV set, a video recorder, a video camera, a radio-clock, a PC/home computer, a still camera, an electric

drill, an electric deep fat fryer, two or more cars, and a second home or a holiday home/flat.

The combination of these input variables results in a new social grade classification with, as categories (upper to lower): A B C D E1 E2 E3.

SCALED on the basis of all active and non-active main income earners as constructed by the original investigator.
