## Acknowledgements

---

Standard & Special Eurobarometer surveys are conducted on behalf of the Commission of the European Communities, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

# 1 Study Description – Eurobarometer 38.1

---

## 1.1 Bibliographic information

### 1.1.1 Archive study numbers

GESIS: ZA2295

ICPSR: 6045

Under a co-operative arrangement for the archival processing and distribution of Standard & Special Eurobarometer, ICPSR and GESIS employ its own study number to identify each – otherwise congruent – dataset.

### 1.1.2 Title and archive subtitle

Eurobarometer 38.1

GESIS, Cologne [Publisher]: ZA2295, dataset version 1.0.1, doi:10.4232/1.10904.

## 1.2 Content

### 1.2.1 Abstract

This round of Eurobarometer surveys focused on the role that consumer, science, and entertainment issues play in the lives of residents of the European Community. Respondents were asked to describe their television viewing habits and to comment on whether they watched programs broadcast by satellite, their interest in a 24-hour European news channel, and their receptivity to purchasing and using HDTV (high definition television) technology. Participants in this Eurobarometer were also asked a series of questions on consumer protection issues. They reported on topics such as recent European Community initiatives on product safety, labelling, and consumer credit; the problems they experienced as consumers over the last twelve months; what action they took if they wished to lodge a formal complaint; where they would turn for information on purchasing/selling products directly; their opinions regarding the uniformity of consumer protection policies across the Community; their level of satisfaction with current practices on the packaging and labelling of foodstuffs; and their knowledge of preservatives, additives, and colourings used in food products. Respondents also described their recent travel experiences, their use of products and services while travelling, and their opinions regarding the level of safety of these products and services when compared to those found in their own countries. Other questions focused on recent issues in the news of interest to respondents and which professions they respected the most. A final battery of questions probed attitudes toward science and technology issues: how informed respondents were in general, the sources of their information; recent visits to zoos, museums, and cultural institutions; opinions as to which subjects were 'scientific' and which were not; and knowledge of scientific methods of investigation and the importance of science and technology in their lives. Finally, they were asked about the role the European Community plays in scientific research and how effective Community countries were in the promotion of science and technologies when compared with Japan and the United States.

As in previous Eurobarometers, information was gathered on family income, number of people residing in the home, size of locality, region of residence, occupation of the head of household, and the respondent's age, sex, education, religion, subject social class standing, socio-professional status, and left-right political self-placement.

### 1.2.2 Topic classification

- International Institutions, Relations
- Patterns of Consumption
- Technology
- University, Research, the Sciences

### 1.2.3 Related publications

- Commission of the European Communities: Europeans, Science and Technology - Public Understanding and Attitudes. Brussels, June 1993.

### 1.3 Universe

The samples of Eurobarometer 38.1 are designed to be representative for the national population aged 15 years and over of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland) and in Germany (West and East Germany).

### 1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random.

In some countries, such as Great Britain, Republic of Ireland and Luxembourg, respondents were randomly selected from electoral registers. In each household, a respondent was selected by a random procedure, such as the first birthday method or the KISH grid method. Up to two recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes. The effective number of realized interviews in this round is indicated in table 1.

### 1.5 Fieldwork

From November 2 to November 30, 1992, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the 'Survey, Research, Analysis' Unit of the Directorate General X, 'Information, Communication and Culture', of the Commission of the European Communities. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R. Vandendriessche 18, B-1150 Brussels.

## 1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

## 1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be

adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

**Eurobarometer 38.1** provides four (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) and NATION WEIGHT IIb (WEIGHT ADJUSTED TO STANDARD SIZE) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, NATION WEIGHT III (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. NATION WEIGHT IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM) combines NATION WEIGHT I and NATION WEIGHT III. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Five variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, REGION II, AGE RECODED, and AGE EDUCATION RECODED. Users should be aware that ZA's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific coding is provided by INRA in other languages than English, ZA documents the original language or field questionnaire version and supplies the English translation in brackets.

In Eurobarometer 38.1 a split ballot (V405) was introduced to check alternative wording for questions Q.58, Q.60, Q.62 and Q.66. Results of these questions should always be analysed according to the split ballot.

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss

Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

		Switzerland	CH	1000	standard and selected topical modules (EFTA)
		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

## 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

## 5 Variable Documentation

## **5 Variable Documentation**

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER

ZA/ICPSR Study Number

Respective study number of the involved archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
2295			13024	100.0	100.0
	Sum		13024	100.0	100.0
	Valid Cases		13024		

#### v2 - EDITION NUMBER

ZA/ICPSR Edition Number

The number identifying the release edition of this dataset.

- 1 Early release version
- 2 1st codebook edition

#### Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

#### v2

Value	Label	Missing	Count	Percent	Valid Percent
1	PRE-RELEASE EDITION		13024	100.0	100.0
	Sum		13024	100.0	100.0
	Valid Cases		13024		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			13024	100.0	100.0
	Sum		13024	100.0	100.0
	Valid Cases		13024		

v3 - PART NUMBER

ZA/ICPSR Part Number

The number identifying this part of a 1-part study.

1 Eurobarometer 38.1

v3

Value	Label	Missing	Count	Percent	Valid Percent
1			13024	100.0	100.0
	Sum		13024	100.0	100.0
	Valid Cases		13024		

v4 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

isocntry

Value	Label	Missing	Count	Percent	Valid Percent
BE			1043	8.0	8.0

	Sum		13024	100.0	100.0
	Valid Cases		13024		

## v5 - NATION I (UNITED KINGDOM)

Nation of interview I

Twelve EC countries including separate samples for East and West Germany

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany - West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany - East

v5

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1008	7.7	7.7
2	BELGIUM		1043	8.0	8.0
3	NETHERLANDS		1022	7.8	7.8
4	WEST GERMANY		1018	7.8	7.8
5	ITALY		1021	7.8	7.8
6	LUXEMBOURG		500	3.8	3.8
7	DENMARK		1000	7.7	7.7
8	IRELAND		1000	7.7	7.7
9	UNITED KINGDOM		1374	10.5	10.5
10	GREECE		1003	7.7	7.7
11	SPAIN		1021	7.8	7.8
12	PORTUGAL		1000	7.7	7.7
13	EAST GERMANY		1014	7.8	7.8
	Sum		13024	100.0	100.0
	Valid Cases		13024		

v6 - WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights (Nation Weight II) are included.

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31 this weight adjusts all samples to the standard size.

## v7 - NATION II (GB AND NORTHERN IRELAND)

## Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany - West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany - East

## v7

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1008	7.7	7.7
2	BELGIUM		1043	8.0	8.0
3	NETHERLANDS		1022	7.8	7.8
4	WEST GERMANY		1018	7.8	7.8
5	ITALY		1021	7.8	7.8
6	LUXEMBOURG		500	3.8	3.8
7	DENMARK		1000	7.7	7.7
8	IRELAND		1000	7.7	7.7
9	GREAT BRITAIN		1066	8.2	8.2
10	NORTHERN IRELAND		308	2.4	2.4
11	GREECE		1003	7.7	7.7
12	SPAIN		1021	7.8	7.8
13	PORTUGAL		1000	7.7	7.7
14	EAST GERMANY		1014	7.8	7.8
	Sum		13024	100.0	100.0
	Valid Cases		13024		

v8 - WEIGHT RESULT FROM TARGET

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples.

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.

v9 - WEIGHT ADJUSTED TO STANDARD SIZE

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg) cases. Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples.

## v10 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal

v10

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1008	7.7	7.7
2	BELGIUM		1043	8.0	8.0
3	NETHERLANDS		1022	7.8	7.8
4	GERMANY EAST+WEST		2032	15.6	15.6
5	ITALY		1021	7.8	7.8
6	LUXEMBOURG		500	3.8	3.8
7	DENMARK		1000	7.7	7.7
8	IRELAND		1000	7.7	7.7
9	GREAT BRITAIN		1066	8.2	8.2
10	NORTHERN IRELAND		308	2.4	2.4
11	GREECE		1003	7.7	7.7
12	SPAIN		1021	7.8	7.8
13	PORTUGAL		1000	7.7	7.7
	Sum		13024	100.0	100.0
	Valid Cases		13024		

v11 - WEIGHT SPECIAL GERMANY

Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size.

v12 - WEIGHT EURO 6

European Weight I (WEIGHT EURO 6)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy and Luxembourg).

This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v13 - WEIGHT EURO 10

European Weight II (WEIGHT EURO 10)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 excludes East Germany, Spain and Portugal. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v14 - WEIGHT EURO 12

European Weight III (WEIGHT EURO 12)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 excludes East Germany (weighted by "zero"). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v15 - WEIGHT EUROPE 12 +

European Weight IV (WEIGHT EUROPE 12 +)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included.

Unlike the "European Weight" in earlier Eurobarometer up to 31 this weight contains the adjustment to the standard size.

## v16 - Q1 ELECTORAL REGISTER

Q.1

Are you ...(NATIONALITY) ?

(IF YES)

Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under your present address, at another address or does not appear at all?

(IF CODE 5: CLOSE INTERVIEW)

- 1 At present address
- 2 At another address
- 3 Don't know if registered
- 4 Does not appear at all
- 5 Is not ... (NATIONALITY)

Note:

Last trend: EB37.0 Q.1

## v33 - Q16 EC PRESIDENCY UK - HEARD ABOUT

## Q.16

## QUESTIONS 16 AND 17 ONLY ASKED IN THE UNITED KINGDOM

In the European Community, each member State, in turn, becomes the President of the Council of Ministers for six months. Just now, it's the turn of United Kingdom. Have you recently read in the newspapers or heard in radio or television anything about the British presidency?

- 1 Yes
- 2 No
- 3 DK
- 9 Inap., only interviewed in Great Britain and Northern Ireland (not coded 9 in V5)

Note:

Last trend: EB38.0 Q.24

v33, weighted by v6

Value	Label	Missing	Count	Percent	Valid Percent
1	YES		643	5.0	51.6

## v47 - Q20 EUROPEAN ECONOMIC AREA - HEARD

## Q.20

Austria, Finland, Iceland, Lichtenstein, Norway, Sweden and Switzerland form the European Free Trade Association - EFTA. The European Community and EFTA have decided to create together the "European Economic Area" from 1st January 1993, that is the same time as the Single European Market of the European Community. Have you ever heard of this "European Economic Area" or not?

## v77 - Q28 TELEVISION - HDTV INTEREST

## Q.28

There will soon be television programmes with pictures of almost the same quality as in cinemas: this is known as "high definition" television. A new type of television set will be needed to receive these programmes. Would you personally be very interested, somewhat interested, not very interested, not at all interested in buying a high definition television set?

- 0 NA
- 1 Very interested
- 2 Somewhat interested
- 3 Not very interested
- 4 Not at all interested

## v127 - Q39 FOODSTUFF LABELLING JUST TO SELL

Q.39

I am going to show you some opinions about the information on packaging and labelling of foodstuffs. Please choose between the two opinions shown at the ends of the scale.

If you fully agree with the opinion on the left hand side, you give a score of 1. If you fully agree with the opinion on the right hand side, you give a score of 7. The scores in between allow you to say how close to either side you are.

## v132 - Q39 FOODSTUFF LABELLING UNDERSTANDING

Q.39

I am going to show you some opinions about the information on packaging and labelling of foodstuffs. Please choose between the two opinions shown at the ends of the scale.

If you fully agree with the opinion on the left hand side, you give a score of 1. If you fully agree with the opinion on the right hand side, you give a score of 7. The scores in between allow you to say how close to either side you are.

## v139 - Q42A FOODSTUFF INGREDIENT - DANGEROUS

## Q.41

Of the various kinds of information which might appear on packaging and labelling of foodstuffs, which one are you most interested in?

## Q.42a

For you is an ingredient something that is:

(SHOW CARD - READ OUT - SEVERAL ANSWERS POSSIBLE)

## Q.42a2 Dangerous

## v191 - Q51 NEWS INFO LEVEL - SCIENTIF DISCOV

## Q.51

I would like you to tell me for each of the following issues in the news if you are very well informed, moderately well informed or poorly informed about it?

## Q.51\_6 New scientific discoveries

- 0 NA
- 1 Very well
- 2 Moderately well
- 3 Poorly
- 4 DK

## v197 - Q53C SCIENTIFIC MAGAZINES - USE

Q.53c

Do you read any scientific magazines, such as ... (EXAMPLES FOR EACH MEMBER STATE)?

(IF YES)

Is it regularly, occasionally or hardly ever?

- 0 NA
- 1 Yes, regularly
- 2 Yes, occasionally
- 3 Yes, but hardly ever
- 4 No, never
- 5 DK

## v216 - Q58A SCIENCE OPINION BIOLOGY(A)

Q.58

ASK ALL

Q.58\_A

SPLIT BALLOT A

People can have different opinions about what is scientific and what is not. I am going to read out a list of subjects. For each one tell me how scientific you think it is by the scale of this card. Number 5 means that you think it is "very scientific" and number 1 that it is "not at all scientific". The other numbers mean somewhere in between. Just tell me for each subject the number you think best describes how scientific the subject is. If you have never heard of the subject don't hesitate to say so.

(SHOW CARD)

Q.58a\_A Biology, that is the study of life

0 NA

1 Not at all scientific

2 2

3 3

4 4

5 Very scientific

6 Never heard of

7 DK

## v217 - Q58B SCIENCE OPINION ASTRONOMY(A)

Q.58

ASK ALL

Q.58\_A

SPLIT BALLOT A

People can have different opinions about what is scientific and what is not. I am going to read out a list of subjects. For each one tell me how scientific you think it is by the scale of this card. Number 5 means that you think it is "very scientific" and number 1 that it is "not at all scientific". The other numbers mean somewhere in between. Just tell me for each subject the number you think best describes how scientific the subject is. If you have never heard of the subject don't hesitate to say so.

## v222 - Q58G SCIENCE OPINION MEDICINE(A)

Q.58

ASK ALL

Q.58\_A

SPLIT BALLOT A

People can have different opinions about what is scientific and what is not. I am going to read out a list of subjects. For each one tell me how scientific you think it is by the scale of this card. Number 5 means that you think it is "very scientific" and number 1 that it is "not at all scientific". The other numbers mean somewhere in between. Just tell me for each subject the number you think best describes how scientific the subject is. If you have never heard of the subject don't hesitate to say so.

## v228 - Q58E SCIENCE OPINION ASTROLOGY(B)

Q.58

ASK ALL

Q.58\_B

SPLIT BALLOT B

People can have different opinions about what is scientific and what is not. I am going to read out a list of subjects. For each one tell me how scientific you think it is by the scale of this card. Number 5 means that you think it is "very scientific" and number 1 that it is "not at all scientific". The other numbers mean somewhere in between. Just tell me for each subject the number you think best describes how scientific the subject is. If you have never heard of the subject don't hesitate to say so.

## v232 - Q59 SCIENTIFIC DRUG TEST EVALUATION

Q.59

Let us imagine that two scientists want to know if a certain drug is effective against high blood pressure.

A. The first scientist wants to give the drug to 1000 people with high blood pressure and see how many of them experience lower blood pressure levels.

B. The second scientist wants to give this drug to 500 people with high blood pressure, and not give this drug to another 500 people with high blood pressure, and see how many in both groups experience lower blood pressure levels.

In your opinion, which is the better way to test this drugs?

0 NA

1 A. First scientist - all 1000 get drug

2 B. Second scientist - 500 get drug, 500 don't get drug

## v233 - Q60 KNOWLEDGE SCIENTIFIC METHODS(A)

Q.60\_A

SPLIT BALLOT A

Suppose a machine is breaking down repeatedly. It is suspected that the material from which a particular part is made, is responsible for the breakdowns. There are different ways of investigating this problem.

Which one do you think scientists would be most likely to use?

(SHOW CARD - ONE ANSWER POSSIBLE)

0 NA

1 Only talk to the machine operators and get their opinion

2 Only use their own scientific knowledge to decide how good the material is

3 Make the same part from different materials, put them in the machine, one after the other, and then compare what happens in each case

4 DK

9 Inap., split ballot B (coded 2 in V405)

## v234 - Q60 KNOWLEDGE SCIENTIFIC METHODS MOST(B)

Q.60\_B

SPLIT BALLOT B

Suppose a machine is breaking down repeatedly. It is suspected that the material from which a particular part is made, is responsible for breakdowns. There are different ways of investigating this problem.

Q.60a\_B

Which one do you think scientists would be most likely to use?

(SHOW CARD - ONE ANSWER POSSIBLE)

0 NA

1 Only talk to the machine operators and get their opinion

2 Only use their own scientific knowledge to decide how good the material is

3 Make the same part from different materials, put them in the machine, one after the other, and then compare what happens in each case

4 DK

## v236 - Q61 KNOWLEDGE HEREDITARY DISEASE RISK

## Q.61

Suppose doctors tell a couple that their genetic make-up means that they've got a one in four chance of having a child with an inherited illness. Does this mean that ...

(SHOW CARD - AND READ OUT - ONE ANSWER POSSIBLE)

- 0 NA
- 1 If they have only three children, none will have the illness
- 2 If their first child has the illness, the next three will not
- 3 Each of the couples' children has the same risk of suffering from the illness
- 4 If their first three children are healthy, the fourth will have the illness
- 5 DK

## v241 - Q62E SCIENCE &amp; TECHNOLOGY ANIMALS(A)

Q.62\_A

SPLIT BALLOT A

I would like to read you now some statements that people have made about science, technology or the environment. For each statement, please, tell me how much you agree or disagree.

(SHOW CARD)

Q.62e\_A Scientists should be allowed to do research that causes pain and injury to animals like dogs and chimpanzees if it can produce new information about serious human health problems.

0 NA

1 Strongly agree

2 Agree to some extent

3 Neither agree nor disagree

4 Disagree to some extent

5 Strongly disagree

## v285 - Q66C SCIENCE &amp; TECHNOLOGY GOVERNMENT(A)

Q.66\_A

SPLIT BALLOT A

Now, I would like to read you some other statements. For each statement, would you please tell me how much you agree or disagree?

Q.66c\_A Even if it brings no immediate benefits, scientific research which advances the frontiers of knowledge is necessary and should be supported by the government.

0 NA

1 Strongly agree

2 Agree to some extent

3 Neither agree nor disagree

4 Disagree to some extent

5 Strongly disagree

## v327 - Q69 EC RESEARCH EVALUAT IMPORTANCE

Q.69

Now a comparison between separate national and common European Community scientific research.

(SHOW CARD)

If you fully agree with the statement on the left, please give a score of one. If you fully agree with the statement on the right, please give a score of five. The scores in between allow you to say how close to either side you are.

Q.69\_3 Compared with research carried out at the national level, research carried out at the European level ...

- 0 NA
- 1 Will become less and less important
- 2 2
- 3 3
- 4 4
- 5 Will become more and more important
- 6 DK

## v342 - Q73\_D EC MAASTRICHT TRAETY - AGREEMENT

## Q.73

## QUESTIONS Q.73 TO Q.77 ONLY ASKED IN GERMANY

Jetzt gibt es im Bundesrat die Forderung, die Beschlüsse von Maastricht abzulehnen. Sollte man diese Beschlüsse jetzt ablehnen oder sollte man sie nicht ablehnen?

(The German Federal Council (Bundesrat) is challenged to reject the decisions of the Maastricht Treaty. Should these decisions now be rejected or not?)

- 0 NA
- 1 sollte man ablehnen (should be rejected)
- 2 nicht ablehnen (should not be rejected)
- 3 unentschieden (undecided)
- 9 Inap., only interviewed in Germany (not coded 4 in V10)

v342, weighted by v11

Value	Label	Missing	Count	Percent	Valid Percent
0	<NA>	M	8	0.1	
1	REJECT		537	4.2	37.3
2	NOT REJECT		901	7.0	62.7

## v344 - Q75\_D EC COMMON CURRENCY - AGREEMENT

Q.75

QUESTIONS Q.73 TO Q.77 ONLY ASKED IN GERMANY

Einmal angenommen, es kommt zu einer Währungsunion aller Staaten in der Europäischen Gemeinschaft: Wären Sie dann dafür oder dagegen, wenn es keine D-Mark mehr geben würde, sondern nur noch ein einheitliches europäisches Geld?

(Supposing that the monetary union of all member countries of the European Community comes into effect: Would you be for or against it if the German Mark would be replaced by a common European currency?)

- 0 NA
- 1 dafür (for)
- 2 dagegen (against)
- 3 egal, weiß nicht (not mind, don't know)
- 9 Inap., only interviewed in Germany (not coded 4 in V10)

v344, weighted by v11

Value	Label	Missing	Count	Percent	Valid Percent

## v345 - Q76\_D EUROPEAN UNIFICATION - FUTURE

Q.76

QUESTIONS Q.73 TO Q.77 ONLY ASKED IN GERMANY

Es gibt ja zwei verschiedene Möglichkeiten, wie Europa in Zukunft aussehen soll. Es kann ein gemeinsamer Staat sein mit einer zentralen Regierung und gemeinsamen Gesetzen, oder aber ein Bündnis einzelner selbständiger Staaten. Was meinen Sie, wie sollte es sein? Sollte es einen gemeinsamen europäischen Staat geben oder ein europäisches Bündnis einzelner Staaten?

(As for the future of Europe, there are two possibilities. There can be a common state with a central government and a common legislation, or a federation of single independent nations. What do you think, should it be a common European state or a European federation of single nations?)

0 NA

1 Bündnis einzelner Staaten (Federation of single nations)

2 Gemeinsamer europäischer Staat (Common European state)

3 unentschieden (undecided)

9 Inap., only interviewed in Germany (not coded 4 in V10)

v345, weighted by v11

Value	Label	Missing	Count	Percent	Valid Percent
0	<NA>	M	7	0.1

v384 - D29 INCOME HH

D.29

We would also like some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc.. Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

in France (FR):

French francs per month

- 0 NA
- 1 Less than 4.000
- 2 4.000 to 4.999

## v385 - D29 INCOME HH QUANTILES (HARMONISED)

D.29R Household income - approximate quartiles

- 1 - - Lowest income quartile
- 2 - Next to lowest income quartile
- 3 + Next to highest income quartile
- 4 ++ Highest income quartile
- 5 DK/REFUSAL

Derivation:

This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:

See D.29 for complete question text

v393 - P6 SIZE OF COMMUNITY (SEE DOCUMENT)

P.6 (Objective) Size of locality

in France (FR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants
- 5 Paris

in Belgium (BE):

- 1 Grands centres
- 2 Localités urbaines
- 3 Localités secondaires
- 4 Autres localités

in Netherlands (NL):

- 1 less than 5.000
- 2 5.000 - less than 10.000
- 3 10.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 400.000
- 7 400.000 and more inhabitants

in Germany (DE):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 500.000
- 7 500.000 and more inhabitants

in Italy (IT):

- 1 less than 10.000
- 2 10.000 - less than 100.000
- 3 100.000 - less than 250.000
- 4 250.000 and more inhabitants

in Luxembourg (LU):

- 1 less than 2.500
- 2 2.500 - less than 5.000
- 3 5.000 - less than 10.000

- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 and more inhabitants (Luxembourg ville)

in Denmark (DK):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 10.000
- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 - less than 100.000
- 7 100.000 and more inhabitants

in Ireland (IE):

- 1 less than 2.000
- 2 2.000 less than 20.000
- 3 20.000 less than 100.000
- 4 100.000 and more inhabitants

in Great Britain (GB\_GBN):

- 1 Metropolitan
- 2 Other 100 % urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB\_NIR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants

in Greece (GR):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 1.000.000
- 5 1.000.000 and more inhabitants

in Spain (ES):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 100.000
- 5 100.000 - less than 300.000
- 6 300.000 - less than 500.000
- 7 500.000 - less than 1.000.000
- 8 1.000.000 and more inhabitants

in Portugal (PT):

- 1 less than 100
- 2 100 - less than 200
- 3 200 - less than 500
- 4 500 - less than 1.000
- 5 1.000 - less than 2.000
- 6 2.000 - less than 5.000
- 7 5.000 - less than 10.000
- 8 10.000 - less than 30.000
- 9 30.000 - less than 100.000
- 10 100.000 - less than 500.000
- 11 500.000 and more inhabitants

v394 - P7 REGION I (SEE DOCUMENT)

P.7\_1 Region I

in France (FR):

Regions (EUROSTAT NUTS II LEVEL)

- 1 Ile-de-France
- 2 Champagne-Ardenne
- 3 Picardie
- 4 Haute-Normandie
- 5 Centre
- 6 Basse-Normandie
- 7 Bourgogne
- 8 Nord Pas de Calais
- 9 Lorraine
- 10 Alsace
- 11 Franche-Comte
- 12 Pays de la Loire
- 13 Bretagne
- 14 Poitou-Charentes
- 15 Aquitaine
- 16 Midi-Pyrenees
- 17 Limousin
- 18 Rhone-Alpes
- 19 Auvergne
- 20 Languedoc-Roussillon
- 21 Provence-Alpes-Cote d'Azur
- 22 Corse

in Belgium (BE):

Provinces (EUROSTAT NUTS II LEVEL - modified)

- 1 Hainaut
- 2 Limburg
- 3 Namur
- 4 Oost-Vlaanderen
- 5 West-Vlaanderen
- 6 Liege
- 7 Luxembourg
- 8 Brabant flamand
- 9 Antwerpen
- 10 Bruxelles
- 11 Brabant wallon

in Netherlands (NL):

Provincies (EUROSTAT NUTS II LEVEL)

- 1 Groningen
- 2 Friesland
- 3 Drenthe
- 4 Overijssel
- 5 Gelderland
- 6 Flevoland
- 7 Utrecht
- 8 Noord-Holland
- 9 Zuid-Holland
- 10 Zeeland
- 11 Noord Brabant
- 12 Limburg

in Germany - West (DE\_W):

Regierungsbezirke (EUROSTAT NUTS II LEVEL)

- 10 Schleswig-Holstein
- 20 Hamburg
- 31 Braunschweig
- 32 Hannover
- 33 Lüneburg
- 34 Weser-Ems
- 40 Bremen
- 51 Düsseldorf
- 53 Köln
- 55 Münster
- 57 Detmold
- 59 Arnsberg
- 64 Darmstadt
- 65 Gießen
- 66 Kassel
- 71 Koblenz
- 72 Trier
- 73 Rheinhessen-Pfalz
- 81 Nord Württemberg=Stuttgart
- 82 Nordbaden=Karlsruhe
- 83 Südbaden=Freiburg
- 84 Süd Württemberg=Tübingen
- 91 Oberbayern
- 92 Niederbayern
- 93 Oberpfalz
- 94 Oberfranken
- 95 Mittelfranken
- 96 Unterfranken
- 97 Schwaben
- 100 Saarland
- 110 Berlin (West)

in Italy (IT):

Regioni (EUROSTAT NUTS II LEVEL - modified)

- 1 Valle d'Aosta e Piemonte
- 2 Liguria
- 3 Lombardia
- 4 Milano
- 5 Trentino
- 6 Veneto
- 7 Friuli-Venezia Giulia
- 8 Emilia-Romagna
- 9 Toscana
- 10 Marche
- 11 Umbria
- 12 Lazio
- 13 Molise e Abruzzi
- 14 Campania
- 15 Puglia
- 16 Basilicata
- 17 Calabria
- 18 Sicilia
- 19 Sardegna

in Luxembourg (LU):

- 1 Centre
- 2 South
- 3 North
- 4 East

in Denmark (DK):

- 1 Hovedstodomradet (Kobenhavens area)
- 2 Sjaellands, Lolland-Falster, Bornholms (excluding hovedstodomradet)
- 3 Fyn
- 4 Jylland

in Ireland (IE):

Planning Regions (EUROSTAT NUTS III LEVEL)

- 1 Donegal
- 2 North West
- 3 North East
- 4 West
- 5 Midlands
- 6 East
- 7 Mid West
- 8 South East
- 9 South West

in United Kingdom (GB):

Groups of Counties (EUROSTAT NUTS II LEVEL)

- 1 Cleveland, Durham
- 2 Cumbria
- 3 Northumberland, Tyne and Wear
- 4 Humberside
- 5 North Yorkshire
- 6 South Yorkshire
- 7 West Yorkshire
- 8 Derbyshire, Nottinghamshire
- 9 Leicestershire, Northamptonshire
- 10 Lincolnshire
- 11 East Anglia
- 12 Bedfordshire, Hertfordshire
- 13 Berkshire, Buckinghamshire, Oxfordshire
- 14 Surrey, East-West Sussex
- 15 Essex
- 16 Greater London
- 17 Hampshire, Isle of Wight
- 18 Kent
- 19 Avon, Gloucestershire, Wiltshire
- 20 Cornwall, Devon
- 21 Dorset, Somerset
- 22 Hereford & Worcester, Warwickshire
- 23 Shropshire, Staffordshire
- 24 West Midlands (County)
- 25 Cheshire
- 26 Greater Manchester
- 27 Lancashire
- 28 Merseyside
- 29 Clwyd, Dyfed, Gwynedd, Powys
- 30 Gwent, Mid-South-West Glamorgan
- 31 Borders, Central, Fife, Lothian, Tayside
- 32 Dumfriesshire & Galloway, Strathclyde
- 33 Highlands, Islands
- 34 Grampian
- 35 Northern Ireland

in Greece (GR):

Development Regions (EUROSTAT NUTS II LEVEL - modified)

- 1 Kentriki Makedonia kai Dytiki Makedonia
- 2 Thessalia
- 3 Anatoliki Makedonia
- 4 Thraki
- 5 Anatoliki Sterea kai Nisia
- 6 Peloponnisos kai Dytiki Sterea
- 7 Ipeiros
- 8 Kriti

9 Nisia Anatolikou Aigaiou

in Spain (ES):

Comunidades Autonomas (EUROSTAT NUTS II LEVEL)

- 1 Andalucia
- 2 Aragon
- 3 Asturias
- 4 Baleares
- 5 Canarias
- 6 Cantabria
- 7 Castilla-Leon
- 8 Castilla-La Mancha
- 9 Cataluna
- 10 Extremadura
- 11 Galicia
- 12 Madrid
- 13 Murcia
- 14 Navarra
- 15 La Rioja
- 16 Comunidad Valenciana
- 17 Pais Vasco

in Portugal (PT):

Comissaoes de Coordinacao Regional, Regioes Autonomas (EUROSTAT NUTS II LEVEL)

- 1 Norte
- 2 Centro
- 3 Lisboa e Vale do Tejo
- 4 Alentejo
- 5 Algarve
- 6 Acores
- 7 Madeira

in Germany - East (DE\_E):

Ex-GDR administrative regional units

- 1 Rostock
- 2 Schwerin
- 3 Neubrandenburg
- 4 Potsdam
- 5 Frankfurt
- 6 Cottbus
- 7 Magdeburg
- 8 Halle
- 9 Erfurt
- 10 Gera
- 11 Suhl
- 12 Dresden
- 13 Leipzig

14 Chemnitz (Karl-Marx-Stadt)

15 Berlin (Ost)

## Note:

In the cases of France, West Germany, Italy, Ireland and the United Kingdom "Region I" corresponds to the variable labelle "Province" in earlier Eurobarometers up to number 31. If indicated, "Region I" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

v395 - P7 REGION II (SEE DOCUMENT)

P.7\_2 Region II

99 Inap.

in France (FR):

(EUROSTAT NUTS I LEVEL)

- 1 Ile-de-France
- 2 Bassin Parisien
- 3 Nord-pas-de-Calais
- 4 Est
- 5 Ouest
- 6 Sud-Ouest
- 7 Centre-Est
- 8 Mediterranee
- 9 Corse

in Belgium (BE):

Regions (EUROSTAT NUTS I LEVEL)

- 1 Region Wallonne
- 2 Bruxelles-Brussel
- 3 Vlaams Gewest

in Netherlands (NL):

Landsdelen (EUROSTAT NUTS I LEVEL)

- 1 Noord-Nederland
- 2 Oost-Nederland
- 3 West-Nederland
- 4 Zuid-Nederland

in Germany - West (DE\_W):

Bundesländer (EUROSTAT NUTS I LEVEL)

- 1 Schleswig Holstein
- 2 Hamburg
- 3 Niedersachsen
- 4 Bremen
- 5 Nordrhein-Westfalen
- 6 Hessen
- 7 Rheinland-Pfalz
- 8 Baden-Württemberg
- 9 Bayern
- 10 Saarland
- 11 Berlin (West)

in Italy (IT):

Gruppi di regioni (EUROSTAT NUTS I LEVEL)

- 1 Nord Ovest
- 2 Lombardia
- 3 Nord Est
- 4 Emilia-Romagna
- 5 Centro
- 6 Lazio
- 7 Abruzzi-Molise
- 8 Campania
- 9 Sud
- 10 Sicilia
- 11 Sardegna

in United Kingdom (GB):

Standard Regions (EUROSTAT NUTS I LEVEL - modified)

- 1 Scotland
- 2 North, Yorkshire, Humberside and North West
- 3 East and West Midlands, East Anglia
- 4 Wales
- 5 South East
- 6 South West
- 7 Northern Ireland

in Spain (ES):

- 1 Galicia
- 2 North
- 3 North-East
- 4 Aragon, Rioja
- 5 Madrid
- 6 Centre
- 7 Cataluna
- 8 East
- 9 South
- 10 Canarias

in Germany - East (DE\_E):

Neue Bundesländer (EUROSTAT NUTS I LEVEL)

- 11 Berlin (Ost)
- 12 Brandenburg
- 13 Mecklenburg-Vorpommern
- 14 Sachsen
- 15 Sachsen-Anhalt
- 16 Thüringen

Note:

Only in the case of West Germany "Region II" corresponds to the variable "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

East Germany: The East German federal units ("Neue Bundesländer") are constructed from the ex-GDR administrative regional units which only give a rough idea of their real outline.

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

## v397 - C1 OPINION LEADERSHIP INDEX

## C.1 OPINION LEADERSHIP INDEX

## Cognitive Mobilization Index 1

0 DK/NA

1 - - low

2 -

3 +

4 ++ high

## Derivation:

This index is based on the answers to the following two questions: "When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.8) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.9). Interviewees giving affirmative answers to both questions are labelled ++. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

CODE 0: coded 0 or 5 for V23 and 0 or 4 for V24

CODE 1: coded 3, 4, 5 or 0 for V23 and 3, 4 or 0 for V24

CODE 2: coded 3, 4, 5 or 0 for V23 and 2 for V24; or coded 1 or 2 for V23 and 3, 4 or 0 for V24

CODE 3: coded 3, 4, 5 or 0 for V23 and 1 for V24; or coded 1 or 2 for V23 and 2 for V24

CODE 4: coded 1 or 2 for V23 and 1 for V24

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

## v398 - C3 EC SUPPORT TYPOLOGY - EUROP ATTITUDES

## C.3 TYPOLOGY OF EUROPEAN ATTITUDES

- 1 Positive
- 2 Ambivalent
- 3 Negative

## Derivation:

The Typology of European attitudes is based upon answers to the following questions: "In general, are you for or against efforts being made to unify Western Europe? Are you for, very much; for, to some extent; against, to some extent; against, very much?" (Q.12 = UNIFICATION) and "Generally speaking, do you think that (your country's) membership of the European Community is: a good thing, a bad thing, or neither good nor bad?" (Q.13 = MEMBERSHIP). Positive attitudes: MEMBERSHIP "good" and UNIFICATION: "for...". Ambivalent attitudes: MEMBERSHIP "neither good nor bad" or MEMBERSHIP "good" and UNIFICATION: "against..." or MEMBERSHIP "bad" and UNIFICATION "for ...". Negative attitudes: MEMBERSHIP "bad" and UNIFICATION: "against...".

## v399 - C4 SOCIO PROF STATUS (OCCUPATION RECODE)

## C.4 SOCIO PROFESSIONAL STATUS

- 0 Other answers (never any paid work, NA)
- 1 Farmer and fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position , not at a desk but travelling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

## Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15a) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-Marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15a). For those not in paid work, "former occupation" (D.15b) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21a) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21b) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses.

## v400 - C6 EC SUPPORT - COMMITMENT

## C.6 COMMITMENT TO THE COMMON MARKET

## Support for the European Community Index

- 1 Strong opposition
- 2 Moderate opposition
- 3 Neutral position
- 4 Moderate support
- 5 Strong support

## Derivation:

This index was constructed from responses to the questions: "Generally speaking, do you think that (your country's) membership of the European Community (Common Market) is ... a good thing, a bad thing, or neither good nor bad?" (Q.13) and "If you were told tomorrow that the European Community (Common Market) had been scrapped, would you be very sorry about it, indifferent or very relieved?" (Q.15).)

## v401 - C11 MEDIA USE (SEE DOCUMENT)

## C.11 MEDIA USE

0 DK/NA

1 +++

2 ++

3 --

4 ---

## Derivation:

This index is based upon answers to question Q.11 (V26-V28): "About how often do you watch the news in television, read the news in the daily paper, and listen to the news broadcasts on the radio?"

It combines the answers in the following way: +++ News on TV, radio and papers every day or several times a week; ++ Two media every day or several times a week, the third medium not more than once or twice a week; - - One of the three media every day or several times a week, the two others, not more than once or twice a week; - - - The three media no more than once or twice a week.

CODE 0: Coded 0 or 6 for either V26 or V27 or V28

CODE 1: Coded 1 or 2 for V26, V27 and V28

CODE 2: Coded 1 or 2 for two of these variables and coded 3, 4 or 5 for the third variable

CODE 3: Coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables

CODE 4: Coded 3, 4 or 5 for V26, V27 and V28

v402 - C12 EUROPEAN SOCIAL GRADE (SEE DOCUMENT)

C.12 European Social Grade (ESOMAR 7-point scale)

- 0 NA
- 1 A (upper)
- 2 B
- 3 C
- 4 D
- 5 E1
- 6 E2
- 7 E3 (lower)

Derivation:

This scale is based on the recommendation of the European Society for Opinion and Marketing Research to harmonise the measurement of social grade across borders. This approach uses three different types of input variables:

I) Occupation of the main income earner (MIE) is based on 16 occupation groups E1 to E16:

E1 General management, director or top management (6 employees or more)

E2 Self employed professional

E3 Employed professional

E4 General management, director or top management (5 employees or less)

E5 Middle management, other management (6 employees or more)

E6 Middle management, other management (5 employees or less)

E7 Business proprietors, owner (full/partner) of company and owner of a shop, craftsmen, other self employed (6 employees or more)

E8 employed position, working mainly at a desk

E9 business proprietors, owner (full/partner) of company (5 employees or less)

E10 student

E11 employed position, not at a desk but travelling or in a service job

E12 farmer and fisherman

E13 responsible for ordinary shopping and looking after the home, housewife

E14 supervisor and skilled manual worker

E15 other (unskilled) manual worker, servant

E16 retired or unable to work through illness, unemployed or temporarily not working

II) The education level of the main income earner (MIE) is based on a classification into 6 groups of education level (adjusting the finishing age of general education in accordance with extra general education or specific apprenticeship and/or professional training): 1) up to 14 years; 2) 15-16 years; 3) 17-18 years; 4) 19-20 years; 5) 21-24 years; 6) 25 years and over.

III) Household ownership of selected durables is based on ownership in terms of number of products owned (D.14): a colour TV set - a video recorder - a video camera - a radio-clock - a PC/home computer - a still camera - an electric drill - an electric deep fat fryer - two or more cars - a second home or a holiday home/flat.

The combination of these input variables results in a new social grade classification with, as categories (upper to lower): A B C D E1 E2 E3.

This scale on the basis of all active and non-active main income earners (combination of input variables I, II and III) was included as created by the principal investigator (INRA). For more details see: Commission of the European Communities, EUROBAROMETER No. 38, Report December 1992, page A70.

## v403 - C13 LIFE CYCLE GROUPS

## C.13 LIFE CYCLE GROUPS

- 0 NA
- 1 Dependent
- 2 Pre-family
- 3 Young family
- 4 Mature family
- 5 Post-family / mature
- 6 Post-family / aged

## Derivation:

This variable combines answers to questions D.11, D.13, D.19a, D.19b and D.15a: Respondents aged 15-34, neither head of household nor responsible for purchases and not in paid work are classified as "DEPENDENT". Respondents aged 15-34 and head of household or responsible for purchases, without children aged 0-15 in the household; or aged 15-34, neither head of household nor responsible for purchases, but in paid work are classified as "PRE-FAMILY". Respondents aged 15-34, head of household or responsible for purchases and with children aged 0-15 in household are classified as "YOUNG FAMILY". Respondents aged 35 +, head of household or responsible for purchases and with children aged 0-15 in household are classified as "MATURE FAMILY". Respondents aged 35-54, head of household or responsible for purchases, but without children aged 0-15 in household; or aged 35-54 and neither head of household nor responsible for purchases are classified as "POST-FAMILY / MATURE". Respondents aged 55 and more, head of household or responsible for purchases, without children aged 0-15 in household; or aged 55 and more and neither head of household nor responsible for purchases are classified as "POST-FAMILY / AGED".
