Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the Commission of the European Communities, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys investigated the level of public support for the European Community and assessed attitudes toward European integration. Respondents were asked how well informed they felt about the Community, how supportive they were of efforts being made to unify Western Europe, whether their country had benefited from being a Community member, and how interested they were personally in Community matters. Other queries focused on respondent reaction to the European flag, the feeling of being a citizen of Europe both now and in the future, opinions relating to the speed of European unification, impressions of the work of the European Commission, and how well a list of statements corresponded to the respondent's hopes for the future of the Community. Respondents also judged which areas of policy should be decided by national governments and which by a central Community structure, and expressed their reactions to the Common Agricultural Policy, their expectations for the Single European Market and whether it should contain a social dimension, and their attitudes about the role and importance of the European Parliament. A number of questions focused specifically on the meeting and treaty produced in the Dutch town of Maastricht in December of 1991. Respondents were queried about their knowledge of the gathering and its possible effects on the Community, on their own countries, and on their personal lives. Opinions were also sought on the desirability and positive and negative effects of certain countries joining the Community, and what the rights of citizens of other member countries should be when residing in the respondent's nation. Attitudes toward immigrants from non-member countries were elicited as well. A set of questions focused on environmental problems, ecological concerns, and the priority assigned to economic development when assessing these issues. Respondents were asked to identify factors that caused serious damage to the environment, and to comment on what could be done to lessen pollution. They were also asked about the role of public bodies in protecting and informing the public about environmental concerns, sources of information about these concerns, and their hopes for the upcoming United Nations Conference for the Environment and Development in Rio de Janeiro, Brazil. As in previous Eurobarometers, questions on political party preference were posed, including which party respondents felt closest to, how they voted in their country's last general election, and how they would vote if a general election were held tomorrow. Additional information was gathered on family income, number of people residing in the home, size of locality, home ownership, region of residence, occupation of the head of household, and the respondent's age, sex, occupation, education, religion, religiosity, subjective social class standing, socio-professional status, and left-right political self-placement.

Note that starting with Eurobarometer 37.0 some socio-demographic and socio-political descriptive questions have substantially changed as indicated for each variable in the codebook.

1.3 Universe

The samples of Eurobarometer 37.0 are designed to be representative for the national population aged 15 years and over of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland) and in Germany (West and East Germany). A separate national survey was conducted independently in Norway, designed to be representative for Norwegian citizens aged 15 years and over.

1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random.

In some countries, such as Great Britain, Republic of Ireland and Luxembourg, respondents were randomly selected from electoral registers. In each household, a respondent was selected by a random procedure, such as the first birthday method or the KISH grid method. Up to two recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

Between March 18 and April 15, 1992, INRA (EUROPE), a European Network of Market and Public Opinion Research Agencies, carried out wave 36.0 of the STANDARD EUROBAROMETER, on request of the COMMISSION OF THE EUROPEAN COMMUNITIES.

1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the

ECO.

INRA (Europe) developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 37.0 provides four (post-stratification) NATION WEIGHTS for the EU member countries: WEIGHT RESULT FROM TARGET (NATION WEIGHT IIa) and WEIGHT ADJUSTED TO STANDARD SIZE (NATION WEIGHT IIb) for separate analysis or comparison of individual samples (countries or regions on sub-national level), WEIGHT SPECIAL UNITED KINGDOM (NATION WEIGHT I adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole and WEIGHT SPECIAL GERMANY (NATION WEIGHT III adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors, except Norway. A separate (post-stratification) NATION WEIGHT is provided for Norway: WEIGHT RESULT FROM TARGET NORWAY ONLY.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included. Norway is always excluded from calculation.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Five variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, REGION II, AGE RECODED, and AGE EDUCATION RECODED. Users should be aware that ZA's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

Responses to the open-ended questions Q.10, Q.38, Q.49 and Q.50 are represented by variables with country-specific coding schemes documented in note one to four.

If the documentation for country-specific questions or coding is provided by INRA in other languages than English, ZA documents the original field questionnaire wording and supplies the English translation in brackets.

Questions Q.88 to Q.101 originally asked in the context of Eurobarometer 37.0 are not included in the present data set edition. They have been merged with the corresponding part of Eurobarometer 37.1 and are available in a separate study on "European Drug Prevention Program" issues (37.0+37.1).

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss

Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER

ZA/ICPSR Study Number

Respective study number of the involved archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
2141			14082	100.0	100.0
	Sum		14082	100.0	100.0
	Valid Cases		14082		

v2 - EDITION NUMBER

ZA/ICPSR Edition Number

The number identifying the release edition of this dataset.

- 1 Early release version
- 2 1st codebook edition

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v2

Value	Label	Missing	Count	Percent	Valid Percent
2	1ST CODEBOOK EDITION - release as of May 2, 2007		14082	100.0	100.0
	Sum		14082	100.0	100.0
	Valid Cases		14082		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.1.0 adds the crosstabulation variable ISOCNTRY and the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.1.0 (2012-07-01)			14082	100.0	100.0
	Sum		14082	100.0	100.0
	Valid Cases		14082		

v3 - PART NUMBER

ZA/ICPSR Part Number

The number identifying this part of a 1-part study.

1 Eurobarometer 37.0

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	EUROBAROMETER 37.0		14082	100.0	100.0
	Sum		14082	100.0	100.0
	Valid Cases		14082		

v4 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

isocntry

v5 - NATION I (UNITED KINGDOM)

Nation of interview I

Twelve EC countries including separate samples for East and West Germany and with the addition of Norway

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany - West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany - East
- 14 Norway

v5

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1005	7.1	7.1
2	BELGIUM		1036	7.4	7.4
3	NETHERLANDS		1002	7.1	7.1
4	WEST GERMANY		1065	7.6	7.6

14	NORWAY		1000	7.1	7.1
	Sum		14082	100.0	100.0
	Valid Cases		14082		

v6 - WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights are included. Norway is weighted by "zero".

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31 this weight adjusts all samples to the standard size.

v7 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany - West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany - East
- 15 Norway

v7

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1005	7.1	7.1
2	BELGIUM		1036	7.4	7.4
3	NETHERLANDS		1002	7.1	7.1
4	GERMANY-WEST		1065	7.6	7.6
5	ITALY		1046	7.4	7.4

15	NORWAY		1000	7.1	7.1
	Sum		14082	100.0	100.0
	Valid Cases		14082		

v8 - WEIGHT RESULT FROM TARGET

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples. Norway is weighted by "zero".

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.

v9 - WEIGHT ADJUSTED TO STANDARD SIZE

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg) cases. Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples. Norway is weighted by "zero".

v10 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Norway

v10

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1005	7.1	7.1
2	BELGIUM		1036	7.4	7.4
3	NETHERLANDS		1002	7.1	7.1
4	GERMANY (UNITED)		2177	15.5	15.5
5	ITALY		1046	7.4	7.4
6	LUXEMBOURG		496	3.5	3.5
7	DENMARK		1000	7.1	7.1
8	IRELAND		1001	7.1	7.1

10	NORTHERN IRELAND		303	2.2	2.2
11	GREECE		1000	7.1	7.1
12	SPAIN		1000	7.1	7.1
13	PORTUGAL		1000	7.1	7.1
14	NORWAY		1000	7.1	7.1
	Sum		14082	100.0	100.0
	Valid Cases		14082		

v11 - WEIGHT SPECIAL GERMANY

Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size. Norway is weighted by "zero".

v12 - WEIGHT EURO 6

European Weight I (WEIGHT EURO 6)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v13 - WEIGHT EURO 10

European Weight II (WEIGHT EURO 10)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 excludes East Germany, Spain and Portugal. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v14 - WEIGHT EURO 12

European Weight III (WEIGHT EURO 12)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 excludes East Germany (weighted by "zero"). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v15 - WEIGHT EUROPE 12 +

European Weight IV (WEIGHT EUROPE 12 +)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included. Norway is excluded (weighted by "zero").

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31 this weight contains the adjustment to the standard size.

v16 - WEIGHT RESULT FROM TARGET NORWAY ONLY

Norwegian Weight (WEIGHT RESULT FROM TARGET NORWAY ONLY)

This variable contains weights that adjust the weighted sample to make it representative for Norway. It reproduces the real number of cases. All other countries are weighted by "zero".

wght_all - WEIGHT RESULT FROM TARGET - ALL SAMPLES

WEIGHT RESULT FROM TARGET - ALL SAMPLES (EU + NO)

This weight adds WEIGHT RESULT FROM TARGET for EUROPEAN COMMUNITY member countries and a parallel survey conducted in NORWAY. This variable was produced by the archive and contains the original weighting factors for ALL SAMPLES adjusting the weighted samples to make them representative for the countries/areas from which they were drawn. It reproduces the real number of cases. British and Northern Irish as well as East and West German samples are weighted separately.

v17 - Q1 ELECTORAL REGISTER

Q.1

Are you ... (NATIONALITY)?

(IF YES)

Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under your present address, at another address or does not appear at all?

(IF CODE 5: CLOSE INTERVIEW)

- 1 At present address
- 2 At another address
- 3 Don't know if registered
- 4 Does not appear at all
- 5 Is not ... (NATIONALITY)

Note:

Last trend: EB36 Q.1

v27 - Q8 DEMOCRACY/DICTATORSHIP LEGITIMACY

Q.8

Here are three opinions about political systems.

(SHOW CARD)

Which one comes closest to your own way of thinking?

0 NA

1 Democracy is the best political system in all circumstances

2 In certain circumstances a dictatorship could be a good thing

3 Whether we live in a democracy or under a dictatorship makes no difference to people like me

4 DK

v209 - Q26 EC MEMBERSHIP - COUNTRY BENEFIT

Q.26

Taking everything into consideration, would you say that (OUR COUNTRY) has on balance benefited or not from being a member of the European Community?

in Germany - East (DE_E):

Haben Ihrer Meinung nach die fünf neuen Länder insgesamt gesehen durch die Mitgliedschaft Deutschlands in der Europäischen Gemeinschaft (EG) Vorteile oder ist das nicht der Fall?

(Taking everything into consideration, would you say that the five new federal units have on balance benefited or not from the German EC membership?)

0 NA

v276 - Q39A EUROP FLAG DISLIKE/LIKE

Q.39A

ASK ALL

This symbol is the European flag. I have a list of statements concerning it. I would like to have your opinion on each of these. Number 1 indicates that you fully agree with the statement on the left-hand side of this scale. Number 10 indicates that you fully agree with the statement on the right-hand side of the scale. All figures between 1 and 10 can be used to indicate the extent to which you agree.

v280 - Q39A EUROP FLAG NOT BE SEEN/BE SEEN

Q.39A

ASK ALL

This symbol is the European flag. I have a list of statements concerning it. I would like to have your opinion on each of these. Number 1 indicates that you fully agree with the statement on the left-hand side of this scale. Number 10 indicates that you fully agree with the statement on the right-hand side of the scale. All figures between 1 and 10 can be used to indicate the extent to which you agree.

(SHOW CARD)

Q.39A_5 This flag should not be seen on all public buildings in (OUR COUNTRY) next to the national flag / This flag should be seen on all public buildings in (OUR COUNTRY) next to the national flag

v305 - Q45 EC AGRICULTURAL POLICY REFORM

Q.45

In order to stop the growth in agricultural surpluses, the European Commission is planning to reform the Common Agricultural Policy. This would not reduce the European Community's spending and might even increase it in the near future. This reform provides for a more balanced distribution of funds by progressively replacing guaranteed high prices to all farmers with direct income assistance to small and middle sized farms. Do you think that this reform would be a good thing or a bad thing?

- 0 NA
- 1 A good thing
- 2 Neither good nor bad (SPONTANEOUS)
- 3 A bad thing
- 4 DK
- 9 Inap. - not interviewed in Norway (coded 15 in V7)

v308 - Q48 EC SINGLE MARKET - GOOD/BAD

Q.48

Overall, do you think that the completion of the Single European Market at the end of 1992, the beginning of 1993, will be - for people like you - a good thing, a bad thing, or neither a good nor a bad thing?

- 0 NA
- 1 A good thing
- 2 Neither good, nor bad thing
- 3 A bad thing
- 4 Don't know

Note:

National Coding Scheme (Source: INRA):

Belgium: I don't see any immediate advantages

Denmark: difficult to understand, confusing, incalculable effects, unsecure etc.

France <translation from French>: how will this happen/not informed enough

Germany (East and West) <translation from German>: disagreement in general/integration of countries will be difficult

Great Britain: don't know/no answer

Greece: Greece is considered as the poor relative (not taken into consideration)

Ireland: won't make things any better

Italy: don't know

Luxembourg <translation from French>: don't know

Netherlands: it goes too fast

Northern Ireland: won't make things any better

Portugal: because most of the people is still not prepared to that

Spain: it can be harmful for Spain in general

v382 - Q52 EC SINGLE MARKET - SOCIAL DIMENSION

Q.52

The European Community is committed to complementing the Single European Market with a social dimension. This consists of a basic set of rules, for example, concerning the rights and duties of workers and employers in all the member countries. In your opinion, is such a European social dimension a good thing or a bad thing?

- 0 NA
- 1 Good thing
- 2 Neither good nor bad (SPONTANEOUS)
- 3 Bad thing
- 4 DK
- 9 Inap. - not interviewed in Norway (coded 15 in V7)

v399 - Q60 EC DEFENCE - PARTICIPATION IRELAND

Q.60

COUNTRY SPECIFIC QUESTION FOR IRELAND

As you can see, European Political Union may include a common defence arrangement involving the member states of the European Community.

Successive Irish government have accepted that moves towards European Political Union could mean scrapping Ireland's policy of military neutrality.

Would you be in favour or opposed to Irish participation in a collective European Community defence arrangement?

- 0 NA
- 1 In favour
- 2 Opposed
- 3 Don't know
- 9 Inap.- only interviewed in Ireland (not coded 8 in V7)

Note:

Last trend: EB36 Q.46

v435 - Q67 EC AID TO EASTERN EUROPE - MORE TAX

Q.67

The European Community is contributing to the reconstruction of the economies of the countries of Eastern Europe. The objectives are to establish lasting economic and political stability throughout the European continent, and to reduce the risk of unbalanced migration. In order to achieve these objectives, would you personally be prepared, or not, to pay one per cent more tax for the next five years?

v443 - Q70 IMMIGRANTS SEEKING POLITICAL ASYLUM

Q.70

a) Some people from different countries of the South of the Mediterranean wish to work here in the European Community.

b) Others coming from Eastern Europe wish to work in the West.

c) Yet others, suffering from human rights violations in their country are seeking political asylum.

For each of these types of immigration, what do you think should be done here in the European Community?

v456 - Q76 ENVIRONMENT VS ECONOMY - EVALUATION

Q.76

I am going to read you three opinions which you sometimes hear about environmental problems. Which one comes closest to your own?

(SHOW CARD - ONE ANSWER ONLY)

0 NA

1 Economic development should get higher priority than concerns about the environment

2 Economic development must be ensured but the environment protected at the same time

3 Concerns about the environment should get higher priority than economic development

4 DK

Note:

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Users may modify these codings or part of these codings in order to suit their specific needs.

- 80 (FRP) Fremskrittspartiet (Progress Party)
- 90 Other party
- 95 Voted blank
- 96 Did not vote
- 98 Don't remember

Note:

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Users may modify these codings or part of these codings in order to suit their specific needs.

v649 - D29 INCOME HH

D.29

We would also like some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc.. Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

in France (FR):

French francs per month

- 0 NA

v650 - D29 INCOME HH QUANTILES (HARMONISED)

D.29R Household income - approximate quartiles

- 1 + + (Highest income quartile)
- 2 + (Next to highest income quartile)
- 3 - (Next to lowest income quartile)
- 4 - - (Lowest income quartile)
- 5 DK/refusal

Derivation:

This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:

See D.29 for complete question text

v658 - P6 SIZE OF COMMUNITY

P.6 (Objective) Size of locality

in France (FR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants
- 5 Paris

in Belgium (BE):

- 1 Grand centre
- 2 Localite urbaine
- 3 Localite secondaire
- 4 Autre localite

in Netherlands (NL):

- 1 less than 5.000
- 2 5.000 - less than 10.000
- 3 10.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 400.000
- 7 400.000 and more inhabitants

in Germany - West (DE_W):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 500.000
- 7 500.000 and more inhabitants

in Italy (IT):

- 1 less than 10.000
- 2 10.000 - less than 100.000
- 3 100.000 - less than 250.000
- 4 250.000 and more inhabitants

in Luxembourg (LU):

- 1 less than 2.500
- 2 2.500 - less than 5.000
- 3 5.000 - less than 10.000

- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 and more inhabitants (Luxembourg ville)

in Denmark (DK):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 10.000
- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 - less than 100.000
- 7 100.000 and more inhabitants

in Ireland (IE):

- 1 less than 2.000
- 2 2.000 less than 20.000
- 3 20.000 less than 100.000
- 4 100.000 and more inhabitants

in Great Britain (GB_GBN):

- 1 Metropolitan
- 2 Other 100 % urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB_NIR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants

in Greece (GR):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 1.000.000
- 5 1.000.000 and more inhabitants

in Spain (ES):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 100.000
- 5 100.000 - less than 300.000
- 6 300.000 - less than 500.000
- 7 500.000 - less than 1.000.000
- 8 1.000.000 and more inhabitants

in Portugal (PT):

- 1 less than 100
- 2 100 - less than 200
- 3 200 - less than 500
- 4 500 - less than 1.000
- 5 1.000 - less than 2.000
- 6 2.000 - less than 5.000
- 7 5.000 - less than 10.000
- 8 10.000 - less than 30.000
- 9 30.000 - less than 100.000
- 10 100.000 - less than 500.000
- 11 500.000 and more inhabitants

in Germany - East (DE_E):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 - less than 500.000
- 5 500.000 and more inhabitants

in Norway (NO):

- 1 Oslo
- 2 Bergen, Trondheim and other cities
- 3 Densely populated
- 4 Scattered populated

- 11 Berlin (Ost)
- 12 Brandenburg
- 13 Mecklenburg-Vorpommern
- 14 Sachsen
- 15 Sachsen-Anhalt
- 16 Thüringen

in Norway (NO):

- 1 Oslo/Akershus
- 2 Rest Eastland

3 South/Western

4 Trondelag/Northern

Note:

Only in the case of West Germany "Region II" corresponds to the variable "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

East Germany: The East German federal units ("Neue Bundesländer") are constructed from the ex-GDR administrative regional units which only give a rough idea of their real outline.

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

Last trend: EB36 P.7_2

v661 - C1 OPINION LEADERSHIP INDEX

C.1 OPINION LEADERSHIP INDEX

Cognitive Mobilization Index 1

0 DK / NA

1 - - low

2 -

3 +

4 + + high

Derivation:

This index is based on the answers to the following two questions: "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.4) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.5). Interviewees giving affirmative answers to both questions are labelled + +. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

CODE 0: coded 0 or 5 for V20 and 0 or 4 for V21

CODE 1: coded 3, 4, 5 or 0 for V20 and 3, 4 or 0 for V21

CODE 2: coded 3, 4, 5 or 0 for V20 and 2 for V21; or coded 1 or 2 for V20 and 3, 4 or 0 for V21

CODE 3: coded 3, 4, 5 or 0 for V20 and 1 for V21; or coded 1 or 2 for V20 and 2 for V21

CODE 4: coded 1 or 2 for V20 and 1 for V21

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

v662 - C2 VALUE ORIENTATION (POST-MATERIALISM)

C.2 VALUE ORIENTATION

Materialist/Post-materialist Values Index

- 0 DK/NA
- 1 Materialist
- 2 Mixed
- 3 Post materialist

Derivation:

This index is based on question Q.6 (V22/V23): "There is a lot of talk these days about what this country's goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority: (1) Maintaining order in the nation; (2) Giving the people more say in important government decisions; (3) Fighting rising prices; (4) Protecting Freedom of speech. Would you please say which of them you yourself consider most important in the long run? And what would be your second choice?" Respondents combining item (1) and (3) are labelled "materialist" Respondents combining items (2) and (4) are labelled "post-materialist", and others are labelled "mixed".

CODE 0: coded 0 or 5 for V22 and 0 or 5 for V23

CODE 1: coded 1 for V22 and 3 for V23; or coded 3 for V22 and 1 for V23

CODE 2: coded 1 or 3 for V22 and 2 or 4 for v23; or coded 2 or 4 for V22 and 1 or 3 for v23; or coded 0 or 5 for either V22 or V23

CODE 3: coded 2 for V22 and 4 for V23; or coded 4 for V22 and 2 for V23

For a complete discussion of this variable, see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

v663 - C3 EC SUPPORT TYPOLOGY - EUROP ATTITUDES

C.3 TYPOLOGY OF EUROPEAN ATTITUDES

- 1 Positive
- 2 Ambivalent
- 3 Negative

Derivation:

The Typology of European attitudes is based upon answers to the following questions: "In general, are you for or against efforts being made to unify Western Europe? Are you for, very much; for, to some extent; against, to some extent; against, very much?" (Q.24 = UNIFICATION) and "Generally speaking, do you think that (your country's) membership of the European Community is: a good thing, a bad thing, or neither good nor bad?" (Q.25 = MEMBERSHIP). Positive attitudes: MEMBERSHIP "good" and UNIFICATION: "for...". Ambivalent attitudes: MEMBERSHIP "neither good nor bad" or MEMBERSHIP "good" and UNIFICATION: "against..." or MEMBERSHIP "bad" and UNIFICATION "for ..." or DK/NA. Negative attitudes: MEMBERSHIP "bad" and UNIFICATION: "against...".

v664 - C4 SOCIO PROF STATUS (OCCUPATION RECODE)

C.4 SOCIO PROFESSIONAL STATUS

- 0 Other answers
- 1 Farmer and fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position , not at a desk but travelling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-Marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses.

v665 - C5 EUROPEAN POL PARTY PREFERENCE (D4)

C.5 EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX

- 0 NA
- 1 (S) Socialist Group
- 2 (PPE) Group of the European People's Party (Christian Democratic Group)
- 3 (LDR) Liberal and Democratic Reformist Group
- 4 (DE) European Democratic Group
- 5 (V) The Green Group in the European Parliament
- 6 (GUE) Group for the European Unitarian Left
- 7 (RDE) Group of the European Renewal and Democratic Alliance
- 8 (DR) Group Technical of the Right
- 9 (CG) Left Unity
- 10 (ARC) Rainbow Group in the European Parliament
- 11 (NI) Non-attached
- 12 Other party
- 13 Other answer
- 99 Inap., not constructed for Norway (coded 15 in V7)

Derivation:

This index is based upon the vote intention question D.4: "If there were a general election tomorrow (say if contact under 18: and you had a vote), which party would you support?"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labelled N.I., supporters of parties not represented in the European Parliament are labelled "other". Labels are presented in the order in which they occur in the "list of members" of the European Parliament of October 1989. Abbreviations are also taken from this document.

v666 - C6 EC SUPPORT - COMMITMENT

C.6 COMMITMENT TO THE COMMON MARKET

Support for the European Community Index

- 1 Strong opposition
- 2 Moderate opposition
- 3 Neutral position
- 4 Moderate support
- 5 Strong support

Derivation:

This index was constructed from responses to the questions: "Generally speaking, do you think that (your country's) membership of the European Community (Common Market) is ... a good thing, a bad thing, or neither good nor bad?" (Q.25) and "If you were told tomorrow that the European Community (Common Market) had been scrapped, would you be very sorry about it, indifferent or very relieved?" (Q.27).

v667 - C9 EC SINGLE MARKET SUPPORT

C.9 TYPOLOGY OF SINGLE MARKET ATTITUDES

- 1 Positive
- 2 Ambivalent
- 3 Negative

Derivation:

This typology is based on answers to two different questions whether respondents react to the Single Market with hope or fear (Q.47) and their evaluation ("good thing"/"bad thing") of the Single Market (Q.48). It combines answers to those two questions in the following way: POSITIVE = "very hopeful" or "rather hopeful" and "a good thing"; AMBIVALENT = "neither good nor bad thing" or DK/NA; NEGATIVE = "rather fearful" or "very fearful" and "a bad thing"

CODE 1: coded 1 or 2 for V307 and 1 for V308

v668 - C11 MEDIA USE (Q7)

C.11 MEDIA USE

0 DK/NA

1 +++

2 ++

3 --

4 ---

Derivation:

This index is based upon answers to question Q.7 (V24-V26): "About how often do you watch the news in television, read the news in the daily paper, and listen to the news broadcast on the radio?"

It combines the answers in the following way: +++ News on TV, radio and papers every day or several times a week; ++ Two media every day or several times a week, the third medium not more than once or twice a week; -- One of the three media every day or several times a week, the two others, not more than once or twice a week; --- The three media no more than once or twice a week.

CODE 0: Coded 0 or 6 for either V24 or V25 or V26

CODE 1: Coded 1 or 2 for V24, V25 and V26

CODE 2: Coded 1 or 2 for two of these variables and coded 3, 4 or 5 for the third variable

CODE 3: Coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables

CODE 4: Coded 3, 4 or 5 for V24, V25 and V26
