## Acknowledgements

---

Standard & Special Eurobarometer surveys are conducted on behalf of the Commission of the European Communities, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

# 1 Study Description – Eurobarometer 35.A

## 1.1 Bibliographic information

### 1.1.1 Archive study numbers

GESIS: ZA2033

ICPSR: 9696

Under a co-operative arrangement for the archival processing and distribution of Standard & Special Eurobarometer, ICPSR and GESIS employ its own study number to identify each – otherwise congruent – dataset.

### 1.1.2 Title and archive subtitle

Eurobarometer 35.A

Working Conditions

March – April 1991

### 1.1.3 Principal investigator

Karlheinz Reif

Commission of the European Communities, Directorate General X – Information, Communication Culture  
Surveys, Research, Analyses

### 1.1.4 Bibliographic citation

Publications based on data collections which are made available through ICPSR or GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

Commission of the European Communities, Brussels: Eurobarometer 35.A, March–April 1991.  
International Research Associates (INRA), Brussels [Producer];  
GESIS, Cologne [Publisher]: ZA2033, dataset version 1.0.1, doi:10.4232/1.10897.

## 1.2 Content

### 1.2.1 Abstract

This collection presents the attitudes of a subset of respondents who participated in the EUROBAROMETER 35.0 (ZA 2031 / ICPSR 9697) and EUROBAROMETER 35.1 (ZA 2032 / ICPSR 9698) surveys. These respondents, who were all actively employed, were asked their opinions and attitudes about work, working conditions, and government policy, their main business activity, the hours they worked daily and weekly, and whether they worked on shifts. They were also asked whether their work involved dangerous machines, high speed activity, tiring positions, heavy loads, tight deadlines, short repetitive tasks, using computers, or working at night. Workers' control of their tasks and rate of work were investigated, and the survey also asked whether respondents felt they had sufficient resources, such as training, information, tools, space, furnishings, and support, to carry out their tasks. A number of questions related to health and safety in the workplace, focusing on workers' own experiences and their opinions on the safety of their workplaces for co-workers. They were also asked about the responsibility of companies, governments, the European Community, and each worker for the prevention of accidents and illness. Several items assessed awareness of European Community efforts concerning the protection of workers, and knowledge of individual countries in Europe with the most or least advanced legislation regarding worker safety. Demographic characteristics recorded in this file include political participation, opinions on membership in the European Community and European unification, religious affiliation and practice, subjective membership in social class, home ownership, family size, occupation, income, subjective size of community, and nationality. The dataset includes a number of constructed variables and indices such as opinion leadership, value orientation, typology of European attitudes, and socio-professional status.

### 1.2.2 Topic classification

- International Institutions
- Work and Industry
- Medicine

### 1.2.3 Related publications

- Commission of the European Communities: Europeans and Health and Safety at Work - A survey (Les Européens et la santé et la sécurité au travail). Brussels, 1992.
- Paoli, Pascal: First European Survey on the Work Environment 1991 - 1992. Dublin: European Foundation for the Improvement of Living and Working Conditions, 1992; Luxembourg: Office for Official Publications of the European Communities, 1992.

### 1.3 Universe

In all, Eurobarometer 35.A interviewed 12.819 citizens of the 12 countries in the European Union (6.324 from Eurobarometer 35.0, 6.495 from Eurobarometer 35.1). The samples of Eurobarometer 35.A are designed to be representative for the professionally active national population aged 15 years and over of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland) and in Germany (West and East Germany); Northern Ireland is not included in Eurobarometer 35.A.

### 1.4 Sampling procedure

A multi-stage sampling design was used for these Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes in the appropriate national language. The effective number of realized interviews in this round is indicated in table 1.

### 1.5 Fieldwork

The Eurobarometer 35.A datafile matches the results of questions A.1 to A.34 ('health and safety at work') asked in the framework of Eurobarometer surveys 35.0 and 35.1, plus a set of trend and background variables. Between March 4 and March 29 (35.0) and from March 28 to April 30 (35.1), 1991, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for these Eurobarometer, at the request of the "Survey, Research, Analysis" Unit of the Directorate General X, "Information, Communication and Culture", of the European Commission. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels.

## 1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English basic questionnaires for these Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

## 1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually

reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

**Eurobarometer 35.A** provides three (post-stratification) NATION WEIGHTS: WEIGHT RESULT FROM TARGET (NATION WEIGHT IIa) and WEIGHT ADJUSTED TO STANDARD SIZE (NATION WEIGHT IIb) for separate analysis or comparison of individual samples (countries or regions on sub-national level) and WEIGHT SPECIAL GERMANY (NATION WEIGHT III adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset (D.16, P.6, and P.7). Two variables containing condensed information were created by ZA for this Eurobarometer: NATION III, and P.7R (REGION II). ZA added variables D.1R, D.16, P.6 and P.7 which were not included in the matched data set 35.0+35.1 by the principal investigator (INRA).

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or coding is provided by INRA in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

The data file for this Eurobarometer is available from ZA with a single logical record of 270 columns per respondent. The machine-readable codebook (Portable Document Format) and SPSS control cards have also been prepared by ZA. These control cards contain formatting information as well as variable and value labels for all the variables in the collection and document cards for country-specific labelling and other remarks.

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

		Switzerland	CH	1000	standard and selected topical modules (EFTA)
		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

## 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.	Eurobarometer 67.1 - February-March 2007 GESIS Study No. 4529 (v3.0.1, <a href="http://dx.doi.org/doi:10.4232/1.10983">http://dx.doi.org/doi:10.4232/1.10983</a> )

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

## 5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - ARCHIVE STUDY ID - DISTRIBUTOR

Distributor Archive Study Number

Study number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
2033			12819	100.0	100.0
	Sum		12819	100.0	100.0
	Valid Cases		12819		

v2 - ARCHIVE STUDY ID - PRODUCER

ZA Study Number

Study number of the data set producer.

2033 The ZA has attached this as a unique data collection identification number.

v2

Value	Label	Missing	Count	Percent	Valid Percent
2033			12819	100.0	100.0
	Sum		12819	100.0	100.0
	Valid Cases		12819		

**v3 - EDITION NUMBER****ZA/ICPSR Edition Number**

The number identifying the release edition of this dataset.

2 2nd ZA edition (codebook edition release May 2000)

**Note:**

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
2	ZA CODEBOOK EDITION		12819	100.0	100.0
	Sum		12819	100.0	100.0
	Valid Cases		12819		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			12819	100.0	100.0
	Sum		12819	100.0	100.0
	Valid Cases		12819		

v4 - EUROBAROMETER NUMBER - SURVEY SPLIT

ZA/ICPSR Part Number

The number identifying the Eurobarometer sample.

- 1 Eurobarometer 35.0
- 2 Eurobarometer 35.1

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	EUROBAROMETER 35.0		6324	49.3	49.3
2	EUROBAROMETER 35.1		6495	50.7	50.7
	Sum		12819	100.0	100.0
	Valid Cases		12819		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA.

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

isocntry

Value	Label	Missing	Count	Percent	Valid Percent
BE			1029	8.0	8.0
DE-E			1354	10.6	10.6

PT			952	7.4	7.4
	Sum		12819	100.0	100.0
	Valid Cases		12819		

## v6 - NATION II (NORTHERN IRELAND NOT INCL)

Nation of interview II:

This variable identifies the E.C. nation in which the respondent was interviewed. A unique numeric code is assigned to each of the 12 E.C. countries including separate samples for East and West Germany.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 West Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland (not included)
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 East Germany

v6

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1093	8.5	8.5
2	BELGIUM		1029	8.0	8.0
3	NETHERLANDS		871	6.8	6.8
4	WEST GERMANY		1141	8.9	8.9

11	GREECE		868	6.8	6.8
12	SPAIN		938	7.3	7.3
13	PORTUGAL		952	7.4	7.4
14	EAST GERMANY		1354	10.6	10.6
	Sum		12819	100.0	100.0
	Valid Cases		12819		

v7 - WEIGHT\_A RESULT FROM TARGET

Weight Result from Target:

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn - with respect to the country's ACTIVE POPULATION.

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.

v8 - WEIGHT\_A ADJUSTED TO STANDARD SIZE

Weight Adjusted to Standard Size:

This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 500 (Luxembourg) cases.

## v9 - NATION III (UNITED GERMANY)

Nation of interview III:

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland (not included)
- 11 Greece
- 12 Spain
- 13 Portugal

v9

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		1093	8.5	8.5
2	BELGIUM		1029	8.0	8.0
3	NETHERLANDS		871	6.8	6.8
4	GERMANY (EAST+WEST)		2495	19.5	19.5
5	ITALY		936	7.3	7.3
6	LUXEMBOURG		492	3.8	3.8
7	DENMARK		1161	9.1	9.1
8	IRELAND		894	7.0	7.0
9	GREAT BRITAIN		1090	8.5	8.5
11	GREECE		868	6.8	6.8
12	SPAIN		938	7.3	7.3
13	PORTUGAL		952	7.4	7.4
	Sum		12819	100.0	100.0
	Valid Cases		12819		

v10 - WEIGHT\_A SPECIAL GERMANY

Weight Special Germany:

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size.

v11 - WEIGHT\_A EURO 6

European Weight 6:

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition. This weight includes the six EC founder-members (France, Belgium, The Netherlands, West Germany, Italy, and Luxembourg) including the national weighting for each sample and containing the adjustment to the standard size.

v12 - WEIGHT\_A EURO 10

European Weight 10:

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition. This weight excludes East Germany, Spain and Portugal. This weight includes national weighting for each sample and contains the adjustment to the standard size.

v13 - WEIGHT\_A EURO 12

European Weight 12:

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries as categorized by Nation I (V5). This weight excludes East Germany. This weight includes national weighting for each sample and contains the adjustment to the standard size.

v14 - WEIGHT\_A EURO 12 +

Weight Euro 12+:

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. The national weights for each sample are included.

Note:

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31 this weight contains the adjustment to the standard size.

## v15 - Q1 ELECTORAL REGISTER

Q.1

Are you ... (NATIONALITY) ?

(IF YES)

Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under present address, at another address or does not appear at all ?

(IF CODE 5: CLOSE INTERVIEW)

- 1 At present address
- 2 At another address
- 3 Don't know if registered
- 4 Does not appear at all
- 5 Is not ... (NATIONALITY)

Note:

Last trend: Q.1 in EB34.0

## v18 - Q4 VALUE ORIENTATION - POL GOALS 1ST

## Q.4

There is a lot of talk these days about what (OUR COUNTRY)'s goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority. Would you please say which one of them you yourself consider to be most important in the long run?

(SHOW CARD - ONE ANSWER ONLY)

## Q.4\_1

First choice

- 1 Maintaining order in the country
- 2 Give people more say in important government decisions
- 3 Fighting rising prices
- 4 Protecting freedom of speech
- 5 DK

## v23 - A1 WORK - BUSINESS-ACTIVITY (RECODED)

## A.1

What is the main business-activity of the establishment (factory, office ...) where you work?

(PROBE FOR DETAILED DESCRIPTION, USE THE LIST FOR CODING)

- 1 Agriculture and fishing
- 2 Energy/water / extraction and processing
- 3 Metal manufacture
- 4 Other manufacture industries
- 5 Building and civil engineering
- 6 Distributive trades, hotels, catering, repairs
- 7 Transport and communication
- 8 Banking and finance, insurance, business services
- 9 Other services including public administration

## Note:

Only grouped data have been made available by INRA. The recode is based on the nomenclature of economic activities in the European Union (NACE).

Questions A.1 to A.34 have originally been asked in the framework of Eurobarometer 35.0 and 35.1 in all countries except Northern Ireland and to respondents who declared to be professionally active (CODES 1 TO 12 IN D.17).

## v25 - A3 WORK - HOURS PER WEEK (RECODED)

## A.3

How many hours do you usually work per week ?

- 1 < 5 hours
- 2 6 - 10 Hours
- 3 11 - 15 Hours
- 4 16 - 20 Hours
- 5 21 - 25 Hours
- 6 26 - 30 Hours
- 7 31 - 35 Hours
- 8 36 - 40 Hours
- 9 41 - 45 Hours
- 10 46 - 50 Hours
- 11 51 - 55 Hours
- 12 56 - 60 Hours
- 13 61 - 65 Hours
- 14 66 Hours +

## Note:

Questions A.1 to A.34 have originally been asked in the framework of Eurobarometer 35.0 and 35.1 in all countries except Northern Ireland and to respondents who declared to be professionally active (CODES 1 TO 12 IN D.17).

## v152 - D13 AGE RECODED - 6 CATEGORIES

D.13R3 (Respondent's age recoded - six groups)

This variable collapses answers to D.13 into six age groups

- 1 15-24 (years)
- 2 25-34 (years)
- 3 35-44 (years)
- 4 45-54 (years)
- 5 55-64 (years)
- 6 65 and more (years)

v155 - D16 INCOME HH

D.16

We would like to analyse the survey results according to the income of the people we interviewed (SHOW INCOME CARD).

Here is an income scale; we would like to know in what group your family is, counting all wages, salaries, child allowances, pensions, and any other income that comes in. Just give me the letter of the group your household falls into before tax and other deductions.

0 NA

97 Refusal

98 DK

in France (FR):

France: French francs per month

- 1 Less than 4.000
- 2 4.000-4.999
- 3 5.000-5.499
- 4 5.500-5.999
- 5 6.000-6.999
- 6 7.000-7.999
- 7 8.000-8.999
- 8 9.000-9.999
- 9 10.000-10.999
- 10 11.000-12.499
- 11 12.500-14.999
- 12 15.000 or more

in Belgium (BE):

Belgium: Belgian francs per month

- 1 Less than 20.000
- 2 20.000-29.999
- 3 30.000-39.999
- 4 40.000-49.999
- 5 50.000-59.999
- 6 60.000-69.999
- 7 70.000-79.999
- 8 80.000-89.999
- 9 90.000-99.999
- 10 100.000-109.999
- 11 110.000-119.999
- 12 120.000 or more

in Netherlands (NL):

The Netherlands: Dutch guilders per month

- 1 Less than 1.500
- 2 1.500-1.749

- 3 1.750-1.999
- 4 2.000-2.249
- 5 2.250-2.499
- 6 2.500-2.749
- 7 2.750-3.249
- 8 3.250-3.749
- 9 3.750-4.249
- 10 4.250-5.249
- 11 5.250-6.250
- 12 6.250 or more

in Germany - West (DE\_W):

West Germany: German marks per month

- 1 Less than 1.500
- 2 1.501-1.750
- 3 1.751-2.000
- 4 2.001-2.250
- 5 2.251-2.500
- 6 2.501-2.750
- 7 2.751-3.000
- 8 3.001-3.500
- 9 3.501-4.000
- 10 4.001-4.500
- 11 4.501-5.000
- 12 5.001 or more

in Italy (IT):

Italy: Italian lire per month

- 1 Less than 750.000
- 2 750.00-1.000.000
- 3 1.000.001-1.500.000
- 4 1.500.001-1.750.000
- 5 1.750.001-2.000.000
- 6 2.000.001-2.500.000
- 7 2.500.001-3.000.000
- 8 3.000.001-3.500.000
- 9 3.500.001-4.000.000
- 10 4.000.001-4.500.000
- 11 4.500.001-5.000.000
- 12 5.000.001 or more

in Luxembourg (LU):

Luxembourg: Luxembourg francs per month

- 1 Less than 50.000
- 2 50.000-59.999
- 3 60.000-69.999
- 4 70.000-79.999

- 5 80.000-89.999
- 6 90.000-94.999
- 7 95.000-99.999
- 8 100.000-109.999
- 9 110.000-119.999
- 10 120.000-129.999
- 11 130.000-139.999
- 12 140.000 or more

in Denmark (DK):

Denmark: Danish kroner per year

- 1 Less than 70.000
- 2 70.000-99.999
- 3 100.000-129.999
- 4 130.000-169.999
- 5 170.000-199.999
- 6 200.000-239.999
- 7 240.000-269.999
- 8 270.000-299.999
- 9 300.000-349.999
- 10 350.000-399.999
- 11 400.000-449.999
- 12 450.000 or more

in Ireland (IE):

Ireland: Irish pounds per month

- 1 less than 240
- 2 240-319
- 3 320-399
- 4 400-479
- 5 480-599
- 6 600-729
- 7 730-829
- 8 830-999
- 9 1.000-1.149
- 10 1.150-1.664
- 11 1.665-2.000
- 12 2.000 and over

in Great Britain (GB\_GBN):

Great Britain: U.K. pounds per month

- 1 less than 240
- 2 240-319
- 3 320-399
- 4 400-479
- 5 480-599
- 6 600-729

- 7 730-829
- 8 830-999
- 9 1.000-1.149
- 10 1.150-1.664
- 11 1.665-2.000
- 12 2.000 and over

in Greece (GR):

Greece: Greek drachmas per month

- 1 Less than 40.000
- 2 40.001-60.000
- 3 60.001-80.000
- 4 80.001-100.000
- 5 100.001-120.000
- 6 120.001-140.000
- 7 140.001-160.000
- 8 160.001-180.000
- 9 180.001-200.000
- 10 200.001-240.000
- 11 240.001-280.000
- 12 280.001 or more

in Spain (ES):

Spain: Spanish pesetas per month

- 1 Less than 40.000
- 2 40.001-50.000
- 3 50.001-60.000
- 4 60.001-70.000
- 5 70.001-80.000
- 6 80.001-90.000
- 7 90.001-100.000
- 8 100.001-125.000
- 9 125.001-150.000
- 10 150.001-175.000
- 11 175.001-200.000
- 12 200.001 or more

in Portugal (PT):

Portugal: Portuguese escudos per month

- 1 Less than 30.000
- 2 30.000-39.999
- 3 40.000-49.999
- 4 50.000-54.999
- 5 55.000-59.999
- 6 60.000-69.999
- 7 70.000-79.999
- 8 80.000-99.999

- 9 100.000-109.999  
 10 110.000-119.999  
 11 120.000-129.999  
 12 130.000 or more

in Germany - East (DE\_E):

East Germany: German marks per month

- 1 Less than 750  
 2 751-1.000  
 3 1.001-1.250  
 4 1.251-1.500

v157 - D17 OCCUPATION OF RESPONDENT

D.17

What is your Occupation?

(WRITE IN AND CODE)

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, etc...)
- 4 Owners of shops or companies, craftsmen, business proprietors

EMPLOYED

- 5 Employed professional (employed lawyer, medical practitioner, accountant)
- 6 General management
- 7 Middle management
- 8 Other office employees
- 9 Non-office employees, non manual workers (shop assistants, etc...)
- 10 Supervisors
- 11 Skilled manual worker
- 12 Other manual worker

WITHOUT PAID WORK (not included)

- 13 Retired
- 14 Housewife not otherwise employed
- 15 Student
- 16 Military service
- 17 Temporarily not working, unemployed

Note:

Note that only CURRENTLY WORKING respondents from surveys 35.0 & 35.1 have been included in the matched data set 35.A.

Last trend: D.17 in EB34.0

## v169 - D29 RELIGION CHURCH ATTENDANCE

D.29

TO THOSE WITH CODE 1 TO 4 ON D.28

Do you attend religious services several times a week, once a week, a few times a week, once a year or less or never?

(ONE ANSWER ONLY)

- 0 NA
- 1 Several times a week
- 2 Once a week
- 3 A few times a year
- 4 Once a year or less
- 5 Never
- 6 DK
- 9 INAP. (not coded 1 to 4 in V168)

v178 - P6 SIZE OF COMMUNITY

P.6 (Objective) Size of Locality (Population Size)

in France (FR):

- 1 Less Than 2000 Inhabitants
- 2 2.000-20.000
- 3 20.001-100.000
- 4 More Than 100.000
- 5 Paris

in Belgium (BE):

- 1 Grand Centre
- 2 Localite Urbaine
- 3 Localite Secondaire
- 4 Autre Localite

in Netherlands (NL):

- 1 Less Than 5.000 Inhabitants
- 2 5.000-10.000
- 3 10.000-20.000
- 4 20.000-50.000
- 5 50.000-100.000
- 6 100.000-400.000
- 7 More Than 400.000

in Germany - West (DE\_W):

- 1 Less Than 2.000 Inhabitants
- 2 2.000-4.999
- 3 5.000-19.999
- 4 20.000-49.999
- 5 50.000-99.999
- 6 100.000-499.999
- 7 500.000 And More

in Italy (IT):

- 1 Up To 10.000 Inhabitants
- 2 10.001-100.000
- 3 100.001-250.000
- 4 More Than 250.000

in Luxembourg (LU):

- 1 Up To 2.500 Inhabitants
- 2 2.501-5.000
- 3 5.001-10.000

- 4 10.001-20.000
- 5 20.001-50.000
- 6 More Than 50.000 - Luxembourg Ville

in Denmark (DK):

- 1 Less Than 2.000 Inhabitants
- 2 2.000-4.999
- 3 5.000-9.999
- 4 10.000-19.999
- 5 20.000-49.999
- 6 50.000-99.999
- 7 100.000 And More

in Ireland (IE):

- 1 Less Than 2.000 Inhabitants
- 2 2.000-20.000
- 3 20.001-100.000
- 4 More Than 100.000

in Great Britain (GB\_GBN):

- 1 Metropolitan
- 2 Other 100% Urban
- 3 Mixed Urban-rural
- 4 Rural

in Greece (GR):

- 1 Up To 2.000 Inhabitants
- 2 2.001-10.000
- 3 10.001-50.000
- 4 50.001-1.000.000
- 5 1.100.001 and More

in Spain (ES):

- 1 Up To 2.000 Inhabitants
- 2 2.001-10.000
- 3 10.001-50.000
- 4 50.001-100.000
- 5 100.001-300.000
- 6 300.001-500.000
- 7 500.001-1.000.000
- 8 More Than 1.000.000

in Portugal (PT):

- 1 Less Than 100 Inhabitants
- 2 101-200
- 3 201-500
- 4 501-1.000

- 5 1.001-2.000
- 6 2.001-5.000

- 13 South: Molise e Abruzzi
- 14 South: Campania
- 15 South: Puglia
- 16 South: Basilicata
- 17 South: Calabria
- 18 Islands: Sicilia
- 19 Islands: Sardegna

in Luxembourg (LU):

- 1 Centre (Center)
- 2 Sud (South)
- 3 Nord (North)
- 4 Est (East)

in Denmark (DK):

- 1 Hovedstadsområdet (Copenhagen area)
- 2 Sjælland, Lolland-Falster Bornholm (excl. Hovedstadsområdet)
- 3 Fyn
- 4 Jylland

in Ireland (IE):

Eurostat NUTS II Level

- 1 Donegal
- 2 North West (Sligo/Leitrim)
- 3 North East (Cavan/Monaghan/Louth)
- 4 West (Mayo/Galway)
- 5 Midlands (West Meath/Roscommon/Longford/Laois/Offaly)
- 6 East (Dublin/Meath/Kildare/Wicklow)
- 7 Mid West (Limerick/Clare/Tipperary North Riding)
- 8 South East (Waterford/Wexford/Carlow/Kilkenny/Tipperary South Riding)
- 9 South West (Kerry/Cork)

in United Kingdom (GB):

Eurostat NUTS II Level

- 1 Cleveland, Durham
- 2 Cumbria
- 3 Northumberland, Tyne and Wear
- 4 Humberside
- 5 North Yorkshire
- 6 South Yorkshire
- 7 West Yorkshire
- 8 Derbyshire, Nottinghamshire
- 9 Leicestershire, Northamptonshire
- 10 Lincolnshire
- 11 East Anglia
- 12 Bedfordshire, Hertfordshire
- 13 Berkshire, Buckinghamshire, Oxfordshire
- 14 Surrey, East/West Sussex
- 15 Essex
- 16 Greater London
- 17 Hampshire, Isle of Wight
- 18 Kent
- 19 Avon, Gloucestershire, Wiltshire
- 20 Cornwall, Devon
- 21 Dorset, Somerset
- 22 Hereford and Worcester, Wiltshire
- 23 Shropshire, Staffordshire
- 24 West Midlands (County)
- 25 Cheshire
- 26 Greater Manchester
- 27 Lancashire
- 28 Merseyside
- 29 Clwyd, Dyfed, Gwynedd, Powys
- 30 Gwent, Mid-S-W Glamorgan
- 31 Borders, Central, Fife, Lothian, Tayside
- 32 Dumfriesshire, Strathclyde
- 33 Highlands, Islands
- 34 Grampian

in Greece (GR):

Eurostat NUTS II Level - modified

- 1 Kentriki kai dytiki
- 2 Thessalia
- 3 Anatoliki makedonia
- 4 Thraki
- 5 Anatoliki Sterea kai Nissia
- 6 Peloponnisos kai Dytiki Sterea
- 7 Ipeiros
- 8 Kriti
- 9 Nisia Anatolikou Aigaiou

in Spain (ES):

Eurostat NUTS II Level

- 1 Andalusia
- 2 Aragon
- 3 Asturias
- 4 Balears
- 5 Canarias
- 6 Cantabria
- 7 Castilla - Leon
- 8 Castilla - La Mancha
- 9 Catalunya
- 10 Extremadura

v180 - P7R REGION II

P.7R Region II

99 INAP. (Region II not available)

in France (FR):

Eurostat NUTS I Level

- 1 Ile de France
- 2 Bassin Parisien
- 3 Nord-pas de Calais
- 4 East
- 5 West
- 6 South West
- 7 Centre East
- 8 Mediterranee

in Belgium (BE):

Eurostat NUTS I Level (Regions)

- 1 Wallonie
- 2 Bruxelles
- 3 Vlaanderen

in Netherlands (NL):

Eurostat NUTS I Level (Landsdelen)

- 1 North
- 2 East
- 3 West
- 4 South

in Germany - West (DE\_W):

Eurostat NUTS I Level (Bundeslaender)

- 1 Schleswig Holstein
- 2 Hamburg
- 3 Niedersachsen
- 4 Bremen
- 5 Nordrhein - Westfalen
- 6 Hessen
- 7 Rheinland Pfalz
- 8 Baden Wuerttemberg
- 9 Bayern
- 10 Saarland
- 11 Berlin (West)

in Italy (IT):

Eurostat NUTS I Level (Gruppi di regioni)

- 1 North West
- 2 Lombardia
- 3 North East
- 4 Emilia Romagna
- 5 Centre
- 6 Lazio
- 7 Molise e Abruzzi
- 8 Campania
- 9 South
- 10 Sicilia
- 11 Sardegna

in Ireland (IE):

- 1 Dublin
- 2 Rest of Leinster
- 3 Munster
- 4 Connaught/Ulster

in Great Britain (GB\_GBN):

Eurostat NUTS I Level - modified (Standard Regions)

- 1 Scotland
- 2 North, Yorkshire, Humberside and North West
- 3 East and West Midlands, East Anglia
- 4 Wales
- 5 GLC (coded 12 through 18 in V179)
- 6 South East and South West

in Spain (ES):

- 1 Galicia
- 2 North
- 3 North-East
- 4 Aragon, Rioja
- 5 Madrid
- 6 Centre
- 7 Cataluna
- 8 East
- 9 South
- 10 Canarias

in Germany - East (DE\_E):

Eurostat NUTS I Level

- 11 Berlin (Ost)
- 12 Brandenburg
- 13 Mecklenburg-Vorpommern
- 14 Sachsen
- 15 Sachsen-Anhalt
- 16 Thuringen

## Note:

Only in the case of West Germany "Region II" corresponds to the variable "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be coded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

v181 - C1 OPINION LEADERSHIP INDEX

C.1 Opinion Leadership Index

- 0 NA (Coded 0 or 5 for V16 and 0 or 4 for V17)
- 1 -- low (Coded 3 or 4 for V16 and 3 for V17)
- 2 - (Coded 3 or 4 for V16 and 2, 4, or 0 for V17; or coded 1, 2, 0 or 5 V16 and 3 for V17)
- 3 + (Coded 3, 4, 5, or 0 for V16 and 1 for V17; or coded 1 or 2 for V16 and 2, 4, or 0 for V17; or coded 0 or 5 for V16 and 2 for V17)
- 4 ++ high (Coded 1 or 2 for V16 and 1 for V17)

Derivation:

Cognitive mobilization index is based on the answers to the following two questions:

(Q.2/V16) "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" AND

(Q.3/V17) "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?"

Labels are: ++, +, -, --.

Interviewees giving affirmative answers to both questions are labeled ++.

Interviewees giving negative answers to both questions are labeled --.

Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process.

For a complete discussion of this variable and its correlates, see Ronald Inglehart, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977), Chapter 11.

Note:

This variable is labeled the Opinion Leadership Index in the codebooks for Euro-Barometers 3, 4, 5, and 6.

v182 - C2 VALUE ORIENTATION POST-MATERIALISM

C.2 Value Orientation (Materialist/Post-materialist values index)

0 NA (Coded 0 or 5 for V18 and 0 or 5 for V19)

1 Materialist - coded 1 for V18 and 3 for V19; or coded 3 for V18 and 1 for V19

2 Mixed - coded 1 or 3 for V18 and 2 or 4 for ; or coded 2 or 4 for V18 and 1 or 3 for V19; or coded 0 or 5 for V18 and 1, 2, 3, or 4 for V19; or coded 1, 2, 3, or 4, for V18 and 0 or 5 for V19; or coded the same in value in both V18 and V19

3 Post materialist - coded 2 for V18 and 4 for V19; or coded 4 for V18 and 2 for V19

Derivation:

This index was constructed from responses to Q.4\_1/V18 and Q.4\_2/V19: "There is a lot of talk these days about what this country's goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority (show card). Would you please say which of them you yourself consider most important in the long run?" (one answer only) "And what would be your second choice?"

Card: (1) Maintaining order in the nation

(2) Giving the people more say in important government decisions

(3) Fighting rising prices

(4) Protecting freedom of speech

Respondents combining item (1) and (3) are labeled "materialist",

Those combining items (2) and (4) are labeled "post-materialist"

Respondents combining items (1) and (1) or (3) and (3) are labeled "materialist",

Respondents combining items (2) and (2) or (4) and (4) are labeled "post-materialist", and

Others are labeled "mixed."

For a complete discussion of this variable, see Ronald Inglehart, the SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977).

## v183 - C3 TYPOLOGY OF EUROPEAN ATTITUDES

## C.3 Typology of European Attitudes

0 DK / NA (coded 0 or 4 for V21 and 0 or 5 for V20)

1 Positive (attitudes - coded 1 for V21 and either 1 or 2 for V20)

2 Ambivalent (attitudes - coded either 0, 2, or 3 for V21 and either 1 or 2 for V20; or coded either 0, 1, or 2 for V21 and either 3 or 4 for V20)

3 Negative (attitudes - coded 3 for V21 and either 3 or 4 for V20)

## Derivation:

This variable was constructed from responses to questions Q.6/V21 and Q.5/V20:

"Generally speaking, do you think that (your country's) membership of (in) the European Community is: good thing; bad thing; neither good nor bad?" (= MEMBERSHIP) and "In general, are you for or against efforts being made to unify Western Europe? are you... for very much; for, to some extent; against, to some extent; against, very much?" (=UNIFICATION). Positive Attitudes: MEMBERSHIP "Good" and UNIFICATION "For...". Ambivalent Attitudes: MEMBERSHIP "Neither good nor bad" or MEMBERSHIP "Good" + UNIFICATION "Against..." or MEMBERSHIP "Bad" and UNIFICATION "For..." or DK/NA or MEMBERSHIP: "No answer" + UNIFICATION "No answer".

Negative Attitudes = MEMBERSHIP: "Bad" + UNIFICATION: "Against...".

v184 - C4 OCCUPATION RECODED - SOC PROF STATUS

C.4 - Socio Professional Status

- 0 NA
- 1 Farmer and fisher
- 2 Professionals
- 3 Shop / company owners
- 4 Employed professionals
- 5 General management
- 6 Middle management
- 7 Other office employees
- 8 Non office employees
- 9 Supervisors
- 10 Skilled manuals
- 11 Other manuals

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.17) would exclude half of the respondents from analysis. An alternative, also used in past Euro-barometer reports, is to base analyses on a (non-Marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio- professional setting, a new classification was created called "socio-professional status."

The following standards were used:

For those in paid work (D.17), it is based on their own present occupation.

Note that only CURRENTLY WORKING respondents from surveys 35.0 & 35.1 have been included in the matched data set 35.A; consequently the present index is only based on V157; the original index has been recoded accordingly by ZA and all following instructions are not applied.

For those not in paid work, "former occupation" (D.18) was used, if applicable (retired, housewives having been in paid work in the past, temporarily not working, unemployed).

For those never having been in paid work, "occupation of the head of household" (D.23) was used. If the head of household was not in paid work at the time of the interview, his or her "former occupation" (D.24) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses.

## v185 - ORIGINAL INRA COUNTRY ID

Original Country Identification Number

This is the original country identification number as supplied by INRA. Crosstabulations in the codebook are based on the recoded standard country ID variable V6.

- 1 Belgium
- 2 Denmark
- 3 West Germany
- 4 Greece
- 5 Italy
- 6 Spain
- 7 France
- 8 Ireland
- 10 Luxembourg
- 11 Netherlands
- 12 Portugal
- 13 Great Britain
- 14 East Germany
