Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the Commission of the European Communities, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys had for its major focus issues involving drugs, alcohol, cancer, and the Single European Market. Respondents were asked to consider the influence of the environment, the anticipated effects of the Single Market of 1992, and the repercussions of an aging population on public health. Moreover, respondents were asked to identify and prioritize the most serious health problems facing the European Community, and also to evaluate the various efforts being made to combat these problems. Health topics addressed included drugs and drug addiction, cancer, smoking, alcoholism, AIDS, cardiovascular disease, education, diet, and vaccinations. Other major questions involved additional effects of the Single European Market of 1992, and whether certain issues of public policy should be decided by national governments or jointly within the European Community. Also, the survey gauged respondents' perceptions of the European Parliament and the Commission of the European Communities, along with categorizing opinion on the Soviet Union and President Gorbachev, the United States and President Bush, the role and relevance of NATO, U.S. military presence in Western Europe, and the possibility of economic cooperation with Poland and Hungary. Respondents were also asked to give examples of why they felt the United Nations was doing either a good or a poor job in solving the problems it had to face, to name various agencies and institutions that were part of the United Nations, and to identify the Secretary General of the United Nations. Respondents were queried regarding their source of information and education on the United Nations, and were asked to indicate their level of interest in receiving more information on pertinent United Nations issues.

As in previous Eurobarometers, questions on political party preference asked respondents which party they felt the closest to, how they voted in their country's last general election, how they would vote if a general election were held tomorrow, and, if not sure, which party they would be most inclined to vote for. Respondents were also asked to comment on the ideal number of children a family should have, factors influencing the number of children parents decide to have, the role of the family in society, and what government can do to improve life for families. Other items included life satisfaction, use of and attitudes toward dairy products, interest in politics, priority of national goals, political party membership, and union membership. Additional information was gathered on family income, number of people residing in the home, size of locality, region of residence, occupation of the head of household, and the respondent's age, sex, occupation, education, religion, religiosity, subjective social class standing, socio-professional status, and left-right political self-placement. Two questionnaires, Form A and Form B, were used in the survey. The Form A questionnaire comprised almost all of the questions asked by Eurobarometer 32. Form B contained a subset of the questions in Form A, plus some additional questions. A questionnaire synopsis is annexed to the basic English questionnaire.

1.2.2 Topic classification

1.3 Universe

The samples of Eurobarometer 32 are designed to be representative for the national population aged 15 years and over of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland).

1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community [EUROSTAT] regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization.

In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random.

In some countries, such as Great Britain, Republic of Ireland, and Luxembourg, respondents were randomly selected from electoral registers.

In each household, a respondent was selected by a random procedure, such as the first birthday method or the KISH grid method. Up to two recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes.

The regular sample size (in the sense of completed interviews) is 2000 respondents per country, except the United Kingdom with separate samples for Great Britain (2000) and Northern Ireland (600), respectively Luxembourg (600). Two questionnaires, form A and form B, were used in this survey. Each was administered to one half of the respondents, i.e. only those questions included in both forms (Form A: Q.88 to Q.163 correspond to Form B: Q.53 to Q.128) were asked to the total number of respondents. Questions only included in one of the forms were only asked to the usual sample of 1000 respectively 300 respondents. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From October 16 through November 22, 1989, International Research ASSOCIATES OF EUROPE (INRA (EUROPE)) CARRIED OUT THE FIELDWORK for this Eurobarometer, at the request of the Survey, Research, Analysis Unit of the Directorate General X, Information, Communication and Culture, of the Commission of the European Communities. INRA (Europe) is a European network of market and public opinion research agencies, coordinated by the European Co-ordination Office (ECO), Avenue R. Vandendriessche 18, B-1150 Brussels. In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

1.6 Mode of data collection

All interviews were carried out face-to-face in people's homes in the respective national languages. INRA (Europe) developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

1.7 Weighting

In general the Eurobarometer datasets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

The **post-stratification weight**, also referred to as redressment or non-response weight, carries out comparisons between the sample composition and a proper universe description with respect to selected attributes such as sex, age or region. The availability of this weight over time and for individual countries is documented in table 2. Until Eurobarometer 31A the corresponding variable is labelled NATION WEIGHT II. Only starting with Eurobarometer 32 post-stratification weights are available continuously and for all samples.

Until Eurobarometer 6 underrepresented rural cases for FRANCE are duplicated; duplicate case indicators (weights) are only available for ECS1970, ECS1971 and Eurobarometer 2. In ECS1971 and ECS1973 a special weighting factor for the NETHERLANDS indicates the number of times that a case is duplicated in the Dutch part of the dataset; the duplication scheme is not documented.

The **population size weighting** factor corrects for the fact that sample sizes do not depend on how large or small the populations are from which they are drawn.

The NATION WEIGHT I (or UK weight) ensures that both samples, Great Britain and Northern Ireland, are represented in proportion to its population size within the United Kingdom as a whole. Starting with Eurobarometer 19 the UK weight also includes the available post-stratification weighting factors for other countries.

The EUROPEAN WEIGHT adjusts each sample in proportion to its share in the total population, aged 15 and over, of the European Community as a whole in its respective composition. Only starting with Eurobarometer 7 the EUROPEAN WEIGHT includes the available post-stratification weighting factors. Starting with Eurobarometer 32 former states in the enlargement process are also considered (EU6, EU10).

The post-stratification weights are at the users' disposal for descriptive (univariate) analysis. Population size weighting is required to obtain meaningful descriptive results for the United Kingdom or the European Community as a whole. For multivariate analysis weighting is not recommended. Official Eurobarometer reports are based on weighted data.

The YOUTH OVERSAMPLES* in Eurobarometer 17 and 28.1 are weighted separately and across ALL samples as documented in the respective study and weight variable description.

Eurobarometer 32 provides only one (post-stratification) NATION WEIGHT which corresponds to WEIGHT SPECIAL UNITED KINGDOM for comparison of individual countries and adjusting the British and the Northern Irish samples to their respective proportions in the United Kingdom. There is no post-stratification weighting factor which could be applied for descriptive analysis of Great Britain and Northern Ireland separately.

The two EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the

total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (EU10 and EU12). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ICPSR from INRA (Europe) were checked for missing and duplicate records, and for illegal (wild) codes. Errors discovered by these procedures were not corrected but were noted in this codebook. Complete machine-readable documentation was also created for this dataset by ICPSR.

To facilitate analyses of the data, ICPSR created new variables which consolidate information dispersed over two or more variables in the original INRA (Europe) dataset. In all, eight variables containing condensed information were created by ICPSR for this Eurobarometer: NATION II, REGIONS, INCOME SCALE, UNION MEMBERSHIP, and the four party preference variables: PARTY PREFERENCE, VOTE INTENTION, VOTE PROBE, and PARTY LAST VOTE. Users should be aware that ICPSR's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

In addition, some "Inappropriate" codes were added by ICPSR to indicate questions not asked on Form A or Form B.

Users should also note that on occasion the number of responses to a particular question may exceed the maximum indicated in the interviewer instructions.

Question text and contingency text appearing in this machine-readable codebook are taken from INRA's (Europe) English language version of the questionnaire. Coding schemes and other documentation are based on INRA's (Europe) English language version of the questionnaire and INRA's (Europe) codebook (in French). Whenever a discrepancy occurs between INRA's (Europe) codebook and its English language questionnaire as to the coding scheme of a variable, the former is followed by ICPSR in its documentation.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brêthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 3: EU enlargement and countries covered by Standard and Special Eurobarometer

		Switzerland	CH	1000	standard and selected topical modules (EFTA)
		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1

Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																						
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																						

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - ICPSR/ZA STUDY NUMBER

ARCHIVE (ICPSR) Study Number

The involved Archive has attached this number as a unique data collection identification number

v1

Value	Label	Missing	Count	Percent	Valid Percent
1752			23397	100.0	100.0
	Sum		23397	100.0	100.0
	Valid Cases		23397		

v2 - ICPSR EDITION NUMBER

ICPSR Edition Number

The number identifying the release edition of the data collection.

2 March, 1992 release

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v2

Value	Label	Missing	Count	Percent	Valid Percent
2	2ND EDITION (RELEASE 04-06-2007)		23397	100.0	100.0
	Sum		23397	100.0	100.0
	Valid Cases		23397		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.1.0 adds the crosstabulation variable ISOCNTRY and the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.1.0 (2012-07-01)			23397	100.0	100.0
	Sum		23397	100.0	100.0
	Valid Cases		23397		

v3 - ICPSR PART NUMBER

ICPSR Part Number

- 1 The entire data collection is contained in one part

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	PART ONE		23397	100.0	100.0
	Sum		23397	100.0	100.0
	Valid Cases		23397		

v4 - ID - ICPSR SEQUENTIAL NUMBER

ICPSR Sequential Case Identification Number

The ICPSR has attached a sequential identification number to every case. This number uniquely identifies each record in the data collection.

Note:

Actual number is coded.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

In the case of Eurobarometer 32 in the crosstabulation variable ISOCNTRY the British and Northern Irish samples are coded together as "GB" (United Kingdom) in accordance with NATION WEIGHT variable which does not distinguish between Great Britain and Northern Ireland, i.e. does not weight both samples separately.

isocntry

Value	Label	Missing	Count	Percent	Valid Percent

v5 - NATION I (UNITED KINGDOM)

Nation of interview

This variable identifies the European Community nation where the respondent was interviewed. A unique numeric code is assigned to each of the 12 European Community countries.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal

v5

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		2000	8.5	8.5

v6 - NATION WEIGHT

Nation Weight

This variable contains national (within-country) weights for all of the European Community member nations. It adjusts the British and Northern Ireland samples to their respective proportions in the United Kingdom . This weight variable should be used whenever the United Kingdom is to be analyzed as a whole and if any of the other countries are to be analyzed separately.

Note:

Actual number is coded.

v7 - NATION II(GB AND NORTHERN IRELAND)

Nation of interview with two codes for the United Kingdom

This variable identifies the E.C. nation in which the respondent was interviewed, plus two areas of the U.K.: Great Britain and Northern Ireland

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal

v7

Value	Label	Missing	Count	Percent	Valid Percent
1	FRANCE		2000	8.5	8.5

	Sum		23397	100.0	100.0
	Valid Cases		23397		

v8 - EURO WEIGHT I

EURO WEIGHT I

This is a weight variable which adjusts each national sample in proportion to its nation's share in the total population of the 12 European Community member countries. EURO WEIGHT I also incorporates the within-country weighting information contained in NATION WEIGHT. It should be used when analyzing the European Community member countries as a whole.

Note:

Actual number is coded.

v9 - EURO WEIGHT II

EURO WEIGHT II

This is a weight variable which adjusts each national sample in proportion to its nation's share in the total population of the 10 European Community member countries that made up the European Community prior to the addition of Spain and Portugal (Spain and Portugal are weighted 0). It can be used for analyses on these 10 countries taken as a whole.

Note:

Actual number is coded.

v10 - ELECTORAL REGISTER

Q.1

Are you ... (NATIONALITY)?

(IF YES)

Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under your present address, at another address or does not appear at all?

- 1 At present address
- 2 At another address
- 4 Does not appear at all
- 6 DK
- 9 Not ascertained

v51 - EUROPEAN UNIFICATION VS NATIONL IDENTITY

Q.18

There is a lot of talk about what the countries in the European Community have in common and what distinguishes them from one another.

(SHOW CARD Q18 OF OPINIONS AND THE SEVEN POINTS)

Some say

(A): If one day the countries of Europe were truly united, this would mark the end of our national, historic, cultural identity and our national economic interests would be sacrificed.

Others say

(B): The only way of protecting our national, historic, cultural identities and our national economic interests against challenges posed by the great world powers is for the countries of Europe to become truly united.

Do you feel closer to the first or the second of these opinions?

Choosing 1 means that you fully agree with A, choosing 7 means that you fully agree with B.

The bars (values) in between allow you to say how close you are to the one or the other opinion.

v994 - CARDIOVASC DISEASE FACTORS: LT PH ACTIV

Q.88

Another topic which is currently being widely discussed is CARDIOVASCULAR DISEASES, that is, diseases of the heart and blood vessels.

Many factors have been put forward as being likely to bring about or speed up the development of such diseases.

(SHOW CARD Q88)

For each of the factors of the card, please tell me whether you consider it to be a common, occasional or rare cause of these diseases?

Q.88_7 Too little physical activity

- 1 Common
- 2 Occasional
- 3 Rare
- 4 DK
- 9 Not ascertained

v1040 - DRUG ADDICTS DESCR: DK

Q.98

Drug addicts may be viewed in a variety of ways. Here are some terms which have been used to describe them.

(SHOW CARD Q98)

In your opinion, which of them best describes a drug addict (by that I mean someone who depends on a drug, he or she cannot do without)? And what else?

(2 ANSWERS ONLY)

v1296 - VOTE INTENTION

D.4

ASK ALL

If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?

in France (FR):

- 0 No answer
- 5 PSU et extreme gauche (Lutte ouvriere) (Unified Socialists and extreme left (Workers Struggle))
- 10 Parti communiste (Communist Party)
- 20 Parti socialiste (Socialist Party)
- 30 MRG (Left Radicals)
- 50 Ecologistes (Ecologists)
- 60 RPR (Rally for the Republic/Gaullist party)
- 70 PR/UDF (Union for French Democracy: Republican)
- 71 CDS/UDF (Union for French Democracy: Democratic)
- 72 Radical UDF (Union for French Democracy: Radical)
- 80 Front National et Extreme Droite (National Front and extreme right)
- 90 Other party
- 95 Would vote blank
- 96 Would not vote
- 98 DK

in Belgium (BE):

- 0 No answer
- 10 PCB/KP (Communist Party)
- 20 PS (Socialist Party-French)
- 21 SP (Socialist Party-Flemish)
- 41 PVV (Liberal Party-Flemish)
- 50 Volksunie (People's Union)
- 51 FDF/RW (Francophone Front/Walloon Union)
- 52 Vlaams blok (Flemish bloc)
- 53 PRL (Party of Reforms and Liberty)
- 55 Ecologiste
- 56 Agalev
- 60 PSC (Christian Socialists-French)
- 61 CVP (Christian Socialists-Flemish)
- 80 URDT-RAD
- 90 Other party
- 95 Would vote blank
- 96 Would not vote
- 98 DK

in Netherlands (NL):

- 0 No answer
- 17 Groen Links (PPR, PSP, CPN, EVP)
- 20 PVDA (Labor Party)
- 22 D'66 (Democrats '66)
- 57 CD-Centrum democraten (Democratic Center).
- 63 CDA (Christian Democratic Appeal)
- 70 VVD (Liberal Party)
- 81 SGP (Calvinist State Party)
- 82 GPV (Calvinist Political Alliance)
- 84 RPF (Reformist Political Federation)
- 90 Other Party
- 95 Would vote blank
- 96 Would not vote
- 98 DK

in Germany - West (DE_W):

- 0 No answer
- 10 DKP (Communist Party)
- 20 SPD (Social Democratic Party)
- 40 FDP (Free Democratic Party)
- 50 Die Grunen (The Greens)
- 60 CDU/CSU (Christian Democratic Party)
- 80 NPD (National Democratic Party)
- 81 Die Republikaner (Republican)
- 90 Other party
- 95 Would vote blank
- 96 Would not vote
- 98 DK

in Italy (IT):

- 0 No answer
- 4 DP (Proletarian Democracy)
- 5 PR (Radicali) (Radicals)
- 9 Sinistra indipendente
- 10 PCI (Communist Party)
- 20 PSI (Socialist Party)
- 30 PSDI (Social Democratic Party)
- 31 Partito Sardo d'azione
- 40 PRI (Republican Party)
- 50 Verdi (Lista verde) (Greens)
- 55 Lega lombarda
- 60 DCI (Christian Democrats)
- 70 PLI (Liberal Party)
- 80 MSI (Social Movement-National Right)
- 90 Other party
- 95 Would vote blank
- 96 Would not vote

98 DK
99 Not ascertained

in Luxembourg (LU):

0 No answer
10 KP (Communist Party)
20 LSAP (Socialist Party)
50 Ecologistes (Ecologists)
60 CSV (Christian Socialists)
70 DP (Liberal)
90 Other Party
95 Would vote blank
96 Would not vote
98 DK
99 Not ascertained

in Denmark (DK):

0 No answer
5 Venstresocialister (Socialist Left)
10 Denmarks Kommunistiske Parti (Communist Party)

v1316 - INCOME HH

D.16

We would like to analyze the survey results according to the income of the people we interviewed.

(SHOW INCOME CARD D.16)

Here is an income scale; we would like to know in what group your family is, counting all wages, salaries, children allowances, pensions and any other income that comes in. Just give me the (number) of the group your household falls into before tax and other deductions.

in France (FR):

French francs per month

- 0 DK
- 1 Less than 3,000
- 2 3,000-3,999
- 3 4,000-4,999
- 4 5,000-5,499
- 5 5,500-5,999
- 6 6,000-6,999
- 7 7,000-7,999
- 8 8,000-8,999
- 9 9,000-9,999
- 10 10,000-12,499

v1317 - INCOME HH - QUARTILES

D.16R Respondent's household income - approximate quartiles

- 1 (Highest income quartile)
- 2 (Next to highest income quartile)
- 3 (Next to lowest income quartile)
- 4 (Lowest income quartile)
- 5 DK/refusal
- 9 Not ascertained

Derivation:

This variable collapses answers to D.16 into four groups representing approximate quartiles

v1330 - RELIGION - DENOMINATION

D.28

Do you consider yourself as belonging to a particular religion?

(IF YES)

Which one?

- 1 Roman catholic
- 2 Protestant
- 3 Orthodox (NL: Gereformeerd)
- 4 Jewish
- 5 Muslim
- 6 Buddhist
- 7 Hindu
- 8 Other
- 9 None
- 10 DK
- 98 Inap., not asked in Form B
- 99 Not ascertained

Note:

RELIGIOUS DENOMINATION is documented as "Orthodox" for code '3' in the original Eurobarometer codebooks and basic questionnaires starting with survey number 32. This is not correct in the case of the Netherlands. Dutch respondents have been asked for the Protestant section "Gereformeerd" in the place of "Orthodox". Corrected in the ZA codebooks for deliveries after March 16, 1999.

v1337 - SIZE OF COMMUNITY (OBJECTIVE)

P.6 (Objective size) Size of locality (population size)

in France (FR):

- 1 Less than 2,000
- 2 2,000-less than 20,000
- 3 20,001-less than 100,000
- 4 100,000 and over
- 5 Paris
- 99 Not ascertained

in Belgium (BE):

- 1 Grand centre
- 2 Localite' urbaine
- 3 Localite' secondaire
- 4 Autre localite'

in Netherlands (NL):

- 1 400,000 and over
- 2 100,000-less than 400,000
- 3 50,000-less than 100,000
- 4 20,000-less than 50,000
- 5 10,000-less than 20,000
- 6 5,000-less than 10,000
- 7 Less than 5,000

in Germany - West (DE_W):

- 1 Less than 2,000
- 2 2,000-5,000
- 3 5,000-20,000
- 4 20,000-50,000
- 5 50,000-100,000
- 6 100,000-500,000
- 7 500,000 and over

in Italy (IT):

- 1 Less than 10,000
- 2 10,001-100,000
- 3 100,001-250,000
- 4 > 250,000

in Luxembourg (LU):

- 1 Less than 2,500
- 2 2,501-less than 5,000

- 3 5,001-less than 10,000
- 4 10,001-less than 20,000
- 5 20,001-less than 50,000
- 6 50,000 and over (Luxembourg ville)

in Denmark (DK):

- 1 Less than 2,000
- 2 2,000-4,999
- 3 5,000-9,999
- 4 10,000-19,999
- 5 20,000-49,999
- 6 50,000-99,999
- 7 100,000 and over

in Ireland (IE):

- 1 Less than 2,000
- 2 2,001-less than 20,000
- 3 20,001-less than 100,000
- 4 100,000 and over

in Great Britain (GB_GBN):

- 1 Metropolitan
- 2 Other 100% urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB_NIR):

- 1 Less than 2,000
- 2 2,001-less than 20,000
- 3 20,001-less than 100,000
- 4 100,000 and over
- 99 Not ascertained

in Greece (GR):

- 1 1,000,001-5,000,000
- 2 500,001-1,000,000
- 3 100,001-500,000
- 4 50,001-100,000
- 5 30,001-50,000
- 6 20,001-30,000
- 7 10,001-20,000
- 8 5,001-10,000
- 9 3,001-5,000
- 10 2,001-3,000
- 11 1,001-2,000
- 12 1-1,000

in Spain (ES):

- 1 Less than 2,000
- 2 2,001-10,000
- 3 10,001-50,000
- 4 50,001-100,000
- 5 100,001-300,000
- 6 300,001-500,000
- 7 500,001-1,000,000
- 8 1,000,000 and over

in Portugal (PT):

- 1 Less than 100
- 2 101-less than 200
- 3 201-less than 500
- 4 501-less than 1,000
- 5 1,001-less than 2,000
- 6 2,001-less than 5,000
- 7 5,001-less than 10,000
- 8 10,001-less than 30,000
- 9 30,001-less than 100,000
- 10 100,001-less than 500,000
- 11 500,000 and over

v1367 - DAIRY PR GUARANTEE SYMBOL - LOOK FOR

DA.21

Sometimes people who make products use a symbol to guarantee that the product is genuine. Do you think that such a symbol would be a good idea or not for DAIRY products?

DA.22

And personally, would you look for DAIRY products that carry such a symbol or not? Would you say...

v1376 - DAIRY PROD SYMBOL RESP: SOMEBODY ELSE

DA.21

Sometimes people who make products use a symbol to guarantee that the product is genuine. Do you think that such a symbol would be a good idea or not for DAIRY products?

DA.23_1

Who should be responsible for the organization and control of such a symbol for dairy products?

DA.23_2

And who else?

DA.23_2_8 Somebody else

v1378 - OPINION LEADERSHIP (COGNITIVE MOBIL)

C.1 Cognitive Mobilization Index

- 1 Low cognitive mobilization
- 2 Medium-low cognitive mobilization
- 3 Medium-high cognitive mobilization
- 4 High cognitive mobilization
- 9 Not ascertained

Derivation:

This variable combines responses to Q.5 and Q.6 to form an indicator of an individual's potential to take an active role in the political process.

For a complete discussion of this variable and its correlates, see Ronald Inglehart, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977), Chapter 11.

This variable is labeled the Opinion Leadership Index in the codebooks for Euro-Barometers 3, 4, 5 and 6.

v1380 - POLITICAL ORIENTATION - TYPOLOGY 7

Political orientation typology - seven point scale

- 1 Unmobilized Materialist
- 2 Unmobilized Mixed
- 3 Unmobilized Post-Materialist
- 4 Mobilized Materialist
- 5 Mobilized Mixed
- 6 Mobilized Post-Materialist
- 7 Revolutionary

Derivation:

This typology was constructed from respondents' scores on the Cognitive Mobilization Index (C.1), the Materialist/Post-materialist Value Index (C.2), and responses to Q.8.

For details on the construction of this typology and its correlates, see Ronald Inglehart and Jacques-Rene Rabier "Economic Uncertainty and European Solidarity," ANNALS OF THE AMERICAN ACADEMY OF POLITICAL AND SOCIAL SCIENCE (Vol. 440, 1978).

v1382 - EUROPEAN PARLIAMENT PARTY PREFERENCE

C.5 European Party Parliamentary Preference Index

- 0 Undocumented code
- 1 Socialists (S/SOC)
- 2 Christian Democrats (European People's Party) (PPE/EPP)
- 3 Liberals (Liberal and democratic reformist group) (LDR/LRD)
- 4 Conservatives (European democratic) (ED/ED)
- 5 Greens (V/ECO)
- 6 Euro (comm.) Left (GUE/EUL)
- 7 Gaullist/Irish FF (RDS/EDA)
- 8 European Right (DR/ER)
- 9 (Communist) Left Unity (CG/LU)
- 10 Rainbow (ARC/ARC)
- 11 Non-attached (NI/NI)
- 12 Non-represented/others

Derivation:

This variable is a 12-category recode which combines responses to D.4R (VOTE INTENTION) and the follow-up probe D.5R (VOTE PROBE).

For more information see Technical Specifications for Selected Constructed Variables.

v1383 - LEFT-RIGH PLACEMENT - HARMONISED

D.1C Political Positioning (Harmonized)

- 1 Left
- 2 Center
- 3 Right
- 4 DK+ refusal
- 9 Not ascertained

Derivation:

This variable collapses responses to D.1 into three categories: left, center, right. Those who reply are grouped in tertiles of the one third of respondents placing themselves most left, the one third most right, and the center third, for each country. The usual weighting according to each country's population aged 15 and more is applied.

v1385 - QUESTIONNAIRE FORM - SPLIT

Type of Questionnaire

- 1 Form A
- 2 Form B

v1385

Value	Label	Missing	Count	Percent	Valid Percent
1	FORM A		11730	50.1	50.1
2	FORM B		11667	49.9	49.9
	Sum		23397	100.0	100.0
	Valid Cases		23397		

v1386 - ORIGINAL RESPONDENT ID (INRA)

Original respondent identification number utilized by INRA (Europe)

This is a eight digit respondent identification. The ID number for each respondent begins with the 2-digit survey number, followed by the 2-digit original country id. The remaining four digits represent the original interview id number as supplied by INRA (Europe).

Note:

Actual number is coded.

v1387 - INTERVIEWER NUMBER (INRA)

Interviewer Number

Note:

Actual number is coded.
