Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (http://zacat.gesis.org), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1 Study Description – Eurobarometer 31A

1.1 Bibliographic information

1.1.1 Archive study numbers

GESIS: ZA1751
ICPSR: 9360

Under a co-operative arrangement for the archival processing and distribution of Standard & Special Eurobarometer, ICPSR and GESIS employ its own study number to identify each – otherwise congruent – dataset.

1.1.2 Title and archive subtitle

Eurobarometer 31A
European Elections, 1989: Post-Election Survey

1.1.4 Bibliographic citation

Publications based on data collections which are made available through ICPSR or GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

> Commission of the European Communities, Brussels: Eurobarometer 31A, June-July 1989.
> Helene Riffault, Faits et Opinions, Paris [Producer];
> GESIS, Cologne [Publisher]: ZA1751, dataset version 1.0.1, doi:10.4232/1.10889.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys focused on the European Community and on the European Parliamentary elections, energy resources, environmental pollution, and the financial well-being of the respondents´ households. Respondents´ attitudes towards the European Community were elicited through a series of questions that asked about respondents´ interest in politics and in European Community politics, views on the importance of European Community matters for the future and, more specifically, for people of the respondent´s country, support of efforts to unify western Europe, and opinions on whether the respondent´s country had benefited from being a member the European Community. Questions about the European Parliamentary elections included queries on the role of the media, whether the respondent had voted in the recent European elections, which party the respondent voted for, and reason for not voting. Respondents were asked if candidates´ stands on domestic matters or on European matters were important in their voting decision, and which reason best explained the way they voted. Other questions examined the respondent´s views on whether cooperation among national members of the European Parliament should be based on nationality or on party affiliations. Political queries included questions about the idea of democracy, how well democracy worked in the respondent´s country, and to what extent the respondent believed the European Community was democratic. In a series of questions on environmental issues, respondents were asked to evaluate major energy resources in terms of price stability, supply, and pollution and to weigh the risks, costs, and benefits of nuclear energy. They were also asked about the causes, effects, and possible solutions for the problems of acid rain, the greenhouse effect, and the deteriorating ozone layer. A number of socioeconomic and demographic characteristics were recorded including life satisfaction, family income, home ownership, number of persons and children under 15 residing in the home, size of locality, regions of residences, occupations of the head of household, and the respondent´s age, sex, occupation, education, religion, religiosity, and subjective social class standing.

1.2.2 Topic classification

1.3 Universe

The samples of Eurobarometer 31A are designed to be representative for the national population aged 15 years and over of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland).

1.4 Sampling procedure

The sampling designs were either multi-stage national probability samples or national stratified quota samples. In each country a two stage sampling method is used:

1) Geographical distribution
The survey covers the whole territory of the twelve countries, i.e. 138 regions. In each country a random selection of sampling points is made in such a way that all types of area (urban, rural, etc.) are represented in proportion of their populations. The interviews are distributed in more or less 1.350 sampling points.

2) Choice of respondents
Within these sampling points the individuals to be interviewed are chosen:

a) at random from the population or electoral lists in those countries where access to suitable lists of individuals or households is possible: Denmark, Luxembourg, Netherlands;

b) by quota sampling in Belgium, France, Italy, United Kingdom and Ireland. In these cases the quota are established by sex, age and occupation on the basis of census data.

c) by a 'random route' procedure in Germany, Greece, Spain and Portugal.

The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

The institutes which carried out the surveys in each E.E.C. country are represented by THE EUROPEAN OMNIBUS SURVEYS s.c. (EOS), co-ordination and data integration were realised by FAITS ET OPINION, Paris (Hélène Riffault).

1.6 Mode of data collection

Interviewing and sampling were conducted by various research firms operating in the E.E.C. countries. All interviews were carried out face-to-face in people´s homes in the respective national languages. Faits et Opinions developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

1.7 Weighting

In general the Eurobarometer datasets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

The **post-stratification weight,** also referred to as redressment or non-response weight, carries out comparisons between the sample composition and a proper universe description with respect to selected attributes such as sex, age or region. The availability of this weight over time and for individual countries is documented in table 2. Until Eurobarometer 31 the corresponding variable is labelled NATION WEIGHT II. Only starting with Eurobarometer 32 post-stratification weights are available continuously and for all samples.

Until Eurobarometer 6 underrepresented rural cases for FRANCE are duplicated; duplicate case indicators (weights) are only available for ECS1970, ECS1971 and Eurobarometer 2. In ECS1971 and ECS1973 a special weighting factor for the NETHERLANDS indicates the number of times that a case is duplicated in the Dutch part of the dataset; the duplication scheme is not documented.

The **population size weighting** factor corrects for the fact that sample sizes do not depend on how large or small the populations are from which they are drawn.

The NATION WEIGHT I (or UK weight) ensures that both samples, Great Britain and Northern Ireland, are represented in proportion to its population size within the United Kingdom as a whole. Starting with Eurobarometer 19 the UK weight also includes the available post-stratification weighting factors for other countries.

The EUROPEAN WEIGHT adjusts each sample in proportion to its share in the total population, aged 15 and over, of the European Community as a whole in its respective composition. Only starting with Eurobarometer 7 the EUROPEAN WEIGHT includes the available post-stratification weighting factors. Starting with Eurobarometer 32 former states in the enlargement process are also considered (EU6, EU10).

The post-stratification weights are at the users' disposal for descriptive (univariate) analysis. Population size weighting is required to obtain meaningful descriptive results for the United Kingdom or the European Community as a whole. For multivariate analysis weighting is not recommended. Official Eurobarometer reports are based on weighted data.

The YOUTH OVERSAMPLES* in Eurobarometer 17 and 28.1 are weighted separately and across ALL samples as documented in the respective study and weight variable description.

Eurobarometer 31A contains both weighted and self-weighting (unweighted) national samples. The weighted samples are Denmark, Spain, Germany, France, Netherlands and United Kingdom. The self-weighting samples are Belgium, Italy, Luxembourg, Ireland, Portugal and Greece. The weighted samples require the application of weights to make them representative of the countries from which they were drawn. The self-weighting samples do not require adjustment by weights for individual country analyses.

Three weight variables are provided in this dataset: NATION WEIGHT I (variable 6), NATION WEIGHT II (variable 8), and EUROPEAN WEIGHT (variable 9). NATION WEIGHT I contains weights that adjust the weighted samples to make them representative of the countries from which they were drawn. NATION WEIGHT I equals one for all respondents who were interviewed in countries with self-weighting samples. This weight variable should be used whenever countries with weighted samples are to be analyzed separately. NATION WEIGHT II allows for separate analyses of Great Britain and Northern Ireland. The weights assigned to respondents in Great Britain produce a

representative sample for Great Britain alone instead of the United Kingdom as a whole. No weights need be applied to separately analyze Northern Ireland, since the sample selected there was self-weighting. Thus, this weight variable equals one for all respondents in Northern Ireland. For all other countries outside the United Kingdom, NATION WEIGHT II is identical to NATION WEIGHT I, except for some very slight differences due to rounding. EUROPEAN WEIGHT contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. This weight variable also incorporates the within-country weights in NATION WEIGHT I. EUROPEAN WEIGHT may be used to analyze the European Community nations as a whole.

1.8 Data preparation

The data received by ICPSR from Faits et Opinions were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ICPSR.

To facilitate analyses of the data, ICPSR created new variables which consolidate information dispersed over two or more variables in the original Faits et Opinions dataset. Thirteen variables containing condensed information were created by ICPSR for this Eurobarometer: NATION II, REGION, PROVINCE, OBJ SIZE TOWN, UNION MEMBERSHIP, INCOME, PROT NATR: MAIN, PROT NATR: SUB, PROT NATR: ITEM, EURO VOTE 1989, VOTE INTENTION, PARTY LAST VOTE, and PARTY PREFERENCE. Users should be aware that ICPSR´s process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

ICPSR also added "Inappropriate" codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the Faits et Opinions questionnaire was adhered to for every respondent.

Users should note that Faits et Opinions has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) without creating separate "dummy" variables to explicitly represent "Don´t know" or "No answer" responses. Occasionally, other residual responses, such as "None of the above," also are not explicitly represented in the data. Except for recoding with "Inappropriate" codes, as described above, ICPSR has not recoded these "dummy" variables to indicate residual responses. Consequently, users will have to devise their own methods to filter them out.

Users should also note that on occasion the number of responses to a particular question may exceed the maximum indicated in the interviewer instructions.

Question text and contingency text appearing in this codebook and ICPSR´s machine-readable documentation is taken from Faits et Opinions´ English language version of the questionnaire. Coding schemes and other documentation are based on Faits et Opinions´ English language version of the questionnaire, Faits et Opinions´ codebook (in French) for its dataset as received by ICPSR and an OSIRIS dictionary provided by Ronald Inglehart for the same Faits et Opinions dataset. Whenever a discrepancy occurs between Faits et Opinions´ codebook and its English language questionnaire as to the coding scheme of a variable, the former is followed in the ICPSR documentation.

Recoding of R´S AGE IN YEARS (variable 658): The original Great Britain data for variable 658 incorrectly recorded the last two digits of year of birth, instead of age at time of interview. ICPSR handled this problem by recoding the British data: year of birth was converted to age by assuming that the birthdays of all British

respondents preceded their Eurobarometer interviews. ZA replaced recoded ICPSR data for Great Britain by correct and complete data provided by the Zentrum fur Europaische Umfrageanalysen und Studien (ZEUS) in Mannheim.

1.9 Further remarks

The European Election Study 1989 was conducted in three waves as an independently financed survey in the framework of the Eurobarometers. The variables from the Eurobarometers 30, 31 and 31A relevant for European Election analysis were arranged and integrated by the Dutch Steinmetz Archive for the European Election Study Research Group: European Election Study 1989 (ZA2320).

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens´ Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: http://www.gesis.org/eurobarometer

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001–099)	not affiliated / electoral alliances across "families"
1	(100–199)	Communists
2	(200–299)	Socialists
3	(300–399)	Liberals
4	(400–499)	Christian Democrats
5	(500–599)	Conservatives
6	(600–699)	Extreme Rights / Nationalists
7	(700–799)	Regionalists / Ethnic
8	(800–899)	Environmental parties
9	(900–949)	Agricultural parties
9	(950–989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the dataset.

QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).

CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).

DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (*absolute values*) refer to the number of cases in the weighted dataset as indicated, in this case *weighted by V8*. The relative frequencies (*row percent*) refer to the valid cases (*n valid sum*), i.e. the total number of cases (*n sum*) reduced by the number of cases defined as missing data (*M*). For display and place saving reasons excluded countries or areas may be completely dropped from the table.

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (*M*), i.e. *percent* on the basis of all cases (*sum*) and *valid percent* on the basis of the *valid cases*.

5 Variable Documentation

Variable, Label
Question Text (English Language)

v1 - ZA STUDY NUMBER 1751

ZA Study Number 1751

v1

Value	Label	Missing	Count	Percent	Valid Percent
1751			11819	100.0	100.0
	Sum		11819	100.0	100.0
	Valid Cases		11819		

v2 - EDITION NUMBER

ICPSR Edition Number

The number identifying the release edition of this dataset.

1   April 1993 edition

2   March 94 (ICPSR/ZA)

3   ICPSR edition / GESIS-ZA update 10-09-2007

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v2

Value	Label	Missing	Count	Percent	Valid Percent
3	ICPSR EDITION / GESIS-ZA update 10-09-2007		11819	100.0	100.0
	Sum		11819	100.0	100.0
	Valid Cases		11819		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			11819	100.0	100.0
	Sum		11819	100.0	100.0
	Valid Cases		11819		

v3 - PART NUMBER

ICPSR Part Number

The number identifying this part of a 1-part study.

1   Euro-Barometer 31A.

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	EUROBAROMETER 31A		11819	100.0	100.0
	Sum		11819	100.0	100.0
	Valid Cases		11819		

v4 - ID - SERIAL NUMBER APPOINTED BY ICPSR

Sequential respondent identification number assigned by ICPSR

A unique identification number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v6 - NATION WEIGHT I (GB AND NIRL TOGETHER)

Nation Weight I (Great Britain and Northern Ireland together)

This variable contains national (within-country) weights for Denmark, Spain, Germany, France, the Netherlands, and the United Kingdom. NATION WEIGHT I equals one for all respondents who were interviewed in other countries. This weight variable should be used whenever any of the countries with weighted samples are to be analyzed separately. See Introduction, Weighting Information.

Note:

Actual number is coded.

v6 - NATION WEIGHT I (GB AND NIRL TOGETHER)

v7 - NATION II

Nation of interview with two codes for the United Kingdom.

This variable identifies the nation of interview and two areas of the U.K.: Great Britain and Northern Ireland.

1 France

2 Belgium

3 Netherlands

4 Germany

5 Italy

6 Luxembourg

7 Denmark

8 Ireland

9 Great Britain

10 Northern Ireland

11 Greece

12 Spain

13 Portugal

v7

	Valid Cases		11819		

v8 - NATION WEIGHT II (GB AND NIRL SEPERATED)

Nation Weight II (Great Britain and Northern Ireland separate)

This weight variable allows for separate analyses of respondents in Great Britain and Northern Ireland. Respondents who were interviewed in Great Britain are assigned weighting factors representing Great Britain alone instead of the United Kingdom as a whole. The Northern Ireland sample is self-weighting. Thus, NATION WEIGHT II equals one for all Northern Ireland respondents. For countries other than the United Kingdom, NATION WEIGHT II is the same as NATION WEIGHT I except for some slight differences due to rounding. See Introduction, Weighting Information.

Note:

Actual number is coded.

v9 - EUROPEAN WEIGHT

European Weight

This weight variable adjusts each national sample in proportion to its nation's share in the total population of the European Community. EUROPEAN WEIGHT also incorporates the within-country weighting information contained in NATION WEIGHT I. It should be used when analyzing the E.C. as a whole. See Introduction, Weighting Information.

Note:

Actual number is coded.

v10 - Q122 ELECTORAL REGISTER

Q.122

Are you....(nationality)?

(IF YES)

Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election)

under your present address, at another address or does not appear at all?

(IF Is not (nationality): close interview)

1   At present address

2   At another address

4   Does not appear at all

5   No answer

6   Don't know if registered

9   (not documented)

v19 - Q130 POL DISCUSSION - FREQUENCY

Q.130

When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?

0 DK/NA

1 Often

2 From time to time

3 Never

v20 - Q131 VALUE ORIENTATION - POL GOALS 1ST

Q.131/132

There is a lot of talk these days about what this country's goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority.

Q.131

Would you please say which one of them you yourself consider most important in the long run?
(SHOW CARD. ONE ANSWER ONLY.)

0   DK/NA

1   Maintaining order in the nation

2   Giving the people more say in important government decisions

3   Fighting rising prices

4   Protecting freedom of speech

v24 - Q134 ENVIRONMENT PROTEC - SUB-HEADINGS

Q.134/137

What things come to your mind if you hear "protecting nature and fighting pollution?" Please tell me everything that comes to your mind.

(DO NOT SUGGEST ANYTHING. WRITE AND CODE.)

Q.134/137SUB

Responses classified by sub-headings

I. ENVIRONMENTAL AREAS (without explicit reference to chemical, nuclear or agricultural causes of the pollution) (codes 11-18)

11 I-1. AIR POLLUTION: Pollution of Air without explicit reference to the chemical industry or nuclear industry) (coded 1 to 5 in Q.134ITEM)

12 I-2. FRESH WATER POLLUTION: Pollution of waters of rivers, lakes and ground water, i.e. freshwater; (no explicit reference to the chemical industry, nuclear industry, or agriculture as sources) (coded 6 to 8 in Q.134ITEM)

13 I-3. POLLUTION OF THE SEA: Pollution of the sea-water, the bottom of the sea, and the beaches (saltwater; no explicit reference to the chemical industry, nuclear industry, or agriculture) (coded 9 to 11 in Q.134ITEM)

14 I-4. LITTER AND WASTE: Litter and waste: disposal of litter and waste, and problem of generally increasing amounts of waste (no explicit reference to dangerous chemical or nuclear waste) (coded 12 to 16 in Q.134ITEM)

15 I-5. DANGEROUS WASTE: Dangerous waste (not explicitly referring to the chemical industry or dangerous chemical products or nuclear waste) (coded 17 to 19 in Q.134ITEM)

16 I-6. NOISE: Different sources/types of noise (coded 20 to 26 in Q.134ITEM)

17 I-7. NATURE PROTECTION: Nature protection and preservation of the countryside (not referring to the consequences of pollution and industrial development but predominantly and explicitly referring to the aspect of nature protection) (coded 30 to 35 in Q.134ITEM)

18 I-8. PLANNING: (Town and Country planning) (coded 36 to 39 in Q.134ITEM)

II. RISK-TECHNOLOGIES (chemical and nuclear industry) and problems of the overuse of chemicals in agriculture (codes 21-23)

21 II-1. CHEMICAL POLLUTION AND CHEMICAL WASTE (non-agriculture) (coded 40 to 44 in Q.134ITEM)

22 II-2. OVERUSE OF CHEMICALS IN AGRICULTURE (coded 45 to 47 in Q.134ITEM)

23 II-3. POLLUTION BY AND PROBLEMS OF NUCLEAR ENERGY AND NUCLEAR WASTE (coded 50 to 54 in Q.134ITEM)

III. DRAMATIC EVENTS AND ACCIDENTS _ Perceived internationally and consequences of pollution and accidents (codes 31-34)

31 III-1. NUCLEAR EVENTS (coded 60 to 61 in Q.134ITEM)

32 III-2. NON NUCLEAR EVENTS (coded 62 to 64 in Q.134ITEM)

33 III-3. CONSEQUENCES OF ACCIDENTS AND POLLUTION (coded 65 to 69 in Q.134ITEM)

34 III-4. GLOBAL AND WORLDWIDE PROBLEMS AND TOPICS (coded 70 to 79 in Q.134ITEM)

IV. PERCEPTION AND EVALUATION OF ACTORS, MECHANISMS AND INSTITUTIONS (codes 41-43)

41 IV-1. PERCEPTION OF ESTABLISHED POLITICAL ACTORS, INSTITUTIONS, AND ACTIONS AND THEIR EVALUATION (coded 80 to 82 in Q.134ITEM)

42 IV-2. PERCEPTION OF ENVIRONMENTAL MOVEMENT (organizations and new environmental initiative and groups and explicitly new green parties) (coded 83 to 85 in Q.134ITEM)

43   IV-3. REFERENCE TO THE ENVIRONMENTAL POLICY AND THE ROLE OF THE EUROPEAN COMMUNITY (coded 86 to 88 in Q.134ITEM)

V. GENERAL RESPONSIBILITY, DEMANDS AND GENERAL EVALUATIONS (codes 51-53)

51   V-1. RESPONSIBILITY (coded 90 to 91 in Q.134ITEM)

52   V-2. DEMANDS (coded 92 to 94 in Q.134ITEM)

53   V-3. GENERAL EVALUATION AND CHARACTERIZATION (coded 95 to 97 in Q.134ITEM)

0   DK/NA

v25 - Q134 ENVIRONMENT PROTEC - V24 CATEGORIES

Q.134/137

What things come to your mind if you hear "protecting nature and fighting pollution?" Please tell me everything that comes to your mind.

(DO NOT SUGGEST ANYTHING. WRITE AND CODE.)

Q.134/137ITEM

Responses classified by individual category

I. ENVIRONMENTAL AREAS (without explicit reference to chemical, nuclear, nuclear or agricultural causes of the pollution)(codes 1-39)

I-1.AIR POLLUTION: Pollution of Air (without explicit reference to the chemical industry or nuclear industry)(codes 1-5)

1   Source of air pollution: industry like effects of burning coal, oil in power plants (not nuclear plants), dust, soot, emission of pollutants into the air

2   Source of air pollution: emissions from vehicles (car exhaust gases)

3   Source of air pollution: households (effects of burning coal, oil in heating systems)

4   "Smog" explicitly mentioned ((which is) a combination of the previously mentioned types of air pollution)

5   Other and (mentions of) air pollution in a general and unspecific way

I-2. FRESH-WATER POLLUTION pollution of waters of rivers, lakes and ground water, i.e., freshwater; (no explicit reference to chemical industry, nuclear industry, or agriculture or sources) (codes 6-8)

6   Source of fresh-water pollution: industrial (sources) (like industrial waste water, discharge of pollutants into rivers and lakes, for example, oil pollution of rivers and lakes)

7   Source of freshwater pollution: households (sewage) (for example, discharge of sewage into rivers and lakes without treatment in (water treatment) plants)

8   Other and general reference without mentioning a source (for example, simple mentioning of pollution of rivers, drinking water or groundwater)

I-3. POLLUTION OF THE SEA: Pollution of the sea-water, the bottom of the sea, and the beaches (saltwater; no explicit reference to the chemical industry, nuclear industry, or agriculture) (codes 9-11)

9   Source of sea-water pollution: industrial (sources), (for example, dumping of all kinds of waste (litter and sewage from ships), oil pollution in the sea and on the shore)

10   Source of sea-water pollution: households - sewage disposal into the sea without treatment in sewage treatment plants

11   Other (for example, sea-water pollution because of more tourist traffic) and general reference to pollution of the sea without mentioning a source

I-4. LITTER AND WASTE: Litter and waste: disposal of litter and waste, and problem of generally increasing amounts of waste (no explicit reference to dangerous chemical or nuclear waste) (codes 12-16)

12   Litter in cities and villages

13   Litter in the countryside

14   Litter on the beaches

15   Problem of increasing amount of litter and waste in general

16   Other (like old and illegal dumping grounds) and general reference to litter and waste

I-5. DANGEROUS WASTE: Dangerous waste (not explicitly referring to the chemical industry or dangerous chemical products or

nuclear waste) (codes 17-19)

17   Dangerous waste: dangerous waste on dumping grounds, industrial waste like paints and varnishes, sump oil, byproducts of industrial production

18   Dangerous waste: dangerous waste like paints, pharmaceutical products, sump oil, batteries, etc.

19   Other and general references to dangerous waste

I-6.   NOISE: different sources/types of noise (codes 20-26)

20   Source of noise: industrial activities (operation of plants, road and house construction)

21   Source of noise: aircraft and airports

22   Source of noise: military aircraft, especially low flying aircraft

23   Source of noise: street traffic (motorbikes, cars, lorries)

24   Noise from neighbors (like music, radio, TV, children, dogs, slamming doors, footsteps, etc.)

25   Noise at the workplace (explicitly mentioned as caused by the working conditions like noise of machines at the workplace)

26   Other and (mentions of) noise in general and unspecific ways

I-7.   NATURE PROTECTION: Nature protection and preservation of the countryside (not referring to the consequences of pollution and industrial development but predominantly and explicitly referring to the aspect of nature protection) (codes 30-35)

30   Protection of birds

31   Protection of wildlife: fauna (not explicitly birds, for example, whales, killing of young seals for their fur, etc.)

32   Protection of wildlife: flora (species of plants)

33   Protection of landscape and preservation of the countryside (for example reference to national parks, protection of biotopes (biospheres?), protected areas

34   Protecting and preservation of ancient monuments and buildings like churches, castles, palaces, houses, etc.

35   Other

I-8.   PLANNING: (Town and Country planning) (codes 36-39)

36   Planning of cities: industrial sites: air, water, and street traffic according to ecologically relevant criteria

37   Traffic planning (for example: road construction, motorways, airports, waterways through historic river valleys etc.)

38   Planning of landscape

39   Other and general reference to planning

II.   RISK-TECHNOLOGIES (chemical and nuclear industry) and problems of the overuse of chemicals in agriculture (codes 40-59)

II-1.   CHEMICAL POLLUTION AND CHEMICAL WASTE (non-agriculture) (codes 40-44)

40   Chemical air pollution (gaseous emissions for example sulfur dioxides (SO 2), nitrogen oxides (NO x), mentioning industry as source of the pollution or characterizing the problems explicitly as of a chemical nature)

41   Chemical pollution of freshwater (discharge of waste water into rivers and lakes without clarification plants (explicitly referring to the chemical industry or the use of chemicals as source of the pollution or characterizing the problems explicitly as of a chemical nature)

42   Chemical pollution of the sea, the bottom of the sea and the beaches (saltwater), like dumping of waste (acids, heavy metals, etc.)

43   Dangerous chemical waste (TOXIC WASTE) (more general and not directly related to air or water pollution) (for example: pollution of soil in former sites of chemical factories with heavy metals, acids, mercury; export of dangerous chemical waste in third world countries, etc.)

44   Other and general reference to chemical products, chemical industry and chemical waste as involving risks (for example problem of increasing amounts of unclassified and probably dangerous industrial chemical substances and products (waste) in air, water, and soil)

II-2. OVERUSE OF CHEMICALS IN AGRICULTURE (codes 45-47)

45 Pollution of water and soil by overuse of pesticides, insecticides, and weed-killers

46 Pollution of soil and water by overuse of fertilizers (eutrophia of rivers and lakes and pollution of groundwater, even transport to the sea (actual case of growth of algae in the northern sea))

47 Other, and mentioning negative effects of agriculture and use of chemicals in agriculture in a general and unspecific way

II-3. POLLUTION BY AND PROBLEMS OF NUCLEAR ENERGY AND NUCLEAR WASTE (codes 50-54)

50 Pollution of air and atmosphere and soil (fallout) by radio-active gaseous emissions of nuclear power plants

51 Pollution of freshwater by emission of radio-active waste water into rivers and lakes

52 Pollution of seawater (by discharging radio-active waste water into the sea or dumping radio-active material into the sea)

53 Radio-active waste, problem of processing, transport, and storage

54 Other, and general reference to pollution by radio-active emissions and the environmental risk of nuclear energy and nuclear technology

III. DRAMATIC EVENTS AND ACCIDENTS - Perceived internationally and consequences of pollution and accidents (codes 60-79)

III-1. NUCLEAR EVENTS (codes 60-61)

60 Nuclear transport events/accidents (dramatic and worldwide perceived events: pollution by transport accidents when transporting nuclear material)

61 Accidents/events in nuclear installations (like the Chernobyl accident, Harrisburg etc.)

III-2. NON NUCLEAR EVENTS (codes 62-64)

62 Transport accidents (not nuclear) like oil transport accidents of tankers (for example: the oil spillage of the Exxon Valdez at Alaska)

63 Events/accidents at industrial installations (not nuclear) especially chemical factories (for example: Seveso, Sandoz, Bophal, etc.)

64 Other possible mentioning of events like locally, regionally, or predominately nationally relevant and discussed events (accidents, scandals etc.)

III-3. CONSEQUENCES OF ACCIDENTS AND POLLUTION (codes 65-69)

65 Acid rain, "Dying woods" (as a consequence of all kinds of chemical air pollution)

66 Chemicals in food, dangerous for the health of people (as a consequence of overuse of chemicals in agriculture)

67 Radio-active pollution of food because of radio-active fallout and emission (animals, vegetables, mushrooms, etc.)

68 Deterioration of farmland by overuse of fertilizers (intensive mono-cultures)

69 Other (consequences of accidents and pollution)

III-4. GLOBAL AND WORLDWIDE PROBLEMS AND TOPICS (codes 70-79)

70 Ozone-layer, holes in the layer, brought about by the increased use of chemicals especially CFCs (i.e. chloro-fluoro-carbons, used in spray cans and refrigerators)

71 Green-house effect (changing of world climate because of increase of carbon dioxide, i.e. the gas emitted from burning fossil fuels like coal and oil)

72 Diminution of woodland (deforestation) (for example, the destruction of the amazonas woods)

73 Growth of the deserts worldwide (desertification); (for example the growth of the Sahel-Zone)

74 Loss and waste of limited natural resources (like minerals, coal, oil, metals, etc.)

75 Extinction of species (genetic loss) (threatened extinction of presently endangered species, flora and fauna)

76 Negative consequences of tourism (like for example: destruction of landscape (beaches, mountains) by building hotels, courses

for skiing, erosion of top soil in the alps, etc.)

77   Overpopulation, population growth with the effects of overuse of the environment (like the just mentioned deforestation and resulting erosion as well as desertification)

78   Ecosystem-disruption; general reference to the possible disruption of ecosystems and biological, geological, and chemical cycles

79   Other consequences and references to global topics

IV. PERCEPTION AND EVALUATION OF ACTORS, MECHANISMS AND INSTITUTIONS (codes 80-88)

IV-1. PERCEPTIONS OF ESTABLISHED POLITICAL ACTORS, INSTITUTIONS, AND ACTIONS AND THEIR EVALUATION (codes 80-82)

80   Negative: established political actors and environmental policy: reference to political parties and institutions (government, parliament, ministries, agencies) and, environmental policy (laws and expenditures))

81   Positive: established political actors and environmental policy: reference to political parties and institutions (government, parliament, ministries, agencies) and, environmental policy (laws and expenditures))

82   Other mentioning of actors and policy, like demands for more powerful institutions and agencies, better environmental laws, better enforcement of laws, more environmental expenditures

IV-2. PERCEPTION OF ENVIRONMENTAL MOVEMENT (organizations and new environmental initiatives and groups, and explicitly new green parties) (codes 83-85)

83   Negative: environmental movement and new actors and parties (negative comments on the environmental movement and/or green parties (like chaotic and irrational people, dangerous idealists, etc.)

84   Positive: environmental movement and new actors (positive comments on the environmental movement and/or green parties (for example: without the movement and/or parties the topic would not be so popular, the environmental movement has considerably increased the perceived importance of the problems, etc.)

85   Other reference to environmental movement (for example: there are new groups, organizations, and new green parties as a result of the problems, etc)

IV-3. REFERENCE TO THE ENVIRONMENTAL POLICY AND THE ROLE OF THE EUROPEAN COMMUNITY (codes 86-88)

86   Negative reference to the role of European Community: (for example: EC preventing progress in environmental policy)

87   Positive reference to the role of European Community: (for example: problems should be handled by the EC, etc.)

88   Other reference to the European Community: (for example: the European Council deals with the problem, there are EC regulations about all kinds of environmental problems, etc.)

V. GENERAL RESPONSIBILITY, DEMANDS AND GENERAL EVALUATION (codes 90-97)

V-1. RESPONSIBILITY (codes 90-91)

90   Blame to industry: industry and industrial system in general are blamed as primarily responsible

91   Blame to everybody: the individual citizen's behavior and responsibility for the environmental problems are referred to

V-2. DEMANDS (codes 92-94)

92   General demands to society as a whole to change the present way of treating the environment (for example: use of alternative technologies, alternative forms of agriculture

93   Reference to individual behavior, demands, and preparedness for actions to protect the environment (like recycling of glass, paper, using ecologically tolerable products, etc.)

94   Other references to responsibility for the problems and demands

V-3. GENERAL EVALUATION AND CHARACTERIZATION (codes 95-97)

95 Pessimistic evaluation (for example: destruction of nature, risks for future generations, destruction of the ecosystems and the

system of the earth in general

96   Optimistic evaluation of the situation (like: the problems are not so bad, with our economic system, our technology, we will be able to cope with the problems)

97   Other evaluation or characterization like neutral problem descriptions (for example: the problems are complicated, worldwide, international, etc.)

Q.134/137GRE

Responses of persons interviewed in Greece as categorized according to the Greek classification scheme

0   Inap., only interviewed in Greece (not coded 11 for variable 7)

1   We must protect the nature, environment, forests

2   Our health is in danger/risks for our children, grand-children/we die slowly

3   Laws for transgressors/strict supervision/efficient precaution

4   Ecological movements/they do excellent job/they are right

5   Air and environmental pollution

6   The smog/the smog poisons us every day

7   Every single citizen should try to not pollute the environment

8   Governmental inaction/they mock us

9   We breath car exhaust gases

10   The industrialization of the cities (is destructive)

11   Nuclear weapons/nuclear tests

12   No answer

13   Efforts are made worldwide by organizations

14   Chernobyl/destruction from nuclear accidents

15   The government take care

16   Sea pollution

17   Nuclear power plants and our safety

18   We must stop environmental destruction, (no more) destruction

19   We need protection from industrial waste

20   In the city of Lavrio, everything is polluted from the industries

21   Natural resources are destroyed worldwide/should be protected

22   Other

23   Dirty beaches/sea shore/coast

Q.134/137FRA

Responses of persons interviewed in France as categorized according to the French classification scheme

0   NA

1   Atmospheric pollution (cars, factories)

2   Fresh water pollution/polluted water (rivers)

3   Pollution of the sea/oil slicks

4   Pollution (without further (specification))/against pollution/the pollution is terrible

5   Rubbish tip/polluting waste

6   Against sprays, detergents

7   Against fertilizers and chemicals

8   Nuclear plants/radio active waste

9   Ozone-layer problem

10   Against deforestation/protecting forests

11   Earth warming

12   Acid rain

13   Noise

51   Respecting and protecting nature (fauna, animals, etc.)

52   Deletion of hunting

53   Necessity of more hygiene among people

54   To avoid developing towns

55   Need for more public transport

56   Catalytic exhaust pipe

57   Disarmament

58   Necessity to take care/danger/Do no destroy everything

59   In favor of protecting earth and environment

80   Worrying about future/to be frightened of consequences

81   In favor of ecology

82   Necessity of a reaction of everybody/the countries must react together

83   People are thoughtless

84   Lot of work/a lot to do to fight against

98   Doesn't care, no interest for ecology

99   Don't know, no idea

999   Inap., only interviewed in France (not coded 01 for variable 7)

v82 - Q134 IRE: ENVIRONMENT PROTECTION

Q.134/137

What things come to your mind if you hear "protecting nature and fighting pollution?" Please tell me everything that comes to your mind.

(DO NOT SUGGEST ANYTHING. WRITE AND CODE.)

Q.134/137IRE

Responses of persons interviewed in Ireland as categorized according to the Irish classification scheme

0   DK/NA; Response was not categorized according to the Irish classification scheme

1   Pollution of rivers with slurry

2   Fish kills

3   Unleaded petrol

4   Leave something for future generations

5   Nothing

6   War/disorder

7   Other answer

8   Unspecified industrial pollution

9   Banning bloodsports/coursing

99   Inap., only interviewed in Ireland (not coded 08 for variable 7)

Note:

Only the answers which were difficult to code according to the international coding scheme are also coded according to the national coding scheme. It represents 226 respondents.

Q.134/137PORT

Responses of persons interviewed in Portugal as categorized according to the Portugese classification scheme

0   DK/NA

1   It is necessary to fight for the well being of nature/I believe it is right to protect nature/nature should be respected by all people /we must rescue nature

2   There are many who want to waste nature by destroying woods and rivers/the unbridled exploration of natural resources must be punished

3   Natural parks should not be destroyed/No, to the destruction of the woods/preservation of woods

4   Landscaping and architectonic protection of urban centers/trees should be grown in every possible place

5   Protection of green zones and waterways/don't destroy vegetation/have more green zones/more green spaces

6   World balance of animals and vegetation/ecological system must be protected

7   Destruction of environment is caused by exploitative people

8   Fire in woods/burning in woods

9   Ecologists fight for nature protection/the effort of ecologists to stop the destruction of nature

10   Ecology party isn't a party strong enough to resolve problems

11   Animal extinction

12   It is necessary to have many green places for the survival of humanity

26   Avoid pollution in order not to destroy nature/I support the fight against pollution/it is necessary to preserve natural resources

27   I believe it is right to campaign against pollution

28   In a consumer society it is hard to fight against pollution/big enterprises make so much pollution and anyone cares about that/as long as humans exist, pollution will also exit/pollution tends to grow

29   Certain gases and detritus which are deposited in rivers and seas should be eliminated

30   We are in much more polluted world/world is dying/everything is contaminated

31   Rivers, seas and air are much more contaminated/our country is much more polluted and has much more trash/river water destruction

32   The river next to me has an awful smell/water and sewers are not treated/open sewers

33   Pollution would be avoided if people followed what the Bible says

34   The sickness caused by pollution/the physical and mental health of people and their descendents

35   Cars/cars exhaust

36   Interest to have more cleanliness

37   Pollution is preoccupying

38   Air will become unbreathable

39   A noisy environment is unbearable/the lack of respect of all people who make noise

40   Chemicals will bring about the end of the world

41   More severe laws must be created against those who pollute/people who pollute should be punished

42   In the rivers pollution begin to prove fish

43   Pollution caused by factory smoke and residue

44   Carelessness with pesticides, insecticides and weed-killers, etc.

45 Litter on the beaches/litter on the streets

99 Inap., only interviewed in Portugal (not coded 13 for variable 7)

v148 - Q142 EUROPEAN ELECTION REASON NON VOTING

Q.140/141

Which party did you vote for at the recent European election or were you prevented from going to vote?

Q.142

TO THOSE WHO DID NOT VOTE: ANSWERS X OR Y TO Q.141 (i.e. coded 00 or 97 for Q.140/141)

Which could you say was the main reason that you did not vote?

(SHOW CARD. DO NOT PRESS. ONE ANSWER ONLY)

0   DK/NA

1   Was not eligible to vote. Not on (election) register

2   Personal reason: sickness, holiday, business commitments

3   Lack of interest in politics/elections

4   Lack of interest in European elections, European Parliament, European affairs

5   Hostility to European institutions, or to ties with Europe

6   Not informed enough to vote in the European election

7   There was no party or candidate that I could support

8   Thought the result was a foregone conclusion

9   Didn't realize there was an election

99   Inap., Voted, not coded 00 or 97 for Q.140/141

v190 - Q158 FEEL CLOSE TO EC COUNTRY 2ND CHOICE

Q.156/157

QUESTIONS 156/161 TO BE ASKED ONLY IN GERMANY, FRANCE AND GREAT BRITAIN

Here is a list of the eleven countries other than your own that belong to the European Community (Common Market).

(SHOW CARD 1)

Is there a country on this list that you personally feel closer to than the others, whatever your reasons may be? Which one?

Q.158/159

Is there a second country you feel closer to than the rest? Which one?

(CODE IN COLUMN 158/159)

(PLEASE REMEMBER TO DELETE FROM THE LIST THE NAME OF YOUR OWN COUNTRY BOTH ON QUESTIONNAIRE AND

ON THE HANDOUT CARD LEAVING A BLANK SPACE. DO NOT CHANGE THE COUNTRY CODES. ALSO SEE LETTER OF

INSTRUCTIONS.)

v343 - Q226 LIVING STANDARD OF MOTHER -FORMERLY

Q.224

Taking everything into account, at about what level is your family situated as far as its standard of living is concerned?
(SHOW CARD)

You may answer by giving me a figure between 1 and 7. Number 1 means a poor family and number 7 a rich family. The other

numbers are for positions in between.

Q.226 And on the same card, where would you put your mother's family when she was a girl?

0 DK/NA

1 Poor

2 2

3 3

4 4

5 5

6 6

7 Rich

v445 - Q272A ENERGY SUPPLIES - IMPORTANCE

Q.271/276

Here is a list of problems.

A. I would like you to tell me for each one if you personally consider it very important, important, of little importance or not important at all?

B. And for each one could you tell me whether you would prefer that decisions about it should be taken by the member countries of the European Community acting together or by each country separately?

v478 - Q339_12 EC COMMON POL DATA PROTECTION

Q.339/340

Some people believe that certain areas of policy should be determined by (national) government, while other areas of policy should be determined in common with the European Community.

Which of the following areas of policy do (you) think should be determined by the (national) government and which should be decided in common within the European Community as a whole?

Q.339/340_12 Protection of computer-based information on individuals

1   Should be determined by the (national) government

2   Should be decided within the European Community as a whole

3   Non precise (DK/NA)

v479 - Q341 EC MEMBERSHIP - ALTERNATIVE

Q.341

Some people feel that (your country) has no other realistic alternatives to participating fully in the European Community in order to safeguard its economic prosperity and position in the world. Others think there are realistic alternatives. How do you feel?

(IF CODE 1 OR 0: GO TO Q.343

IF CODE 2: GO TO Q.342)

0   DK/NA

1   No other realistic alternatives

2   There are other alternatives

Note:

Responses to Q.342 are not included in this data set

v483 - Q346 NUCLEAR ENERGY DEVELOPMENT EVALUAT

Q.346

All new development in the industrial field implies efforts, time and money. It may also involve risk. Here are three opinions about the development of nuclear power stations, which use atomic energy for the production of electricity. Which of these three statements comes closest to your own opinion of the development of nuclear power?
(SHOW CARD. ONE ANSWER ONLY)

0   DK/NA

1   It is worthwhile

2   No particular interest

3   The risks involved are unacceptable

v545 - Q367 LEFT-RIGHT SELF PLACEMENT

Q.367

IN ALL COUNTRIES

In political matters, people talk of "the left" and "the right". How would you place your views on this scale?

(SHOW CARD)

(DO NOT PROMPT. THE TEN BOXES OF THE CARD ARE NUMBERED. RING (circle) CHOICE. IF CONTACT HESITATES, ASK HIM TO TRY AGAIN)

v658 - Q436 AGE EXACT

Q.436/437

Can you tell me your date of birth please?

(Write in date of birth AND age.)

0   NA

15   15

97   97

Note:

This variable is respondent's age in years.

Actual number is coded

v659 - Q437 AGE RECEDED / 4 GROUPS

Q.436/437R (R's age - collapsed categories)

1 24 years and younger

2 25 to 39 years

3 40 to 54 years

4 55 years and older

Derivation:

This variable collapses answers to Q.436 into four categories

Note:

See Q.436 for complete question text

v662 - Q440 INCOME HH

Q.440

We would like to analyze the survey results according to the income of persons interviewed.

(SHOW INCOME CARD)

Here is a scale of incomes and we would like to know in what group your family is, counting all wages, salaries, pensions and any

other income that comes in.

Just give me the number of the group your household falls into BEFORE tax and other deductions.

in France (FR):

French francs per month

0   No answer

1   Less than 3,000

2   3,000-3,999

3   4,000-4,999

4   5,000-5,499

5   5,500-5,999

6   6,000-6,999

7   7,000-7,999

8   8,000-8,999

9   9,000-9,999

10   10,000-12,499

11   12,500-15,000

12   15,000 and over

in Belgium (BE):

Belgian francs per month

0   No answer

1   Less than 20,000

v663 - Q440R INCOME HH - QUARTILES

Q.440R (Respondent's family income - approximate quartiles)

1 Poorest (Lowest income "quartile")

2 (Next to lowest income "quartile")

3 (Next to highest income "quartile")

4 Richest (Highest income "quartile")

5 NA (coded 00 for Q.440)

Derivation:

This variable collapses answers to Q.440 into four groups representing approximate quartiles.

Note:

See Q.440 for complete question text

v675 - Q450 TRADE UNION MEMBERSH - WHICH UNION

Q.450

TO THOSE WHO ARE MEMBER OF A TRADE UNION: CODE 1 TO QUESTION 449 (coded 1 for Q.448/449b_1)

Of which union are you a member?

in France (FR):

0   Non precise (DK/NA)

1   C.G.T.

2   C.F.T.C.

3   C.F.D.T.

4   Force Ouvriere

5   FEN

6   C.G.C.

7   Other Union

99   Inap., not a union member (not coded 1 for Q.448/449b(1))

in Belgium (BE):

0   Non precise (DK/NA)

1   CSC (Syndicat Chretien)/ACV (Christelijke Vakbond)

2   FGTB (Syndicat Socialiste)/ABVV (Socialistische Vakbond)

3   CGSLB (Syndicat Liberal)/ACLVB (Liberale Vakbond)

99   Inap., not a union member (not coded 1 for Q.448/449b(1))

in Netherlands (NL):

0   Non precise (DK/NA)

1   FNV

2   CNV

3   NCHP

4   Abva Kabo

5   Other

99   Inap., not a union member (not coded 1 for Q.448/449b(1))

in Germany - West (DE_W):

0   Non precise (DK/NA)

1   IG Bau Steine Erden

2   IG Chemie Papier Keram.

3   Gewerkschaft der Eisenbahner Deutschlands

4   Gewerk. Erziehung und Wissenschaft

5   Gewerk. Handel Banken Versicherungen

6   IG Metal

7   Gewerk. OTV

9   Deutsche Postgewerk.

10   DAG

11   Other

99 Inap., not a union member (not coded 1 for Q.448/449b(1))

in Italy (IT):

0 Non precise (DK/NA)

1 CGIL

v678 - Q454 OCCUPATION LAST JOB HEAD OF HH

Q.454/455

TO THOSE WHOM HEAD OF HOUSEHOLD DOES NOT DO ANY PAID WORK: CODES 13 TO 17, QUESTION 452/453

Did the head of household do any paid work in the past?

(IF YES)

What was his (her) last occupation?

(WRITE IN AND CODE)

SELF EMPLOYED

1   Farmers

2   Fishermen

3   Professional (lawyer, practitioner, accountant, etc...)

4   Owners of shops or companies, craftsmen, proprietors

EMPLOYED

5   Employed professional (employed lawyer, practitioner, accountant, etc...)

6   General management

7   Middle management

8   Other office employees

9   Non-office employees, not manual work (e.g. restaurant service, shop assistants, etc...)

10   Supervisors

11   Skilled manual worker

12   Other manual worker

0   Inap., head of household currently does paid work or current employment status of head of household is not known (coded 0 to 12

in variable 677)

13   Head of household never did any paid work

14   Non precise (DK/NA)

Derivation:

This variable reports the last occupation of household heads who were not doing any paid work at the time of interview. It was

constructed from responses to Q.443/444 and Q.454/455.

v691 - Q473 SIZE OF COMMUNITY

Q.473 (Objective) Size of Locality

in France (FR):

0   (Not specified)

1   Commune rurale (rural commune)

2   2,000-5,000

3   5,000-20,000

4   20,000-100,000

5   More than 100,000 inhabitants

6   Paris (complexe residentiel)

in Belgium (BE):

1   Less than 2,000

2   2,000-5,000

3   5,000-10,000

4   10,000-25,000

5   More than 25,000

6   Grandes agglomerations (Brussels, Antwerp, Liege, Charleroi, Ghent)

in Netherlands (NL):

1   400,000 and over

2   100,000-400,000

3   50,000-100,000

4   20,000-50,000

5   10,000-20,000

6   5,000-10,000

7   Less than 5,000

in Germany - West (DE_W):

1   Less than 2,000

2   2,000-5,000

3   5,000-20,000

4   20,000-50,000

5   50,000-100,000

6   100,000-500,000

7   500,000 and over

in Italy (IT):

1   Less than 2,000

2   2,001-3,000

3   3,001-5,000

4   5,001-10,000

5   10,001-20,000

6   20,001-30,000

7   30,001-50,000

8   50,001-100,000

9   100,001-250,000

10   250,000 and over

in Luxembourg (LU):

1   Less than 2,500

2   2,500-5,000

3   5,000-10,000

4   10,000-20,000

5   20,000-50,000

6   More than 50,000

in Denmark (DK):

3   5,000-10,000

4   10,000-20,000

5   20,000-50,000

6   50,000-100,000

7   100,000 and over

in Ireland (IE):

0   (Not specified)

1   Less than 2,000

2   2,000-19,000

3   20,000-99,000

4   100,000 and over

in Great Britain (GB_GBN):

0   (Not specified)

in Northern Ireland (GB_NIR):

0   (Not specified)

1   Less than 2,000

2   2,000-19,000

3   20,000-99,000

4   100,000 and over

in Greece (GR):

1   1,000,001-5,000,000

2   500,001-1,000,000

3   100,001-500,000

4   50,001-100,000

5   30,001-50,000

6   20,001-30,000

7   10,001-20,000

8   5,001-10,000

9   3,001-5,000

10   2,001-3,000

11   1,001-2,000

12   1-1,000

in Spain (ES):

1   Less than 2,000

2   2,001-5,000

3   5,001-10,000

4   10,001-30,000

5   30,001-50,000

6   50,001-100,000

7   100,001-200,000

8   200,001-500,000

9   More than 500,000 except Madrid and Barcelona

10   Madrid and Barcelona

in Portugal (PT):

1   Less than 100 inhabitants

2   100-200

3   200-500

4   500-1,000

5   1,000-2,000

6   2,000-5,000

7   5,000-10,000

8   10,000-30,000

9   30,000-100,000

10   100,000-500,000

11   More than 500,000

v694 - OPINION LEADERSHIP INDEX (COG MOB I)

Cognitive Mobilization Index (1)

1 Low cognitive mobilization

2 Medium-low cognitive mobilization

3 Medium-high cognitive mobilization

4 High cognitive mobilization

Derivation:

This variable combines responses to Q.129 and Q.130 to form an indicator of an individual's potential to take an active role in the political process.

CODE 1: coded 3, 4 or 0 for Q.129 and 3 or 0 for Q.130
CODE 2: coded 3, 4 or 0 for Q.129 and 2 for Q.130; or coded 1 or 2 for Q.129 and 3 or 0 for Q.130
CODE 3: coded 3, 4 or 0 for Q.129 and 1 for Q.130; or coded 1 or 2 for Q.129 and 2 for Q.130
CODE 4: coded 1 or 2 for Q.129 and 1 for Q.130

For a complete discussion of this variable and its correlates, see Ronald Inglehart, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977), Chapter 11. This variable is labeled the Opinion Leadership Index in the codebooks for Eurobarometers 3, 4, 5 and 6.

v695 - VALUE ORIENTATION (POST-MATERIALISM)

Materialist/Post-materialist values index

1 Materialist

2 Mixed

3 Post-Materialist

4 Missing data

Derivation:

This index is constructed from responses to Q.131 and Q.132.

CODE 1: coded 1 for Q.131 and 3 for Q.132; or coded 3 for Q.131 and 1 for Q.132

CODE 2: coded 1 or 3 for Q.131 and 2 or 4 for Q.132; or coded 2 or 4 for Q.131 and 1 or 3 for Q.132

CODE 3: coded 2 for Q.131 and 4 for Q.132; or coded 4 for Q.131 and 2 for Q.132

CODE 4: coded 0 for either Q.131 or Q.132

For a complete discussion of this variable, see Ronald Inglehart, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977).

v696 - EC SUPPORT INDEX

Support for the European Economic Community Index

1 Strong opposition

2 Moderate opposition

3 Neutral

4 Moderate support

5 Strong support

Derivation:

This index of support for the E.C. was constructed from responses to Q.268 and Q.270.

CODE 1: coded 3 for Q.268 and 3 for Q.270

CODE 2: coded 0 or 2 for Q.268 and 3 for Q.270; or coded 3 for Q.268 and 0 or 2 for Q.270

CODE 3: coded 0 or 2 for Q.268 and 0 or 2 for Q.270; or coded 1 for Q.268 and 3 for Q.270; or coded 3 for Q.268 and 1 for Q.270

CODE 4: coded 0 or 2 for Q.268 and 1 for Q.270; or coded 1 for Q.268 and 0 or 2 for Q.270

CODE 5: coded 1 for Q.268 and 1 for Q.270

v697 - COGNITIVE MOBILIZATION INDEX II

Cognitive Mobilization Index (2)

1 Lowest level of cognitive mobilization

2 Next to lowest level of cognitive mobilization

3 Medium level of cognitive mobilization

4 Next to highest level of cognitive mobilization

5 Highest level of cognitive mobilization

Derivation:

This index of cognitive mobilization was constructed from responses to Q.130, Q.436/437 and the recoded responses to Q.428 contained in variable 655.

CODE 1: coded 0 or 3 for Q.130 and either (i) 1 in V655 or (ii) 4 in V655 and 15 for Q.436/437

CODE 2: coded 0 or 3 for Q.130 and either (i) 2 in V655 or (ii) 4 in V655 and 16 to 19 for Q.436/437; or coded 2 for Q.130 and either (i) 1 in V655 or (ii) 4 in V655 and 15 for Q.436/437

CODE 3: coded 0 or 3 for Q.130 and either (i) 3 in V655 or (ii) 4 in V655 and 20 or more for Q.436/437; or coded 2 for Q.130 and either (i) 2 in V655 or (ii) 4 in V655 and 16 to 19 for Q.436/437; or coded 1 for Q.130 and either (i) 1 in V655 or (ii) 4 in V655 and 15 for Q.436/437

CODE 4: coded 2 for Q.130 and either (i) 3 in V655 or (ii) 4 in V655 and 20 or more for Q.436/437; or coded 1 for Q.130 and either (i) 2 in V655 or (ii) 4 in V655 and 16 to 19 in Q.436/437

CODE 5: coded 1 for Q.130 and either (i) 3 in V655 or (ii) 4 in V655 and 20 or more for Q.436/437

v699 - EUROPEAN POLITICAL PARTY PREFERENCE

European Party Parliamentary Preference Index

1 Socialist - this category comprises the following parties recorded in Q.140/141:

2 P.P.E. (European People's Party) - this category comprises the following parties recorded in Q.140/141:

3 Liberal group - this category comprises the following parties recorded in Q.140/141:

4 Conservatives (DE) - this category comprises the following parties recorded in Q.140/141:

5 The greens - this category comprises the following parties recorded in Q.140/141:

6 G.U.E. - this category comprises the following parties recorded in Q.140/141:

7 R.D.E. (Group of the European Democratic Alliance) - this category comprises the following parties recorded in Q.140/141:

8 Right - this category comprises the following parties recorded in Q.140/141:

9 C.G. - this category comprises the following parties recorded in Q.140/141:

10 Rainbow Group - this category comprises the following parties recorded in Q.140/141:

11 Non-attached - this category comprises the following parties recorded in Q.140/141:

12 Not represented in the E.P. - this category comprises the following parties recorded in Q.140/141:

13 DK/NA (Would not vote, would vote blank, DK, no answer) - coded 00, 95, 96 or 98 in Q.140/141

in France (FR):

1 Parti Socialiste

2 Liste du Centre pour l'Europe

3 Liste de l'Union (RPR-UDF)

5 Liste des Verts

7 Liste de l'Union (RPR-UDF)

8 Liste Europe et Patries (Front National)

9 Liste du Parti Communiste

12 Liste Apolitique pour la Protection des Animaux et de leur Environnement; Liste de l'Alliance; Liste Chasse, Peche, Tradition; Liste pour l'Europe des Travailleurs et de la Democratie (MPPT); Liste Generation Europe; Liste de Lutte Ouvriere; Liste du Mouvement des Renovateurs Communistes (MRC); Other party

in Belgium (BE):

1 SP; PS

2 CVP; P.S.C.

3 PVV; PRL

5 Ecologistes/Agalev

8 Vlaams blok

10 Volksunie

12 FDF/RW; UDRT/RAD; Other party

in Netherlands (NL):

1 Partij van de Arbeid/Europese Socialisten

2 CDA/Europese Volkspartij

3 VVD/Europese Liberaal Democraten; D'66

5 Regenboog (PPR - PSP - CPN - EVP - GPN - Onafhankelijken)

11 SGP, GPV en RPF

12 Socialistiese Partij; God met Ons; Initiatief voor Europese Democratie/IDE; Lijst Janmaat/Centrumdemocraten

in Germany - West (DE_W):

1   SPD

2   CDU/CSU

3   F.D.P.

5   Grune

8   Republikaner

12   ODP; Mundege Burger; Bund Sozialistischer Arbeiter (BSA); Christliche Mitte (CM); DKP; Oko Union; Deutsche Volksunion

(DVU); Fur das Europa der Arbeitnemer/innen und der Democratie; Humanistiche Partei (HP); Neues Bewusstsein. Die ganzheitlich

esoterische Partei Deutschlands

in Italy (IT):

1   PSI (Partito Socialista Italiano); PSDI (Partito Socialista Democratico Italiano)

2   DC (Democrazia Cristiana)

3   PLI/PRI/FED (Liberali, Repubblicani, Federalisti)

5   DP (Democrazia Proletaria); Verdi Europa Lista Verde; Verdi Arcobaleno per l'Europa; Antiproibizionisti Sulla Droga

6   PCI (Partito Comunista Italiano)

10   Lega Lombarda Alleanza Nord; Federalisimo

11   MSI (Movimento Sociale Italiano)

12   Pensionati

in Luxembourg (LU):

1   LSAP/POSL

2   CSV/PCS

3   DP/PD

12   KP/PC; GAP (Greng Alternativ Partei); GLEI (Greng Lescht Ekologesch Initiative); GRAL (Greng Alternativ Allianz); National

Bewegung; RSP (Revolutionar Solzialistesch Partei)

in Denmark (DK):

1   Socialdemocratiet

2   Centrum-Democraterne

6   Socialistisk Folkeparti

10   Folkebevaegelsen MOD EF

12   Radikale; Kristeligt Folkeparti; Fremskridtspartiet; Other party

in Ireland (IE):

1   Labour

2   Fine Gael

3   Progressive Democrats; Independent/ Non-Party

4   Konservative

7   Fianna Fail

9   Workers Party

12   Sinn Fein; Green Party

in Great Britain (GB_GBN):

1   Labour

4   Conservative

5   Green Party

11   Nationalists

12   Social and Liberal Democrats (Democrats); Social Democrats; Other party

in Northern Ireland (GB_NIR):

1   S.D.L.P.; Labour

2   Ulster Unionist Party

4   Conservative

11   Democratic Unionist Party

12   Other Unionist; Alliance Party; Sinn Fein; Workers Party; Other party

in Greece (GR):

1   PA.SO.K

2   New Democracy

6   K.K.E. INT. A-A (Renovated Left)

7   DI.ANA

9   Alliance of the Left and the Progression

12   Epen; Other party

in Spain (ES):

1   Partido Socialista Obrero Espanol (PSOE)

2   Partido Popular(PP)/Partido Aragones Regionalista (PAR)/Union del Pueblo Navarro (UPN)

3   Centro Democratico Y Social (CDS); Convergencia I Unio (CIU)

5   Coalicion Izquierda de los Pueblos (CIP): Euskadiko Ezkerra (EE)/ Esquerda Galega (EG)/Unitat del Poble Valencia (UPV)/Partit Socialista Mallorqui (PSM)/Entesa

6   Izquierda Unida (IU)

10   Coalition Europea de los Pueblos (CEP): Eusko Alkartasuna (EA)/ Esquerra Republicana de Catalunya (ERC)/Partido Nacionalista Galego (PNG)

11   Coalition Nacionalista (CN): Partido Nacionalista Vasco (PNV)/ Coalition Galega/Pancal/Asociacion Independiente Canaria (AIC); Herri Batasuna (HB); Partido Andalucista (PA)

12   Partido de los Trabajadores de Espana - Unidad Comunista (PTE-UC); Federation de Partidos Regionalistas (FPR): Union Valenciana (UV)/ Union Mallorquina (UM)/Partido Regionalista Cantabro (PRC)/Extremadura Unida (EU); Other Party

in Portugal (PT):

1   PS-Partido Socialista

2   CDS-Centro Democratico Social

3   PSD-Partido Social Democrata

9   CDU-Coligacao Democratica Unitaria

12   MDP/CDE-Movimento Democratico Portugues; UDP-Uniao Democratica Popular; PDC-Partido da Democracia Crister; PPM-Partido Popular Monarquico; Other party

Derivation:

This variable is a 13-category recode of respondent's political party preferences as specified in Q.140/141.

Each respondent is coded according to the party (or list) he voted for at European elections and its membership to the European Group at European Parliament. The only exception is the Green Party in Great Britain (not represented in European Parliament.) which is coded 5 (the Greens).

v702 - SOCIO PROFESSIONAL CLASS

Socio-professional class

1   Farmer

2   Professional

3   Owners of shops or companies, craftsmen, Proprietors

4   Employed professional and general management

5   Middle management

6   Office employees

7   Non-office employees

8   Skilled manual worker and supervisor

9   Other manual worker

10   Unemployed (See Coding Algorithm)

11   Other

Derivation:

This variable categorizes the socio-professional class of a household by recoding responses to variables 664, 665, 677 and 678.

Coding Algorithm

1. If codes 01 to 12 in variable 664, then corresponding codes in variable 702.

If code 00 in variable 664, then code 11 in variable702.

If code 17 in variable 664, then code 10 in variable702.

if codes 13 to 16 in variable 664, then follow part 2.

2. If codes 01 to 12 in variable 665, then corresponding codes in variable 702.

If code 14 in variable 665, then code 11 in variable702.

If code 13 in variable 665, then follow part 3.

3. If codes 01 to 12 in variable 677, then corresponding codes in variable 702.

If code 17 in variable 677, then code 10 in variable702.

If code 00 in variable 677, then code 11 in variable702.

If codes 13 to 16 in variable 677, then follow part 4.

4. If codes 01 to 12 in variable 678, then corresponding codes in variable 702.

If code 13 or 14 in variable 678, then code 11 invariable 702.

v703 - EC SUPPORT TYPOLOGY - EUROPEAN ATTITUDES

TYPOLOGY OF EUROPEAN ATTITUDES

1 Positive attitudes

2 Ambivalent attitudes/undecided

3 Negative attitudes

Derivation:

This variable was constructed from responses to Q.267 and Q.268.

CODE 1: coded 1 for Q.268 and either 1 or 2 for Q.267

CODE 2: coded 0 for Q.268; or coded 1 for Q.268 and either 3, 4 or 0 for Q.267; or coded 2 for Q.268; or coded 3 for Q.268 and either 1, 2 or 0 for Q.267

CODE 3: coded 3 for Q.268 and either 3 or 4 for Q.267

v704 - FRONTIER ZONE

FRONTIER ZONE

1   Frontier zone (adjacent to another E.C. country)

2   Non-frontier zone (not adjacent to another E.C. country)

Derivation:

This variable signals adjacency to another E.C. country. Respondents are coded 1 on this variable if they reside in an area that

borders another E.C. country. They are coded 2 if they reside in an area that is not adjacent to another E.C. country. In Belgium, the

Netherlands, Luxembourg, Denmark, the United Kingdom and Greece, REGION (variable 692) is the criterion for determining

adjacency; in France, Germany, Italy, Ireland, Spain and Portugal, PROVINCE (variable 693) is used as the criterion.

v705 - ORIGINAL RESPONDENT ID

Original respondent identification number

This is the original respondent identification number supplied by Faits et Opinions. The first two digits identify the country of interview (01: France; 02: Great Britain; 03: Germany; 04: Italy; 05: Netherlands; 06: Denmark; 07: Belgium; 08: Luxembourg; 09: Ireland; 10: Northern Ireland; 11: Greece; 12: Spain; 13: Portugal). The remaining four digits contain country-specific questionnaire numbers.

Note:

These identification numbers are not necessarily unique. Several duplicate IDs have been detected in the data.

Actual number is coded.
