Standard & Special Eurobarometer surveys are conducted on behalf of the Commission of the European Communities, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

## 1.2 Content

### 1.2.1 Abstract

This round of Eurobarometer surveys investigated life satisfaction, union membership, smoking habits, knowledge and views regarding cancer, views on the importance of Nato and certain national problems, attitudes toward democracy and individual liberties, attitudes toward immigrants and out-groups (i.e., people of another nationality, race, religion, culture, or social class), and knowledge of and attitudes toward European Community institutions and policies, including the Common Agricultural Policy and the creation of a Single European Market in 1992. Respondents also were asked to name current topics and events most important for them and to state whether or not certain causes such as the protection of wildlife and the promotion of world peace were worth taking risks and making sacrifices for. Questions on political party preferences asked respondents which party they felt the closest to, how they voted in their country's last general election, how they would vote if a general election were held tomorrow, and how they planned to vote in the June 1989 elections for the European Parliament. The survey also gauged respondents' perceptions of the general attitude of each country's political parties toward the European Community. The inquiry into out-groups asked respondents to identify groups that came to mind when they thought of people of another nationality, race, religion, culture, or social class. Respondents were asked if they counted any out-group members among their friends and if any of these persons worked at their place of employment or lived in their neighbourhoods. Additional questions asked respondents if they were disturbed by the presence of these out-groups and if they thought that these groups exploited social welfare benefits, increased unemployment, caused delinquency and violence, affected property prices, or reduced the level of education in schools. In West Germany, France, Great Britain, and the Netherlands, respondents were queried about their attitudes and feelings toward specific out-groups: Southern Europeans, North Africans, Turks, Black Africans, Asians, Southeast Asians, West Indians, Jews, Surinamers and Northern Europeans. The section on cancer queried respondents about their knowledge of the causes of cancer and medical recommendations for its early detection and prevention, and asked respondents if they followed or intended to follow those recommendations. Additional information gathered includes family income, home ownership, number of persons and children under 15 residing in the home, size of locality, region of residence, occupation of the head of household, and the respondent's age, sex, occupation, education, religion, religiosity, subjective social class standing, and left-right political self-placement.

## 1.3 Universe

The samples of Eurobarometer 30 are designed to be representative for the national population aged 15 years and over of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland).

## 1.4 Sampling procedure

The sampling designs were either multi-stage national probability samples or national stratified quota samples. In each country a two stage sampling method is used:

### 1) Geographical distribution

The survey covers the whole territory of the twelve countries, i.e. 138 regions. In each country a random selection of sampling points is made in such a way that all types of area (urban, rural, etc.) are represented in proportion of their populations. The interviews are distributed in more or less 1.350 sampling points.

### 2) Choice of respondents

Within these sampling points the individuals to be interviewed are chosen:

a) at random from the population or electoral lists in those countries where access to suitable lists of individuals or households is possible: Denmark, Luxembourg, Netherlands;

b) by quota sampling in Belgium, France, Italy, United Kingdom and Ireland. In these cases the quota are established by sex, age and occupation on the basis of census data.

c) by a 'random route' procedure in Germany, Greece, Spain and Portugal.

The effective number of realized interviews in this round is indicated in table 1.

## 1.5 Fieldwork

The institutes which carried out the surveys in each E.E.C. country are represented by THE EUROPEAN OMNIBUS SURVEYS s.c. (EOS), co-ordination and data integration were realised by FAITS ET OPINION, Paris (Hélène Riffault).

The YOUTH OVERSAMPLES\* in Eurobarometer 17 and 28.1 are weighted separately and across ALL samples as documented in the respective study and weight variable description.

**Eurobarometer 30** contains both weighted and self-weighting (unweighted) national samples. The weighted samples are Denmark, Spain, Germany, France, Netherlands and United Kingdom. The self-weighting samples are Belgium, Italy, Luxembourg, Ireland, Portugal and Greece.

The weighted samples require the application of weights to make them representative of the countries from which they were drawn. The self-weighting samples do not require adjustment by weights for individual country analyses.

Three weight variables are provided in this dataset: Nation Weight I (Variable 6), Nation Weight II (Variable 8) and

### European Weight (Variable 9).

Nation Weight I contains weights that adjust the weighted samples to make them representative of the countries from which they were drawn. These weights are scaled so that the sum of the weights for each country equals the number of respondents who were interviewed there. Nation weight I equals one for all respondents who were interviewed in countries with self-weighting samples. This weight variable should be used whenever countries with weighted samples are to be analyzed separately.

Nation Weight II allows for separate analyses of Great Britain and Northern Ireland. The weights assigned to respondents in Great Britain produce a representative sample for Great Britain alone. No weights need be applied to separately analyze Northern Ireland, since the sample selected there was self-weighting. Thus, this weight variable equals one for all respondents in Northern Ireland. For all other countries outside the United Kingdom, Nation Weight II is identical to Nation Weight I, except for some very slight differences due to rounding.

European Weight contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. This weight variable also incorporates the within-country weighting information contained in Nation Weight I. European Weight may be used to analyze the European Community nations as a whole.

## 1.8 Data preparation

The data received by ICPSR from *Faits et Opinions* were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ICPSR.

To facilitate analyses of the data, ICPS created new variables which consolidate information dispersed over two or more variables in the original *Faits et Opinions* dataset. In all, ten variables containing condensed information were created for this Eurobarometer: nation II, Euro vote June 89, party preference, vote intention, party last vote, income, union membership, obj town size, province and region. Users should be aware that ICPSR's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

ICPSR also added "inappropriate" codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the *Faits et Opinions* questionnaire was adhered to for every respondent.

Users should note that *Faits et Opinions* often represents answers to a question by a series of binary variables (i.e. variables which take on values of one and zero only) without explicitly representing "don't know" or "no answer" responses. Occasionally, other residual responses, such as "none of the above," also are not explicitly represented in the data. Except for recoding with "inappropriate" codes, as described above, ICPSR has not recoded these variables to indicate residual responses. Consequently, users will have to devise their own methods to filter them out.

Users should also note that on occasion the number of responses to a particular question may exceed the maximum indicated in the interviewer instructions.

Question text and contingency text appearing in this codebook and ICPSR's machine-readable documentation is taken from *Faits et Opinions'* English language version of the questionnaire. Coding schemes and other

documentation are based on *Faits et Opinions'* English language version of the questionnaire, *Faits et Opinions'* codebook (in French) and an OSIRIS dictionary provided by Ronald Inglehart. Whenever a discrepancy occurs between *Faits et Opinions'* codebook and its English language questionnaire as to the coding scheme of a variable, the former is followed by ICPSR in its documentation.

Note: ICPSR did not receive documentation for category 5 in the French classification scheme for Q.245/249. ICPSR is continuing its efforts to obtain this missing information. Recoding of *r's* age in years (variable 690): the original Great Britain data for variable 690 incorrectly recorded the last two digits of year of birth, instead of age at time of interview. ICPSR handled this problem by recoding the British data: year of birth was converted to age by assuming that the birthdays of all British respondents preceded their Eurobarometer interviews. ICPSR was unable to reconstruct the ages of persons born before 1915. Consequently, for variable 690, code 73 is defined as "ages 73 and over" for respondents in Great Britain.

Unlike the corresponding ICPSR dataset the ZA version maintains the original number of 11794 cases. In the ICPSR dataset three Irish duplicates (completely identical cases) have been dropped (i.e. it contains only 1009 instead of 1012 Irish cases). In the ZA dataset these Irish duplicates can easily be identified by the sequential respondent id numbers '11792', '11793', and '11794' in variable v4.

## 1.9 Further remarks

The European Election Study 1989 was conducted in three waves as an independently financed survey in the framework of the Eurobarometers. The variables from the Eurobarometers 30, 31 and 31A relevant for European Election analysis were arranged and integrated by the Dutch Steinmetz Archive for the European Election Study Research Group: European Election Study 1989 (ZA2320).

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

## 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .

## version - GESIS ARCHIVE VERSION

## VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

## v5 - NATION I

### NATION OF INTERVIEW

THIS VARIABLE IDENTIFIES THE E.C. NATION IN WHICH THE RESPONDENT WAS INTERVIEWED. A UNIQUE NUMERIC CODE IS ASSIGNED TO EACH OF THE 12 E.C. COUNTRIES.

- 1 FRANCE
- 2 BELGIUM
- 3 NETHERLANDS
- 4 GERMANY
- 5 ITALY
- 6 LUXEMBOURG

9 INAP., CATEGORY NOT USED IN CLASSIFICATION SCHEME

Note:

ANSWERS TO THE OPEN-ENDED QUESTION 123/124 WERE CATEGORIZED DIFFERENTLY IN EACH COUNTRY. IN ALL, THERE ARE 13 COUNTRY SPECIFIC CLASSIFICATION SCHEMES, EACH COMPRISING FROM 12 TO 36 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 36 VARIABLES, Q.123/124(1) THROUGH Q.123/124(36). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHEZIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. FOR EXAMPLE, Q.123/124(6) REPRESENTS CATEGORY NUMBER 6, I.E., "AIDS, HEALTH" FOR FRENCH RESPONDENTS, "ECONOMIC AND FINANCIAL SITUATION IN BELGIUM" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.123/124(13) THROUGH Q.123/124(36) ARE CODED 1, 0 OR 9:

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE CATEGORIES IF A CATEGORY NUMBER (1-36) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE THE SCHEME HAS LESS THAN 36 CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

9 INAP., CATEGORY NOT USED IN CLASSIFICATION SCHEME

Note:

ANSWERS TO THE OPEN-ENDED QUESTION 123/124 WERE CATEGORIZED DIFFERENTLY IN EACH COUNTRY. IN ALL, THERE ARE 13 COUNTRY SPECIFIC CLASSIFICATION SCHEMES, EACH COMPRISING FROM 12 TO 36 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 36 VARIABLES, Q.123/124(1) THROUGH Q.123/124(36). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHEZIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. FOR EXAMPLE, Q.123/124(6) REPRESENTS CATEGORY NUMBER 6, I.E., "AIDS, HEALTH" FOR FRENCH RESPONDENTS, "ECONOMIC AND FINANCIAL SITUATION IN BELGIUM" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.123/124(13) THROUGH Q.123/124(36) ARE CODED 1, 0 OR 9:

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE CATEGORIES IF A CATEGORY NUMBER (1-36) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE THE SCHEME HAS LESS THAN 36 CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

9 INAP., CATEGORY NOT USED IN CLASSIFICATION SCHEME

Note:

ANSWERS TO THE OPEN-ENDED QUESTION 123/124 WERE CATEGORIZED DIFFERENTLY IN EACH COUNTRY. IN ALL, THERE ARE 13 COUNTRY SPECIFIC CLASSIFICATION SCHEMES, EACH COMPRISING FROM 12 TO 36 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 36 VARIABLES, Q.123/124(1) THROUGH Q.123/124(36). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHEZIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. FOR EXAMPLE, Q.123/124(6) REPRESENTS CATEGORY NUMBER 6, I.E., "AIDS, HEALTH" FOR FRENCH RESPONDENTS, "ECONOMIC AND FINANCIAL SITUATION IN BELGIUM" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.123/124(13) THROUGH Q.123/124(36) ARE CODED 1, 0 OR 9:

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE CATEGORIES IF A CATEGORY NUMBER (1-36) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE THE SCHEME HAS LESS THAN 36 CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

Note:

ANSWERS TO THE OPEN-ENDED QUESTION Q.173/174 WERE CLASSIFIED INTO 16 RESPONSE CATEGORIES COMMON TO ALL COUNTRIES, PLUS ADDITIONAL COUNTRY-SPECIFIC RESPONSE CATEGORIES. THE RESPONSE CATEGORIES COMMON TO ALL COUNTRIES ARE DUBBED THE "COMMON CODES" AND ARE ASSIGNED CATEGORY NUMBERS 1 THROUGH 13 AND 22 THROUGH 24. COUNTRY-SPECIFIC RESPONSE CATEGORIES ARE ASSIGNED CATEGORY NUMBERS 14 THROUGH 21. THE CLASSIFICATION SCHEMES FOR BELGIUM, GERMANY, SPAIN, FRANCE, IRELAND AND LUXEMBOURG COMPRISE THE COMMON CODES ONLY. CLASSIFICATION SCHEMES FOR NORTHERN IRELAND, GREAT BRITAIN AND THE REMAINING COUNTRIES ALSO INCLUDE FROM ONE TO SEVEN COUNTRY-SPECIFIC RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 24 VARIABLES, Q.173/174(1) THROUGH Q.173/174(24). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHEZIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. FOR EXAMPLE, Q.173/174(9) REPRESENTS CATEGORY NUMBER 9, I.E., "TURKS."

Q.173/174(1) THROUGH Q.173/174(13) AND Q.173/174(22) THROUGH Q.173/174(24) ARE CODED 1OR 0.

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

Note:

ANSWERS TO THE THE OPEN-ENDED QUESTION 245/249 WERE CATEGORIZED DIFFERENTLY IN GREAT BRITAIN, NORTHERN IRELAND AND IN EACH OF THE OTHER 11 E.C. NATIONS. IN ALL, THERE ARE 13 DIFFERENT CLASSIFICATION SCHEMES FOR THIS QUESTION, EACH COMPRISING FROM 12 TO 48 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 48 VARIABLES, Q.245/249(1) THROUGH Q.245/249(48). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHEZIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. THUS, FOR EXAMPLE, Q.245/249(6) REPRESENTS RESPONSE CATEGORY NUMBER 6, I.E., "INCREASE IN EXCHANGES" FOR FRENCH RESPONDENTS, "FREE COMPETITION, MORE COMPETITION" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.245/249(9) THROUGH Q.245/249(48) ARE CODED 1, 0 OR 9:

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE RESPONSE CATEGORIES. IF A CATEGORY NUMBER (1-48) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE THE SCHEME HAS LESS THAN 48 RESPONSE CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

NOTE: THERE IS AN ADDITIONAL VARIABLE, Q.245/249(R), WHICH SUMMARIZES RESPONSES TO Q.245/249 ON BALANCE AS BEING POSITIVE, NEGATIVE OR NEUTRAL. Q.245/249(R) IMMEDIATELY FOLLOWS Q.245/249(48) IN THE DATA.

9 INAP., CATEGORY NOT USED IN CLASSIFICATION SCHEME

Note:

ANSWERS TO THE THE OPEN-ENDED QUESTION 245/249 WERE CATEGORIZED DIFFERENTLY IN GREAT BRITAIN, NORTHERN IRELAND AND IN EACH OF THE OTHER 11 E.C. NATIONS. IN ALL, THERE ARE 13 DIFFERENT CLASSIFICATION SCHEMES FOR THIS QUESTION, EACH COMPRISING FROM 12 TO 48 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 48 VARIABLES, Q.245/249(1) THROUGH Q.245/249(48). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHEZIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. THUS, FOR EXAMPLE, Q.245/249(6) REPRESENTS RESPONSE CATEGORY NUMBER 6, I.E., "INCREASE IN EXCHANGES" FOR FRENCH RESPONDENTS, "FREE COMPETITION, MORE COMPETITION" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.245/249(9) THROUGH Q.245/249(48) ARE CODED 1, 0 OR 9:

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE RESPONSE CATEGORIES. IF A CATEGORY NUMBER (1-48) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE THE SCHEME HAS LESS THAN 48 RESPONSE CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

NOTE: THERE IS AN ADDITIONAL VARIABLE, Q.245/249(R), WHICH SUMMARIZES RESPONSES TO Q.245/249 ON BALANCE AS BEING POSITIVE, NEGATIVE OR NEUTRAL. Q.245/249(R) IMMEDIATELY FOLLOWS Q.245/249(48) IN THE DATA.

Note:

ANSWERS TO THE THE OPEN-ENDED QUESTION 245/249 WERE CATEGORIZED DIFFERENTLY IN GREAT BRITAIN, NORTHERN IRELAND AND IN EACH OF THE OTHER 11 E.C. NATIONS. IN ALL, THERE ARE 13 DIFFERENT CLASSIFICATION SCHEMES FOR THIS QUESTION, EACH COMPRISING FROM 12 TO 48 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 48 VARIABLES, Q.245/249(1) THROUGH Q.245/249(48). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHEZIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. THUS, FOR EXAMPLE, Q.245/249(6) REPRESENTS RESPONSE CATEGORY NUMBER 6, I.E., "INCREASE IN EXCHANGES" FOR FRENCH RESPONDENTS, "FREE COMPETITION, MORE COMPETITION" FOR BELGIAN RESPONDENTS, AND SO ON.

Note:

ANSWERS TO THE THE OPEN-ENDED QUESTION 268/270 WERE CATEGORIZED DIFFERENTLY IN GREAT BRITAIN, NORTHERN IRELAND AND IN EACH OF THE OTHER 11 E.C. NATIONS. IN ALL, THERE ARE 13 DIFFERENT CLASSIFICATION SCHEMES FOR THIS QUESTION, EACH COMPRISING FROM 12 TO 36 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 36 VARIABLES, Q.268/270(1) THROUGH Q.268/270(36). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHESESIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. THUS, FOR EXAMPLE, Q.268/270(6) REPRESENTS RESPONSE CATEGORY NUMBER 6, I.E., "TURKS" FOR FRENCH RESPONDENTS, "INHABITANTS OF ZAIRE" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.268/270(1) THROUGH Q.268/270(12), Q.268/270(15) THROUGH Q.268/270(36) ARE CODED EITHER 1, 0 OR 9 AND

Q.268/270(13) TROUGH Q.268/270(14) ARE CODED 1 OR 0. :

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE RESPONSE CATEGORIES. IF A CATEGORY NUMBER (1-36) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE IT HAS LESS THAN 36 RESPONSE CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

ANSWERS TO THE THE OPEN-ENDED QUESTION 268/270 WERE CATEGORIZED DIFFERENTLY IN GREAT BRITAIN, NORTHERN IRELAND AND IN EACH OF THE OTHER 11 E.C. NATIONS. IN ALL, THERE ARE 13 DIFFERENT CLASSIFICATION SCHEMES FOR THIS QUESTION, EACH COMPRISING FROM 12 TO 36 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 36 VARIABLES, Q.268/270(1) THROUGH Q.268/270(36). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHESESIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. THUS, FOR EXAMPLE, Q.268/270(6) REPRESENTS RESPONSE CATEGORY NUMBER 6, I.E., "TURKS" FOR FRENCH RESPONDENTS, "INHABITANTS OF ZAIRE" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.268/270(1) THROUGH Q.268/270(12), Q.268/270(15) THROUGH Q.268/270(36) ARE CODED EITHER 1, 0 OR 9 AND

Q.268/270(13) TROUGH Q.268/270(14) ARE CODED 1 OR 0. :

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE RESPONSE CATEGORIES. IF A CATEGORY NUMBER (1-36) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE IT HAS LESS THAN 36 RESPONSE CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

9 INAP., CATEGORY NOT USED IN CLASSIFICATION SCHEME

Note:

ANSWERS TO THE THE OPEN-ENDED QUESTION 268/270 WERE CATEGORIZED DIFFERENTLY IN GREAT BRITAIN, NORTHERN IRELAND AND IN EACH OF THE OTHER 11 E.C. NATIONS. IN ALL, THERE ARE 13 DIFFERENT CLASSIFICATION SCHEMES FOR THIS QUESTION, EACH COMPRISING FROM 12 TO 36 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 36 VARIABLES, Q.268/270(1) THROUGH Q.268/270(36). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHESESIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. THUS, FOR EXAMPLE, Q.268/270(6) REPRESENTS RESPONSE CATEGORY NUMBER 6, I.E., "TURKS" FOR FRENCH RESPONDENTS, "INHABITANTS OF ZAIRE" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.268/270(1) THROUGH Q.268/270(12), Q.268/270(15) THROUGH Q.268/270(36) ARE CODED EITHER 1, 0 OR 9 AND

Q.268/270(13) TROUGH Q.268/270(14) ARE CODED 1 OR 0. :

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE RESPONSE CATEGORIES. IF A CATEGORY NUMBER (1-36) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE IT HAS LESS THAN 36 RESPONSE CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

9 INAP., CATEGORY NOT USED IN CLASSIFICATION SCHEME

Note:

ANSWERS TO THE THE OPEN-ENDED QUESTION 268/270 WERE CATEGORIZED DIFFERENTLY IN GREAT BRITAIN, NORTHERN IRELAND AND IN EACH OF THE OTHER 11 E.C. NATIONS. IN ALL, THERE ARE 13 DIFFERENT CLASSIFICATION SCHEMES FOR THIS QUESTION, EACH COMPRISING FROM 12 TO 36 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 36 VARIABLES, Q.268/270(1) THROUGH Q.268/270(36). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHESESIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. THUS, FOR EXAMPLE, Q.268/270(6) REPRESENTS RESPONSE CATEGORY NUMBER 6, I.E., "TURKS" FOR FRENCH RESPONDENTS, "INHABITANTS OF ZAIRE" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.268/270(1) THROUGH Q.268/270(12), Q.268/270(15) THROUGH Q.268/270(36) ARE CODED EITHER 1, 0 OR 9 AND

Q.268/270(13) TROUGH Q.268/270(14) ARE CODED 1 OR 0. :

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE RESPONSE CATEGORIES. IF A CATEGORY NUMBER (1-36) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE IT HAS LESS THAN 36 RESPONSE CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

9 INAP., CATEGORY NOT USED IN CLASSIFICATION SCHEME

Note:

ANSWERS TO THE THE OPEN-ENDED QUESTION 268/270 WERE CATEGORIZED DIFFERENTLY IN GREAT BRITAIN, NORTHERN IRELAND AND IN EACH OF THE OTHER 11 E.C. NATIONS. IN ALL, THERE ARE 13 DIFFERENT CLASSIFICATION SCHEMES FOR THIS QUESTION, EACH COMPRISING FROM 12 TO 36 RESPONSE CATEGORIES.

RESPONSE CATEGORIES ARE REPRESENTED IN THE DATA BY A SERIES OF 36 VARIABLES, Q.268/270(1) THROUGH Q.268/270(36). THESE VARIABLES ARE DESIGNATED BY THEIR QUESTION NUMBER AND A PARENTHESESIZED SUFFIX WHICH IDENTIFIES EACH RESPONSE CATEGORY BY ITS CATEGORY NUMBER. THUS, FOR EXAMPLE, Q.268/270(6) REPRESENTS RESPONSE CATEGORY NUMBER 6, I.E., "TURKS" FOR FRENCH RESPONDENTS, "INHABITANTS OF ZAIRE" FOR BELGIAN RESPONDENTS, AND SO ON.

Q.268/270(1) THROUGH Q.268/270(12), Q.268/270(15) THROUGH Q.268/270(36) ARE CODED EITHER 1, 0 OR 9 AND

Q.268/270(13) TROUGH Q.268/270(14) ARE CODED 1 OR 0. :

CODE 1: IF A RESPONDENT'S ANSWER WAS CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 1.

CODE 0: IF A RESPONDENT'S ANSWER WAS NOT CLASSIFIED AS A RESPONSE OF THE CATEGORY REPRESENTED BY A GIVEN VARIABLE, THEN THAT VARIABLE IS CODED 0.

CODE 9: THIS CODE FLAGS INAPPLICABLE RESPONSE CATEGORIES. IF A CATEGORY NUMBER (1-36) IS NOT USED WITHIN A GIVEN CLASSIFICATION SCHEME BECAUSE IT HAS LESS THAN 36 RESPONSE CATEGORIES, THEN THE VARIABLE REPRESENTING THE UNUSED CATEGORY IS INAPPLICABLE FOR THE COUNTRY IN QUESTION AND IS CODED 9 FOR ALL RESPONDENTS WHO WERE INTERVIEWED THERE.

THERE IS A LOT OF TALK ABOUT WHAT THE COUNTRIES IN THE EUROPEAN COMMUNITY HAVE IN COMMON AND WHAT DISTINGUISHES THEM FROM ONE ANOTHER.

(SHOW CARD OF OPINIONS AND THE SEVEN POINTS)

SOME SAY (A): IF ONE DAY THE COUNTRIES OF EUROPE WERE REALLY UNITED, THIS WOULD MARK THE END OF OUR NATIONAL HISTORIC, CULTURAL IDENTITY AND OUR OWN NATIONAL ECONOMIC INTERESTS WOULD BE SACRIFICED.

OTHERS SAY(B): THE ONLY WAY OF PROTECTING OUR NATIONAL HISTORIC, CULTURAL IDENTITIES AND OUR NATIONAL ECONOMIC INTERESTS AGAINST A CHALLENGE POSED BY THE GREAT WORLD POWERS IS FOR THE COUNTRIES OF EUROPE TO BECOME TRULY UNITED.

v715 - Q559 RELIGION DENOMINATION

Q.559

DO YOU CONSIDER YOURSELF AS BELONGING TO A PARTICULAR RELIGION.

(IF YES)

WHICH ONE?

(IF CODE 1, 2, 3 OR 4: GO TO Q.560

IF CODE 5, 6, 7, 8 OR 9: GO TO Q.561)

0 DK/NA

1 ROMAN CATHOLIC

2 PROTESTANT; CHURCH OF ENGLAND, IRELAND, SCOTLAND OR WALES; NEDERLANDS HERVORMD (DUTCH REFORMED)

3 ORTHODOX; FREE CHURCH/NON-CONFORMIST; GEREFORMEERD (DUTCH CALVINIST SECT)

4 JEW

5 MUSLIM

6 BUDDHIST

7 HINDU

8 OTHER (SPECIFY)

9 NONE (DOES NOT CONSIDER SELF AS BELONGING TO A PARTICULAR)

Note:

Dubious frequencies and inconsistencies have been detected for the RELIGION DENOMINATION variable (V715) for Belgium and Germany. Category '9' ("none") shows unusual high frequencies for Belgium; probably the categories '9' and '0' (DK/NA) have been merged. For Germany categories '9' and '0' have probably been exchanged; usually about 10% of respondents in Germany do not consider self as belonging to a particular religion. In general, answers to category '9' ("none") have erroneously been pre-defined as "missing value"; users might want to correct this. Correct data are not available (September 14, 2000).
